The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3075) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes, submit the following joint statement to the House and to the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment to the text of the bill struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the committee of conference, and minor drafting and clarifying changes.

AUTHORIZATION OF APPROPRIATIONS

The conference substitute contains authorizations for appropriations for international security assistance and other assistance programs for fiscal year 1979 of $2,817,500,000 which represents a reduction of $32,500,000 in the Senate figure, an increase of $1,818,200,000 in the House figure, and an increase of $28,200,000 in the amount requested by the executive branch. Including the Economic Support Fund, funds for which the House authorized in the International Development and Food Assistance Act of 1978 (H.R. 12222), the total authorization represents a reduction of $36,800,000 from the amounts authorized by the House.

The amounts approved by the committee of conference compared to the amounts requested by the executive branch and recommended by the House and Senate follow:

[In millions of dollars]

| | Executive request | Senate recommendation | House recommendation | Conference agreement |
|---|---|---|---|---|
| Grant military assistance | 133.5 | 133.5 | 163.5 | 133.5 |
| Grant international military education and training | 32.1 | 31.8 | 32.1 | 31.8 |
| Foreign military sales (FMS) credits | 674.3 | 677.8 | 674.3 | 674.3 |
| FMS aggregate ceiling[1] | [1] (2,085.5) | [1] (2,120.2) | [1] (2,085.5) | [1] (2,085.5) |
| Subtotal, military assistance and sales program | 838.9 | 843.1 | 869.9 | 839.6 |
| Peacekeeping operations | [2] 32.4 | | 29.4 | 30.9 |
| Middle East Special Requirements Fund | [2] (5.0) | 6.0 | [3] (2.0) | [4] (3.5) |
| Sinai Support Mission | [2] (11.7) | 11.7 | [3] (11.7) | [3] (11.7) |
| U.N. Forces in Cyprus | [2] (8.7) | 8.7 | [3] (8.7) | [3] (8.7) |
| Spain | [2] (7.0) | 7.0 | [3] (7.0) | [3] (7.0) |
| Subtotal, peacekeeping operations | [2] 32.4 | 32.4 | 29.4 | 30.9 |
| Economic support fund | [2] 1,872.0 | 1,932.0 | [5] 50.0 | 1,902.0 |
| Contingency fund | 5.0 | 2.5 | 10.0 | 5.0 |
| International Narcotics Control | 40.0 | 40.0 | 40.0 | 40.0 |
| Total | 2,789.3 | 2,850.0 | 999.3 [6] (2,854.3) | 2,817.5 |

[1] The FMS aggregate ceiling represents the total program which could be funded under FMS credit authorization. The aggregate ceiling is not an authorization of funds for appropriation.
[2] Requested under the Security Supporting Assistance account.
[3] Included in the general peacekeeping operation assistance authorization, but no line item authorization made.
[4] Earmarked under the Peacekeeping Operations account.
[5] Only $50,000,000 (for Turkey) of the Economic Support Fund was authorized in the House amendment. An additional $1,855,000,000 was authorized in the International Development and Food Assistance Act of 1978 (H.R. 12222).
[6] Total including $1,855,000,000 authorized for an Economic Support Fund in H.R. 12222.

The conference substitute includes an authorization of $133,500,000 in new appropriations for the grant military assistance program in fiscal year 1979. The committee of conference adopted this figure in light of the usual practice of reappropriating unobligated balances in the annual foreign assistance appropriations legislation. New appropriations in the amount authorized by the conference report, together with the reappropriation of unobligated balances, will enable the President to carry out the fiscal year 1979 military assistance program provided for in this bill.

Under grant military assistance, both the Senate and the House provided that not more than the following amounts may be used in fiscal year 1979 for the following countries: Portugal, $27.9 million; Spain, $41 million; Jordan, $45 million. For the Philippines, the Senate authorized $18.1 million while the House authorized $13.1 million; for Greece, the Senate authorized nothing while the House authorized $35 million.

The committee of conference agreed to accept a reduction below the executive branch request of $1 million in grant military assistance for the Philippines because of continued failure by the Philippine Government to show significant progress in improving human rights practices as well as its refusal to lift martial law and restore democratic government.

The $35 million earmarked for grant military assistance for Greece is intended to maintain a proportional balance in total security assistance for Greece and Turkey pending implementation of defense cooperation agreements with both countries. In addition to grant military assistance, Greece will be eligible for FMS credits of $140 million. Turkey will be eligible for FMS credits of $175 million.

The committee of conference adopted the Senate position on authorization of grant military education and training funding and included a reduction of $300.000 below the executive branch request which equals the amount programed for Nicaragua and Paraguay.

The committee of conference adopted the House position on authorization of FMS credits. Therefore, it did not add to $140 million programed for Greece the $35 million provided in the Senate bill. Instead, $35 million is provided to Greece in grant military assistance.

The committee of conference adopted the House FMS ceiling. Adoption of the House authorization, however, is not intended to signify approval of the FMS program for Paraguay, funding for which was eliminated by the aggregate ceiling authorized in the Senate bill.

The committee of conference adopted the Senate position on authorization of funds for the Economic Support Fund with two exceptions: (1) Authorization for Southern African programs was set at $60 million; and (2) authorization for Middle East regional cooperation programs was set at $5 million.

The committee of conference believes that efforts should be made in Turkey to prevent or reduce the damage to persons and property resulting from earthquakes and other natural disasters. The committee of conferences believes the executive branch should encourage the use of a portion of the Economic Support Fund or any other available monies in Turkey for research, analysis, and equipment necessary to prepare for a more effective life and property saving response to such national disasters. Further, we believe such an effort could be of substantial benefit to other countries which suffer frequent, severe natural disasters.

INTERNATIONAL NARCOTICS CONTROL

*Involvement of U.S. personnel in narcotics control enforcement activities abroad*

The Senate bill amended section 481(c)(1) of the Foreign Assistance Act of 1961 to limit activities of U.S. employees abroad with respect to narcotics control efforts, by not allowing them to interrogate or be present during interrogation of any U.S. person arrested in a foreign country without the written consent of such person. It also exempted U.S. Armed Forces personnel carrying out their responsibilities under applicable status of forces arrangements.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

*Use of herbicides*

The Senate bill amended section 481 of the Foreign Assistance Act of 1961 to prohibit the use of foreign assistance funds directly or indirectly for spraying herbicides on marijuana plants if such herbicides are likely to be harmful to health. The Secretary of State was required to inform the Secretary of Health, Education, and Welfare of the use or intended use of any herbicide in a marijuana eradication program receiving foreign assistance funds. In turn, the Secretary of Health, Education, and Welfare was to advise the Secretary of State if the herbicide was likely to be harmful. The Secretary of State was required to report to Congress each January on compliance with these requirements.

The House amendment amended section 482 of the Foreign Assistance Act of 1961 to prohibit the use of fiscal year 1979 international narcotics control funds for the eradication of marihuana through the use of paraquat unless paraquat was used in conjunction with another substance or agent that would warn potential users that paraquat had been used.

The committee of conference adopted the Senate provision with two amendments: (1) to delete the words "directly or indirectly," and (2) to incorporate the essence of the House amendment, with the addition of the following language after the prohibition on herbicide use: this prohibition shall not apply if the herbicide is used in conjunction with another substance that will clearly and readily warn potential users and consumers of the sprayed marijuana that a herbicide has been used on it."

This language closely follows the House amendment. The use of the words "clearly and readily" is intended to emphasize that potential users should be warned of the pres-

ence of a herbicide by an ineradicable means without resorting to laboratory analysis or the use of costly, specialized equipment.

It is not the intent of the committee of conference to jeopardize programs for poppy eradication with this provision.

*Procurement of weapons*

The Senate bill amended section 482 of the Foreign Assistance Act of 1961 to prohibit the use of international narcotics control funds for the procurement of weapons or ammunition.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

HUMAN RIGHTS

*General policy statement*

The House amendment amended section 502B(a)(1) of the Foreign Assistance Act of 1961 to clarify current ambiguous language without changing the thrust of current policy pertaining to U.S. foreign policy and human rights.

The Senate bill did not contain a comparable provision.

The committee of conference adopted the House provision.

*Human rights and security assistance*

The House amendment amended section 502B(a)(2) of the Foreign Assistance Act of 1961 to delete the introductory words "It is further the policy of the United States" and to substitute "except under extraordinary circumstances which necessitate a continuation of security assistance," for "except under circumstances specified in this section" in the prohibition on security assistance to any country the government of which engages in a consistent pattern of gross violations of internationally recognized human rights.

The Senate bill did not contain a comparable provision.

The conference substitute deletes "it is the policy of the United States" but otherwise makes no change in section 502B(a)(2).

In so doing, the committee of conference adhered as much as possible to the language in existing law in order to avoid further complications in this provision. However, the intended effect of this amendment is to substitute for the current policy statement a legal requirement to deny security assistance to any country the government of which engages in a consistent pattern of gross violations of internationally recognized human rights, unless in accordance with the procedures of section 502B(c)(1), (1) the Secretary of State finds that extraordinary circumstances exist which necessitate a continuation of security assistance for such country, and, (2) that on all the facts it is in the national interest of the United States to provide such assistance.

The conference amendment to section 502B is not intended to require the executive branch to publicly identify those countries which it considers to be consistent violators of human rights. Rather it is the intent of the committee of conference to place renewed emphasis on human rights as a major factor that must, as a matter of law, be taken into account in making security assistance decisions.

ASSISTANCE TO POLICE AND OTHER LAW ENFORCEMENT FORCES

*Licensing of exports of crime control equipment*

The Senate bill amended section 4 of the Export Administration Act of 1969, to require that exports of crime control and detection instruments and equipment be approved by the Secretary of Commerce only pursuant to a validated export license. Exports to NATO countries, Japan, Australia, and New Zealand were exempted from this requirement.

The House amendment amended section 38(a) of the Arms Export Control Act to direct the President to include on the U.S. Munitions List crime control and detection instruments and equipment currently regulated by the Commerce Department pursuant to the Export Administration Act.

The committee of conference adopted the Senate provision. Given the sensitive nature of such exports, it is the expectation of the committee of conference that the State Department will participate in a review process with the Secretary of Commerce concerning exports of crime control and detection instruments and equipment. It should be noted that, in accordance with another provision of the conference substitute based on essentially identical provisions of the Senate bill and the House amendment, the issuance of export licenses for crime control and detection instruments and equipment is prohibited to countries which engage in a consistent pattern of gross violations of internationally recognized human rights, unless the President certifies in writing to the Congress that "extraordinary" circumstances exist warranting provision of such assistance.

In imposing a statutory requirement for validated licenses for crime control and detection instruments and equipment, the committee of conference believes it would be appropriate for the Department of Commerce to review the current listing of items classified as crime control and detection instruments and equipment in order to determine whether those classifications need to be revised. Such revision should be conducted with a view toward removing from the category of crime control equipment those items whose subjection to a validated license procedure is unnecessary to carry out the purpose of this legislation. These would include items currently listed as crime control and detection instruments and equipment which are not exported to law enforcement agencies; e.g., sporting shotguns which, by virtue of their special characteristics, are unsuitable for police and military use. Unlike riot shotguns, it is inappropriate to subject sporting shotguns to validated license requirements.

It is not the intention of the committee of conference that the Commerce Department in its revision exempt particular destinations from controls, with the exception of those destinations specifically exempted by the provision.

*Reports on exports to law enforcement agencies*

The House amendment amended section 36(a) of the Arms Export Control Act to require quarterly reports on Government sales and commercial exports of defense articles and services (including crime control equipment) sold for more than $100,000 to or for foreign government forces which perform law enforcement functions.

The Senate bill did not contain a comparable provision.

The committee of conference adopted the Senate position. However, it is expected that the Senate Foreign Relations Committee and the House International Relations Committee will have ready access to data concerning the export licenses issued (1) for the export of crime control and detection equipment and instruments pursuant to the Export Administration Act, and (2) for the export of defense articles or services sold to or for forces performing law enforcement functions pursuant to the Arms Export Control Act.

The committee of conference expects that semiannual reports to Congress already required from the Commerce Department in accordance with section 10 of the Export Administration Act will include full reports on exports of crime control and detection instruments and equipment.

INTERNATIONAL MILITARY ASSISTANCE AND SALES PROGRAM MANAGEMENT

*Justification of continuation of military assistance advisory groups (MAAG's)*

The Senate bill amended section 515(a) of the Foreign Assistance Act of 1961 to express the sense of Congress that continuation of military assistance advisory groups is contingent upon executive branch justification that continuation is essential to U.S. foreign policy or national security interests.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position with the understanding that similar justifications are made annually by the executive branch in the Congressional Presentation Documents.

*Personnel serving on a reimbursable basis*

The Senate bill amended section 515(b)(3) of the Foreign Assistance Act of 1961 to specify that personnel serving on a reimbursable basis must be counted under the annual ceiling for MAAG's.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

*Ceiling on personnel*

The Senate bill amended section 515(d) of the Foreign Assistance Act of 1961 to set a ceiling of 775 military personnel assigned overseas to perform security assistance management functions during fiscal year 1979.

The House amendment amended the same section to set the ceiling at 800.

The committee of conference adopted the Senate provision with amendment to set the ceiling at 790. The committee of conference supports the continued phaseout of military assistance advisory groups and expects the executive branch to thoroughly review the need for such groups in fiscal year 1980.

*Assignment of additional defense attachés*

The House amendment amended section 515(f) of the Foreign Assistance Act of 1961 to allow the President to assign an aggregate worldwide total of up to eight additional defense attachés to perform security assistance management functions in countries to which defense attachés were authorized to be assigned on December 31, 1977.

The Senate bill did not contain a comparable provision.

The committee of conference adopted the House provision.

*Exemption for temporary assignments*

The Senate bill amended section 515(g) of the Foreign Assistance Act of 1961 by adding "for fixed" before "periods of time." Section 515(g) provides exemptions from assignment prohibitions and numerical limitations for personnel performing services for specific purposes and periods of time on a fully reimbursable basis.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

By adding the words "for fixed" the committee of conference intends to make clear that temporary reimbursable groups should not be in existence for extended or indefinite periods of time.

*Promotional activity*

The Senate bill amended section 515 by adding a new subsection that requires the President to continue to instruct U.S. missions abroad that their actions should not encourage, promote, or influence foreign country purchase of U.S. military equipment.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

RHODESIA EMBARGO

The Senate bill prohibited the enforcement of sanctions against Rhodesia before fiscal year 1980 provided the President determines that (1) Rhodesia has committed itself to participate in, and negotiate at, an all-parties conference under international auspices; and (2) a government has been installed chosen by free elections in which all population groups have been allowed to participate freely, with international observation.

The House amendment prohibited the enforcement of sanctions against Rhodesia after calendar year 1978 unless the President determined that a government had not been installed chosen by free elections in which all political groups had been allowed to participate freely.

The committee of conference adopted a compromise version which provides that the United States shall not enforce sanctions against Rhodesia after December 31, 1978, provided that the President determines (1) that the Government of Rhodesia has demonstrated its willingness to negotiate in good faith at an all-parties conference held under international auspices on all relevent issues; and (2) that a government has been installed chosen by free elections in which all political and population groups have been allowed to participate freely, with observation by impartial, internationally recognized observers.

In adopting the compromise version, it is the intent of the committee of conference that—

(*a*) the phrase "has demonstrated its willingness to negotiate in good faith at an all-parties conference" be interpreted to mean that the Rhodesian Government has committed itself to attend and participate in such a conference, if held, and that it is not necessary that the conference convene by December 31, 1978.

(*b*) the Presidential determination is obligatory and shall be made upon fulfillment of the conditions set forth in paragraphs (1) and (2).

(*c*) in making his determination on whether or not free elections were held, the President consider, among other factors, the extent of public participation in the elections. The committee further intends that any disruptions in the election process due to guerrilla activities shall not unduly prejudice an affirmative Presidential determination regarding participation in elections. By the same token, however, the possibility that many people may express their opposition to the internal settlement by voluntarily refraining from voting in the elections shall be taken into account in considering a negative Presidential determination.

(*d*) the phrase "all political and population groups" means that all the people of Rhodesia as well as all organized political groups have been given a fair opportunity to participate fully in the election without regard to their ethnic identity or political affiliation.

(*e*) "all relevant issues" to be considered at an all-parties conference include, among other things, the terms of majority rule, the protection of minority rights, the Anglo-American plan, and the terms of the Salisbury Agreement.

INTERNATIONAL MILITARY EDUCATION AND TRAINING (IMET)

*Nicaragua and Paraguay*

The Senate bill amended section 542 of the Foreign Assistance Act of 1961 to prohibit the use of fiscal year 1979 international military education and training funds for Nicaragua and Paraguay.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position.

The committee of conference agreed (1) to avoid naming specific countries in the statute, and (2) to cut the international military and education and training account by $300,000—the exact amount which had been programmed for both Nicaragua and Paraguay.

The elimination of references to specific countries should not be interpreted as approval of the human rights practices in either Nicaragua or Paraguay. This bill already contains a clear and concise prohibition on grant military training to any country which engages in a consistent pattern of gross violations of internationally recognized human rights.

*Human rights and international military education and training programs*

The Senate bill amended section 543 of the Foreign Assistance Act of 1961 to add to the purposes of training that of increasing the awareness of participants on human rights issues.

The House amendment amended chapter 5 of part II of the Foreign Assistance Act of 1961 to add a new section 554 to require a course on human rights as a prerequisite for completion of all other courses. The provision would have taken effect at the beginning of fiscal year 1980.

The committee of conference adopted the Senate provision.

PEACEKEEPING OPERATIONS

*General authority*

The Senate bill amended part II of the Foreign Assistance Act of 1961 by adding a new section 551 stating that under special circumstances U.N. and other peacekeeping forces can provide a measure of stability and promote the cause of world peace and authorizing assistance for such forces.

The House amendment amended part II of the Foreign Assistance Act of 1961 by adding a new section 551 establishing general authority for assistance for peacekeeping operations and other programs carried out in furtherance of U.S. national security interests.

The committee of conference adopted the House provision. The committee of conference notes that sections 551, 552, and 553 of the Senate bill contained specific authorizations for the same programs authorized generally in section 551 of the House amendment.

*Base rights*

The Senate bill amended the Foreign Assistance Act of 1961 by adding a new section 552(a) which states the sense of Congress that multiyear assistance authorizations should not be used to obtain base rights agreements.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position.

*Spain*

The Senate bill amended the Foreign Assistance Act of 1961 by adding a new section 552(b) which states that money authorized for Spain is to carry out programs of nonmilitary cooperation with the United States in certain fields pursuant to the 1976 treaty with Spain.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position. The committee of conference notes that this authorization for Spain is included in section 551 of the House amendment.

*Middle East Special Requirements Fund*

The Senate bill amended the Foreign Assistance Act of 1961 by adding a new section 553 which (1) authorizes a Middle East Special Requirements Fund, (2) requires a Presidential report on the Fund prior to obligation or expenditure of authorized funds, and (3) provides for a congressional veto by concurrent resolution. Both the Senate and the House provisions establishing the Economic Support Fund repeal part VI of the Foreign Assistance Act which previously contained the Special Requirements Fund.

The House amendment did not contain a comparable provision and hence would repeal the Middle East Special Requirements Fund.

The committee of conference adopted the Senate provision.

*Emergency assistance*

The House amendment added a new section 553 to the Foreign Assistance Act of 1961 which would have authorized the President in emergencies to transfer and consolidate with peacekeeping funds an amount not to exceed 10 percent of economic support funds without regard to the 20-percent limit on transfers into an account which is contained in section 610(a) of the Foreign Assistance Act of 1931.

The Senate bill did not contain a comparable provision.

The committee of conference adopted the Senate position.

*Administrative authorities*

The House amendment added a new section 554 to the Foreign Assistance Act of 1961 which would make peacekeeping operations assistance subject to administrative authorities of part I of the act. The House amendment also made such assistance subject to the human rights policy, restrictions, and reporting requirements of section 502B; and made various conforming changes relating to prohibitions and limitations. The purpose of the provisions was to make the legal authorities and limitations which now apply to security supporting assistance apply to peacekeeping operations.

The Senate bill did not contain comparable provisions.

The committee of conference adopted the House provisions.

KOREA EQUIPMENT TRANSFER

*Transfer in conjunction with troop withdrawal*

The Senate bill amended the Foreign Assistance Act of 1961 by adding a new section 561 to grant the President the authority to transfer defense articles and services to Korea without expressly requiring the transfer to be in conjunction with withdrawals of U.S. Armed Forces.

The House amendment added a provision which granted the President authority to transfer defense articles and services to Korea in conjunction with the withdrawal of the 2d Infantry Division and support forces.

The committee of conference adopted the House provision with an amendment adding the word "only" before "in conjunction with." By adding the word "only," the committee of conference intends that the rate and proportion of the defense articles transferred shall correspond to the rate and proportion of the troop withdrawals and that equipment shall not be transferred to Republic of Korea at a rate faster than the withdrawal of troops.

The committee of conference intends that nothing in the language of subsections (a) and (b) of section 23 of the conference substitute shall be interpreted to mean that Congress either approves or disapproves the policy of withdrawing all U.S. ground forces from Korea. However, the committee of conference intends that the authorization of this equipment transfer in no way diminishes the expression of serious concern about the troop withdrawal contained in subsection (e) of section 23.

*Policy statement on troop withdrawal*

The Senate bill contained a policy statement on troop withdrawal, and a requirement that the President "should" report to Congress on the effect of any proposed withdrawal plan prior to further withdrawal.

The House amendment contained the same policy statement but required a mandatory report.

The committee of conference adopted the House position.

The committee of conference expects that the President will consult fully with Congress in advance of further troop withdrawals from Korea.

*$800 million ceiling*

The House amendment authorized the transfer of U.S. defense articles and defense services to the Republic of Korea but placed a ceiling of $800 million on the value of defense articles that can be transferred to Korea in connection with the withdrawal of U.S. forces. This authority would be terminated on December 31, 1982.

The Senate bill did not contain a comparable provision.

The committee of conference adopted the Senate position.

The committee of conference intends that under no circumstances should the President transfer to the Republic of Korea, pursuant to this authorization, defense articles which cost more than the replacement value minus a standard depreciation of the defense articles now in possession of the 2d Division and support forces. The committee of conference notes that the authorization for the equipment transfer includes a requirement that the annual congressional presentation documents must contain a description and statement of the value of the equipment to be transferred during the period covered by the congressional presentation documents.

*Report on assessments*

The Senate bill amended the Foreign Assistance Act of 1961 to require assessments on the viability of withdrawal in a report 120 days prior to each phase of withdrawal.

The House amendment listed a series of assessments that must be included in an annual report on the equipment transfer to be included in the congressional presentation documents (CPD).

The conference substitute is essentially the same as the Senate provision.

*Placement of equipment transfer authority*

The Senate bill added the Korea transfer authority as a new chapter in part II of the Foreign Assistance Act of 1961.

The House amendment established this authority outside the Foreign Assistance Act of 1961.

The committee of conference adopted the House provision.

TURKEY ARMS EMBARGO

The Senate bill repealed section 620(x) of the Foreign Assistance Act of 1961. It further made policy statements regarding Cyprus, Greece, and Turkey. Finally, it required that any request for economic or military assistance for Greece, Cyprus, or Turkey must include a Presidential certification that the goals specified in the policy statements had been substantially achieved or that such assistance would contribute to their achievement.

The House amendment provided that section 620(x) would be of no further force and effect if the President determined and certified to Congress that resumption of military coperation with Turkey was in U.S. national and NATO interests and that Turkey was acting in good faith to achieve a just and peaceful settlement of the Cyprus problem, the early peaceable return of refugees to their homes and properties, continued removal of Turkish military troops from Cyprus, and the early serious resumption of intercommunal talks aimed at a just negotiated settlement. The House amendment also made policy statements different from those of the Senate bill. Finally, the House amendment required that a Presidential certification accompany any request for security assistance for Greece and Turkey stating that such assistance is intended solely for defensive purposes, including the fulfillment of their NATO responsibilities, and that furnishing security assistance is not inconsistent with the objectives of a peaceful settlement among all concerned parties to the Cyprus problem.

The committee of conference adopted the House provision with an amendment. This action clearly constitutes a de facto repeal of section 620(x) of the Foreign Assistance Act of 1961 although it is the intention of the committee of conference that removal of the prohibitions be contingent upon a Presidential determination and certification to the Congress that resumption of full military cooperation with Turkey is in the national interest of the United States and in the interest of the North Atlantic Treaty Organization and that the Government of Turkey is acting in good faith to achieve a just and peaceful settlement of the Cyprus problem.

The committee of conference recognizes the extreme volatility of the situation in the Eastern Mediterranean. In recognizing the need to maintain close relationships with two key NATO allies, Turkey and Greece, the committee of conference nevertheless regrets the lack of progress toward a Cyprus settlement. In the course of ensuing deliberations over these issues, the Congress will continue to assess and examine how it can best promote political and military stability in the Eastern Mediterranean, reduce tensions between Greece and Turkey, and help promote progress toward a Cyprus settlement while at the same time trying to bolster U.S. relations with all states in the region.

With regard to the fiscal year 1978 authorization of $48 million in grant military assistance to Turkey, it is the understanding of the committee of conference that the executive branch does not intend to obligate those funds for that purpose. It is the intention of the committee of conference that no new grant military assistance program be authorized for Turkey in fiscal year 1978.

ARMS SALES POLICIES

*Arms sales principles*

The Senate bill amended chapter 1 of the Arms Export Control Act by adding 10 arms sales principles which the executive branch would be directed to consider in making arms sales decisions affecting developing countries. The principles are as follows:

(1) Arms sales should be approved only if they clearly and demonstrably enhance United States national security interests and are consistent with United States foreign policy interests. Arms sales should be used only as an exceptional foreign policy implement. In determining the national security impact of an arms sale, account should be taken of the impact of the sale on United States defense readiness; and the sale of advanced weapons should not be approved unless the weapons system is operationally deployed by United States forces.

(2) Arms sales should not substitute for diplomacy in bringing stability to areas experiencing regional strife. No arms sale should be approved for a region if such arms are likely to disrupt ongoing diplomatic efforts to achieve regional stability.

(3) The United States should not be the first supplier to introduce into a region newly developed, advanced weapons systems which would create a new or significantly higher combat capability.

(4) The sale of advanced weapons should not be approved if less advanced existing weapons systems are available which have roughly comparable capabilities. In addition, development of advanced weapons systems solely for export should not be permitted unless such systems can substitute for a more advanced system.

(5) In general, weapons systems should be sold only if they can be utilized effectively by indigenous forces without large and long-term commitments of United States personnel in training, advisory, or maintenance capacities.

(6) If a weapons system being considered for sale includes highly sophisticated technology which could damage United States national security interests when acquired by unfriendly states, the sale should be approved only after special arrangements are made to guard against espionage, theft of equipment, and defection of key personnel. Similiar precautions should be taken for weapons that are especially useful to international terrorists.

(7) Coproduction agreements for significant weapons, equipment, and major components should be approved only if the coproduced items are solely for the coproducer's own security requirements.

(8) The sale of expensive weapons systems or related services should not be approved for less-developed countries if the impact of such sale would cause serious harm to such country's economic development prospects, unless such sales are vital for that country to deter a significant threat of external attack.

(9) The human rights situation in recipient countries should be taken into account in all arms sales decisions.

(10) Arms sales should not be approved simply because other arms suppliers might make the sale, unless it is determined that the sale of United States weapons is necessary for United States national security or foreign policy reasons.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position. The committee of conference strongly urges that the executive branch give consideration to the aforementioned principles in making decisions on potential arms sales. However, it is the understanding of the committee of conference that these principles need not apply in cases where extraordinary circumstances necessitate a Presidential exception or where countries friendly to the United States must depend on advanced weaponry to offset quantitative and other disadvantages in order to maintain a regional balance.

*Arms transfer policies*

The Senate bill added a new section 7 to the Arms Export Control Act containing a policy statement on multilateral conventional arms transfer restraint and requiring a Presidential report by December 31, 1979, which assessed the results of the multilateral approach and commented on its implications for U.S. arms export policy.

The House amendment amended section 1 of the Arms Export Control Act, adding a provision expressing the sense of Congress relating to the implementation of U.S. policy on conventional arms transfers. It stated that (1) U.S. arms sales should be balanced, (2) full regard should be given to U.S. security interests in all regions of the world, and (3) particular attention should be given to the flow of arms to the developing world.

The committee of conference adopted the House provision with two amendments: (1) To add after the word "Congress" the phrase "that the President maintain adherence to a policy of restraint in conventional arms transfers and"; and (2) to add a subsection: (b) Not later than December 31, 1979, the President shall transmit to the Congress a detailed report assessing the results and commenting on the implications of the

multilateral discussions with other arms suppliers.

SALES FROM STOCK

The Senate bill amended section 21(e)(1) of the Arms Export Control Act to require that appropriate charges for inventory losses be included in the price of defense articles sold to foreign governments.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

ANNUAL ARMS SALES PROPOSAL AND SURVEY REPORTS

*Annual arms sales proposal*

The Senate bill amended section 25 of the Arms Export Control Act to revise the requirements in existing law for an annual arms sales estimate and justification to require greater detail in the annual estimate and to focus it more on weapons and weapons related sales. With the amendment, section 25 would require a report early each year containing the President's security assistance and arms transfer plan proposed for the following fiscal year for countries other than NATO, Japan, Australia, and New Zealand. The report would include the following new information: (1) the estimated dollar value of all weapons and weapons related sales intended to be made under sections 21 and 22 of the Arms Export Control Act; (2) an estimate of the amount of all weapons and weapons related credits and guaranties requested for authorization; (3) a detailed country-by-country list setting forth a best estimate of the identity and value of each weapons or weapons related major defense equipment sale, credit, or guaranty to be made to each country; (4) a detailed statement explaining the foreign policy and U.S. national security considerations involved in determining each country's sales credit or guaranty level and weapons or weapons related major defense equipment list and how such sales would promote world peace; and (5) the best estimate of the number of U.S. Armed Forces and civilian personnel required to be stationed in each such country in connection with such sale, credit, or guaranty for training or any other purpose.

In addition, with respect to any sales which exceed the estimated aggregate country total or which involve the sale of any major defense equipment not identified in the estimate, the Senate bill would have required (1) a Presidential determination that the information: (1) The estimated dollar value (2) compliance with the normal congressional review procedures of section 36(b) of the Arms Export Control Act.

The House amendment made no change in section 25 of the Arms Export Control Act.

The committee of conference accepted a compromise provision that amends section 25 of the Arms Export Control Act to require the transmittal to Congress by November 15 sale is in the national security interest; and of each year a document known as the Arms Sales Proposal, setting forth the arms sales proposal of the executive branch which will cover all defense articles and services for $25 million or more and of major defense equipment for $7 million or more which are considered eligible for approval during that fiscal year to countries other than NATO, Japan, Australia, and New Zealand.

The Arms Sales Proposal is expected to be an authoritative projection of all sales the executive branch contemplates as being eligible for approval during the fiscal year.

After the November 15 report, it is expected that notification and that regular consultations will occur with the Senate Foreign Relations and House International Relations Committees on any changes which might be made in the Arms Sales Proposal. It is also expected, however, that the report received on November 15 contain the most accurate and up-to-date information on potential arms sales that is then available to the executive branch.

Reporting to Congress under this provision does not affect nor does it fulfill the notification requirements under section 36(b) of the Arms Export Control Act. This provision also will not alter in any way current procedures which provide for a prenotification of intent to issue a letter of offer 20 days before the formal 30 day notification period under section 36(b) of the Arms Export Control Act.

Given the highly sensitive nature of the assessments that will be made, it is expected that the report will be controlled under appropriate classification procedures.

*Policy statement on defense requirement surveys*

The Senate bill added a new section 26(a) to the Arms Export Control Act containing a policy statement that military surveys in no way represent a U.S. commitment to provide military equipment and that survey recommendations should be consistent with arms export control policy.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

*Survey reports*

The Senate bill provided for a quarterly listing of defense requirement surveys proposed for the following quarter and that the Senate Foreign Relations Committee and the House International Relations Committee be provided with a complete copy of any foreign military surveys upon request.

The House amendment required a quarterly Presidential report on security assistance surveys authorized during the preceding calendar quarter and provided for Senate Foreign Relations Committee and House International Relations Committee access to the results of such surveys.

The committee of conference adopted the House amendment with two amendments: (1) to strike all references to "security assistance surveys" and insert in lieu thereof "defense requirement surveys"; and (2) to strike "the results of." In adopting the latter amendment it is the intent of the committee of conference that upon the request of the chairman of either the Senate Foreign Relations or House International Relations Committee a complete copy of the survey will be provided to such committee.

INFORMATION ON SECTION 36(b) ARMS SALES

The Senate bill amended section 36(b)(1) of the Arms Export Control Act to require the President to provide to the Senate Foreign Relations and House International Relations Committees, on request, additional information in connection with certifications of major proposed arms sales transmitted under section 36(b). The additional information includes an arms control impact evaluation prepared by the Arms Control and Disarmament Agency in consultation with the Departments of State and Defense.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

EXTENDED REVIEW PERIOD

The Senate bill amended section 36(b)(1) of the Arms Export Control Act to permit two-thirds of the members of either the Senate Foreign Relations or the House International Relations Committee to extend for an additional 30 calendar days the period for congressional review and disapproval of proposed arms sales.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position. The executive branch has cooperated with the Congress recently in providing for advance notification of proposed sales, and is urged to continue this practice. Further it is the expectation of the committee of conference that the executive branch will consider acceding to appropriate congressional requests for additional time for congressional review of specific arms sales.

ANNUAL SECURITY ASSISTANCE REPORT

The Senate bill contained a provision that requires an annual report on military assistance and sales and commercial exports of military items.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision. The provision retains a reporting requirement of section 657 of the Foreign Assistance Act of 1961 that will be deleted upon enactment of the International Development and Food Assistance Act of 1978 (H.R. 12222).

UNITED STATES-CHINA MUTUAL DEFENSE TREATY

The Senate bill provided that it is the sense of the Senate that proposed policy changes affecting the Mutual Defense Treaty with China shall be a matter for prior consultation with the Senate.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision with an amendment to change all references to "Senate" to "Congress," with the exception of the reference to "Senate" which will remain in paragraph (a)(4) concerning advice and consent to treaties. The purpose of this change is to make clear that the House of Representatives is to be included in this consultation process.

NONIMMIGRANT VISAS

The Senate bill repealed section 21 of "An act to provide certain basic authority for the Department of State" which states that the Secretary of State should recommend to the Attorney General a waiver permitting the admission to the United States of any prospective visitor who is excludable under the immigration laws only for reason of organizational affiliation.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position. The committee of conference agreed that the continued implementation of procedures under section 212(d)(3) of the Immigration and Nationality Act which provides for the waiver of visa ineligibility because of membership in proscribed organizations shall not be construed as implying that Soviet citizens who visit the United States as labor representatives are actually trade unionists as the term is understood in the United States.

EXPORTS WITH POLITICAL/MILITARY IMPLICATIONS

The Senate bill amended section 4 of the Export Administration Act of 1969 by adding a new subsection which provided that exports regulated by the Commerce Department which could have direct military application may be exported to countries engaged in activities detrimental to important U.S. political/military interests only pursuant to a validated export license. The State Department would have 30 days to review such a license. Exports to NATO countries and Japan, Australia, and New Zealand were exempted.

The House amendment did not contain a comparable provision.

The committee of conference adopted the House position with the understanding that the Senate Subcommittee on International Finance and the House Subcommittee on International Economic Policy and Trade will give serious study to this matter and will review the need for such legislation in connection with their consideration next year of

the extension of the Export Administration Act of 1969.

UNITED STATES-SOVIET RELATIONS

The Senate bill contained a provision that expressed the sense of Congress that the President should review U.S. policy toward the Soviet Union and should report to the Congress.

The House amendment contained a comparable provision which provided it is the sense of the Congress that the President "shall", rather than "should", review U.S. policy toward the Soviet Union and which required a report on the results of the review not later than 90 days after the date of enactment of this Act.

The committee of conference adopted the Senate provision with an amendment to provide that the President should report to the Congress by December 31, 1978, on the results of the review.

USE OF FOREIGN CURRENCIES

The Senate bill amended section 502(b) of the Mutual Security Act of 1954 which authorizes the use of foreign currencies to defray expenses incurred by Members of Congress and eligible staff when on official business abroad. The Senate bill designated the Speaker of the House, the President pro tempore of the Senate, the majority leader of the Senate, the minority leader of the Senate or the chairman of any committee of the House of Representatives or the Senate or of any joint committee of the Congress as those authorized to approve the use of foreign currencies. It also contained a permanent authorization for the Secretary of the Treasury to purchase local currencies whenever local currencies owned by the United States are not otherwise available to defray official congressional travel expenses. The bill contained two reporting requirements: The first retained the annual consolidated reporting requirement of existing law itemizing the amounts and dollar equivalent values of each foreign currency expended and the amount of dollar expenditures from appropriated funds in connection with official foreign travel. Such reports were to be submitted to the Committee on House Administration or to the Secretary of the Senate, to be open to public inspection and to be published in the CONGRESSIONAL RECORD.

The Senate bill also required that each Member, staffperson, or group authorized to travel on official business submit a report to the Clerk of the House of Representatives or to the Secretary of the Senate setting forth the same information required for the annual reports, within 30 days after completion of such travel.

The House amendment, which also amended section 502(b) of the Mutual Security Act, differed from the Senate bill in several respects. First, it would have allowed committee chairmen to authorize travel only for members and staff of their respective committees. Second, it provided annual authority for the Secretary of the Treasury to acquire local currencies needed to defray official travel expenses. Third, it required quarterly consolidated reports itemizing the amount and dollar equivalent value of each foreign currency expended and the amounts of dollar expenditures from appropriated funds in connection with travel outside the United States.

The committee of conference adopted the House amendment with an amendment to provide for permanent authority for the Secretary of the Treasury to acquire currencies needed to defray expenses incurred by Members of Congress and eligible staff when on official business outside the United States out of foreign currencies as available or from a permanent appropriation to the Treasury Department for such purposes. The amendment also provides that the chairman of each committee of the Senate may authorize travel for members of that committee, staff persons of members of that committee and staff of that committee.

The committee of conference recognizes that congressional study missions and other official travel abroad is an essential and fundamental responsibility in a world of increasing interdependency. This amendment will provide the funds to defray official congressional expenses on a rational, manageable, and economic basis. The 30-day and quarterly reporting requirements, providing information subject to public inspection, are designed not only to promote business-like and accountable financing procedures with regard to congressional travel but also to help increase understanding of the need for and purposes of congressional missions abroad.

ISRAEL AND EGYPT

The Senate bill contained a provision that stated congressional findings concerning Israeli-Egyptian negotiations and expressed the sense of Congress that the United States should continue to promote negotiations and encourage other Arab States to enter into negotiations. The Senate bill also stated the sense of Congress that the United States should be responsive to Israel's economic needs and defense requirements including the provision of additional advanced aircraft to maintain Israel's defense capability which is essential to peace.

The House amendment contained no comparable provision regarding negotiations but stated the sense of Congress that the United States should be responsive to the defensive requirements of Israel and sell Israel additional advance aircraft in order to maintain Israel's defense capability which is essential to peace.

The committee of conference adopted the Senate provision.

REPORTS TO CONGRESS

The House amendment (1) amended section 8(d) of "An act to amend the Foreign Military Sales Act," approved January 12, 1971, by changing a quarterly reporting requirement to an annual reporting requirement and (2) repealed several provisions relating to reports which have already been submitted to Congress.

The Senate bill did not contain a comparable provision.

The committee of conference adopted the House provision.

SAVINGS PROVISION

The Senate bill provided that, with specified exceptions, amendments made by the bill shall take effect on October 1, 1978.

The House amendment provided that with specified exceptions, enactment of the amendments made by the bill will not affect fiscal year 1978 authorizations and limitations.

The committee of conference adopted the House provision.

ECONOMIC SUPPORT FUND

The Senate bill amended part II of the Foreign Assistance Act of 1961 by deleting the current chapter 4 (security supporting assistance) and replacing it with a new chapter 4 (Economic Support Fund). The bill—

—states that under special economic, political or security conditions the national interests of the United States may require support for countries or in amounts that could not be justified under the development assistance accounts.

—assigns to the Secretary of State responsibility for policy decisions and program justifications for the Economic Support Fund (ESF), this responsibility to be exercised in cooperation with the Administrator of the Agency for International Development (AID).

—authorizes the appropriation of $1,932 million for the ESF for fiscal year 1979.

—continues existing authority for funds appropriated under this section to remain available until expended.

—stipulates that amounts authorized under the ESF shall be used for economic programs only and may not be used for military or paramilitary purposes.

—provides authority for an ESF program in the Middle East and earmarks not less than the following amounts for the following countries:

| | |
|---|---|
| Israel | $785,000,000 |
| Egypt | 750,000,000 |
| Jordan | 93,000,000 |

—provides that the total amount of the funds earmarked for Israel may be made available as a cash transfer, provided that the President shall insure that the level of cash transfers does not cause an adverse impact on U.S. nonmilitary exports to Israel.

—provides that not less than 67 percent of the assistance to Israel and Egypt shall be provided on a grant basis.

—requests the President to provide at least $65 million of the funds authorized for Egypt for the development and encouragement of private enterprise.

—earmarks $25 million of the funds authorized for the Middle East to be used to fund regional programs which stress development or scientific and technical cooperation between Israel and neighboring Arab countries, or programs which could be used for Arab-Israeli cooperation once normalization of relations occurs.

—provides that before proceeding with further U.S. participation in the potash production facility in Jordan and the Maqarin Dam and Jordan Valley Irrigation System the President shall determine and report to the Congress that Jordan has obtained firm commitments from other sources for the balance of the financing of the projects.

—earmarks $70 million of the funds authorized under this chapter for the countries of southern Africa to address problems caused by the economic dislocation resulting from regional conflict and for education and job training assistance. These funds may be used to provide humanitarian assistance to African refugees and displaced persons, to improve transportation links disrupted or jeopardized by regional conflicts, and to provide economic support to the countries in the region. Of the funds authorized, $10 million is earmarked for humanitarian assistance to the people of Rhodesia and $10 million is earmarked for educational and vocational training programs for Rhodesia.

—prohibits assistance under the southern Africa program to Mozambique, Angola, Tanzania, or Zambia unless the President determines that furnishing such assistance woud further the foreign policy interests of the United States.

—earmarks not less than $50 million of the funds authorized under this chapter for economic assistance to Turkey, and $15 million for refugee relief and reconstruction on Cyprus.

The House amendment did not contain a comparable provision. The House, however, did provide for an Economic Support Fund in the International Development and Food Assistance Act of 1978 (H.R. 12222). While H.R. 12222 was not before the committee of conference, House conferees urged the adoption of the Economic Support Fund pro-

visions of H.R. 12222 to the extent that such provisions were within the scope of the conference.

Many provisions relating to ESF as contained in H.R. 12222 were essentially identical to ESF provisions in S. 3075. In such cases the committee of conference adopted the Senate provision. Those provisions where the House had no comparable provision or a dissimilar position was taken in H.R. 12222 are discussed on the following pages.

The committee of conference adopted the Senate provision for a new chapter 4 in part II of the Foreign Assistance Act, establishing an Economic Support Fund to succeed Security Supporting Assistance. The name change more accurately reflects the actual purpose of these funds: to provide economic support to countries of special importance to United States foreign policy. It is the intent of the committee of conference that insofar as is possible development assistance criteria as set forth in part I of the Act be followed in the development and funding of economic supporting assistance programs.

*Type of assistance authorized under the Economic Support Fund*

The Senate bill amended section 531 of the Foreign Assistance Act of 1961 to add language emphasizing the economic nature of the program.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision with an amendment to add the word "economic" before the word "support" in the Senate provision. In H.R. 12222 the House included the word "economic" to emphasize the type support intended.

*Middle East Program—Earmarkings*

The Senate bill earmarked the following amounts for the following countries in the Middle East:

| | Million |
|---|---|
| Israel | $785 |
| Egypt | 750 |
| Jordan | 93 |

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision with the intent that funds will also be provided for the following Middle East programs and in the following amounts:

| | Million |
|---|---|
| Syria | $90 |
| Maqarin Dam project | 50 |
| Private voluntary organization development projects | 3 |

H.R. 12222 earmarked the above country and program amounts.

*Cash transfer to Israel*

The Senate bill provided that the total amount of funds earmarked for Israel may be available as a cash transfer if the President insures that it does not have an adverse impact on U.S. nonmilitary exports to Israel.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision. H.R. 12222 contained a similar provision but earmarked the cash transfer at not less than $560 million.

*Grant assistance to Israel and Egypt*

The Senate bill provided that 67 percent of the assistance to Israel and Egypt be provided on a grant basis.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision with an amendment providing that two-thirds of the assistance to Israel and Egypt be provided on a grant basis. The amendment is similar to a provision contained in H.R. 12222.

*Private enterprise in Egypt*

The Senate bill requested the President to provide at least $65 million of the $750 million authorized for Egypt to be used for the development and encouragement of private enterprise.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

*Promotion of regional cooperation and development*

The Senate bill earmarked $25 million for regional programs which stress development or scientific and technical cooperation between Israel and neighboring Arab countries.

The House amendment did not contain a comparable provision. H.R. 12222 earmarked $3 million for the promotion of regional cooperation and development.

The committee of conference adopted the Senate provision with an amendment:

(1) That not less than $5 million shall be available only for regional programs which stress development or scientific or technical cooperation.

(2) Substituting the word "nations" for the word "nation" where the Senate provision refers to future normalization of relations to indicate that the reference is to normalization between Israel and its Arab neighbors rather than to its relations with the entire Arab nation.

The committee of conference noted that the executive branch supports the encouragement of activities which might lay the base for programs of regional significance in the Middle East in suport of the peace process and that it currently has underway studies of possible regional projects and cooperation. The committee requests that the executive branch report to the Congress not later than February 1, 1979, on the results of its studies. The committee also requests that the executive branch include in its studies those programs which stress economic development and scientific or technical cooperation.

*Assistance for Southern Africa—Use of funds*

The Senate bill earmarked $70 million for economic programs in Southern Africa, with $20 million of the $70 million to be used as follows: $10 million for humanitarian assistance to the people of Rhodesia and $10 million for the establishment of or support for educational and vocational training programs for Rhodesia.

The House amendment did not contain a comparable provision. H.R. 12222 earmarked $65 million for southern African countries.

The committee of conference agreed to earmark $60 million for Southern Africa, and adopted the House position with regard to Rhodesia with the understanding that $10 million of the funds provided for southern African countries will be used to provide humanitarian assistance to refugees from or in Rhodesia, such assistance to be provided promptly as needed through appropriate international organizations. Education and training assistance under this section may be used for, but is not limited to, such assistance for Africans from Namibia and Zimbabwe.

*Authorization for Cyprus*

The Senate bill earmarked not less than $15 million for refugee relief and reconstruction for Cyprus.

The House amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision.

H.R. 1222 earmarked $15 million for economic support for Cyprus.

## SECURITIES AND EXCHANGE AUTHORIZATION, FISCAL YEARS 1979–81

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 11567) to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979–81 and for other purposes, with Senate amendments thereto, and concur in the Senate amendments with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert:

That section of the Securities Exchange Act of 1934 (15 U.S.C. 78kk) is amended—

(1) by striking out "and" after "September 30, 1977," in the first sentence;

(2) by inserting before the period at the end of the first sentence a comma and the following: "$69,000,000 for the fiscal year ending September 30, 1979, and $79,000,000 for the fiscal year ending September 30, 1980"; and

(3) by striking out "fiscal year 1978" in the last sentence and inserting in lieu thereof "fiscal year 1980".

SEC. 2. Section 3(b) of the Securities Act of 1933 (15 U.S.C. 77c(b)) is amended by striking out "$1,500,000" and inserting in lieu thereof "$2,500,000".

Amend the title so as to read: "An Act to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979 and 1980, and for other purposes.".

The SPEAKER. The Clerk will report the House amendment to the Senate amendments.

The Clerk read the House amendment to the Senate amendments, as follows:

Page 2 of the Senate engrossed amendments, strike out "$2,500,000" on line 3 and insert in lieu thereof "$2,000,000".

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

A motion to reconsider was laid on the table.

## FOREIGN INTELLIGENCE SURVEILLANCE ACT OF 1978

Mr. MURPHY of Illinois. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7308) to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information.

The SPEAKER. The question is on the motion offered by the gentleman from Illinois (Mr. MURPHY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 7308, with Mr. MURTHA (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee rose on Wednesday, September 6, 1978, the Clerk had read through line 25 on page 64.

Are there any further amendments to title I?

AMENDMENT OFFERED BY MR. BUTLER

Mr. BUTLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BUTLER: Page 64, after line 25, add the following new section:

CONSTITUTIONAL POWER OF THE PRESIDENT

SEC. 111. Nothing contained in chapter 119 of Title 18, United States Code, section 605 of the Communications Act of 1934, or this Act shall be deemed to affect the power vested by the Constitution in the President to acquire foreign intelligence information by means of an electronic, mechanical, or other surveillance device.

Mr. BUTLER. Mr. Chairman, H.R. 7308 denies the existence of any inherent authority on the part of the executive to conduct warrantless electronic surveillance by vesting Federal courts with the jurisdiction to authorize—or to refuse to authorize—through a warrant procedure, foreign intelligence gathering activities. The judicial warrant approach in the administration's bill is premised on the proposition that the fourth amendment to the Constitution presumptively requires a warrant for every search.

The underlying reasoning for this assertion is the Supreme Court's holding in the Keith case, where they ruled that a warrant is required for electronic surveillance employed for domestic security purposes. However, the warrant requirement in the Keith case was limited to domestic security cases, as the courts made it clear that they were in no way addressing the issues involved in foreign intelligence electronic surveillance.

Not only is there no existing case authority for vesting the Federal courts with jurisdiction to authorize or refuse to authorize foreign intelligence gathering activities as proposed in H.R. 7308, but the U.S. Supreme Court has explicitly rejected such authority in *Chicago & Southern Air Lines Inc.* v. *Waterman Steamship Corp.*, 333 U.S. 103, 111 (1948) holding:

> . . . It would be intolerable that courts, without the relevant information, should review and perhaps nullify actions of the Executive taken on information properly held secret. Nor can courts sit in camera in order to be taken into executive confidences. But even if courts could require full disclosure, the very nature of executive decisions as to foreign policy is political, not judicial. Such decisions are wholly confided by our Constitution to the political departments of the government, Executive and Legislative. They are delicate, complex, and involve large elements of prophecy. They are and should be undertaken only by those directly responsible to the people whose welfare they advance or imperil. They are decisions of a kind for which the Judiciary has neither aptitude, facilities nor responsibility and which has long been held to belong in the domain of political power not subject to judicial intrusion or inquiry.

Even the most recent espionage case *United States* v. *Humphrey & Troung*, Crim. No. 78–25–A, E. D. Va., May 19, 1978, stated:

> It is not at all certain that a judicial officer, even an extremely well-informed one, would be in a position to evaluate the threat posed by certain actions undertaken on behalf of or in collaboration with a foreign state. . . . The Court is persuaded that an initial warrant requirement (for foreign intelligence electronic surveillance) would frustrate the President's ability to conduct foreign affairs in a manner that best protects the security of our government.

All the Federal judicial circuits which have considered the issue of the inherent constitutional right of the President to authorize warrantless electronic surveillance have held that such power does exist. (Third, fifth, and ninth circuits.)

In accordance with established case law, I believe not only that the President has the power under article II of the Constitution to authorize warrantless electronic surveillance, but that we would be in violation of article II by transferring this executive power to the judiciary under H.R. 7308. I, therefore, urge my colleagues to support the amendment that would continue to recognize the constitutionally inherent power of the Executive to authorize warrantless electronic surveillance in the area of foreign intelligence, a power which has been asserted by every President at least since Franklin D. Roosevelt.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding to me. I want to commend the gentleman on offering this amendment.

I am sure that the gentleman would agree that this amendment complies with article II of the Constitution, which vests in the President responsibility and authority with regard to our national security and our foreign affairs. It would be quite improper on our part to endeavor to undercut or deprive the President of his inherent constitutional power in this legislation. Do I accurately understand the gentleman's position on this point?

Mr. BUTLER. The gentleman is correct. That is a fair statement. We cannot do legislative damage to the Constitution. We have questions and problems which should not exist, and therefore I think we ought to make it perfectly clear with regard to the existence of the President's inherent power in this area.

The CHAIRMAN pro tempore. The time of the gentleman from Virginia (Mr. BUTLER) has expired.

(On request of Mr. McCLORY, and by unanimous consent, Mr. BUTLER was allowed to proceed for 1 additional minute.)

Mr. McCLORY. Mr. Chairman, will the gentleman yield further?

Mr. BUTLER. I yield further to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, would the gentleman not agree that it would be improper, if not unconstitutional, for the Congress to transfer this authority which constitutionally belongs to the President to the judiciary as far as the decisionmaking is concerned?

Mr. BUTLER. The gentleman is correct. I appreciate his contribution.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the immediate result of passage of this amendment would be to make the Congress look foolish and to announce to the country that we have wasted 3 years on this legislation.

The amendment negates the rest of the bill's provisions. It eliminates the standards the other provisions set up to authorize and control electronic surveillance and returns us, once again, to the thrilling days of the pre-Watergate era. Even the McClory substitute affects the so-called inherent power of the President by legislating how foreign intelligence information is collected.

The amendment says to the President—any President—"here's a statute that we have considered carefully for 3 years. It's the first piece of legislation intended to deal with the problems facing our intelligence operations. We hope you like it. If you don't, no sweat, just ignore it."

Make no mistake about it—that is precisely what the amendment says.

This amendment can be read two ways. Either the President has no inherent power to collect foreign intelligence information, or this bill and all its provisions are abrogated entirely.

Presuming the approach of the amendment to be the latter, it eliminates all standards of any kind in the use of electronic surveillance. It throws us right back into the pre-Watergate era.

Voting for this amendment is to ignore the need for legislation to settle the law and collect needed intelligence. It is to

ignore the plight of individual intelligence agents.

Even the McClory bill affects the so-called inherent power of the President by legislating how foreign intelligence information is collected.

This amendment is dilatory. "Death by delay," is what the New York Times called this approach.

Again, voting for this amendment is to ignore the need for legislation to settle the law and to collect needed intelligence. It is to ignore the plight of the individual intelligence agents.

I ask my colleagues to reject this amendment.

Mr. McCLORY. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I recognize that there has been a long period of time that has elapsed since the first hearings were conducted by the Subcommittee on the Judiciary with respect to the whole subject of requiring warrants for conducting electronic surveillance in the field of foreign affairs, but I think that the debates on the floor here yesterday and today indicate that there is a great deal more work that needs to be done and there are many, many issues that need to be carefully considered and extensively debated and ultimately resolved by this Chamber and by the other body. And to suggest that the mere fact that there has been a lapse of time since this subject originally began and that therefore it comes here in some sort of perfect form or with an aura of perfection around it is I think to misconceive what the situation is at the present time.

As I understand this amendment, this amendment is in existing law. It is not only in existing law but earlier Congresses have recognized that they could not restrict themselves from writing this into the existing law because it is in the basic law of our Nation, it is in the fundamental law of our country, it is in the Constitution. And if the President has that inherent power we cannot by any legislation in this bill or any other bill deprive the President of that authority. So that it seems to me that if we omit putting this into the legislation, while we establish purportedly "exclusive" requirements with respect to electronic surveillance, we are ignoring our responsibility to adhere to the Constitution.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Georgia.

Mr. FOWLER. May I ask the distinguished gentleman from Illinois whether or not the gentleman's substitute bill would affect this so-called inherent power of the President by setting standards?

Mr. McCLORY. I would answer that by saying no, it does not. Actually what my substitute bill does in effect is to translate the Executive orders, the Executive authority, into statutory form to confirm in the President the inherent powers which he constitutionally has. So that it really reconfirms what the Constitution says, which I understand and believe it means. So that really the adoption of this amendment is entirely consistent with that concept of what our appropriate role here should be.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I discussed yesterday, with my friend the gentleman from Virginia (Mr. BUTLER) the author of the amendment, this matter. I told him I would think about it very carefully to see if I could find it possible to support it.

The gentleman brings a thoughtful approach to all legislation in our committee, but, however, having thought about it overnight and having read it thoroughly, I am constrained to oppose the gentleman's amendment.

I would like to ask the gentleman this particular question. I think the gentleman's amendment boils down to a value judgment that we must make as to whether or not specifically writing this section into the bill would give a declaration, or would send a signal or would issue notice that Congress suggests that the President has almost plenary power in this area anyway and Congress is just passing a bill for show but, in reality, by adopting this amendment we are maintaining the status quo.

I wonder if the gentleman could advise me: a person who looks at this bill with this language, were it to be adopted, could such a person look at it and say really, Congress is trying to expand the President's power rather than limit it?

Mr. BUTLER. Mr. Chairman, if the gentleman will yield, I appreciate the question very much, because I think the gentleman has put his finger on it. The Constitution of the United States is the preeminent law of the United States and that the Congress must not pass legislation that does not conform with the Constitution.

What we are trying to do here in this legislation—we say the exclusive means by which electronic surveillance is engaged in shall be under this standard. What concerns me is we are saying to the President of the United States: If you want to do what the Constitution tells you to do—and that is that you are the Commander in Chief of the Armed Forces and you have got the responsibility for protecting your country—if you want to exercise your constitutional authority, you do it at your peril.

I think that is a signal this legislation sends, that my amendment would say no, Mr. President, you have got the job, and you have got the responsibility, and if a crisis arises, you do not have to spend all of your time rushing up to the courts or asking the current Attorney General with his current opinion how he feels about it. What you have to do is to recognize that you have this responsibility and the Congress of the United States recognizes you have it.

What about war? If we had a war under this bill the President has to go through all this process.

Mr. MAZZOLI. Mr. Chairman, if I may reclaim my time. I certainly think the gentleman's observations are illustrative of his concerns. The gentleman, by his amendment, does not seek simply to restate the obvious. That is, Congress is not taking any powers from the President and his residual powers remain in his hands.

What the gentleman is basically trying to say, is that powers to surveill would be conferred upon the Chief Executive himself and he can take certain actions in connection with what he determines to be essential needs of foreign intelligence.

Is that a fairly correct analysis of the gentleman's feelings on this matter?

Mr. BUTLER. The gentleman's statement is somewhat correct; but, of course, we have an expression from the Congress here as to the areas in which we want the President to be cautious. Of course, we have had some experience with that area. We have "impeached" a few people who have trespassed on constitutional rights, so we have systematically, over the years—which is the American system—defined just how far the President can go.

However, all of a sudden, we come along with a bill and say that the Constitution does not really mean anything because we are saying that we have a higher authority. That is not right. I do not want our President, who is charged with the responsibility of protecting our country, to have to worry about just exactly what the law says as opposed to what the Judiciary says. That is not what the Constitution wants him to do.

Mr. MAZZOLI. As always, the gentleman from Virginia makes an important point. I share his concern about what happens in the event of an emergency which can, on its own terms, be clearly determined to any thoughtful and any alert person as an emergency.

My problem is, if I read the gentleman's language correctly, that he suggests that certain powers are vested by the Constitution in the President, yet the courts have not spoken to such an extent and with such particularity on the issue of what constitutes an emergency to which the President must respond. Therefore, I am not really aware of the precise situation at this point. If the gentleman is, I would appreciate his instruction.

The CHAIRMAN pro tempore (Mr. MURTHA). The time of the gentleman from Kentucky (Mr. MAZZOLI) has expired.

(By unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. Mr. Chairman, I would ask the gentleman whether he can instruct me as to what are the particular powers or what is the defined area of powers which is retained or held by the Chief Executive. The gentleman from Kentucky only knows of the Keith case, in which the court avoided the question and put off for a later time the question of the existence and extent of the inherent power of the Chief Executive in foreign intelligence matters.

Mr. BUTLER. If the gentleman will yield further, Mr. Chairman, that is a very good question.

Of course, I cannot define that with particularity. I might say to the gentleman one of the reasons I might have a little difficulty in responding to the question is that the Committee on the Judiciary was not allowed an opportunity to go into this bill. The subcommittee denied us this privilege; I am not sure they did it wisely. But to the extent that we have not explored all the details of this matter, I do not think that is important at this moment.

What we are saying now is that the Constitution of the United States charges the President with these responsibilities, and he has to exercise them. He is guided somewhat by experience and precedent, so it is not all case law. It is not all the Keith case. Part is the impeachment case. Part of it is previous circumstances; but whatever it is, all this amendment really says is that the President of the United States has the constitutional responsibility. He still has it, and we cannot take it away from him.

Mr. MAZZOLI. I think the gentleman has said it very clearly. That is the reason I am constrained to oppose the gentleman's amendment. Putting this language in H.R. 7308, I think, would at best muddy up the waters as to where the line of demarcation is between Presidential powers retains and Presidential powers limited.

At worst, I think the language would suggest to any reader of the statute that basically what Congress had in mind is this: "Mr. President, you are pretty much on your own. We are saying a few things is H.R. 7308, basically if you want to do something in foreign intelligence, the law is not going to challenge you."

The CHAIRMAN pro tempore. The time of the gentleman from Kentucky (Mr. MAZZOLI) has again expired.

(On request of Mr. BUTLER and by unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. BUTLER. Mr. Chairman, will the gentleman yield further?

Mr. MAZZOLI. I am happy to yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, I thank the gentleman for yielding.

On this point with respect to exactly where the line is drawn, we had a very learned colloquy yesterday between the gentleman from Wisconsin (Mr. KASTENMEIER) and the gentleman from California (Mr. EDWARDS). Unfortunately, it was not printed in the RECORD this morning, and I have not had a chance to pull it out. Therefore, I am drawing somewhat on my memory.

However, basically what the gentleman from California (Mr. EDWARDS) asked the gentleman from Wisconsin was that he make it perfectly clear that the President of the United States has no authority, under any circumstance, to authorize electronic surveillance. The gentleman from Wisconsin (Mr. KASTENMEIER) said absolutely yes, and then he cited a section on page 67, one which says that this legislation shall be the exclusive means by which electronic surveillance is carried out.

That does not leave a hazy line, does it, because what that says is that the President has no authority. How can we—and I ask the gentleman this question—arrogate to ourselves the authority to say to the President of the United States, this is the exclusive means we have for you to exercise your constitutional responsibility to see that the laws are enforced, to be Commander in Chief of our Armed Forces, and to protect our country. How can we arrogate that?

The CHAIRMAN. The time of the gentleman has expired.

Mr. KASTENMEIER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment. I regret that the colloquy referred to by the gentleman from Virginia did not appear in the RECORD. I trust that it will appear in the later RECORD, and I do not know the explanation for its failure to be there this morning.

This, I think, is a very dangerous amendment. What it tends to do is invite the President to exercise "constitutional powers" outside of this bill, outside of what we, the Congress, are doing. We might as well not do anything at all if we are to concede to this amendment and to grant affirmatively constitutional rights to the President to conduct this type of operation in this country. That is what the 3 years of work is all about.

Let me go back in time, if I may. I do not at this point yield to the gentleman from Illinois because I do want to make my point. The Committee on the Judiciary perhaps 10 years ago or so had a question of whether or not in title II of the Internal Security Act to terminate the authorization for the detention camps in America. Some people thought of these as concentration camps. Overwhelmingly the Congress decided against further authorization of those camps, and President Nixon signed it into law. But before that happened there was a very interesting circumstance. The Assistant Attorney General, Mr. Mardian, wanted a statutory recognition of a constitutional authority for the President to set up these so-called concentration camps, if needed, and thought that we should have a similar amendment in connection with it. But we, the Congress, decided no, that no person in this country would be detained except pursuant to the laws of the United States. Whether or not the situation would ever arise in which the President might round up Americans and put them in detention camps, nonetheless, he could not draw on the statutes we enacted with reference thereto, and so by analogy we ought not here give the Executive a statutory declaration of constitutional authority to conduct national security wiretaps. If he possesses such a power, he must assert it independent of the statute because we have provided the only authorized, the statutory way of dealing with this question. So it ought to remain, Mr. Chairman, and the gentleman's amendment ought to be rejected.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Virginia.

Mr. BUTLER. I thank the gentleman for yielding.

We are handicapped on our side of the aisle because we are so young and inexperienced in the Congress. I have not been here for 10 years, but my recollection, having talked to staff, is that the detention camp legislation was an amendment to existing legislation. But the detention camps existed under statutory authority and not under constitutional authority. I pass that on as a second-hand suggestion.

Mr. KASTENMEIER. I appreciate that, and I would only comment that the question, nonetheless, arose: Does the President have constitutional authority, and should we state a statutory disclaimer in recognition of such authority? We declined to do so, and we ought not, indeed, assert such authority here for the President with regard to these wiretaps.

Mr. McCLORY. Mr. Chairman, will the gentleman yield to me for an observation?

Mr. KASTENMEIER. I yield to the gentleman.

Mr. McCLORY. I thank the gentleman for yielding.

The gentleman suggests that this legislation would provide that the President may not conduct foreign intelligence electronic surveillance. That is a misconception of what this bill is intended to do, as I understand it.

I think that we do not have the right or authority to deprive the Executive of the power to conduct electronic surveillance. Now, what we are doing here is saying that he conducts it, but he has to have another branch, the judicial branch, to pass on this. We are attempting to pass the Executive authority to the judiciary.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. KASTENMEIER) has expired.

(By unanimous consent, Mr. KASTENMEIER was allowed to proceed for 1 additional minute.)

Mr. KASTENMEIER. Mr. Chairman, I appreciate the gentleman's comments. We here give the President authority to conduct foreign intelligence surveillance pursuant to this statute. Now, if, in fact, the President has constitutional authority in some other capacity to conduct wire tapping or surveillance on his own, then he must find it and assert it. We have given him the sole statutory authority in this bill to open that sort of thing.

Mr. McCLORY. Mr. Chairman, if the gentleman will yield further, I think what the legislation demonstrates is that we do not have the authority to deprive the President of his constitutional authority.

Mr. KASTENMEIER. May I say to the gentleman we do not affirmatively assert that the President has no constitutional authority. What we have is a situation in which the extant President has said to us gratuitously that he will not, indeed, assert such power beyond the authority within this bill.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to comment on this amendment and briefly on the entire legislation.

I do think it is deplorable, and I am sure there were reasons adequate to those who exercised them, that this bill did not get a full hearing by the Committee on the Judiciary. If we have been dealing with this for 3 years, we could have found 3 weeks or 3 days or 3 hours for the full Committee on the Judiciary, a committee, on which I am proud to serve and which has a distinguished record for being punctilious in protecting civil rights and the human rights and the constitutional rights of everybody concerned; so I think, No. 1, we are making a serious mistake by not letting the Committee on the Judiciary deal with this bill completely.

No. 2, it is, of course, true that we cannot divest the President of any constitutional authority that the Constitution has given him. It is there and there is nothing this body can do to take it away; but, of course, we can put the President in a position of confrontation with this body if we are requiring him to exercise his judgment that, notwithstanding the strictures of this legislation, he is going to act under his inherent constitutional power. That is something we ought to do with great reluctance.

Third, you know, we are a coequal branch of Government, the President, the Congress, and the courts. This Congress in overreacting to the Watergate scandals insists on conferring on the Judiciary more and more authority to make them the supreme authority in this country in terms of running our school districts, running our jails, running our hospitals, and now they are going to run the intelligence services of this country.

Now, I have great respect for each and every Federal judge. I know how they are appointed and how they are confirmed; but I do not think their wisdom, individually or collectively, is superior to the wisdom of the Executive, with the checks and balances that are inherent in his office and in the press and in this body.

I think we are depriving the President of a necessary flexibility to face situations in terms of the national security of this country, and he may need that flexibility on short notice. He may need to act immediately on the best advice available.

We are not defending Richard Nixon. We are defending an institution, and we have so stripped away its powers and its constitutional authorities—we have attempted to anyway—that I think the vital interests of this country are being damaged.

This amendment is certainly innocuous. All it says is that we read the Constitution, too, and nothing we do here is designed or intended to deprive the President of his constitutional authority. I think it is a statement of sanity. I think it is a statement that recognizes that we know the Constitution has given the President some power that we cannot deprive him of.

I trust the President. I trust every President, and I trust the self-cleansing mechanisms of the executive department, the judiciary, and this Congress to see that the abuses, when they occur, will be swiftly discovered and swiftly punished.

But, Mr. Chairman, I just deplore further encroachments on the powers of Congress and the powers of the Executive by the judiciary, and I especially deplore our helping that process along.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, I thank my colleague, the gentleman from Illinois, for yielding, and I will say that I respect his viewpoint very much.

I would like to say, however, that I note the gentleman refers to busing, the medical profession, and other things in which the Federal courts have intervened.

Mr. HYDE. And we could include school districts and jails.

Mr. MURPHY of Illinois. Yes, including school districts and jails. And I share the gentleman's apprehensions about an overactive judiciary. What we are asking in this particular piece of legislation is this: We are asking that a neutral arbitrator, a Federal judge, be appointed as a protection between U.S. citizens and their fourth amendment rights and a government that in the past has violated those fourth amendment rights.

We are not alone in asking this. We have had two Presidents send up this message and the philosophy underlying this bill: President Ford and now President Carter. I can say to the gentleman that I cannot imagine President Ford or President Carter trading away or exchanging their inherent executive rights to defend this country.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. HYDE) has expired.

(On request of Mr. MURPHY of Illinois, and by unanimous consent, Mr. HYDE was allowed to proceed for 3 additional minutes.)

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield further?

Mr. HYDE. Yes, I will yield, but let me just comment first on what has been said thus far.

President Ford was reacting to a deplorable situation in which he found himself following Watergate. As far as President Carter is concerned, I am really at a loss to understand his action except that he campaigned against the White House and against the "imperial Presidency." I am certainly not defending the "imperial Presidency," but I am defending the institution. I think the President has constitutional duties that we ought not to take away from him.

Mr. MURPHY of Illinois. Mr. Chairman, if the gentleman will yield, we are not taking the President's inherent constitutional powers away from him. We are extending the statutory standard or criteria by which we will judge the Executive Department as a coequal branch, to use the gentleman's own words, and it is a standard under which his actions are judged. We are not taking his powers away.

We are dealing with a domestic scene. Within the borders of the United States, when we are dealing with foreign intelligence wiretapping, we are concerned with American citizens' fourth amendment rights.

When the President deals with foreign countries off the shores of the United States, what he does with national security, as it relates to the Marines, the Army, the Navy, and the Air Force, is his business. This is not affected at all.

All we are saying is that "here is a statutory criteria, and when you go to tap or interfere with the fourth amendment rights of American citizens, you must follow these statutory standards."

Mr. HYDE. Mr. Chairman, if I may reclaim my time, I suggest to the gentleman that nothing we do is going to impinge on the President's constitutional authority, but we do put an obstacle in his way and we do restrain his free and flexible exercise of that authority at a very difficult time when he may not know if the person concerned is a citizen.

How does one determine whether a person is a citizen or not if one needs to make a tap immediately, today or tonight?

Mr. MURPHY of Illinois. Mr. Chairman, if the gentleman will yield, the gentleman knows that he can apply for a 24-hour emergency tap without a warrant. The gentleman was here yesterday, and he knows that.

Mr. HYDE. I understand that, but the gentleman assumes that he can get that emergency tap in 24 hours.

Mr. MURPHY of Illinois. That is not a consideration if he is a foreigner, a representative of a foreign government or foreign embassy.

Mr. HYDE. I am simply saying this amendment is a statement of constitutional fact that we ought not to eliminate from the bill.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I thank the gentlemann for yielding.

The gentleman from Illinois (Mr. HYDE), for whom I have high respect, is a member of our Judiciary Committee, and I wish to ask the gentleman this question:

If it is the gentleman's feeling that there is no way the Congress can impinge or limit or circumscribe the President's constitutional power, then I wonder why we should insert this language at all if we are simply stating again what the gentleman feels is already the essence of the bill.

Mr. HYDE. Mr. Chairman, my answer to that question is that we put ourselves in a position of confrontation with the President, because without this in the law, the President may feel that he is breaking the law that we have passed, even though that part of it is constitutional. I just say that we ought to at least state that we know he is the President and he has some inherent authority.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. HYDE) has again expired.

(On request of Mr. BUTLER, and by unanimous consent, Mr. HYDE was allowed to proceed for 2 additional minutes.)

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, I thank the gentleman for yielding, and I appreciate his contribution very much.

The gentleman is, of course, entirely correct in saying that what we are doing by this legislation, without the amendment I offered is, telling the President of the United States, "You assert your constitutional prerogatives and responsibilities at your peril." And that is wrong.

The real language of this legislation puts it in this context; that is, shall be the exclusive means, and "exclusive" is the key word in this legislation.

I do not think there can be any doubt in the gentleman's mind about what the people who wrote this bill had in mind, and I do not think there could be any doubt in the gentleman's mind, after the colloquy we had yesterday between the gentleman from Wisconsin (Mr. KASTENMEIER) and others, about what the people who wrote the bill and the intelligence community had in mind. What is meant here is that the President of the United States has no constitutional authority, and if he does have any, by God, he has to prove it. That is a heck of a position to put the President of the United States in.

If the gentleman will yield further, I am very much distressed that the impression is being left that this requirement of exclusive legislative authority was in President Ford's bill. There was no such thing at all. President Ford's bill expressly included language substantially in the language which I offer here today, which was a recognition of the President's inherent constitutional authority.

I quote from the Ford bill:

> Nothing contained in this chapter shall limit the constitutional power of the President to order electronic surveillance for the reasons stated in section 2511(3) . . .

I insist that what we are doing here is what was done in the Ford bill, and it is very clearly indicated in these circumstances.

Mr. HYDE. Mr. Chairman, I just do not know what that hearing is going to consist of when you go before the judge and say, "I have a feeling in this case, and will Your Honor give us a warrant." It is a charade and it is designed to sanctify something that is essentially meaningless.

Mr. ASHBROOK. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I have listened to this debate, and go back to what we said yesterday. We continually hear the assertion—and it is an incorrect assertion, I believe—that we are really not trying to go very far and we are really not trying to impinge on the power of the President in this legislation.

The truth of the matter is that what we are trying to do is to change the position of Congress expressed in the 1968 omnibus crime legislation.

Mr. Chairman, we clearly said in the 1968 legislation, in section 2511(3), that we were not going to impinge on the President's inherent power. Now we are trying to go exactly the opposite and saying the President does not have inherent power, he only has what we give him.

The people who drafted the legislation, those who appeared before the committee, those who testified, knew what they were doing.

Let us take what Common Cause said in their letter of August 7 to all of us. It said that H.R. 7308 eliminated once and for all the doctrine that the executive branch has inherent power to conduct national security wiretaps.

That is what the ACLU believes. That is what Common Cause believes. That is what people who will be going into court and litigating believe.

I do not think we should, as we have on page 67, indicate that the President of the United States does not have the authority that is inherent in the Constitution. That is done by using the word "exclusive."

I believe that he has certain inherent powers. We cannot change them. It is like saying tomorrow is Monday, although it is still Friday. It is like 435 Members of Congress voting and saying tomorrow is Monday, although it is still Friday. The President has the inherent power, regardless of what we say. But we do try to muddy the water here and I think that is why the language of my colleague, the gentleman from Virginia, is absolutely essential. It puts us back in the position we were in in 1968. It puts us back in the same position we were in in the Keith case. The President has what powers he has, and the court will uphold those powers. We should not at this point try to countermand those powers.

So the sponsors are not saying we are going to impinge on the President's inherent powers but they are going to try to cut it a little bit. That is the basis of page 67 of this bill.

It may be that Mr. Carter does not want to exercise his powers. There is little counterintelligence now. We are not talking, necessarily, about 1978, 1979, or 1980. We are talking about future Presidents. If Mr. Carter does not want to engage in wiretapping that he has a right in his constitutional power, that is his business. But why should we say at this point that future Presidents will be limited to the narrow action President Carter now wants to take in the vital field of internal security?

I certainly urge the support and the adoption of the amendment offered by the gentleman from Virginia (Mr. BUTLER), and I applaud him for offering the amendment.

Mr. LATTA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, I thank the gentleman from Ohio for yielding.

I just want to clarify one point which the gentleman from Wisconsin, in the course of his references to the proposed legislation, has referred to time after time.

Mr. Chairman, if I could have the attention of the gentleman from Illinois (Mr. MURPHY), perhaps we could solve the problem which my amendment addresses. By inserting on page 67, line 11, the word "statutory," we could make perfectly clear that this legislation is the exclusive statutory means by which electronic surveillance is to be permitted. We will have solved the problem; and my amendment would be unnecessary.

Mr. Chairman, I wonder whether the gentleman from Illinois (Mr. MURPHY), the manager of the bill, would agree to that amendment. If so, we could avoid further discussion of the amendment in question.

Mr. MURPHY of Illinois. If the gentleman will yield, Mr. Chairman, would the gentleman repeat that statement again? I am sorry.

Mr. BUTLER. Yes. The amendment which I would ask the gentleman to consider would obviate the problem to which my amendment is addressed would be on page 67, line 11. At that point I would suggest inserting after the third word, and before the word, "means," one word, "exclusive." At that point I would insert the word "statutory" so that the legislation shall read the "exclusive statutory means."

Mr. MURPHY of Illinois. Mr. Chairman, if the gentleman will withdraw his amendment, we will accept that word "statutory" at that point in the bill.

Mr. BUTLER. Mr. Chairman, I thank the gentleman from Illinois (Mr. MURPHY).

Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The CHAIRMAN pro tempore. The amendment offered by the gentleman from Virginia (Mr. BUTLER) is withdrawn.

Does the gentleman propose another amendment?

Mr. BUTLER. Yes, Mr. Chairman. If I may, I ask unanimous consent that I may offer an amendment not in writing and not published in the RECORD, which would insert the word "statutory" on page 67, line 11.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Virginia?

Mr. MURPHY of Illinois. Reserving the right to object, Mr. Chairman, I would like to hear the amendment first.

Mr. BUTLER. All right.

AMENDMENT OFFERED BY MR. BUTLER

Mr. BUTLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BUTLER: On page 67, line 11, after the word "exclusive" insert the word "statutory".

Mr. MURPHY of Illinois. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. MURPHY of Illinois. Mr. Chairman, we will accept the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Virginia (Mr. BUTLER).

The amendment was agreed to.

PARLIAMENTARY INQUIRY

Mr. BUTLER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state his parliamentary inquiry.

Mr. BUTLER. Mr. Chairman, is my amendment now accepted in the bill?

The CHAIRMAN pro tempore. The Chair will state that the gentleman's amendment is accepted.

Mr. BUTLER. As part of the bill, Mr. Chairman?

The CHAIRMAN pro tempore. As part of the bill.

Mr. BUTLER. I thank the Chair.

AMENDMENT OFFERED BY MR. LATTA

Mr. LATTA. Mr. Chairman, I offer an amendment.

The CHAIRMAN pro tempore. Is the gentleman offering an amendment which appears in the RECORD?

Mr. LATTA. That is correct, Mr. Chairman.

The CHAIRMAN pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. LATTA: Page 40, after line 4, insert the following new subparagraph and redesignate subparagraphs (2) and (3) accordingly:

(2) Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods up to one year—

(A) during a period of war declared by the Congress; or

(B) during a period of national emergency, declared by the President in accordance with the National Emergencies Act, with specific reference to this Act, and upon the transmittal to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate of a statement by the President setting forth the facts and circumstances giving rise to the need for such declaration.

Mr. LATTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. LATTA. Mr. Chairman, I ask unanimous consent to substitute a modified amendment by reason of the fact that the McClory amendment has changed the page number into which this amendment would fit, and we have had to redraft the amendment to provide for a new section.

Mr. Chairman, this matter has been discussed with both sides, both managers of the bill.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN pro tempore. The Clerk will report the amendment, as modified.

The Clerk read as follows:

On page 64, after line 25, add the following new section:

"AUTHORIZATION DURING TIME OF WAR

"Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods up to one year during a period of war declared by the Congress".

Mr. LATTA. Mr. Chairman, I believe my amendment is needed to correct an oversight or an omission in this bill. At the time this matter came before the Committee on Rules, I raised the question of the need for the President to act in times of war without being required to take the time to secure a court order. There certainly would be no desire on the part of the proponents of this legislation to tie the hands of the President during such a period and to possibly put the security of the country in jeopardy. During such a period we ought to give the President of the United States all the discretion he needs to protect the best interests of the country. Therefore, I have proposed this amendment to give him that needed authority. I have discussed this amendment with the managers on both sides of the aisle and I believe they will accept it as a necessary amendment to the bill.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. I thank the gentleman for yielding.

The gentleman from Ohio brought this to our attention when the committee appeared before the Committee on Rules. I think it is a pertinent amendment, and this side of the aisle will accept it.

The CHAIRMAN pro tempore. The question is on the amendment, as modified, offered by the gentleman from Ohio (Mr. LATTA).

The amendment, as modified, was agreed to.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment that has been published in the RECORD.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 63, line 2, insert "(a)" after "Sec. 108.".

Page 63, after line 9, insert the following new subsection:

(b) The Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate shall periodically review the information provided under subsection (a). If either such committee determines that an electronic surveillance of a United States person under this title has produced no foreign intelligence information and that the disclosure of the fact of such surveillance to such United States person would not harm the national security, such committee shall inform such person of the fact of such surveillance and that no foreign intelligence information was derived from such surveillance.

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Ms. HOLTZMAN. Reserving the right to object, Mr. Chairman, will the gentleman from Pennsylvania explain the amendment?

Mr. ERTEL. Yes, I will, Mr. Chairman.

Ms. HOLTZMAN. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ERTEL. Mr. Chairman, prior to discussing the amendment, I ask unanimous consent that one word in the amendment as printed in the RECORD be changed, that is, that the word in the third line of section (b) be changed from "shall" to "may."

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN pro tempore. The Clerk will report the modification.

The Clerk read as follows:

In the third sentence of section (b) of the Ertel amendment following the word "Senate" strike the word "shall" and insert in lieu thereof the word "may".

Mr. ERTEL. Mr. Chairman, this amendment is basically an amendment for oversight by the Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate. It provides that in the event there has been electronic surveillance, whether it be by a wiretap or any other type of electronic surveillance, if the committee of the House or the Senate determines, one, that no foreign intelligence information has been obtained and, two, that there is no threat to the national security, then that committee should inform the target of that investigation that he has been under surveillance. It advises the person what has been done in regard to his particular activities by the intelligence community.

I point out that this is an oversight amendment. It gives the Select Committees on Intelligence a right. They do not have to, but they may disclose to the individual, but only after they make an affirmative determination there is no threat to the national security or, second, that no foreign intelligence information was obtained. The reason for the amendment is to hold over the intelligence agencies the threat that their activities if they are improperly done will be disclosed. There are criminal sanctions within this bill which are to be

used against intelligence agencies if they act in bad faith, but there is no way to know if they act in bad faith unless there is a disclosure.

We cannot provide a disclosure unless we know that there is no threat to the national security, and further, that there is no national security information obtained; so really what it is, is an oversight amendment to make sure that the agencies act properly.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, I appreciate the gentleman bringing this to the committee's attention. I have talked with the gentleman, as have other members of our committee and the chief counsel, and with the change from "shall" on the third line to the word "may", this side will accept the amendment.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I do not know that I have any objection to the amendment; but I would just like to ask this question. How do you determine whether or not information has been obtained; who would make that determination?

Mr. ERTEL. The Select Committee on Intelligence, either of the House or of the Senate, they would make that determination under their oversight. Under the bill it is required that the Select Committee have oversight on a semiannual basis.

Mr. McCLORY. Mr. Chairman, we have no objection to the amendment.

The CHAIRMAN pro tempore. The question is on the amendment, as modified, offered by the gentleman from Pennsylvania (Mr. ERTEL).

The amendment, as modified, was agreed to.

AMENDMENTS OFFERED BY MR. M'CLORY

Mr. McCLORY. Mr. Chairman, I offer two conforming amendments.

The Clerk read as follows:

Amendments offered by Mr. McCLORY: Page 50, strike out line 22 and all that follows down through line 6 on page 51, and redesignate subsections (d) through (g) accordingly.

Page 51, line 9, strike out ", except that" and all that follows down through line 13 and insert in lieu thereof: ".".

Page 51, line 17, strike out ", except that an" and all that follows down through line 23 and insert in lieu thereof: ".".

In section 102(a) (as amended by the amendment offered by Mr. McCLORY), strike out "the Special Court" and insert in lieu thereof "a court".

In section 105(e) (as amended by the amendment offered by Mr. McCLORY), strike out "designated pursuant to" and insert in lieu thereof "having jurisdiction under".

Mr. McCLORY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. MURPHY of Illinois. Mr. Chairman, reserving the right to object, I wish the gentleman would explain the amendments.

Mr. McCLORY. Mr. Chairman, these are amendments which have been discussed by counsel on both sides.

Mr. MURPHY of Illinois. Mr. Chairman, reserving the right to object, I would insist on the amendments being read. Therefore, I object.

The CHAIRMAN pro tempore. Objection is heard.

The Clerk will read.

(The Clerk concluded the reading of the amendments.)

Mr. McCLORY. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. MURPHY of Illinois. Mr. Chairman, reserving the right to object, now that the amendments have been read, we have no objection on this side.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Illinois (Mr. McCLORY).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. M'CLORY

Mr. McCLORY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCLORY: Page 45, line 9, strike out "or" and insert in lieu thereof "and".

Mr. McCLORY. Mr. Chairman, this amendment really does nothing more than to add to the accountability of the Executive with regard to exercise of foreign intelligence electronic surveillance. In the foreign intelligence requirements in H.R. 7308 there is provision that the court application shall include a detailed certification.

It states that the certification should contain statements that the information sought was from intelligence information-gathering agencies, including a justification for the statement, and that the information cannot reasonably be obtained by normal investigative techniques. It states also that the certification should be approved by a senior executive branch official or the Assistant to the President for National Security Affairs.

What this amendment does is to require that the Assistant to the President for National Security Affairs and a senior executive official who is confirmed by the Senate shall make this certification. It merely assures that we can call before our body for purposes of oversight somebody who will be involved in this certification procedure. It affords us a better chance at oversight. It imposes a greater responsibility and puts greater restrictions on the Executive.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, I have talked to the gentleman from Illinois (Mr. McCLORY) with regard to this amendment, and we are willing to accept it on this side.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Illinois (Mr. McCLORY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. M'CLORY

Mr. McCLORY. Mr. Chairman, I offer an amendment that is referred to as "amendment number 11."

The Clerk read as follows:

Amendment offered by Mr. McCLORY: Page 63, line 2, strike out "semiannual" and insert in lieu thereof "quarterly".

Mr. McCLORY. Mr. Chairman, all this amendment does is require that the Attorney General shall report quarterly not semiannually to the House and Senate Intelligence Committees. It seems to me, particularly since we are going to be reporting with regard to electronic surveillance on U.S. persons, that we should have that kind of reporting.

The Attorney General, as I recall, said that this would not be too great a hardship on his part to provide for this quarterly report. It would give us increased oversight and enable the Congress to protect further the rights of persons who are subjected to electronic surveillance.

Mr. Chairman, it seems to me that this amendment is likewise a very desirable amendment, and I urge its adoption.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the committee spent considerable time and thought in deliberations over the congressional oversight provisions. We considered requiring quarterly reporting. The administration opposed it and gave convincing arguments against it.

It was decided that the advantages of more frequent reporting were outweighed by the administrative burdens and security risks involved in the proliferation of the paperwork that would ensue. It was also felt that the content of the report would be more thorough and substantive if it were developed over a 6-month period.

This is the view of the Director of the FBI, the Attorney General, and the heads of the NSA and the CIA.

On those grounds, Mr. Chairman, I reluctantly oppose the gentleman's amendment.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I am happy to yield to the chairman of the committee.

Mr. BOLAND. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, as the distinguished chairman of the subcommittee indicated, the administration opposes this particular amendment because it does impose an administrative burden upon the administration.

But beyond that, it is going to impose an administrative burden upon this committee, and we have sufficient burdens right now. We have a difficult enough time now reading the voluminous reports that come to us and getting all the briefings from the intelligence agencies. I hope we are not impacted with yet another report.

The 6-month report is clearly sufficient to do the job that ought to be done by the administration and by the committee.

Mr. Chairman, I would hope that this particular nitpicking amendment would be rejected by the committee.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Illinois (Mr. McCLORY).

The amendment was rejected.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment, entitled "amendment number 10," which appeared in the RECORD on August 2, 1978.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: Page 63, strike out lines 11 through 18 and insert in lieu thereof the following:

SEC. 109. (a) OFFENSE.—A person is guilty of an offense if he intentionally engaged in electronic surveillance under color of law except as authorized by statute.

Page 63, line 19, strike out "(1)".

Page 63, line 20, strike out "(1)".

Page 63, strike out line 25 and all that follows down through line 4 on page 64.

Mr. ASHBROOK (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. ASHBROOK. Mr. Chairman, this amendment was requested by the Justice Department in a letter to Chairman BOLAND of the House Permanent Select Committee on Intelligence dated April 17, 1978, and signed by John M. Harmon, Assistant Attorney General, Office of Legal Counsel. I have worked with my colleague, the gentleman from Arizona, Mr. RUDD, in developing this amendment.

The statement of the Justice Department on this section is:

The Administration objects to this section, which was added by Subcommittee amendment. The penalty section in the Senate version of this bill makes it a crime to willfully engage in an unauthorized surveillance or to willfully disclose information derived from an unauthorized surveillance. That is acceptable. This section in H.R. 7308, however, would cover unauthorized surveillances and a violation of any other provision of the chapter. Thus, it would be criminal to violate the minimization requirements of this bill.

As the Committee is aware, this is a very complicated legislation and the minimization procedures required by the bill will often be long and involved. We do not believe it is necessary to ensure that the bill's provisions are properly implemented to impose possible criminal violations on all of those employees who will have to deal with such minimization procedures on a daily basis. There are no comparable provisions in connection with Title III. We see no need to treat individual employees in the intelligence community substantially different than their colleagues involved primarily in law enforcement.

In this matter I find myself in agreement with the administration.

Under this section, if an FBI agent intentionally kept one piece of information he was supposed to destroy, or intentionally disseminated one conversation within the FBI to a person who was not supposed to receive it, he could be sent to jail. If an FBI agent intentionally violates the minimization procedures, he should be subject perhaps to disciplinary measures within the Bureau, but it is not a violation sufficient to justify criminal prosecution. Even more important, where he does not intentionally violate the procedures, but in the press of business makes a human mistake, he may fear that a prosecutor is going to be breathing down his neck, expecting the agent to prove that it was not intentional. Such a threat will impede the intelligence collection of this country and runs counter to one of the avowed purposes of the bill—to protect these agents and give them confidence that they will not be prosecuted for acting under the bill.

In addition, if this provision is not deleted, the ACLU will be encouraged to undertake additional civil suits to harass the FBI agents.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from Ohio (Mr. ASHBROOK) and I have discussed this. The chief counsel and other members of the committee have reviewed it, and we will accept the amendment.

Mr. ASHBROOK. I thank my colleague.

Mr. RUDD. Madam Chairman, I move to strike the requisite number of words.

I would like to engage the distinguished gentleman from Illinois in a colloquy, if I may, and perhaps the gentleman from Ohio in a colloquy concerning the Ashbrook amendment which was passed. I have a couple questions that I would like to ask.

In the debate yesterday, I expressed concern about what might happen in the case of a subordinate, a loyal subordinate, the agent on the street, and I am wondering if this amendment will actually protect the person against prosecution while acting under legal guidelines and under authority of the President and the Attorney General in conducting surveillances prior to the time a warrant might be issued. Is that spelled out in this amendment?

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I will yield to anyone who can answer the question.

I yield to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Madam Chairman, the subject of protection of FBI agents and law enforcement personnel is addressed by the Federal Torts Claims Act Amendments pending before the Committee on the Judiciary. That bill would be comprehensive with regard to all Federal agents and would substitute the United States as the party defendant in suits alleging that Federal agents have acted unlawfully.

This legislation would absolve Federal agents of defending against challenges to their activities performed under color of law and would guarantee to plaintiffs that their successful grievances will be fully remedied. This legislation is a matter of high priority with the administration and will, I believe, be considered in the Judiciary Committee next week.

Mr. RUDD. Madam Chairman, I thank the gentleman.

I yield to the gentleman from Ohio.

Mr. ASHBROOK. Madam Chairman, I thank the gentleman for yielding.

As I pointed out in my statement, the reason that John Harmon, Assistant Attorney General of Counsel, addressed a letter to Chairman BOLAND stating, in effect, the administration's opposition to a provision that was in the House bill, but not in the Senate bill, was for the precise purpose that my amendment was offered. As Mr. Harmon said, there was no comparable provision in title III of the Senate bill and he went on to say, and I think this will answer the question:

We see no need to treat individual employees of the intelligence community substantially different than their colleagues involved in law enforcement.

The thrust of my amendment, which was agreed to by both the majority and the minority side, was to delete the House provision, which in the case of minimization procedures would possibly make an FBI agent or a CIA agent guilty or subject to criminal prosecution for violation of a regulation.

Madam Chairman, we all agree that they should be guilty and found guilty if they willfully violate the law. I do not think there is any question about that. I do not think the FBI agents or the CIA agents disagree with that.

But what Mr. Harmon is saying and what my amendment attempted to clarify is that in those situations where we have good faith performances and cumbersome minimization procedures. the agent in the field should not be held criminally liable or stand a chance of facing criminal prosecution if by chance or in some way there is a name he forgot to turn in from his file or he did not comply with some procedure that was laid out in minimization.

My amendment precisely addressed itself to that problem. It did not relieve him of criminal liability in cases where he violated the law. It simply said that as far as minimization procedures and good faith performances are concerned, he has the same rights that other law enforcement officers have, and that counterintelligence officers and intelligence community officers should also have those rights. That is the only thrust of my amendment.

Mr. RUDD. Madam Chairman, I am sure the agent himself or anyone else would want to bo so assured. If he is acting in good faith, he is protected, and I assume this piece of legislation also

does the same thing civilly. That would derive also from the criminal action; is that correct?

Mr. ASHBROOK. Yes. If the gentleman will yield further, if an FBI agent intentionally violates the law, I think all of us agree, of course, that he can be subject to criminal prosecution. But where he might make some human error or unintentionally violate guidelines or procedures that would be handed down—and many times, as we all know, they are nebulous, particularly as they concern the man out in the field—he would not be subject to prosecution.

The CHAIRMAN pro tempore. The time of the gentleman from Arizona (Mr. RUDD) has expired.

(By unanimous consent, Mr. RUDD was allowed to proceed for 2 additional minutes.)

Mr. ASHBROOK. Madam Chairman, if the gentleman will yield further, my point was that the agent could and probably should be subject to discipline within the agency, within the FBI or CIA, for violation of minimization procedures, but he should not have the fear that some prosecutor or some court might be looking over his shoulder and saying, "You are guilty or you may be guilty of a criminal violation, and we are going to prosecute you."

Mr. RUDD. Madam Chairman, I wanted to be assured, of course, that an agent acting in good faith is properly protected, and after all, we want to guarantee to our intelligence agents they may operate without fear of reprisal for doing the job they may be ordered to do in a competent manner.

Mr. ASHBROOK. I do not completely agree with all the provisions of the bill, but the bill does not change the common law provisions, of course, and it protects the agents who are acting in good faith.

Mr. MURPHY of Illinois. Madam Chairman, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Madam Chairman, I agree with the remarks of the gentleman from Ohio (Mr. ASHBROOK). We have entered into a colloquy about this matter on a number of occasions.

There is a good faith defense in common law.

When an FBI agent does his job pursuant to a warrant or a court order and he goes out and he does it in good faith, he has a good faith common law defense. The only time I think they could bring a criminal action is for a conscious, open disregard of the law. The standard would be almost beyond a reasonable doubt. This is the problem we addressed.

I appreciate the gentleman's bringing this point to our attention.

The testimony before our subcommittee and the full committee by the head of the FBI, Mr. Webster, and the Attorney General was that we are having a hard time getting agents to execute orders today for conducting surveillance of foreign spies in this country, and there is a wealth of intelligence material that is undetected. That was not the fact in the past, because in the old days under Director Hoover orders were given to conduct surveillance, and the job was done.

The CHAIRMAN pro tempore. The time of the gentleman from Arizona (Mr. RUDD) has again expired.

(By unanimous consent, Mr. RUDD was allowed to proceed for 2 additional minutes.)

Mr. MURPHY of Illinois. Madam Chairman, if the gentleman will yield further, under Director Hoover, the agents were sent out into the field to conduct surveillance, and there was no memorandum or there were no written orders given. Mr. Hoover is now dead, and these agents stand naked in the "hall of justice" trying to defend themselves against criminal charges brought against them for their behavior.

What this bill does is to try to protect those agents, and I think it does it well.

Madam Chairman, I thank the gentleman for yielding.

Mr. RUDD. Madam Chairman, I thank the gentleman from Illinois (Mr. MURPHY) for clarifying this issue, and I am sure this legislation does protect the employees.

I hope the mention of Mr. Hoover's name will not be taken as disparaging or that anyone thinks we are disparaging in any way the name of this great American. Mr. Hoover was a great American, and he did a fine job for our country.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The amendment was agreed to

AMENDMENT OFFERED BY MR. BUTLER

Mr. BUTLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BUTLER: Page 31, line 11, strike out "and controlled".

Mr. BUTLER. Mr. Chairman, section 101(a) provides six definitions of the term "foreign power."

The sixth definition defines "foreign power" as an entity that is directed and controlled by a foreign government or governments.

This amendment would simply strike the words "and controlled," so that it would be sufficient if an entity is directed by a foreign government rather than directed and controlled. If an entity is directed by a foreign government, this should be more than adequate to allow our intelligence agents to target such entity for electronic surveillance to gather foreign intelligence information.

To burden the Government with the additional requirement that a showing also be made to the court that the entity is also controlled by a foreign government is entirely inappropriate, and the amendment would strike the words "and controlled."

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Georgia.

Mr. FOWLER. I thank the gentleman for yielding, and I have just one question of clarification that I would like to ask of the gentleman from Virginia.

How would this affect a foreign airline? Would the gentleman have an opinion as to whether or not a government airline would be directed and controlled, or simply directed and not controlled?

Mr. BUTLER. I would assume, under those circumstances, that an airline is both directed and controlled.

Mr. FOWLER. If it were a government-owned airline?

Mr. BUTLER. Right.

Mr. FOWLER. I thank the gentleman.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, any domestic group which would receive some direction from a foreign government could be targeted under this amendment. A law firm or public relations firm representing a foreign government falls into this category. Former CIA Director William Colby's firm is one such law firm. The majority of the American banking institutions and Madison Avenue firms also would be covered. They all receive some direction from foreign governments. I might say to my colleagues that the subcommittee, under the able leadership of the gentleman from North Carolina (Mr. ROSE), is considering starting hearings on terrorist groups, and this committee will in the future deal with domestic terrorist groups that I think the gentleman from Virginia is directing his amendment at. I might say that we recently in Chicago had a terrorist group take over the embassy or the German legation in Chicago. The gentleman from North Carolina (Mr. ROSE) is bringing down those officials who were involved in the peaceful settlement of those terrorists occupying the German legation office, and we are presently taking testimony on this. I would ask the gentleman to defer this amendment so that when this committee comes out with legislation—and I can assure the gentleman that as chairman of the subcommittee I will be working closely with the gentleman from North Carolina (Mr. ROSE)—in the not-too-distant future we will begin to discuss thoroughly this question. I feel it would be better not to deal with it today under this amendment.

Mr. BUTLER. Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

AMENDMENT OFFERED BY MR. BUTLER

Mr. BUTLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BUTLER: Page 31, beginning on line 20, strike out "contrary to" and all that follows through page 22, line 3, and insert in lieu thereof "; or".

Mr. BUTLER. Mr. Chairman, this amendment would broaden the definition of "agent of a foreign power" as it applies to non-U.S. persons by deleting from the foreign visitor provision the requirement that the circumstances of the visitor's presence in the United States would indicate that he was likely to engage in espionage. It would also delete the requirement that any espionage conducted by the visitor's country of origin by

"contrary to the interests of the United States" before the visitor could fall under the definition of "agent of a foreign power."

The requirement that the circumstances of the visitor's presence in the United States indicate that he is likely to engage in espionage creates inflexibility and denies positive intelligence-gathering opportunities. The principal responsibility of our intelligence services is to learn and understand the political, strategic, economic, and sociological forces of other countries. As former CIA Director William Colby pointed out in testimony before the Subcommittee on Courts, Civil Liberties and the Administration of Justice:

> When people with this kind of background come over here, even if they are going to Disneyland, they can have a considerable knowledge to that effect. In their side remarks and their conversations with their colleagues and communications homeward they can be communicating information which, putting those bits of pieces together, can give us a unique view of what is happening in some foreign country. It has nothing to do with protecting us in the narrow sense of that man doing something here, but it has a great deal to do with protecting us by understanding another country's politics.

It is clear that the requirement that the circumstances of the visitor's presence in the United States indicate that he is likely to engage in espionage would undermine this general intelligence gathering activity that has proven so useful to the United States in the past.

The additional requirement that any espionage conducted by the visitor's country of origin be contrary to the interests of the United States is equally restrictive and unnecessary. When a foreign power is conducting intelligence activities in secret in the United States it is highly inconceivable that the purpose of such activities is benevolence toward the United States.

Therefore, I urge my colleagues to support the amendment which would strike these two overly restrictive and unnecessary standards which would greatly undermine foreign intelligence activities conducted by the United States.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I certainly would agree 100 percent with what my colleague has said. I have brought up some of these precise points in committee before, and this is an area that concerns me very much.

The thing that bothers me the most about this bill, in addition to creating so many cracks that I think intelligence can fall through, is that it is almost a "Catch 22" in some cases. Our intelligence agencies almost have to show full control they can have surveillance in one section we just discussed.

One cannot really do that without first having some investigation. We have many, many examples where it took long, hard investigation with some surveillance to prove the case.

There are too many cases where we almost have to prove the end result before the intelligence agencies can do anything. I think the gentleman adequately makes the point, and I thank him very much.

Mr. BUTLER. I thank the gentleman.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman and my colleagues, most of the arguments made against the gentleman's previous amendment are equally compelling here.

The overriding point that wants to be noted is that the U.S. Government does not, cannot, and should not engage in the kind of indiscriminate electronic surveillance that the amendment would authorize.

The amendment will not contribute one iota toward the achievement of any intelligence goal that the intelligence people have suggested is necessary. The FBI does not seek this amendment. They have asked for nothing more than the current provision contained in H.R. 7308, which was inserted in committee to respond to the Bureau's concerns.

The FBI participated directly in drafting the existing language that the gentleman would amend. The existing language gives the Bureau the full authority it asked for to target specific classes of individuals from specific foreign countries.

The gentleman's amendment would lay hidden like a bomb with a long fuse waiting to be fired. If some future President or FBI wanted to utilize it—and the fact were made known—the political and diplomatic repercussions would be explosive. The amendment would authorize the wiretapping of any foreigner who comes to our shores in a representative capacity.

All that would need to be documented to a judge is that the foreigner comes from a country that engages in intelligence activities in the United States. Presumably, that is about any country with the money to support an intelligence service.

I oppose such wasteful and indiscriminate surveillance, as does the intelligence community, and I oppose the gentleman's amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Virginia (Mr. BUTLER).

The amendment was rejected.

Ms. HOLTZMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I ask for this time solely to clarify some of the language in the bill.

(Ms. HOLTZMAN asked and was given permission to revise and extend her remarks.)

Mr. Chairman, I would like to direct to the attention of the distinguished chairman of the subcommittee to the language on page 34 which gives the definition of "foreign intelligence information." The definition says that foreign intelligence information means "information with respect to a foreign power or foreign territory that relates to and, if concerning a U.S. person, is necessary to . . . the conduct of the foreign affairs of the United States."

I am concerned by what the term "the conduct of the foreign affairs of the United States" means. We are not talking here about the national defense or security position of the United States. We are talking about something much broader.

I am concerned that this term would authorize surveillance of a U.S. citizen in the United States who might be engaged in a perfectly peaceful activity. For instance, if a group of Americans organizes to protest the arms sale to Turkey, obviously that relates to the foreign affairs of the United States. Or suppose a group organizes to protest arms sale to Saudi Arabia or another nation. Are those groups of Americans now subjected to surveillance?

Foreign affairs is a subject of very grave concern to many Americans who participate in expressing their views in a perfectly peaceful manner, and I am concerned that we may be authorizing surveillance of them when they engage in these activities.

Mr. MURPHY of Illinois. Mr. Chairman, if the gentlewoman will yield, I would say the type of group she describes would not be the type of group that would come under observation. In other words, it is not the type of group the FBI and the National Security Agency or the counterintelligence or the CIA had in mind when we drafted this language.

Ms. HOLTZMAN. They might not have had these groups in mind at that time but I want to be sure that they never have them in mind and are never able to subject them to electronic surveillance, because the gentleman and I both agree that this kind of activity is peaceful and perfectly in accordance with our democratic system. I am concerned about the breadth of this term "foreign affairs of the United States" and what surveillance activities it would trigger.

Mr. MURPHY of Illinois. It was not intended to prohibit a first amendment activity. I do not know whether that would help the gentlewoman or not.

Ms. HOLTZMAN. Would it subject American citizens or U.S. persons—I guess that is the term used in the bill—to surveillance if, in a peaceable manner, they engaged in activities that relate to the conduct of foreign affairs of the United States?

Mr. MURPHY of Illinois. If they were exercising their first amendment rights, U.S. persons would not be the subject of this type of surveillance as the lady envisions.

Ms. HOLTZMAN. I thank the gentleman for his assurance.

Mr. DRINAN. Mr. Chairman, if the gentlewoman will yield, why should we not drop lines 17 and 18? I know that was in the Senate bill, and the Senate bill read at one time the successful conduct of U.S. foreign affairs.

The gentleman from Illinois (Mr. MURPHY) says there is no intention against American citizens who may be protesting, so why do we not just drop lines 17 and 18 seeing the bill relates only to the security of the United States.

Mr. MURPHY of Illinois. I can say to the gentleman from Massachusetts (Mr. DRINAN) that this language was suggested by the administration when they

testified before the committee, as the type of activity they were referring to.

The gentlewoman from New York (Ms. HOLTZMAN) brought up the fact it does not apply to this particular section. The gentleman from Massachusetts (Mr. DRINAN) says why should we not strike that out? The answer is no because there are circumstances under which the counter-intelligence divisions of the FBI and the NSA consider important, and would bring in under that definition.

Mr. DRINAN. But this is relating to the national defense or security of the United States so that that does broaden the vast powers that are vested in the CIA and the FBI, and they simply can state that it is necessary to have surveillance on certain American citizens because the information to be obtained is necessary for the United States to conduct the foreign affairs of the United States, they do not have to say it is necessary to the national defense.

The CHAIRMAN pro tempore. The time of the gentlewoman has again expired.

(On request of Mr. MURPHY of Illinois, and by unanimous consent, Ms. HOLTZMAN was allowed to proceed for 2 additional minutes.)

Mr. MURPHY of Illinois. Mr. Chairman, will the gentlewoman yield further?

Ms. HOLTZMAN. I yield further to the gentleman from Illinois.

Mr. MURPHY of Illinois. I would suggest that the gentleman turn to page 30 and read the definition of "foreign power" and what we mean by foreign power under that definition.

Mr. DRINAN. This section is speaking only, on page 13 and 14, that if this operation, that is a U.S. person, who wishes to demonstrate, so that it is necessary to obtain this surveillance because the information to be obtained is necessary to the conduct of the foreign affairs of the United States, that is far and above, it is much wider than just relating to national defense or security.

Mr. MAZZOLI. Mr. Chairman, if the gentlewoman would yield, in answer to the last question of the gentleman from Massachusetts (Mr. DRINAN) I would refer him to page 32 of our bill, at line 4, which protects the kind of person who would be targeted. I think this is a very important distinction because, in answer to what the gentlewoman also brought up, in order for a U.S. person, that is an American citizen or a resident alien, to be targeted, that person has to fit into the category on page 32. There is a criminal standard that that person has to measure up to. So, taking part in some activity relating to the arms sale to Turkey, or the embargo thereof, is not a criminal violation.

Ms. HOLTZMAN. Mr. Chairman, if I might refine my question a little, would this bill, let us say, allow a wiretap on a foreign power or its agent solely for the purpose of getting information about Americans who are engaging in a perfectly peaceful conduct? For example, would it permit wiretapping an agent of the Greek Government in order to find out whether or not Americans were going to engage in a protest against the arms sale to Turkey? I am very concerned that we in no way permit any such surveillance.

Mr. FOWLER. Mr. Chairman, if the gentlewoman will yield, the answer is an unequivocable no under the committee bill. It may be questionable now that the McClory amendment has been adopted.

The CHAIRMAN pro tempore. The time of the gentlewoman has again expired.

(On request of Mr. MAZZOLI and by unanimous consent, Ms. HOLTZMAN was allowed to proceed for 2 additional minutes.)

Ms. HOLTZMAN. I thank the gentleman for yielding and I yield further to the gentleman from Georgia.

Mr. FOWLER. I appreciate that very much.

Under the committee bill, the answer is no.

Now that we have no warrant to protect U.S. citizens from the very kind of abuse that might occur under the McClory substitute or under the McClory amendment which was adopted last night, we have to be even more vigilant that that does not occur.

However, I asked the gentleman from Kentucky to yield to me so that I could answer the original question which he has just elaborated upon.

First of all, when we have a U.S. person involved, the criminal standard has to apply that that person is either engaging in criminal activity or is likely to engage in criminal activity.

Ms. HOLTZMAN. I understand that would be the case if the U.S. person were the target of the surveillance; but what if the U.S. person is not the nominal target, but is the real target? Would this bill nonetheless authorize the intelligence agencies to obtain a warrant to snoop on foreign powers or persons for the purpose solely or primarily of getting information about Americans and American conduct? That is really my question.

Mr. FOWLER. If I may respond, the gentlewoman from New York undoubtedly knows about the Pike committee and the Church committee, on both of which the gentleman from Illinois (Mr. MURPHY), as subcommittee chairman, served. They have documented those abuses where a foreign agency or a foreign organization was targeted just to collect information on Americans.

Ms. HOLTZMAN. Yes; that is my point.

Mr. FOWLER. Therefore, we wrote into this bill the judicial protection that in an application for a tap, the magistrate should evaluate the reason for that tap in order to afford protection. Unfortunately, the McClory amendment knocked out that provision.

The CHAIRMAN pro tempore. The time of the gentlewoman from New York (Ms. HOLTZMAN) has again expired.

(On request of Mr. MAZZOLI and by unanimous consent, Ms. HOLTZMAN was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I thoroughly concur with what my friend, the gentleman from Georgia (Mr. FOWLER), has said.

I think that that protection which our bill, in the original form H.R. 7308, provided did protect the American citizen who is the incidental subject of a targeted search or surveillance, let us say, of the Turkish Embassy or of some foreign power.

Last night on this very floor I suggested that the committee bill did protect against that by requiring minimization procedures to be in effect and approved by the judge before the tap was put on. Further, if the judge, after inquiring into the matter, determined that this was an indirect effort to really target American citizens by going through this facade of targeting some foreign power solely to get this information, the original bill—now it is changed—would have said that there are minimization procedures as to this, and those minimization procedures would be periodically reviewed by the court.

When this committee goes back into the House, I hope we will have a chance to take another look at the McClory amendment That is why I opposed it last night. While I am sure it is well-intended, I think it has a pernicious effect.

Ms. HOLTZMAN. I thank the gentleman from Kentucky for his assurance.

Let me just ask again under the original bill, not as amended by the gentleman from Illinois if the courts were to find that the objective of the wiretap or of the surveillance was solely or essentially to get information about American people or the conduct of American citizens here in the United States or U.S. persons, even though the matter were related to foreign affairs in some way, that surveillance would not be authorized in the bill?

Mr. MAZZOLI. Absolutely not. The gentlewoman from New York is correct.

Ms. HOLTZMAN. I thank the gentleman for his assurance.

Mr. McCLORY. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I would like to point out that with or without the McClory amendment, we have minimization procedures which are prescribed and must be adhered to.

If we had the abuses to which the gentleman from Kentucky (Mr. MAZZOLI) makes reference, then we have abuses which we can take care of both the congressional oversight and by appropriate action against anybody who is abusing the authority.

Mr. MAZZOLI. If the gentlewoman will yield, Mr. Chairman, one of the important distinctions of those minimization procedures to which the gentleman refers would then involve solely an executive function, reviewed by nobody.

Mr. BOB WILSON. Madam Chairman, I move to strike the requisite number of words.

I would like to clarify the colloquy which occurred here with respect to the McClory amendment.

The McClory amendment does not affect U.S. persons as far as the warrant

requirement is concerned. The statement made by the gentleman from Georgia (Mr. FOWLER) is completely inaccurate in that respect.

Mr. FOWLER. Madam Chairman, will the gentleman yield?

Mr. BOB WILSON. I yield to the gentleman from Georgia.

Mr. FOWLER. Madam Chairman, I would like the gentleman to specify in what way my statement was inaccurate.

Mr. BOB WILSON. The McClory amendment removes the warrant requirement for non-U.S. persons only; is that not correct? And U.S. persons are not only subjected to a warrant requirement in order for them to be surveilled, but also, they are protected through the minimization procedures.

Both the gentleman from Georgia and the other gentleman said that the McClory amendment took this right away from U.S. citizens, and that is completely unfair and wrong.

Mr. FOWLER. Madam Chairman, if the gentleman will yield further, I will be delighted, of course, to let the author of the amendment correct me if I make any inaccurate statements. First, however, I would like to have an opportunity to respond.

First of all, the question which the gentlewoman from New York (Ms. HOLTZMAN) asked was whether or not there was judicial protection for American citizens who are surveilled through a tap which was placed on a foreign entity.

I am sure the gentleman from Illinois (Mr. MCCLORY) will agree that under his amendment there is no judicial protection under that circumstance and that he inserts minimization protection which are, as the gentleman from Kentucky (Mr. MAZZOLI) pointed out, solely under the control of the executive branch.

The whole thrust of our legislation was to try to keep this Government, or any subsequent Government, from tapping a foreign power under the ruse of collecting foreign intelligence information when it is really trying to collect nonintelligence information about Americans. The amendment offered by the gentleman from Illinois would not give judicial protection in that instance.

Mr. MCCLORY. If the gentleman will yield, I would like to point out that if there is abuse of the authority which is granted, if there is some ruse employed, the guilty person is going to be subjected to criminal penalties under the McClory amendment or without the McClory amendment. So the question is as to whether or not we are going to require a judicial warrant when we want to target a foreign power or a foreign agent. It could be a foreign spy.

Let me point out that the minimization procedures are minimization procedures which are developed and put in place by the Executive. The judiciary does not have anything to do with either developing or promulgating these minimization procedures, and they should not. I am fearful that with the intervention of the courts they may try to usurp authority that is not granted to them in this legislation. But to suggest that the court is going to review the minimization procedures, then, this it seems to me is an aberration. It is an irrelevant explanation of this legislation. The court is supposed to be there presumably to protect the Attorney General or those who are exercising authority under his direction. They claim that they want this for the Attorney General and for the FBI agents, and so on, who have been sued or who are not going to be sued any more, and it may be that this legislation may discourage some of the suits. But let me say that if the Attorney General or others are abusing their authority, whether they have a court order or they do not have a court order, there is a right to sue and to recover, and the bill provides for it.

Mr. BOB WILSON. Madam Chairman, I yield back the remainder of my time.

AMENDMENT OFFERED BY MR. RAILSBACK

Mr. RAILSBACK. Madam Chairman, I ask unanimous consent to offer a clarifying amendment not previously printed in the RECORD, but which I have discussed with both sides and which I believe to be acceptable.

The CHAIRMAN pro tempore (Mrs. MEYNER). Is there objection to the request of the gentleman from Illinois?

Mr. MURPHY of Illinois. Reserving the right to object, I would just say, Madam Chairman, if we could have the amendment read for the benefit of all of the members of the Committee, it would clarify it.

The CHAIRMAN pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. RAILSBACK: In the amendment offered by Mr. MCCLORY, section 102(b)(4)(A)(1) is amended by adding the words "unobtrusively and" before the words "in such a manner"; and on page 50, lines 8 and 9, add the words "unobtrusively and" before the words "in such a manner".

Mr. MURPHY of Illinois. Madam Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois (Mr. RAILSBACK)?

There was no objection.

Mr. RAILSBACK. Madam Chairman, I offer this amendment to insure that H.R. 7308 will not impose new and onerous burdens of compliance on those telephone companies called upon to assist in the establishment of electronic surveillances.

Currently, I am told, telephone company assistance—pursuant to court order in criminal proceedings, authorizations of the U.S. Attorney General in national security cases—is limited to providing line access information and, when requested, a private line from the source of the tap to the listening post. All physical connections to the intercepted telephone line, however, are made by law enforcement personnel who also provide, connect, and operate listening or recording devices.

Language contained in this measure has been interpreted by some as opening the door to greater demands for telephone company involvement such as: The furnishing of monitoring equipment, the use of telephone company employee identification cards to gain access to customer premises, or even the use of telephone company personnel for access and listening device placement in customer premises. Such a direct role in electronic surveillance by the telephone companies would, in my opinion, be inappropriate. It would seriously conflict with the responsibility of these companies to safeguard the privacy of their customers.

The amendment which I am proposing is quite simple. It would merely replace the uncertain language contained in H.R. 7308 with the judicially tested and defined language found in the Federal Omnibus Crime Control Act. Found at 18 U.S.C. section 2518(4) this language provides that telephone companies will provide the technical assistance necessary to accomplish the interception "unobtrusively". This language is preferable over that found in the legislation currently under consideration because it has proven workable over a number of years, it is compatible with the responsibility owed by telephone companies to their customers, and its meaning has been clearly refined by judicial interpretation.

I urge my colleagues on both sides of the aisle to support this simple amendment.

Mr. MCCLORY. Madam Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Illinois.

Mr. MCCLORY. I thank the gentleman for yielding.

I am familiar with the gentleman's amendment, and I see no objection to the amendment.

Mr. MURPHY of Illinois. Madam Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. I thank the gentleman for yielding.

I would say to my colleague, the gentleman from Illinois, that we have discussed this amendment. The amendment that he offers makes it clear that the statute does not authorize the Government to request cooperation from a common carrier that is not authorized under title III of the Omnibus Crime Control Act of 1968. I made this point yesterday in colloquy with the gentleman from Wisconsin (Mr. KASTENMEIER) and the gentleman from Ohio (Mr. ASHBROOK) on the floor. We are not requiring anything other than what is required now under title III of the act I just mentioned.

Mr. RAILSBACK. I want to thank the gentleman very much.

Mr. MURPHY of Illinois. I will support the amendment, and I appreciate the gentleman's bringing it to our attention.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. KEMP

Mr. KEMP. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KEMP: Page 62, after line 15, insert the following new subsection:

(l)(1) Notwithstanding any other provision of this title, whenever the President

has reason to believe that, based upon information obtained through an electronic surveillance under this title or otherwise, an individual who has diplomatic immunity conferred by the United States is, within the United States, intercepting by electronic means the communications of individuals in the United States and that such intercepting of communications is being conducted on behalf of a foreign power and in violation of the laws of the United States, the President shall—

(A) so inform the chairman and ranking minority member, or, in his discretion, the members, of the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate;

(B) except as provided under paragraph (2), so inform any individual believed to be a particular target of such intercepting of communications in order that such individual may take such precautions as such individual considers advisable; and

(C) except as provided under paragraph (2), so inform the Ambassador or Charge d'Affairs or other principal representative of such foreign power to the United States and demand that such intercepting of communications be ceased immediately.

(2) The President shall not be required to comply with the provisions of subparagraph (B) or (C) of paragraph (1) in any case in which the President certifies in writing to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate that to comply with the provisions of such subparagraph would cause serious damage to the national security of the United States.

Mr. KEMP (during the reading). Madam Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEMP. Madam Chairman, my amendment would require the President to take the following actions when it became apparent that electronic communications of U.S. persons were being intercepted and monitored by foreign governments or their agents. First, the President would be required to notify such person that his communications were being subjected to electronic surveillance by the foreign government. Second, the President would be required to notify the foreign government to cease and desist such surveillance, since the act is in violation of U.S. law. The President would be relieved of this responsibility in the event that he notify the House Permanent Select Committee on Intelligence and the Select Committee on Intelligence of the other body that to comply would cause grave harm to the national security interests of the United States.

Information has been reported recently in the press that millions of Americans are having their telephone calls monitored and recorded by the KGB from various locations in the United States. Further, the press reports that the Soviets are engaged in electronic surveillance of Government activities and defense contractors, private businesses, stock and commodity exchanges, national and international banking institutions, and perhaps even the press, universities and other centers of information and research concentration.

It would appear that the Soviets carefully plan for this activity by determining the routes of communications, so as to optimize intercept capability. Further, it appears that the locations for new consulates and trade missions have been carefully selected to provide even greater opportunities for the Soviets to intercept personal information, and business and monetary secrets of our citizens and corporations. This situation could grow more serious in the near future as new consulates and trade missions are opened. Further, the techniques involved in electronic surveillance are neither technologically difficult, nor expensive. There is no guarantee that other foreign governments, and their intelligence organizations, will not similarly invade the rights to privacy guaranteed under the provisions of the fourth amendment.

The bill under consideration would provide protection to those few U.S. persons who were subjected to electronic surveillance by our intelligence organizations and, under the provisions of Executive Orders 11905 and 12036, only a few U.S. persons have been subjected to electronic eavesdropping. It is ironic that, during this same period, millions of American citizens have had their privacy right violated with impunity by the Soviet Union.

The House in dealing with this legislation has a responsibility to the American people to do all in its power to protect their right to privacy. Apparently, the fourth amendment provisions of our Constitution do not apply to acts of foreign governments, but are limited to acts of the Government of the United States. In view of the activities of the intelligence services of foreign governments operating against U.S. persons within our territory, I believe we must provide statutory protection to limit these criminal actions. Adoption of my amendment would accomplish these objectives by warning U.S. persons of the fact, and notifying foreign governments to cease and desist, unless the President personally determined that to do so would cause grave harm to the national security interests of the United States.

Madam Chairman, I urge support for this amendment.

Mr. McCLORY. Madam Chairman, I rise in support of the amendment.

Madam Chairman, I want to commend the gentleman from New York (Mr. KEMP) on the amendment that is being offered. I think at a time when we are seeking to protect the privacy of U.S. citizens through our own efforts and through actions of our executive branch, and to the extent that we may be also involving the courts in this matter of protecting the privacy interests of U.S. persons, to ignore the fact that Americans' privacy is being violated in a wholesale way, as is reported to us through the press and through the debates that were carried on in the other body at the time this measure was debated there, seems to me to be quite unthinkable.

This is a very modest approach to the subject of protecting U.S. citizens against intrusion by electronic surveillance of a foreign power right in our midst, in this city, and perhaps in other cities and other areas of our country. To the extent that these reports are or may be true, it seems to me that the very least we can do is to adopt this amendment.

It is, of course, a further protection to U.S. citizens. In part of the debate we have had here, we talked about protecting the incidental rights of American citizens whose communications are incidentally listened into—that is, not intentionally, but just because they happen to get overheard accidentally or incidentally. What this amendment would do would be to attack that type of electronic surveillance which is directly or deliberately imposed upon American citizens, so I cannot see that there is any reason for this body not to support this.

The bill that the gentleman has sponsored and that is sponsored in the other body by Senator MOYNIHAN goes a long way and deals precisely with this subject. I might say that the amendment was drafted very carefully in order to be sure that it was germane and was not objectionable from a parliamentary standpoint. It seems to me that it is entirely appropriate that we should adopt it.

Mr. STRATTON. Madam Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from New York.

Mr. STRATTON. Madam Chairman, I would just like to join the gentleman from Illinois in support of the amendment of my colleague from New York (Mr. KEMP). As a matter of fact, I have an amendment that bears on this same situation, which Senator MOYNIHAN has recently brought to the attention of all of us.

I think the gentleman's amendment is a very valuable addition to the bill, and at the proper time in title III I shall be offering my own amendment which will, I believe, further provide some restrictions in connection with the same situation as the amendment of the gentleman from New York (Mr. KEMP).

Mr. McCLORY. I thank the gentleman.

Mr. MURPHY of Illinois. Madam Chairman, I rise in opposition to the amendment. It serves no useful purpose here in furthering the dialog on H.R. 7308 or in protecting Americans from unlawful foreign surveillances. The President, the intelligence agencies, and the congressional intelligence committees share the gentleman's concern and are fully aware of the intrusive activities that some governments engage in within our borders.

It is a sensitive and complex problem with sweeping intelligence and diplomatic ramifications.

I suggest to the gentleman that I think any further discussion here of the sensitive issues involved can only serve to aggravate the underlying problem which has nothing to do with the merits of H.R. 7308.

I assure the gentleman and my colleagues in the House that this Member

and the Intelligence Committee will maintain the closest possible scrutiny of this delicate issue.

I think that on the floor of the House with our visitors and guests in the House is no place to discuss the sensitive issues involved.

Mr. KEMP. Madam Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to the gentleman from New York.

Mr. KEMP. Madam Chairman, I respect the gentleman's position. The gentleman knows I am not about to reveal anything that would hurt this Nation or its relations with other countries or the privacy of U.S. citizens. So I share that belief as far as the gentleman is concerned. I give him credit for that. I only bring it out because there have been reports about it. It was related in the Rockefeller report to the American people. So I apprecate the gentleman's attempts to deal with this quietly and in a proper forum, and I regret to having to bring it up, but it seems to me it is a legitimate concern to the American people, not by virtue of a KEMP or a MOYNIHAN bringing it up, but it was the subject of the Rockefeller report.

But if it is simply a matter of codifying what the gentleman has suggested, I cannot understand the gentleman's opposition to the amendment, thus making it a bigger issue.

It is just that it seems that this has been going on for quite some time? That is my only concern.

Mr. MURPHY of Illinois. Let me say that the methods the gentleman speaks about are very sensitive and sophisticated.

I just think now that, to go any further today with this dialog would be ill-advised.

Mr. ASHBROOK. Mr. Chairman, I move to strike the last word and I rise in support of the amendment offered by the gentleman from New York (Mr. KEMP).

Mr. Chairman, this amendment seems to present several of the arguments that I have heard on many amendments. For instance, I have heard it said a number of times, against amendments that I bring in that, well, a previous President agrees with the Carter administration on this bill so that makes it pass the litmus paper test.

Here it has been said that it would be premature to tread in this area. Let us be fair about it, Soviet eavesdropping was done in a previous administration and little was done, if anything. We have had the best part of 2 years of the new administration and little is done if anything. So it is not a partisan issue. I think there was a degree of allowing this to be the victim of détente, of looking the other way in both administrations. So it is not a partisan matter.

Mr. MURPHY of Illinois. Will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. The gentleman says nothing has been done. I do not know if the gentleman was present in the hearings, but definite moves have been made by the executive branch and the Secretary of State in this matter. They are in the midst of bearing fruit. Also the fact that protective measures are being directed at those individuals that have been conducting it.

The gentleman is fully aware of what those moves are without my describing them today.

Mr. ASHBROOK. That is right, and the gentleman indicated that some people have been contacted, but the sheer multitude of eavesdropping indicates if there are tens of thousands of American conversations being monitored, nobody is making an effort to contact tens of thousands of people.

Mr. MURPHY of Illinois. I will say to the gentleman that the most sensitive, the people that have the most to lose have been contacted.

Mr. ASHBROOK. Then let us not get caught in that trap. All the arguments I have heard have been made, the gentlewoman from New York (Ms. HOLTZMAN) presented them, and I have heard them any number of times. We are supposedly vigilant for all Americans' rights. How many times have I heard it said in this debate that we must make sure we protect the rights of Americans?

I think the Kemp amendment is a pretty good test of whether Congress wants to show it is zealous to protect Americans' rights against our Government and against actions directed by Communist agents against Americans.

Mr. MURPHY of Illinois. I am sure the gentleman recognizes the fact that we gave the counterintelligence division $10 million in the last appropriation here for this very purpose.

Mr. ASHBROOK. I would add one point to my colleague, the gentleman from Illinois, and that is that I do not see that the Kemp amendment does anything that would be adverse to our national security or to our intelligence gathering effort. It merely requires the President of the United States to indicate what is going to be done on this subject. It is not going to trespass into the intelligence field.

Mr. KEMP. Mr. Chairman, if the gentleman would yield, I would say, just to enter into this colloquy, that this issue was fully aired and discussed on April 20 in the other body.

I can understand the gentleman's concerns, and they are shared by me, but I want to remind the gentleman that the article pubulished in the New York Times, which suggests that the administration is mapping a secret plan to counteract Soviet activity is kind of interesting, because here we are mapping out a public plan, a congressional plan to take care of domestic surveillance, and yet we are working on a secret plan, according to the New York Times, to deal with the activities of the Soviets.

Why are we so sensitive about that and less sensitive about the intelligence gathering agencies of the U.S. Government. It seems to me to be a little bit counterproductive.

Mr. MURPHY of Illinois. We are talking about a sensitive apparatus and sensitive methods. We are not talking about the fourth amendment rights of American citizens, basic rights under the Bill of Rights.

Let me say, further, that the junior Senator from New York that brought this up in the Senate, after he made his point, he withdrew the amendment which you can see if you read the debate.

Mr. KEMP. I have.

Mr. MURPHY of Illinois. That the Senate committee was working on this, too, and they have the same information that we have.

Mr. ASHBROOK. Mr. Chairman, let me reclaim my time to say that my colleague, the gentleman from New York (Mr. KEMP), is not becoming involved in sensitive apparatuses. He is not becoming involved in foreign policy. He is not becoming involved in intrigue. All he is saying is that this foreign surveillance is going on on a massive scale and it deserves some attention. We know that to be a fact.

Mr. Chairman, there is no reason that the Congress should not at least recognize that fact in what we are doing, not with respect to countermeasures, not with respect to sensitive equipment, but to emphasize the knowledge of this invasion of privacy, indeed, criminal invasion of privacy of the American people by the Soviet Union, to escalate that knowledge of something which is at least known by the public. Countermeasures or what is being done to protect us has nothing to do with the Kemp amendment.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Let me suggest to my very good friend—and he is my friend—why does he not perform an act of statesmanship here, as was done by the junior Senator from New York? He has made his point in offering the amendment. Why does he not withdraw it?

One of the reasons I suggest that he do it is that as intelligent as he is, as smart and as persuasive as he is, he knows that this is a matter with ramifications which really travel beyond the matter which we are discussing today in this foreign intelligence surveillance bill. The gentleman from New York (Mr. KEMP) knows that.

He also knows that those ramifications do embrace other agencies of the Government such as the State Department and the Department of Commerce.

Mr. Chairman, it would occur to me that this is really not the place in which to accept this amendment.

The gentleman from New York (Mr. KEMP) has his own bill. He knows that he will get a hearing on that bill because it is a matter which the Congress is very interested in. He knows that he is going to get a hearing on the bill. He can bring that matter to the attention of the Congress at that time; and I am sure that with the persuasiveness of which he is so capable, we will get a bill which will answer the problems that he and the junior Senator from New York are so interested in.

Furthermore, the gentleman from

New York (Mr. KEMP) knows that the President is worrying about this matter and that the Congress is getting a look at it, as this committee is, and as are other committees, incidentally, of the House and Senate, too. He also knows that the President and the administration are engaged in the study of this very difficult problem; and hopefully, it will be resolved.

Again, why does not the gentleman perform that act of statemanship at this point? Why does he not withdraw his amendment? He is going to get a lot of credit for it anyhow.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I am sorry that the gentleman from Massachusetts (Mr. BOLAND) suggests that I might be doing this simply to get credit.

I am doing it to get the Soviets to cease and desist their electronic surveillance of American citizens, which now mounts into the tens of thousands or more. This fact has already been confirmed by the gentleman as well as by our friend, the gentleman from Illinois (Mr. MURPHY).

My point is that if we knew about this, why was not something done in conjunction with bringing this bill to the floor? Why am I now being asked to remove the amendment from consideration and to be a statesman and lower the profile of our concern for the rights of American citizens?

Why was not this matter brought to the attention of the committee at an earlier time so that we could have had a bill that would have dealt with both of these problems, not only the surveillance of American citizens by domestic intelligence agencies, but also that of foreign intelligence agencies?

Mr. BOLAND. That is a good question, and it deserves an answer.

Let me say emphatically to the gentleman from New York that I do not think the gentleman offered his amendment for the purpose of getting publicity. I am aware of his intense interest in this matter as well as of the interest of a lot of Members of Congress, a lot of members of this committee, and a lot of members of the New York delegation.

One of the reasons I presume—at least, it is my judgment—that we did not include this matter in this bill is that we are not the only committee involved here. The International Affairs Committee would be involved in this matter; there is no doubt about it. There are some diplomatic ramifications. Let me indicate to the gentleman, we had enough difficulty with the foreign surveillance intelligence bill without impacting with something that might give us additional trouble. That is my response to the gentleman from New York.

Mr. KEMP. Will my friend, the gentleman from Massachusetts, yield again?

Mr. BOLAND. I yield to the gentleman.

Mr. KEMP. I thank the gentleman for yielding.

This act creates or amends all of the applicable law on electronic surveillance, and it seems, therefore, that any electronic surveillance undertaken by an intelligence-gathering source, domestic or foreign, in this country, is a violation of the specific provisions of this bill. I cannot understand why the Congress ought not make clear our concern for these violations and force the Soviets to cease and desist. I personally would like to make them persona non grata, but I understand that might not be germane.

We worked, as the gentleman from Illinois (Mr. MCCLORY) said, with the Parliamentarian in trying to work out something that would be acceptable. It seems to me a reasonable attempt to assure the people of this country that we are concerned as much about their rights vis-a-vis foreign intelligence services, as we are about their rights vis-a-vis our own agencies. So I rest my case and hope that the gentleman will support it.

Mr. BOLAND. Mr. Chairman, I think this is the wrong place and the wrong time for this particular amendment, and I would hope that the committee would reject it.

The CHAIRMAN pro tempore (Mr. MURTHA). The question is on the amendment offered by the gentleman from New York (Mr. KEMP).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

Mr. KEMP. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN pro tempore. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to report their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 732]

| | | |
|---|---|---|
| Abdnor | Conyers | Guyer |
| Ambro | Crane | Hagedorn |
| Ammerman | Danielson | Hansen |
| Andrews, N. Dak. | Davis | Harrington |
| Archer | Delaney | Harsha |
| Armstrong | Dellums | Hawkins |
| Beilenson | Dent | Holt |
| Bingham | Diggs | Holtzman |
| Bonker | Duncan, Oreg. | Huckaby |

| Quillen | Teague | |
| Rangel | Thone | |

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MURTHA, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 7308, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 327 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

RECORDED VOTE

The CHAIRMAN pro tempore. The pending business is the demand of the gentleman from New York (Mr. KEMP) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 154, noes 230, not voting 48, as follows:

[Roll No. 733]

Mr. ROBERTS changed his vote from "aye" to "no."

Mr. MAGUIRE changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore. Are there any further amendments to title I?

The Clerk will read.

The Clerk read as follows:

TITLE II—CONFORMING AMENDMENTS

AMENDMENTS TO CHAPTER 119 OF TITLE 18, UNITED STATES CODE

SEC. 201. Chapter 119 of title 18, United States Code, is amended as follows:

(a) Section 2511(2)(a)(ii) is amended to read as follows:

"(ii) Notwithstanding any other law, communication common carriers, their officers, employees, and agents, landlords, custodians, or other persons, are authorized to provide information, facilities, or technical assistance to persons authorized by law to intercept wire or oral communications or to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, if the common carrier, its officers, employees, or agents, landlord, custodian, or other specified person, has been provided with—

"(A) a court order directing such assistance signed by the authorizing judge, or

"(B) a certification in writing by a person specified in section 2518(7) of this title or the Attorney General of the United States that no warrant or court order is required by law, that all statutory requirements have been met, and that the specified assistance is required,

setting forth the period of time during which the provision of the information, facilities, or technical assistance is authorized and specifying the information, facilities, or technical assistance required. No communication common carrier, officer, employee, or agent thereof, or landlord, custodian, or other specified person shall disclose the existence of any interception or surveillance or the device used to accomplish the interception or surveillance with respect to which the person has been furnished an order or certification under this subparagraph, except as may otherwise be required by legal process and then only after prior notification to the Attorney General or to the principal prosecuting attorney of a State or any political subdivision of a State, as may be appropriate. No cause of action shall lie in any court against any communication common carrier, its officers, employees, or agents, landlord, custodian, or other specified person for providing information, facilities, or assistance in accordance with the terms of an order or certification under this subparagraph.".

(b) Section 2511(2) is amended by adding at the end thereof the following new provisions:

"(e) Notwithstanding any other provision of this ttile or section 605 or 606 of the Communications Act of 1934, it shall not be unlawful for an officer, employee, or agent of the United States in the normal course of his official duty to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, as authorized by that Act.

"(f) Nothing contained in this chapter, or section 605 of the Communications Act of 1934, shall be deemed to affect the acquisition by the United States Government of foreign intelligence information from international or foreign communications by a means other than electronic surveillance as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, and procedures in this chapter and the Foreign Intelligence Surveillance Act of 1978 shall be the exclusive means by which electronic surveillance, as defined in section 101 of such Act, and the interception of domestic wire and oral communications may be conducted.".

(c) Section 2511(3) is repealed.

(d) Section 2518(1) is amended by inserting "under this chapter" after "communication".

(e) Section 2518(4) is amended by inserting "under this chapter" after both appearances of "wire or oral communication".

(f) Section 2518(9) is amended by striking out "intercepted" and inserting "intercepted pursuant to this chapter" after "communication".

(g) Section 2518(10) is amended by striking out "intercepted" and inserting "intercepted pursuant to this chapter" after the first appearance of "communication".

(h) Section 2519(3) is amended by inserting "pursuant to this chapter" after "wire or oral communications" and after "granted or denied".

Mr. MURPHY of Illinois (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN pro tempore. Are there amendments to title II?

The Clerk will read.

The Clerk read as follows:

TITLE III—EFFECTIVE DATE

EFFECTIVE DATE

SEC. 301. The provisions of this Act and the amendments made hereby shall become effective upon the date of enactment of this Act, except that any electronic surveillance approved by the Attorney General to gather foreign intelligence information shall not be deemed unlawful for failure to follow the procedures of this Act, if that surveillance is terminated or an order approving that surveillance is obtained under title I of this Act within ninety days following the designation of the chief judges pursuant to section 103 of this Act.

The CHAIRMAN pro tempore. Are there amendments to title III?

AMENDMENT OFFERED BY MR. STRATTON

Mr. STRATTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STRATTON: Page 68, strike out line 5 and all that follows down through "of this Act," on line 8 and insert in lieu thereof the following:

EFFECTIVE DATE

SEC. 301. The provisions of this Act and the amendments made by this Act shall not take effect unless the President certifies to the Congress that no individual who has diplomatic immunity conferred by the United States is, within the United States, intercepting by electronic means the communications of individuals in the United States on behalf of a foreign power and in violation of the laws of the United States. If the President makes such a certification, the provisions of this Act and the amendments made by this Act shall take effect upon the date of such certifications.

Mr. STRATTON. Mr. Chairman, the previous amendment referred to a situation which is also at the heart of my amendment, but for different reasons. The House was unwilling to accept the amendment of the gentleman from New York (Mr. KEMP) because of the possibility that it might lead to discussions

and disclosures about the extent of our information.

My amendment also is premised on the news we have received in the press lately about the intelligence activities of certain foreign governments operating here in the United States, and even in the city of Washington.

This bill, essentially, places limitations on the operation of United States intelligence. It provides restrictions so that we do not get into the errors and abuses of the past and it requires various things—or did until the amendment of the gentleman from Illinois and the gentleman from Pennsylvania were adopted on yesterday—to be performed before intelligence collection can begin.

In effect this legislation is based on the philosophical concept enunciated, I think it was by Mr. Justice Holmes, that "it is better that one guilty man go free than that the Government play an ignoble role."

That kind of Marquis of Queensberry approach to intelligence might have been all right back in the easy-going early days of the 20th century or the last part of the 19th century; but the world that we live in today is a different world, as it was made clear yesterday in the debate. No other nation, either in the free world or the Communist world or the third world, operates by the type of system that we are proposing to place upon our intelligence services in this bill. Certainly not our number one competitor, the Union of Soviet Socialist Republics; so it is obvious that if we are going to place these limitations on our own intelligence activities, we are going to be operating at a distinct disadvantage in a tough, competitive real world where intelligence operations are sometimes matters of life and death.

It is a little bit as though you went to a football game and one team was allowed to tackle while the other team was only allowed to say, "Please slow down." Obviously, that is not the kind of situation we want to be in as far as our national security is concerned today.

Senator MOYNIHAN has already indicated the extent to which these intelligence activities are going on in Washington today. I do not want to say more about them, because, as the distinguished chairman of the subcommittee, the gentleman from Illinois (Mr. MURPHY) has said, we are indeed getting into a sensitive area. But we ought to be aware of it. So it seems to me that it is a little ridiculous for us to enact this legislation under these circumstances, because we would be in effect adopting the Unilateral Intelligence Disarmament Act of 1978.

We are going to be "good guys," we are going to be clean, we are going to play by Marquis of Queensberry rules, but we are operating in a world in which nobody else follows that same procedure.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I will yield in just a moment.

Mr. Chairman, my amendment simply says that until American citizens are not being surveilled and "intelligenced" and spied upon in our country, we are not going voluntarily to restrict our own ability to protect ourselves against that kind of surveillance or insist on comparable intelligence to protect our own security.

Mr. Chairman, I will be glad to yield now to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding.

As I understand the gentleman's amendment, it only relates to the effective date of this legislation.

The CHAIRMAN pro tempore (Mr. MURTHA). The time of the gentleman from New York (Mr. STRATTON) has expired.

(On request of Mr. McCLORY, and by unanimous consent, Mr. STRATTON was allowed to proceed for 2 additional minutes.)

Mr. McCLORY. Mr. Chairman, will the gentleman yield further?

Mr. STRATTON. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, the legislation we are discussing here relates to restrictions and restraints which circumscribe our exercise of electronic surveillance of foreign agents and foreign powers for foreign intelligence. So all the gentleman is asking in this amendment is that the effective date of this legislation be postponed, and that these restraints and guidelines be imposed at such time as we are assured that similar electronic surveillance of American citizens by foreign agents or foreign powers has been discontinued.

In other words, we do not want to leave ourselves open to their electronic surveillance while we are preventing ourselves from engaging in that kind of intelligence gathering.

Mr. STRATTON. Exactly. The gentleman from Illinois (Mr. McCLORY) has expressed it very clearly.

We are living in a real world in which people are zeroing in on us, and we would be foolish, it seems to me, to impose these restrictions, which everybody acknowledges do limit the effectiveness of our intelligence, at a time when we are going to be hard pressed to maintain our own operations. That is all that is involved here.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I am glad to yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, there are, of course, various constitutional restrictions in the Bill of Rights on our Government, such as the fourth amendment itself.

The argument the gentleman is making would require that we suspend the Bill of Rights until all the other countries in the world impose similar restrictions on their governments. I do not really see that that is practical.

Mr. STRATTON. Mr. Chairman, I do not think the gentleman from Ohio (Mr. SEIBERLING) was here last night when I had the opportunity to address the committee. I find that my remarks somehow never got into the RECORD, and so the gentleman may unfortunately be prevented from ever reading that "deathless prose."

What I was referring to were the fairly successful intelligence operations going on in this country during World War II and even before World War II. I believe we can all be grateful that those operations were not embargoed by the very restrictions we are instituting in this bill.

Mr. FOWLER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, speaking on behalf of the committee, if we adopt the Stratton amendment as it is proposed, including that language that requires that we postpone the effective date of this act until the President certifies to Congress that no individual with diplomatic immunity conferred by the United States is engaging in electronic surveillance in the United States, that would require us to reveal—and I stress the hypothetical nature of my example—that if we determine that friendly governments such as the Government of New Zealand, for instance, was using electronic surveilling in this country against the Government of Australia, then this would cause this act not to go into effect.

In other words, the Stratton language is so broad that, if our Government gains knowledge of any electronic surveillance by any government against any other government within the borders of this country, then this would vitiate the entire act under the Stratton amendment.

Also, as if that were not reason enough to defeat this amendment, let me say this. First, I might say that I know the position of the gentleman from New York (Mr. STRATTON), because I heard what he referred to as his "deathless prose" last night. We are trying to protect the ability of this country to preserve the finest intelligence surveillance system in the world, and if we are to certify to the Congress or to the Executive or to anybody else that we know everything about what our enemies or our allies are doing in the electronic surveillance field, we are in the old Western position of revealing how our ambush is better than their ambushes, and immediately our enemies will have ways of targeting on us to find out how we know what we know from what we must reveal if the Stratton amendment passes.

It is overly broad, it is completely unworkable, it would work against our allies as much as it would work against our enemies, and I urge rejection of the amendment.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I would point out to the gentleman that the text of my amendment says that—

> . . . intercepting by electronic means the communications of individuals in the United States on behalf of a foreign power and in violation of the laws of the United States.

It is the interception on behalf of a foreign power in violation of our laws that we are asking be certified as nonexistent before we will adopt these procedures ourselves.

In other words, the gentleman appears to be suggesting that we allow activities in violation of our laws, and I do not

think he really would want that to happen.

Mr. FOWLER. Mr. Chairman, the only place I will agree with the gentleman from New York (Mr. STRATTON) is that the basis of spying is nasty business. We are talking about spying. We are violating laws, both of this country and of others by spying, laws that are protected by the first and fourth amendments to the Constitution. What this legislation attempts to do is to set precise standards so that we balance that need for collection; that is, spying, and at the same time protect the rights of American citizens when those rights do not have to be violated.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman makes a very good point. I am against the amendment, and I join the gentleman in opposition to it.

I would ask the gentleman one further question. The administration of this, the handling, the mechanics of putting the Stratton amendment into play just completely befuddle me. If I understand the language, if the millennium ever arrives and nobody is spying on anybody, the Stratton amendment goes into effect. And what happens on the day when the spying resumes? Would the gentleman suggest that the Stratton amendment ceases to be in effect?

Mr. FOWLER. First of all, I cannot conceive of the scope of the administrative bureaucracy that would have to be set up in order for the President to make this determination.

Mr. MAZZOLI. That is right.

Mr. FOWLER. And, of course, everything the legislation is trying to protect would have to be held in abeyance.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I thank the gentleman for yielding.

Mr. Chairman, would not the gentleman from Georgia concede that the enactment of the Stratton amendment would in effect make the President a prisoner, literally, of persons beyond Presidential control because of diplomatic immunity? It makes a mockery of the whole process, in effect.

Mr. FOWLER. I certainly agree with the distinguished gentleman.

Mr. KASTENMEIER. Certainly the amendment ought to be rejected. I agree with the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. STRATTON).

The amendment was rejected.

AMENDMENT OFFERED BY MR. DRINAN

Mr. DRINAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DRINAN: Page 68 after line 15, add the following new section:

SUNSET PROVISION

SEC. 302. The provisions of this Act and the amendments made by this Act shall expire at the end of the five-year period beginning on the date of enactment of this Act.

Mr. DRINAN. Mr. Chairman, in general I do not favor the adoption of sunset provisions, calling for positive action by Congress to reenact a bill by a date certain. H.R. 7308, however, breaks so much new ground, contains so many provisions which are subject to differing interpretations, and deals to such a large extent with so many of our most fundamental rights, including the fourth amendment, that I believe it is essential that we reconsider this bill in its entirety after we have had an opportunity to study its implementation.

The amendment which I propose is a simple one. It states that the terms of this act shall expire 5 years after the date of its enactment. This will provide us with the time to consider the actual impact of this bill and also provide answers to the many questions which H.R. 7308 raises. How will the unprecedented three-judge special courts function? Will warrants be granted almost as a matter of course, as some fear, or will the intelligence agencies be denied the opportunity to conduct surveillance which is needed, as others believe? Can we depend upon rigid adherence to the rule of secrecy? Precisely how broadly will the intelligence agencies define the terms "foreign power" and "agent of a foreign power"? To what extent will some law enforcement agencies abuse the privileges granted by H.R. 7308 to obtain information about a wide range of individuals and activities not subject to the surveillance authorization?

One of the most important distinctions drawn by H.R. 7308 is between citizens and resident aliens on the one hand and all other persons within the United States on the other. Insofar as I am aware, there is little constitutional support for such a distinction, especially when it is a central concept of legislation which deals directly with the bill of rights. Many people in the United States are neither citizens, nor resident aliens, nor engaged in espionage of any kind. Tourists, lecturers, businessmen, scholars and others all visit the United States regularly. Yet these individuals are not accorded the same protections as citizens and resident aliens. The first and fourth amendments refer to people, not just citizens. To what extent will we, by passing this measure, diminish the scope of these amendments and subject our guests to eavesdropping? To this question, as to the others, we have no answer.

In a more general sense, a sunset provision will insure that, after a reasonable period of time within which to evaluate the act, we will be able to balance the amount and the importance of the intelligence information collected under the terms of this bill against its intrusions on our first and fourth amendment rights. The important respects in which this bill departs from our existing intelligence gathering methods mandate a comprehensive review of the act after we have seen its results. The only way to make absolutely certain that we have the opportunity to conduct such a review is by adopting a sunset provision.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. DRINAN. I will be happy to yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, it seems to me that this is most appropriate legislation in which to have a so-called sunset amendment. We are venturing into ground that has been uncharted. It is an unprecedented piece of legislation. Many aspects of this legislation are really without precedent, and consequently I think a 5-year limitation on the legislation is highly desirable.

Mr. Chairman, I am happy to support the gentleman's amendment.

Mr. DRINAN. I thank the gentleman for his support.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the purpose of this bill is to assure Americans that their rights are being protected and to provide a sound legal basis for the continuation of vital foreign intelligence programs. Having it expire in 5 years' time puts both those principles in jeopardy.

If there were to be a delay in the legislative process and the bill was not passed again on time, the status of protection of individual rights and the legality of surveillances would be endangered.

The Senate has announced that it will take a hard look at this statute on an annual basis to determine if it needs to be modified on the basis of experience. That seems a far sounder approach where such important issues are at stake and the committee will certainly pledge to do that also.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Massachusetts (Mr. DRINAN).

The question was taken, and on a division (demanded by Mr. DRINAN) there were—ayes 21; noes 28.

Mr. DRINAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the distinguished gentleman from North Carolina (Mr. PREYER).

Mr. PREYER. Mr. Chairman, I thank the distinguished gentleman from Massachusetts for yielding to me. I wish to ask the chairman of the committee at this time if I am correct in my understanding that in accordance with section 2, 2(c) of House Resolution 658, jurisdiction to study and review intelligence activities other than those dealing exclusively with the Central Intelligence Agency is to be shared concurrently with the committee by other committees that have exercised jurisdiction over these activities in the past.

The Government Information and Individual Rights Subcommittee, which I

chair, has in the past held numerous hearings on such matters as the interception of nonverbal communications by Federal intelligence agencies and the notification to victims of improper intelligence activities. For this reason, I think the subcommittee's jurisdiction in the area of intelligence surveillance has been established.

I would appreciate the comments of the gentleman from Massachusetts (Mr. BOLAND) regarding this matter.

Mr. BOLAND. Mr. Chairman, in response to the question propounded by the gentleman, let me say that his understanding of House Resolution 658, establishing the House Permanent Select Committee on Intelligence, and his reference to section 2, 2(c) of that resolution conferring jurisdiction to study and review intelligence activities other than those dealing exclusively with the CIA, is to be shared concurrently with the committee by other committees that have exercised jurisdiction over these activities in the past is correct. Those committees that have exercised jurisdiction of these activities in the past will continue to have that jurisdiction.

And as he has indicated, his Subcommittee on Government Information and Individual Rights has actually dealt with some of the matters we are dealing with, and we will continue to share that jurisdiction with his subcommittee and the full committee.

Mr. PREYER. I thank the gentleman.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. M'CLORY

Mr. McCLORY. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. McCLORY:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Foreign Intelligence Electronic Surveillance Act of 1978".

TABLE OF CONTENTS

TITLE I—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

Sec. 101. Definitions.
Sec. 102. Authorization for electronic surveillance for foreign intelligence purposes.
Sec. 103. Use of information.
Sec. 104. Congressional oversight.
Sec. 105. Penalties.
Sec. 106. Civil liability.
Sec. 107. Retention of records.

TITLE II—CONFORMING AMENDMENTS

Sec. 201. Amendments to chapter 119 of title 18, United States Code.

TITLE III—EFFECTIVE DATE

Sec. 301. Effective date.

TITLE I—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

DEFINITIONS

SEC. 101. As used in this title:

(1) a foreign government or any component thereof, whether or not recognized by the United States;

(2) a faction of a foreign nation or nations, not substantially composed of United States persons;

(3) an entity that is openly acknowledged by a foreign government or governments to be directed and controlled by such foreign government or governments;

(4) a group engaged in international terrorism or activities in preparation therefor;

(5) a foreign-based political organization, not substantially composed of United States persons; or

(6) an entity that is directed and controlled by a foreign government or governments.

Such term shall not apply to any United States person solely upon the basis of activities protected by the first amendment of the Constitution.

(b) "Agent of a foreign power" means—

(1) any person other than a United States person who—

(A) acts in the United States as an officer, member, or employee of a foreign power; or

(B) acts or on behalf of a foreign power which engages in clandestine intelligence activities in the United States contrary to the foreign policy or security interests of the United States, when the circumstances of such person's presence in the United States indicate that such person may engage in such activities in the United States, or when such person knowingly aids or abets any person in the conduct of such activities or knowingly conspires with any person to engage in such activities; or

(2) any person who—

(A) knowingly engages in clandestine intelligence activities for or on behalf of a foreign power under circumstances which indicate that such activities are contrary to the foreign policy or security interests of the United States;

(B) knowingly engages in sabotage or international terrorism, or activities that are in preparation therefor, for or on behalf of a foreign power; or

(C) conspires with or knowingly aids or abets any person engaged in any activity described in subparagraph (A) or (B).

Such term shall not apply to any United States person solely upon the basis of activities protected by the first amendment of the Constitution.

(c) "International terrorism" means activities that—

(1) involve violent acts or acts dangerous to human life that are or may be a violation of the criminal laws of the United States or of any State, or that might involve a criminal violation if committed within the jurisdiction of the United States or any State;

(2) appear to be intended—

(A) to intimidate or coerce a civilian population;

(B) to influence the policy of a government by intimidation or coercion; or

(C) to affect the conduct of a government by assassination or kidnapping; and

(3) occur totally outside the United States, or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum.

(d) "Sabotage" means activities that involve or may involve a violation of chapter 105 of title 18, United States Code, or that might involve such a violation if committed against the United States.

(e) "Foreign intelligence information" means—

(1) information that relates to and, if concerning a United States person, is necessary to the ability of the United States to protect against—

(A) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;

(B) sabotage or international terrorism by a foreign power on an agent of a foreign power; or

(C) clandestine intelligence activities by an intelligence service or network of a foreign power or by an agent of a foreign power; or

(2) information with respect to a foreign power or foreign territory that relates to and, if concerning a United States person, is necessary to—

(A) the national defense or the security of the United States; or

(B) the conduct of the foreign affairs of the United States.

(f) "Electronic surveillance" means—

(1) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire or radio communication sent by or intended to be received by a particular, known United States person who is in the United States, if the contents are acquired by intentionally targeting that United States person, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes;

(2) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire communication to or from a person in the United States, without the consent of any party thereto;

(3) the intentional acquisition, by an electronic, mechanical, or other surveillance device, of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States; or

(4) the installation or use of an electronic, mechanical, or other surveillance device in the United States for monitoring to acquire information, other than from a wire or radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes.

(g) "Minimization procedures", with respect to a particular electronic surveillance, means specific procedures, reasonably designed in light of the purpose and technique of the surveillance, to minimize the acquisition, retention, and dissemination of nonpublicly available information concerning unconsenting United States citizens consistent with the need of the United States to obtain, produce, and disseminate foreign intelligence information. To achieve such minimization, the Attorney General shall adopt procedures which shall include, where appropriate—

(1) provisons for the destruction of unnecessary information acquired through the surveillance;

(2) provisions with respect to what information may be filed and on what basis, what information may be retrieved and on what basis, and what information may be disseminated, to whom, and on what basis;

(3) provisions for the deletion of the identity of any United States citizen acquired through the surveillance if such identity is not necessary to assess the importance of or to understand the information;

(4) provisions relating to the proper authority in particular cases to approve the retention or dissemination of the identity of any United States citizen acquired through the surveillance;

(5) provisions relating to internal review of the minimization process; and

(6) provisions relating to adequate accounting of information concerning United States citizens that is used or disseminated.

In addition, the procedure shall include provisions that require that nonpublicly available information that is not foreign intelligence information, as defined in subsection (e)(1), shall not be disseminated in a manner which identifies any individual United States citizen, without such person's consent, unless such person's identity is necessary to understand foreign intelligence in-

formation or to assess its importance; and shall allow for the retention and dissemination of information that is evidence of a crime that has been, is being, or is about to be committed and that is to be retained or disseminated for the purpose of preventing the crime or of enforcing the criminal law.

(h) "United States person" means a citizen of the United States, an alien lawfully admitted for permanent residence (as defined in section 101(a)(20) of the Immigration and Nationality Act), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence, or a corporation which is incorporated in the United States, but does not include a corporation or an association which is a foreign power, as defined in subsection (a) (1), (2), or (3).

(i) "United States", when used in a geographic sense, means all areas under the territorial sovereignty of the United States and the Trust Territory of the Pacific Islands.

(j) "Aggrieved person" means a person who is the target of an electronic surveillance or any other person whose communications or activities were subject to electronic surveillance.

(k) "Wire communication" means any communication while it is being carried by a wire, cable, or other like connection furnished or operated by any person engaged as a common carrier in providing or operating such facilities for the transmission of interstate or foreign communications.

(l) "Person" means any individual, including any officer or employee of the Federal Government, or any group, entity, association, corporation, or foreign power.

(m) "Contents", when used with respect to a communication, includes any information concerning the identity of the parties to such communication or the existence, substance, purport, or meaning of that communication.

(n) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, and the Trust Territory of the Pacific Islands.

AUTHORIZATION OF ELECTRONIC SURVEILLANCE TO OBTAIN FOREIGN INTELLIGENCE INFORMATION

SEC. 102. (a) Electronic surveillance of a foreign power or an agent of a foreign power for the purpose of obtaining foreign intelligence information may be authorized by the issuance of a surveillance certificate in accordance with subsection (h). If the target of the electronic surveillance is a United States citizen, the issuance of a certificate under oath and signed by the President stating that such electronic surveillance would be in accordance with the criteria and requirements of this title shall also be required.

(b) Electronic surveillance authorized under subsection (a) may only be performed according to the terms of a surveillance certificate issued in accordance with subsection (h).

(c) Electronic surveillance may be authorized under this section for the period necessary to achieve its purpose, except that—

(1) if the target of the surveillance is not a foreign power, the period of the surveillance may not exceed ninety days; and

(2) if the target of the surveillance is a foreign power, the period of the surveillance may not exceed one year.

(d) An electronic surveillance authorized under this section may be reauthorized in the same manner as an original authorization, but all statements required to be made under subsection (h) for the initial issuance of a surveillance certificate shall be based on new findings.

(e)(1) Notwithstanding any other provision of this title, if the Attorney General or Deputy Attorney General determines that—

(A) an emergency situation exists with respect to the employment of electronic surveillance to obtain foreign intelligence information before the requirements of subsection (a) can be followed; and

(B) the factual bases exist for the issuance of a surveillance certificate under subsection (h) to approve such surveillance,

the Attorney General or Deputy Attorney General, as the case may be, may authorize the emergency employment of electronic surveillance if, as soon as is practicable, but not more than forty-eight hours after the Attorney General or Deputy Attorney General authorizes such surveillance, the requirements of subsection (a) are met as they would have been.

(2) If the target is a United States citizen, the Attorney General or Deputy Attorney General shall notify the President at the time of such authorization that the decision has been made to employ emergency electronic surveillance.

(3) If the Attorney General or Deputy Attorney General authorizes such emergency employment of electronic surveillance, he shall require that the minimization procedures required by this title be followed.

(4) If electronic surveillance is authorized under this subsection, it shall terminate when the information sought is obtained or after the expiration of forty-eight hours from the time of authorization, whichever is earliest. In the event that the requirements of subsection (a) are not met, all information obtained or evidence derived from electronic surveillance authorized under this subsection shall be destroyed within forty-eight hours of such determination, except that a record of the facts surrounding the Attorney General's or Deputy Attorney General's authorization and the failure to meet the requirements subsection (a) shall be made and preserved with all other records which under this title are required to be retained.

(f) Notwithstanding any other provision of this title, officers, employees, or agents of the United States are authorized in the normal course of their official duties to conduct electronic surveillance not targeted against the communications of any particular person or persons, under procedures approved by the Attorney General, solely to—

(1) test the capability of electronic equipment, if—

(A) it is not reasonable to obtain the consent of persons incidentally being subjected to the surveillance;

(B) the test is limited in extent and duration to that necessary to determine the capability of the equipment; and

(C) the contents of any communication acquired are retained and used only for the purpose of determining the capability of the equipment, are disclosed only to test personnel, and are destroyed before or immediately upon completion of the test;

(2) determine the existence and capability of electronic surveillance equipment being used by persons not authorized to conduct electronic surveillance, if—

(A) it is not reasonable to obtain the consent of persons incidentally subjected to the surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to determine the existence and capability of such equipment; and

(C) any information acquired by such surveillance is used only to enforce chapter 119 of title 18, United States Code, or section 605 of the Communications Act of 1934, or to protect information from unauthorized surveillance; or

(3) train intelligence personnel in the use of electronic surveillance equipment, if—

(A) it is not reasonable to—

(i) obtain the consent of the persons incidentally subjected to the surveillance;

(ii) train persons in the course of surveillances otherwise authorized by this title; or

(iii) train persons in the use of such equipment without engaging in electronic surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to train the personnel in the use of the equipment; and

(C) no contents of any communication acquired are retained or disseminated for any purpose, but are destroyed as soon as reasonably possible.

(g)(1) Upon the issuance of a surveillance certificate under this section, the Attorney General may direct a specified communication or other common carrier, or a landlord, custodian or other specified person, to—

(A) furnish any information, facility, or technical assistance necessary to accomplish the electronic surveillance in such a manner as will protect the secrecy of such surveillance and will produce a minimum of interference with the services that such common carrier or person provides its customers; and

(B) maintain any records concerning such surveillance or the assistance furnished by such common carrier or person that such common carrier or person wishes to retain under security procedures approved by the Attorney General and the Director of Central Intelligence.

(2) Any direction by the Attorney General under paragraph (1) shall be in writing.

(3) The Government shall compensate any common carrier, landlord, custodian, or other specified person at the prevailing rate for assistance furnished pursuant to a direction under paragraph (1).

(4) Any individual may, for reasons of conscience, refuse to comply with a direction from the Attorney General under paragraph (1).

(h) A surveillance certificate issued under subsection (a) shall be issued in writing and under oath by the Attorney General and an executive branch official or officials designated by the President from among those officials employed in the area of national security or national defense who were appointed by the President by and with the advice and consent of the Senate, and shall include—

(1) a statement—

(A) identifying or describing the target of the electronic surveillance, including a certification of whether or not the target is a United States citizen;

(B) certifying that the target of the surveillance is a foreign power or an agent of a foreign power; and

(C) certifying that each of the facilities or places at which the surveillance is directed is being or may be used by a foreign power or an agent of a foreign power;

(2) a statement of the basis for the certification under paragraph (1) that—

(A) the target of the surveillance is or is not a United States citizen;

(B) the target of the surveillance is a foreign power or an agent of a foreign power; and

(C) each of the facilities or places at which the surveillance is directed is being used or may be used by a foreign power or an agent of a foreign power;

(3) a statement of the proposed minimization procedures;

(4) a statement that the information sought is foreign intelligence information;

(5) a statement that the purpose of the surveillance is to obtain foreign intelligence information;

(6) if the target of the surveillance is a United States person, a statement that the information sought cannot reasonably be obtained by normal investigation techniques;

(7) if the target of the surveillance is not a foreign power, a statement of the basis for the certification under paragraph (4) that

the information sought is foreign intelligence information;

(8) a statement of the period of time for which the surveillance is required to be maintained;

(9) a statement of the means by which the surveillance will be effected;

(10) if the nature of the intelligence gathering is such that the approval of an electronic surveillance under subsection (b) should not automatically terminate when the described type of information has first been obtained, a statement of the facts indicating that additional information of the same type will be obtained thereafter;

(11) a statement indicating whether or not an emergency authorization was made under subsection (e); and

(12) if more than one electronic, mechanical, or other surveillance device is to be involved with respect to such surveillance, a statement specifying the types of devices involved, their coverage, and the minimization procedures that will apply to information acquired by each type of device.

USE OF INFORMATION

SEC. 103. (a) Information acquired from an electronic surveillance conducted pursuant to this title concerning any United States person may be used and disclosed by Federal officers and employees without the consent of the United States person only in accordance with the minimization procedures required by this title. No otherwise privileged communication obtained in accordance with, or in violation of, the provisions of this title shall lose its privileged character. No information acquired from an electronic surveillance pursuant to this title may be used or disclosed by Federal officers or employees except for lawful purposes.

(b) No information acquired pursuant to this title shall be disclosed for law enforcement purposes unless such discloure is accompanied by a statement that such information, or any information derived therefrom, may only be used for or disclosed in any proceeding with the advance authorization of the Attorney General.

(c) Whenever the Government intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States. against an aggrieved person, any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the Government shall, prior to the trial, hearing, or other proceeding or at a reasonable time prior to an effort to so disclose or so use that information or submit it in evidence, notify the aggrieved person and the court or other authority in which the information is to be disclosed or used that the Government intends to so disclose or so use such information.

(d) Before any State or political subdivision thereof may enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of a State or a political subdivision thereof, against an aggrieved person any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the State or political subdivision thereof must receive from the Attorney General an authorization to so use such information. Upon receiving such authorization, the State or political subdivision thereof shall notify the aggrieved person and the court or other authority in which the information is to be disclosed or used that the State or political subdivision thereof intends to so disclose or so use such information.

(e) Any person against whom evidence obtained or derived from an electronic surveillance to which he is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, a State, or a political subdivision thereof, may move to suppress the evidence obtained or derived from such electronic surveillance on the grounds that—

(1) the information was unlawfully acquired; or

(2) the surveillance was not made in conformity with an order of authorization or approval.

Such a motion shall be made before the trial, hearing, or other proceeding unless there was no opportunity to make such a motion or the person was not aware of the grounds of the motion.

(f) Whenever a court or other authority is notified pursuant to subsection (c) or (d), or whenever a motion is made pursuant to subsection (e) and the Government concedes that information obtained or derived from an electronic surveillance pursuant to the authority of this title as to which the moving party is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding, the Government may make a motion before the court, or if the case is before a court of a State or a subdivision thereof, then before the United States district court of the judicial district in which the case is pending, to determine the lawfulness of the electronic surveillance. Such motion shall stay any action in any court or authority to determine the lawfulness of the surveillance. In determining the lawfulness of the surveillance, the court shall, nowithstanding any other law, if the Attorney General files an affidavit under oath with the court that disclosure would harm the national security of the United States or compromise foreign intelligence sources and methods, review in camera the surveillance certificate and such other materials relating to the surveillance as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making such determination, the court may disclose to the aggrieved person, under appropriate security procedures and protective orders, portions of the application, order, or other materials if there is a reasonable question as to the legality of the surveillance and if disclosure would likely promote a more accurate determination of such legality.

(g) Except as provided in subsection (f), whenever any motion or request is made pursuant to any statute or rule of the United States or any State before any court or other authority of the United States or any State to discover or obtain surveillance certificates or other materials relating to surveillance pursuant to the authority of this title, or to discover, obtain, or suppress any information obtained from electronic surveillance pursuant to the authority of this title, and the court or other authority determines that the moving party is an aggrieved person, if the Attorney General files with the court of appeals of the circuit in which the case is pending an affidavit under oath that an adversary hearing would harm the national security or compromise foreign intelligence sources and methods and that no information obtained or derived from an electronic surveillance pursuant to the authority of this title has been or is about to be used by the Government in the case before the court or other authority, the court of appeals shall, notwithstanding any other law, stay the proceeding before the other court or authority and review in camera and ex parte the surveillance certificate and such other materials as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the court of appeals shall disclose, under appropriate security procedures and protective orders, to the aggrieved person or his attorney, portions of the surveillance certificate or other materials relating to the surveillance only if necessary to afford due process to the aggrieved person.

(h) If the court pursuant to subsection (f) or the court of appeals pursuant to subsection (g) determines the surveillance was not lawfully authorized and conducted, it shall, in accordance with the requirements of the law, suppress the evidence which was unlawfully obtained or derived from electronic surveillance of the aggrieved person or otherwise grant the motion of the aggrieved person. If the court pursuant to subsection (f) or the court of appeals pursuant to subsection (g) determines the surveillance was lawfully authorized and conducted, it shall deny the motion of the aggrieved person except to the extent that due process requires discovery or disclosure.

(i) Orders granting motions or requests under subsection (h), decisions under this section as to the lawfulness of electronic surveillance, and, absent a finding of unlawfulness, orders of the court or court of appeals granting disclosure of surveillance certificates or other materials relating to a surveillance shall be binding upon all courts of the United States and the several States except the courts of appeals and the Supreme Court, and shall be final orders for purposes of appeal.

(j) In circumstances involving the unintentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States, such contents shall be destroyed upon recognition, unless the Attorney General determines that the contents may indicate a threat of death or serious bodily harm to any person.

CONGRESSIONAL OVERSIGHT

SEC. 104. On a semiannual basis the Attorney General shall fully inform the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate concerning all electronic surveillance under this title. Nothing in this chapter shall be deemed to limit the authority and responsibility of those committees to obtain such additional information as they may need to carry out their respective functions and duties.

PENALTIES

SEC. 105. (a) OFFENSE.—A person is guilty of an offense if he intentionally—

(1) engages in electronic surveillance under color of law except as authorized by statute; or

(2) violates section 102(a), 102(b), 102(d), 102(e), 103(a), 103(b), 103(j), or 107 or any order issued pursuant to this chapter, knowing his conduct violates such section or such order.

(b) DEFENSE.—(1) It is a defense to a prosecution under subsection (a)(1) that the defendant was a law enforcement or investigative officer engaged in the course of his official duties and the electronic surveillance was authorized by and conducted pursuant to a search warrant or court order of a court of competent jurisdiction;

(2) It is a defense to a prosecution under subsection (a)(2) that the defendant acted in a good faith belief that his actions were authorized by and taken pursuant to a surveillance certificate or otherwise did not violate any provision of this title, under circumstances where that belief was reasonable.

(c) PENALTY.—An offense described in this section is punishable by a fine of not more

than $10,000 or imprisonment for not more than five years, or both.

(d) JURISDICTION.—There is Federal jurisdiction over an offense in this section if the person was an officer or employee of the United States at the time the offense was committed.

CIVIL LIABILITY

SEC. 106. CIVIL ACTION.—An aggrieved person, other than a foreign power or an agent of a foreign power as defined in section 101 (a) or (b)(1)(A), respectively, who has been subjected to an electronic surveillance or whose communication has been disclosed or used in violation of section 105 of this chapter shall have a cause of action against any such person who committed such violation and shall be entitled to recover—

(1) actual damages, but not less than liquidated damages of $1,000 or of $100 per day for each day of violation, whichever is greater;

(2) punitive damages, where appropriate; and

(3) reasonable attorney's fees and other investigation and litigation costs reasonably incurred.

RETENTION OF RECORDS

SEC. 107. All surveillance certificates and all documents used to support the issuance of surveillance certificates shall be retained for a period of not less than twenty years and shall be stored at the direction of the Attorney General under security procedures approved by the Director of Central Intelligence.

TITLE II—CONFORMING AMENDMENTS

AMENDMENTS TO CHAPTER 119 OF TITLE 18, UNITED STATES CODE

SEC. 201. Chapter 119 of title 18, United States Code, is amended as follows:

(a) Section 2511(2)(a)(ii) is amended to read as follows:

"(ii) Notwithstanding any other law, communication common carriers, their officers, employees, and agents, landlords, custodians, or other persons, are authorized to provide information facilities, or technical assistance to persons authorized by law to intercept wire or oral communications or to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Electronic Surveillance Act of 1978, if the common carrier, its officers, employees, or agents, landlord, custodian, or other specified person has been provided with—

"(A) a court order directing such assistance signed by the authorizing judge, or

"(B) a certification under oath and signed by a person specified in section 2518(7) of this title of the Attorney General of the United States that no warrant or court order is required by law, that all statutory requirements have been met, and that the specified assistance is required,

setting forth the period of time during which the provision of the information, facilities, or technical assistance is authorized and specifying the information, facilities, or technical assistance required. No communication common carrier, officer, employee, or agent thereof, or landlord, custodian, or other specified person shall disclose the existence of any interception or surveillance or the device used to accomplish the interception or surveillance with respect to which the person has been furnished an order or certification under this subparagraph, except as may otherwise be required by legal process and then only after prior notification to the Attorney General or to the principal prosecuting attorney of a State or any political subdivision of a State, as may be appropriate. No cause of action shall lie in any court against any communication common carrier, its officers, employees, or agents, landlord, custodian, or other specified person for providing information, facilities, or assistance in accordance with the terms of an order or certification under this subparagraph.".

(b) Section 2511(2) is amended by adding at the end thereof the following new provisions:

"(e) Notwithstanding any other provision of this title or section 605 or 606 of the Communications Act of 1934, it shall not be unlawful for an officer, employee, or agent of the United States in the normal course of his official duty to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Electronic Surveillance Act of 1978, as authorized by that Act.

"(f) Nothing contained in this chapter, or section 605 of the Communications Act of 1934, shall be deemed to affect the acquisition by the United States Government of foreign intelligence information from international or foreign communications by a means other than electronic surveillance as defined in section 101 of the Foreign Intelligence Electronic Surveillance Act of 1978, and procedures in this chapter and the Foreign Intelligence Electronic Surveillance Act of 1978 shall be the exclusive means by which electronic surveillance, as defined in section 101 of such Act, and the interception of domestic wire and oral communications may be conducted.".

(c) Section 2511(3) is repealed.

(d) Section 2518(1) is amended by inserting "under this chapter" after "communication".

(e) Section 2518(4) is amended by inserting "under this chapter" after "wire or oral communication" both places it appears therein.

(f) Section 2518(9) is amended by striking out "intercepted" and by inserting "intercepted pursuant to this chapter" after "communication".

(g) Section 2518(10) is amended by striking out "intercepted" and by inserting "intercepted pursuant to this chapter" after "communication" the first place it appears therein.

(h) Section 2519(3) is amended by inserting "pursuant to this chapter" after "wire or oral communications" and after "granted or denied".

TITLE III—EFFECTIVE DATE

EFFECTIVE DATE

SEC. 301. The provisions of this Act and the amendments made hereby shall become effective upon the date of enactment of this Act, except that any electronic surveillance approved by the Attorney General to gather foreign intelligence information shall not be deemed unlawful for failure to follow the procedures of this Act, if that surveillance is terminated or a surveillance certificate authorizing that surveillance is obtained under title I of this Act within ninety days following such date of enactment.

Mr. McCLORY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The amendment has been printed in the RECORD previously.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. McCLORY. Mr. Chairman, this is the substitute amendment about which there has been a great deal of information circulated. As a matter of fact, this is the substitute measure which has the support of a large number of Members on both sides of the aisle. A "Dear Colleague" letter was circulated bearing the signatures of 21 Democratic Members and 15 or 16 Republican Members, noting that this substitute was the preferable procedure for handling the subject of foreign intelligence and electronic surveillance.

What the substitute amendment does in essence, is to translate the existing Presidential guidelines issued formerly by President Ford and more recently by President Carter, into statutory form.

Let me say that the guidelines and restrictions are more circumscribed than are the provisions in the committee bill. For one thing there is a requirement that in order to engage in electronic surveillance of any foreign agent, foreign power, or a U.S. person, it has to be authorized by an executive department official who has been confirmed by the Senate. This is someone over whom we can exercise oversight.

If it relates to the exercise of electronic surveillance of a U.S. citizen, then it requires action by the President of the United States himself.

I do not think that there is any greater imposition on the executive department or Presidential responsibility contained in the substitute amendment. Nor is there any better way in which we can have executive department accountability. It seems to me that is where we want the accountability to be. The reason we have oversight committees is so that we can oversee what the executive does. If there are abuses, then we can take some appropriate action against them.

It is only the political personnel, the executive department officials, and the Members of Congress over whom the public has any control. We are the political entities in this great system of government, that we have and we are the ones that can be called to account for any abuses of our authority. And so it seems to me that this substitute is far superior to one which delegates to the judicial branch the authority to decide whether or not we shall have electronic surveillance.

If the judiciary abuses its authority, or serves as a patsy to the executive branch, and we find persons subjected to electronic surveillance who were not previously subjected, are we going to be able to discipline the court? Certainly not.

Or, if the judiciary denies the executive the opportunity to engage in electronic surveillance for our national security and defense purposes, are we going to be able to discipline the court? Certainly not.

If, for instance, the court decides that something that comes to its attention should be made public when, in fact, it should not be made public, is there any way to discipline the court? None whatsoever.

The only way we can discipline those charged with the responsibility regarding electronic surveillance of foreign intelligence is to repose that responsibility and accountability in the executive branch of the Government.

So, Mr. Chairman, in a sense, that is what my amendment does.

It is supported by all of the former intelligence officers, and by their entire

association. It is supported by virtually all of the former leaders in the intelligence community. If you wonder why we have support for the bill from those who have more recently been appointed, you will find that what they are saying, in effect, is that they can support the administration's bill. They can go along with it. They can live with it. And, of course, they are responding in a very obedient way to the demands of the executive.

The Washington Star has commented very favorably on this amendment. Former Deputy Attorney General Lawrence Silverman has commented favorably on this amendment.

The CHAIRMAN pro tempore. The time of the gentleman has expired.

(By unanimous consent, Mr. McCLORY was allowed to proceed for 1 additional minute.)

Mr. McCLORY. This is the last amendment. If this substitute can be adopted I can assure you that we will have effective electronic surveillance of foreign intelligence gathering while not experiencing any abuses. I can say under the existing executive guidelines that there is no evidence before our Committee on the Judiciary of any abuses, and I see none forthcoming. However, if any occur, we can find far more effective ways of taking care of them than the proposed bill.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment in the nature of a substitute offered by the gentleman from Illinois (Mr. McCLORY).

Mr. Chairman and my colleagues, the McClory substitute is opposed by the administration and every intelligence agency.

It will not clear up the overriding legal issue of whether warrants are or are not required. It will not change the existing situation in which field agents are hesitant to rely on the Attorney General's orders. It sets no standard of proof to guide the executive officials in approving surveillances. Even the current executive branch guidelines require the Attorney General to find probable cause to believe that the target is an agent of a foreign power.

It allows electronic surveillance of American citizens with no showing of any connection with any criminal activity required.

The substitute allows common carriers and others to refuse to provide assistance to the government in the conduct of foreign intelligence surveillances.

Mr. Chairman, the gentleman from Illinois talked about the editorial of the Washington Star in support of his substitute. We have editorials from the New York Times, the Washington Post, the Chicago Tribune, the American Bar Association, all in support of the committee's well-thought-out legislation.

We have a letter from former President Ford.

I have talked personally with former Attorney General Levi, the present Attorney General, the President of the United States and they are all in favor of this legislation.

This legislation is the result and the work product of 3 years of intensive study of hearings and reports of over six committees. To scrap it now after all this work would appear to me to be the height of irresponsibility.

I respectfully urge my colleagues to oppose the amendment in the nature of a substitute offered by the gentleman from Illinois (Mr. McCLORY).

Mr. WRIGHT. Mr. Chairman, I hope my colleagues will reject this additional attempt to alter and redirect the entire thrust of this carefully drafted bill.

Rarely in the years that I have spent in the Congress have I seen a bill which was the product of so many labors. Rarely have I seen one which has brought together often disparate thoughts into one well-crafted piece of legislation supported by practically all of the thinking elements of our society. It is a shame that we have failed, apparently, to recognize the care and precision with which this particular legislation has been drafted.

Not only do I hope that we will reject the total McClory substitute; I hope that when a separate vote is requested in the House, we will reflect very carefully upon what was done in haste yesterday and will reject the McClory amendment which does away with the requirement of a warrant.

The requirement of a warrant was asked for by the FBI Director, Mr. Webster, when he appeared before the committee. It was asked for by the Director of the CIA, Admiral Turner. It was asked for by Chief Hinman of the National Security Agency. It was agreed to by all of those people as a protection for the agents of the United States against the jeopardy they otherwise might face with respect to criminal prosecution or civil suits.

President Carter wants this committee bill passed. President Ford wants this committee bill passed. Civil liberties groups have embraced and endorsed the committee bill. The distinguished chairmen of the Intelligence Committee of the House, the International Relations Committee of the House, the Judiciary Committee of the House, and of the Armed Services, Appropriations, and Budget Committees of the House all want this committee bill passed. The 95 U.S. Senators who voted for its companion measure want this bill passed.

Most important of all, perhaps, the Directors of the Central Intelligence Agency, the National Security Agency, and the Federal Bureau of Investigation want this committee bill passed. They believe that it will strengthen and assist them and give them tools which they have needed for a long time, and that it will clarify their rights and remove the jeopardy in which their agents sometimes are presently placed.

Mr. Chairman, I do hope the Members will recognize the enormous amount of time that has gone into the crafting of this particular piece of legislation, will respect its carefully balanced provisions, and will reject the McClory substitute; and when the time comes, on a separate vote, will reverse the narrow margin by which yesterday, in haste, the House adopted an ill-considered amendment.

Mr. RUDD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as a former FBI special agent for 20 years who spent many of those years in the foreign intelligence area, I would implore this body to adopt the McClory substitute as an alternative to H.R. 7308.

Mr. Chairman, one of the benefits of this substitute over the committee's proposal is that it will accomplish the objective of tightening up the procedures for conducting electronic surveillance for foreign intelligence purposes without compromising essential speed in emergency and other special situations.

The McClory proposal does not open up the Pandora's box of judicial involvement in the intelligence process. However, it does insure public accountability of the executive branch in its conduct of intelligence operations by requiring a much greater involvement by Congress and particularly of the special intelligence committees which we have established for that purpose.

I sincerely believe that the McClory substitute adequately meets all of the concerns which have been raised about former intelligence surveillance without compromising the essential speed and confidentiality of the intelligence activities which would occur under the committee bill.

Mr. Chairman, I urge passage of the McClory substitute.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding.

I just want to point out that former President Ford, in his speech at the University of South Carolina, stated in part as follows:

> The Carter Administration has asked the Congress to pass much of that responsibility to the courts. The conduct of foreign policy is not a judicial function. Moreover, after this responsibility is split, it will no longer be possible for the American people to hold the President, his political appointees, and any involved Members of Congress responsible for misdeeds in this area.

President Ford's position has been made clear there that he does not subscribe to this business of passing the responsibility on to the courts. I would like to point out, too, that while it is true that the ACLU has tremendous input insofar as this legislation is concerned, this is merely a foot in the door. This is merely a foot in the door. What they really want to get a warrant requirement with regard to informants and informers of the FBI, and that is well known. Of course, the New York Times editorial of July 26 pointed out that in their opinion electronic surveillance was less offensive than an informant who intrudes on individuals and organizations and then informs the law enforcement agencies of the information that he has gathered. So I think that we should be very, very cautious before we venture into this area

of a warrant requirement for foreign intelligence surveillance. I am hopeful that on a rollcall vote we can have a favorable vote on this substitute and then move on by in effect translating the very valid guidelines that the Executive has established into statutory form for permanent control of foreign intelligence electronic surveillance.

I thank the gentleman for yielding.

Mr. RUDD. No intelligence agency, no police agency can operate very long without dependable sources, and that is why this McClory substitute is a necessary substitute for H.R. 7308.

Mr. Chairman, I yield back the remainder of my time.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would just take a brief few seconds to endorse what was recently said by the majority leader of the House, who I think eloquently stated in the well of the House the reasons why this McClory amendment, as well as the McClory amendment which was adopted by the House last night in haste, which will be revoted on in a few minutes, ought to be defeated.

H.R. 7308, which came out of the committee headed by the able gentleman from New Jersey (Mr. RODINO) and came out of the committee headed by the able gentleman from Massachusetts (Mr. BOLAND) is a very carefully developed bill which satisfies the unique and sometimes desperate needs of all of the intelligence community, those organizations and groups dealing with civil liberties in America, and those groups dealing with law enforcement. Mr. Chairman, it seems that if we deprive, take away—we strip away that protection. We strip away that device which gives security to those people and to all individuals, and then it seems to me that we have gutted the bill. I think instead of having the best of both worlds, we have the worst of both worlds.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

We have differences of opinion as to what a good foreign intelligence surveillance bill should provide, but I merely want to point out that the Committee on the Judiciary did not consider this legislation. As a matter of fact, what happened there was that there was a motion to table. The motion to table succeeded, and the matter remains in the Committee on the Judiciary right now, which in effect means that the bill is really not on the floor from the Committee on the Judiciary in any sense at all.

Mr. MAZZOLI. I appreciate the gentleman's comments. I think we spoke last night to the very point that the distinguished chairman of the subcommittee, the gentleman from Wisconsin (Mr. KASTENMEIER) conducted 3 days of very complete hearings and very vigorous debate, and I would say that probably in those 3 days this bill got as much attention as it might have gotten in many other committees of the House in perhaps weeks. It was a serious-minded effort, Mr. Chairman. I would hope that the Committee of the Whole House on the State of the Union would reject the gentleman's statement.

The McClory substitute and his amendment of yesterday would harm—not help—the Government's future ability to conduct surveillance of foreign persons in the United States.

First, it leaves a cloud of legal uncertainty over the surveillance of foreigners in the United States. There are grave doubts about the constitutionality of discriminating against all nonresident aliens simply on the basis of their being "foreigners." The Constitution requires reasonable grounds for any discrimination against aliens. The Supreme Court might easily find that there are no reasonable grounds for the blanket exclusion of all nonresident aliens from the fourth amendment warrant protection.

Second, this risk means that FBI agents and other intelligence officials will continue to act at their peril. Anyone who proceeds with the Attorney General's approved only—and no judicial warrant—has no certainty that his acts are constitutional. This is likely to keep intelligence agents from acting vigorously because their conduct might still, in the future, be considered illegal.

Third, the Attorney General himself will surely be reluctant to approve surveillances of nonresident aliens as long as these doubts persist. Without a warrant, he is left where he is now. He needs the support of legislation that includes a warrant to resolve any serious constitutional doubts in this area.

The purpose of the bill is to assure that the legality of surveillance is as clear as possible. Limiting the warrant to U.S. persons or having no warrants at all does not achieve that goal. Instead, it raises new constitutional questions that will inhibit intelligence gathering.

AMENDMENT OFFERED BY MR. GONZALEZ TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. M'CLORY

Mr. GONZALEZ. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

POINT OF ORDER

Mr. MURPHY of Illinois. Mr. Chairman, a point of order.

The CHAIRMAN pro tempore. The gentleman will state it.

Mr. MURPHY of Illinois. Mr. Chairman, this amendment is not germane in that it is not timely printed in the RECORD. The gentleman came up to us just a few minutes ago and said the gentleman had printed it in the RECORD yesterday; but the rule issued July 12 requires it be reported 3 legislative days prior to consideration.

The CHAIRMAN pro tempore. The Chair will rule that the rule applies to amendments to the bill and not to amendments to amendments. In this case we have an amendment to a substitute amendment, so the rule does not apply.

The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. GONZALEZ to the amendment in the nature of a substitute offered by Mr. MCCLORY: On page 24, line 24, after "SEC. 104" insert "(a)".

On page 25, after line 6 insert:

(b) In April of each year, the Attorney General shall transmit to the Administrative Office of the United States Courts and to Congress a report setting forth with respect to the preceding calendar year—

(1) the total number of applications made for orders and extensions of orders approving electronic surveillance under this title; and

(2) the total number of such orders and extensions either granted, modified, or denied.

(c) And in April of each year the Attorney General shall transmit a report to the appropriate Member of Congress or Congressional Committee on any information gathered by virtue of this act regarding any foreign government's attempt to improperly influence Congress, suborn individual Members or to threaten a Member.

Mr. GONZALEZ. Mr. Chairman, I offer this amendment to the amendment in the nature of a substitute offered by the gentleman from Illinois (Mr. MCCLORY) because it is the only opportunity that I have a chance to bring up a matter that I thought had been properly taken care of in other sections of the bill; but after looking at the bill and making a reading of the bill, I find that every consideration seems to have been given to the executive branch of the Government, to the FBI, to the CIA and the other surveillance agencies, but nothing safeguarding the basic rights of Members of Congress.

Let us suppose that in the course of a foreign intelligence wiretap or microphone surveillance, information is gathered that indicates some foreign power is attempting to bribe or otherwise suborn a Member of Congress. This is information that the Congress needs to know in order that we may protect our integrity, but the bill does not require, nor does the substitute amendment, that reports bearing on the integrity of the Congress be made available to us.

My experience has been that most statutes, such as those in title XVIII that make it mandatory for the FBI to investigate any threats of violence against the Congress, the FBI interprets that to mean they should investigate, but never report to the Congressman involved.

I have had three cases in which I have been unable to this day to get a written report from the FBI concerning information pursuant to threats that the FBI investigated; so that is the interpretation these agencies have given the statutes we have written for our protection.

Now, let us continue here and say that we have this hypothetical situation. A foreign intelligence gathering system reflects after our surveillance agencies have found out by virtue of the powers we give them in this act that a Member or Members of Congress are involved. The Executive can sit back with this information. He does not have to impart

it to the Members or other Members of Congress.

Let us suppose further that a surveillance indicates some dishonest behavior on the part of a Member. Does the bill require that a complete and immediate investigation be undertaken, and that the House be informed? It does not. Instead, such information can be held at the leisure and the pleasure of the Executive, the President, who may use it in any way he pleases. Can we imagine what would have happened just a few years ago with that power?

Let us suppose that one of our colleagues has in some way become entangled with a foreign government. Should we not know this? And should we not know if some foreign power is attempting to sway our actions one way or another? But the bill does not require that we be informed.

These are not hypothetical problems. There have been occasions in the past in which I have some good reason to know that there has been some forbearance in the case of Members who feared some retaliation on the part of the executive branch or who feared prosecution. If the Speaker or the Ethics Committee had known of any investigations involving these Members, there could have been some actions taken to disqualify at least the votes rendered in that case, if the House had been informed of the action of other governments in the past.

For instance, let us take the case of the Korean Government. We could have averted scandal and tragedy. As it is, we do not know what actions might have been taken to protect individual Members from being suborned, to protect the integrity of the House, and, as I have said, to cause even Members influenced by actions of Korean agents to disqualify themselves from voting on issues involving that country. The existence of such a system to help assure our own integrity would have caused that government never to have attempted to play its game of influence.

This bill does not address such questions. Because of the fact that the rule made it impossible to offer any amendment after the discovery of the need for it during the debate and because of the 3-day legislative rule, the only chance I have had to offer this amendment for consideration is under these circumstances as an amendment to the amendment offered by the gentleman from Illinois (Mr. McCLORY).

It is certainly true that intelligence gathering is in the national interest. I am not certain that civil rights are best protected by legitimizing what amounts to warrantless search. I am even less certain that a special court has any more competence to protect individual rights than any other court.

This bill has profound importance, because it establishes in law practices that heretofore have been of at best questionable legality, and confirms in law Presidential powers that have heretofore only been claimed to exist, never really legitimized. We are dealing here with questions that affirm—if we pass this bill—powers that Presidents have claimed they had, implicit powers or residual powers—previously undefined. These are but poorly charted constitutional grounds, and none of us should mistake the fact that we are in fact creating new powers here, in the name of confining quasi-legal practicies to some definable procedural law.

This is why this bill is embraced by the administration; it assures that the powers it now exercises only in legal peril can hereafter be exercised with impunity. We are confining nothing; we are confiding wholly new powers instead.

The CHAIRMAN pro tempore. The time of the genteman from Texas (Mr. GONZALEZ) has expired.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the gentleman from Texas (Mr. GONZALEZ) brings an amendment to us late in the day. This bill has been under consideration for over 3 years. At least during the last 6 or 7 months or during the whole session of this Congress it has been thoroughly considered, and the gentleman brings this amendment to us at this late date. I am not saying that what the gentleman has to say is not meritorious, but this is not the manner to bring it up and discuss it in the waning moments of the consideration of the bill.

I urge my colleagues to reject this amendment. Then we will invite the gentleman from Texas (Mr. GONZALEZ) before our committee. I would be happy to have the gentleman testify before the committee and bring any information in that he has. The gentleman talks about a Member of Congress who might have been involved in the Korean scandal. My understanding of the situation is that the Member who pleaded guilty in that matter was engaged actively in the bribery that came about, so I do not imagine that if he was told about it ahead of time, it would have made much difference.

Mr. GONZALEZ. Mr. Chairman, will the distinguished chairman of the subcommittee yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Chairman, my amendment has been offered at a late date, for which I have apologized, but because of the fact of the narrowness of the rule accompanying this bill, I believe that had we been untrammeled in our consideration of the bill, I could have offered the amendment in a timely fashion.

Mr. MURPHY of Illinois. Mr. Chairman, does the gentleman realize that the rule was granted on July 12?

Mr. GONZALEZ. Right.

Mr. MURPHY of Illinois. The rule was granted on July 12, and the gentleman had from July 12 until last week to put his amendment into the RECORD.

Mr. GONZALEZ. That is correct.

Mr. MURPHY of Illinois. Does the gentleman say that is not enough time?

Mr. GONZALEZ. Mr. Chairman, it is a question of the sufficiency of that kind of a rule and the fact that this ought to be a body that should be untrammeled in the free flow of debate, because there are many things involved, and even if one knows of the existence of a rule, since one is not a member of the committee, he is going to have to wait for the full general debate and get the fine nuances of the facts before offering an amendment.

Mr. MURPHY of Illinois. There have been over 50 amendments printed in the RECORD, and I would imagine there have been over 100 "Dear Colleague" letters circulated.

Mr. GONZALEZ. Mr. Chairman, although, as I said, I admit that maybe we should have acted sooner, I want to get to the merits and the sufficiency of this amendment.

If the gentleman will bear with me a little further, this amendment encompasses what the gentleman has in the bill now accept the last four lines, in which I provide for a report to be made in a case involving an individual Member of the committee or of the House, and it provides that he will be informed. That is the only thing involved.

Will a Member have an opportunity to be informed that surveillance has discovered that he is involved? He may be an unwitting victim. Yet we are saying the executive branch ought to be the sole and exclusive judge as to his comportment and it is under no obligation to convey that information to him.

Mr. MURPHY of Illinois. Mr. Chairman, let me say to the gentleman that the intelligence agencies have to report to this committee on a semiannual basis, and they have to report all warrants or wiretaps taking place.

The counterintelligence division of the FBI talks to us constantly about the nature of the Soviet involvement within this country. I can assure the gentleman, speaking as chairman of the Legislative Committee, and, I am sure, the gentleman from Massachusetts (Mr. BOLAND), as chairman of this committee, that we would be glad to inquire of the FBI; and when we get that information I can assure the gentleman that we would inform any Member if any foreign government were attempting to influence Members of this House. The gentleman has my word.

Mr. GONZALEZ. I know the gentleman is very sincere in that.

Let me just add one thought, in addition. Let us look what we are doing now in the case of Korea. We are actually providing that Members be exposed, under no protection of our traditional constitutional rights, in the case of the interrogation of the former Korean ambassador. He could involve in his testimony an innocent Member who is wholly and completely vulnerable to the whims of a particular foreign agent.

Mr. MURPHY of Illinois. The gentleman has me at a disadvantage. I am not a member of the Ethics Committee that undertook the investigation into the Korean scandal. I do not think this is the forum or the time to discuss this. I know Members of Congress have been accused. I would like to afford any Member his day in court which is his due. I do not wish to discuss it on the floor. I have no information with relation to that.

The CHAIRMAN pro tempore. The time of the gentleman from Illinois (Mr. MURPHY) has expired.

(On request of Mr. CHARLES H. WILSON

of California and by unanimous consent, Mr. MURPHY of Illinois was allowed to proceed for 1 additional minute.)

Mr. CHARLES H. WILSON of California. Mr. Chairman, if the gentleman will yield, I do not want to discuss Korea, especially; but I was a little concerned, though, that the principal argument the gentleman had against the Gonzalez amendment was that it was submitted at a late hour in the day. When is a good time to submit an amendment? Would the gentleman tell me, please? What time of the day should we put in our amendments?

Mr. MURPHY of Illinois. If the gentleman will yield, a rule was granted on July 12. We had hearings for a year and one-half prior to that. This bill has been under consideration for 3 years.

Mr. CHARLES H. WILSON of California. Is there some rule that we have that prohibits a Member from putting in an amendment or that says when to put in amendments?

Mr. MURPHY of Illinois. We live by and go by the Rules of the House. The gentleman is aware of the open and closed rules. We do not need to get into that now.

I would like to say that I can assure the gentleman from Texas, as chairman of the Legislative Subcommittee, I will make inquiry into all of the intelligence agencies as to whether they have any information about any foreign government attempting to influence legislators.

The CHAIRMAN pro tempore. The time of the gentleman from Illinois (Mr. MURPHY) has again expired.

(On request of Mr. BOLAND and by unanimous consent, Mr. MURPHY of Illinois was allowed to proceed for 1 additional minute.)

Mr. BOLAND. Mr. Chairman, if the gentleman will yield, in response to the question propounded by my friend, the distinguished gentleman from California (Mr. CHARLES H. WILSON), frankly, I do not think either the gentleman from Illinois (Mr. MURPHY) or myself can give a very sound answer when amendments are to be offered. My only suggestion is you do not offer them after 9 o'clock at night because nobody seems to get any amendments adopted at that time. And I think the gentleman from California understands the response of the gentleman from Illinois (Mr. MURPHY) with reference to the rule itself which was granted on July 12. We then had 3 legislative days prior to consideration of this bill for any amendments to be printed in the RECORD. As the gentleman indicated, we have had something like 50 amendments, and maybe even more than that.

I think we have a reasonable rule. I do not think anybody can quarrel with that rule. I can understand the concern of the gentleman from Texas about this particular matter and, so far as this Committee is concerned, the assurance that has been given by the chairman of the Legislative Subcommittee I would agree with, and this is a matter which ought to be looked at a little bit more carefully. I do not think this is the time to do it.

Mr. Chairman, I oppose the amendment.

Mr. KAZEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to remind my good friend, the gentleman from Illinois, concerning the question of time limits on amendments, this is the very first opportunity that the gentleman from Texas has had to offer this amendment, since it would not have been in order under the rule before this time, until the gentleman from Illinois (Mr. MCCLORY) offered his amendment. This is an amendment to the McClory amendment. If the Gonzalez amendment is too late, the McClory amendment is too late. But so far as the timeliness is concerned, this is the earliest opportunity in the entire debate, in the entire consideration of this bill, that the gentleman from Texas had to offer his amendment.

I am not debating the merits of the amendment. I am questioning the point that the gentleman from Illinois has made on the procedure in this matter.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas (Mr. GONZALEZ) to the amendment in the nature of a substitute offered by the gentleman from Illinois (Mr. MCCLORY).

The amendment to the amendment in the nature of a substitute was rejected.

The CHAIRMAN pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Illinois (Mr. MCCLORY).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. MCCLORY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 128, noes 249, not voting 55, as follows:

[Roll No. 734]

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Richmond against.

Mr. Kasten for, with Mr. Zeferetti against.

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

Mr. BURLISON of Missouri. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I believe that legislation is needed to clear up the existing confusion and uncertainty surrounding the use of electronic surveillance, and that H.R. 7308, as reported, is best calculated to achieve this purpose.

For the past year I have had the privilege and responsibility of chairing the Intelligence Committee's Subcommittee on Program and Budget Authorization. I also serve on the Appropriations Subcommittee on Defense. As a result, I have spent a good deal of my time meeting with intelligence officials. I have attempted to use these meetings, the resources of the committee, and the budget authorization process itself, to obtain a useful understanding of the workings and complexities of our intelligence agencies.

In so doing, I have come to a few basic conclusions:

The people working in our intelligence services are competent men and women of good faith, dedicated to serving the national interest.

Occasionally, their view of what is in the national interest is clouded by their very dedication.

In its programmatic and budget concerns the intelligence community behaves like any other Government bureaucracy that must seek funding from the Congress.

These conclusions are not by any means novel or the result of any particular insight. But they did aid me in thinking through my position on H.R. 7308 when it came to the full committee from the Subcommittee on Legislation.

I do support this measure but, as my colleagues on the committee know, I had to be convinced.

The first question I had to answer for myself was whether electronic surveillance was a necessary and efficient method of obtaining needed foreign intelligence information. So I spoke to intelligence officials, listened to their testimony at both open and closed hearings, read the budget justification books, and made myself aware of some of the product of electronic surveillance activities. As a result, I concluded that such activities are, indeed, an essential part of our intelligence operations.

My next endeavor was to determine if legislation was needed to authorize, regulate, or control such activities. It soon became readily apparent that the answer was "yes"—not only because of the well known excesses and abuses committed pursuant to national security wiretaps, but also because of the political and legal uncertainties which surround the use of electronic surveillance.

Clearly, it seemed to me, our intelligence agents need legislation to authorize and legitimize their activities; and other American citizens need legislation to protect their legitimate privacy rights.

So, the question then became one of deciding whether H.R. 7308, with its judicial warrant requirement, was the proper legislation.

Having been a county prosecuting attorney for several years, I was familiar with warrants and the concepts behind them. I know the protections warrants afford, and that activities engaged in pursuant to a judicial warrant were more readily accepted as proper by the people of the community.

But I was also skeptical. I wondered if the bill's standards and procedures went too far. Was there an overreaction that would thwart our intelligence collection efforts?

I talked to some intelligence officials. I read their statements. I listened to their testimony given in executive session.

I heard the Director of Central Intelligence say that H.R. 7308 was good legislation that would not unduly burden intelligence collection.

I heard the Director of the National Security Agency state his unqualified support for H.R. 7308, as reported by the Intelligence Committee.

I heard the Director of the FBI say that the bill and its warrant requirement, including a warrant for embassies and other official foreign powers, would facilitate the work of and improve the morale of his agents.

I also heard Director Webster state that the bill's compromise version of a criminal standard for surveilling Americans was fully supported by him, because it was not the criminal standard required for law enforcement warrants.

Finally, I heard the Attorney General say that both he and the field agent needed the protections that could best be provided by a warrant, and that passage of H.R. 7308 would facilitate, not hinder, intelligence collection.

In summary, I have become convinced that electronic surveillance is a means of intelligence collection that must be utilized; that it is susceptible to abuse if not regulated by statute; and that H.R. 7308, as reported is carefully balanced legislation that will authorize needed intelligence activities while protecting the legitimate interest of our intelligence agents and our people. I hope the House will overturn the McClory amendment in the full House and pass the bill.

Mr. McCLORY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it is my understanding that a separate vote will be requested with regard to amendment No. 2, the McClory amendment that was adopted yesterday by a very narrow margin. I know there has been a great deal of activity undertaken to try to switch votes in order to try to change the outcome of that vote result when we get to the separate vote on that amendment after we return to the House. I am hopeful that the Members will hold the line and will, indeed, support this important amendment. I do not want any confusion as to the substitute that we just voted upon. The substitute was, indeed, my legislation. It was my view that we should establish clear statutory guidelines for conducting foreign intelligence surveillance. But my proposal would have eliminated the warrant requirement with regard to all foreign intelligence surveillance. It would have eliminated the court proceedings from the entire picture, and it would have done other things that I felt were desirable.

The amendment that I offered yesterday, which was favorably acted upon, was an amendment which would eliminate the warrant requirement for all except U.S. persons. In other words, there would be no need to go to a judge and have a judge decide whether or not the executive branch could conduct foreign intelligence surveillance. We are only talking about foreign powers and foreign agents and we are only talking about that insofar as national security is concerned. We are only talking about targeting foreign agents and foreign powers that will be defined in this bill. So the only change that would result from my amendment is that we would not have to go to a judge when we want to engage in foreign intelligence, national security intelligence, when these foreign powers or foreign agents are involved.

With regard to U.S. persons, we would still have this requirement. We know, that after the adoption of my amendment, we adopted overwhelmingly an amendment that will eliminate the special court, so that in the situation we are in now with no special court, unless we retain the McClory amendment, is that we will have a large barrage of applicants for warrants, which would be very burdensome for the district courts throughout the entire country.

In my opinion, the House acted very wisely in eliminating the special courts. This unprecedented provision for a special court with special prerogatives, special tenure, and all that sort of thing was appropriately eliminated from the bill; but without that and with a warrant requirement that would be so far reaching as to reach every foreign agent and every foreign power it seems unthinkable to me that we would want to restore such a provision.

I might say that the committee did adopt an amendment in the committee, which was my amendment No. 9, which excludes a large part of the foreign intelligence surveillance from the warrant requirement, where foreign powers are communicating with each other.

It seems to me appropriate that we should also eliminate the warrant requirement when we want to target in on foreign agents or foreign powers, by radio, telephone, even by television. Without my amendment you could not televise the Soviet Embassy unless you first got a court order. Now, how absurd can you get?

It seems to me the McClory amendment makes a lot of sense. It makes a

much better bill than the bill that the committee reported.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, first of all, I want to commend my colleague, the gentleman from Illinois. I know often work is done around this Chamber that is not appreciated by all of us; but I cannot express my appreciation enough for what the gentleman has done. The gentleman from Illinois has been diligent and worked hard and been on the right track.

Let me repeat what the gentleman said. I think the McClory amendment is absolutely necessary to this legislation. I am one who over the time we have been hearing this legislation gradually developed the view that we probably ought to wait until next year until the charter legislation comes up and tie this all together. But if this bill is necessary I think we should at least have the McClory amendment as a part of it.

In a lighter vein, let me say to my colleague that I have been the author of four amendments in the last session that have been rejected when we went into the House. Those who were listening to the debate voted for them and then when we go back in the Whole House in a separate vote, quite often the good intelligence and good sense of the Members have been reversed for some mysterious reason.

I hope this does not happen to the gentleman from Illinois, but it has happened to me four times in the last year.

Mr. Chairman, I had hoped that this bill could be amended enough so it could be supported by those of us who are concerned about the state of our Nation's security.

H.R. 7308 has been recommended to us as both a bill to authorize surveillance in foreign espionage and terrorism cases, and as a protection for the American people. The bill as it now stands does not do enough of either. The protections for foreign agents are too broad while the authorization to surveil them is too narrow. The only effect this bill will have on the freedom of the American people is to weaken the defenses we have against foreign agents and terrorists. If we cannot protect our country, we will really lose our freedoms.

During the next session Congress will be considering charter legislation for the intelligence agencies. The argument for such legislation is that it will provide "a carrot and a stick" for the intelligence community. "A carrot" in the sense that it will protect them by spelling out their duties and responsibilities. "A stick" in the sense that it will spell out restrictions. H.R. 7308 will upset that balance by placing some of the restrictions on in advance. Foreign intelligence wiretaps are clearly part of the charter package. In fact, this bill, or its equivalent, appears as title III in the proposed charter bill.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let the members of this committee understand precisely what we are going to vote on when we ask for a separate vote on the McClory amendment. That amendment would delete the warrant requirements for all targets—all targets, except U.S. persons.

I join with my distinguished friend, the gentleman from Ohio (Mr. ASHBROOK) in commending the gentleman from Illinois (Mr. McCLORY) for the gentleman's continual and persistent work on this particular bill. It has not been easy. We started at 3 o'clock yesterday afternoon, wound up after 9 o'clock last night. We started at some time around 2 o'clock today and it is now 6 o'clock in the evening; so we have spent considerable time on it.

Let me also say to the members of this committee that we have accepted a number of amendments that have been offered by Members on the other side of the aisle and also some offered by Members on this side. We have to go to conference on this bill. That is going to be a very difficult conference. The Senate bill is a bill which was not acceptable to a lot of the Members on both sides of this aisle, and because it was not accepted, some of the Members on both sides of the aisle, and to the members of the Select Committe on Intelligence, we perfected the Senate bill and brought the bill that we are now discussing to the floor and adopted the McClory amendment that we hope will be knocked out when we come to a separate vote on that particular amendment.

Mr. Chairman, all the intelligence committee agents and all the agents of our intelligence communities oppose the McClory amendment. It would be open season, it seems to me, on all foreign visitors. Tradesmen, athletes, teachers—you name them—anybody coming to the United States, whether they are from Russia, France, England, or any nation, if they are foreigners, they would be subject to surveillance without a warrant under the terms of the McClory amendment.

Need I recall for the Members the abuses that have occurred in the past, in years gone by?

All of these abuses or the majority of them that were detailed by the Church committee, detailed by the Pike committee, or detailed by any committee that has looked into this particular matter have been made known. These abuses occurred, because there was surveillance of foreign embassies and foreigners, and American names became involved. Then the names of those Americans were turned over to someone else in the administration that was in power at that time, be it a Republican administration or a Democratic administration.

Mr. Chairman, that is what we are trying to get rid of here. We are trying to get rid of the abuses. This bill was submitted by President Ford and by Attorney General Levi, and it was resubmitted by President Carter and Attorney General Bell. Their position is that this bill is a well-balanced bill, one that protects the national interests and the national security. It also protects, as I say, the constitutional rights of American citizens and foreigners who are in this land and who are entitled to the same protection under the fourth amendment as U.S. persons who are permanent resident-alien.

Mr. Chairman, it would be a disaster for this committee to accept the amendment offered by the gentleman from Illinois (Mr. McCLORY). We would then bring this bill to conference, and do we think that the other body is going to cave in on this amendment? This is a disastrous amendment. It ought to be rejected. I hope it is soundly defeated when we get back into the House and vote on it.

The CHAIRMAN pro tempore. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN pro tempore. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MURTHA, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 7308) to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information, pursuant to House Resolution 1266, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole?

Mr. BOLAND. Mr. Speaker, I demand a separate vote en bloc on the McClory amendments agreed to on September 6, and I demand a separate vote on the conforming McClory amendments agreed to today.

The SPEAKER. Is a separate vote demanded on any other amendment to the Committee amendment? The Clerk will report the amendments en bloc on which a separate vote has been demanded.

PARLIAMENTARY INQUIRIES

Mr. BAUMAN. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BAUMAN. Mr. Speaker, is it proper for the gentleman from Massachusetts (Mr. BOLAND) to demand a separate vote en bloc on the amendments, or must he ask for a vote on each one of these amendments?

The SPEAKER. The Chair will state that the rule provides that it shall be in order to consider the amendments en bloc, so under the rule the vote on the amendments would be considered as on the amendments en bloc.

Mr. BAUMAN. The amendments were considered en bloc?

The SPEAKER. Yes, under the rule.

Mr. BAUMAN. Mr. Speaker, am I correct that the original McClory amendment was considered separately and that the several others were adopted subsequently?

Mr. McCLORY. Mr. Speaker, if the gentleman will yield, I might inform the gentleman that the conforming amendments were considered separately, and the other amendments were considered en bloc.

Mr. BAUMAN. Mr. Speaker, may I inquire, on which amendment is it that the gentleman from Massachusetts (Mr. BOLAND) demands a separate vote? I wish the Chair would let the House know so we will know what we are voting on.

The SPEAKER. The Chair will state that the amendments offered by the gentleman from Illinois (Mr. McCLORY) that were agreed to yesterday will be voted on en bloc today. That is in conformance with the demand made by the gentleman from Massachusetts (Mr. BOLAND).

Mr. BAUMAN. A further parliamentary inquiry, Mr. Speaker.

The gentleman mentioned the McClory amendment and all amendments agreed to en bloc. So do we now face three or four separate votes?

The SPEAKER. The McClory amendment agreed to today is a separate amendment.

The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: Page 39, strike out line 1 and all that follows down through line 12 on page 41 and insert in lieu thereof the following:

AUTHORIZATION FOR ELECTRONIC SURVEILLANCE FOR FOREIGN INTELLIGENCE PURPOSES

SEC. 102. (a) An application for a court order under this title is authorized if the President has, in writing, authorized the Attorney General to approve applications to a court having jurisdiction under section 103. A judge to whom such an application is made may, notwithstanding any other law, grant an order in accordance with section 105 approving electronic surveillance of a United States person who is a foreign power or an agent of a foreign power for the purpose of obtaining foreign intelligence information.

(b)(1) If the target of electronic surveillance for the purpose of obtaining foreign intelligence information is not a United States person, such electronic surveillance may be authorized by the issuance of a surveillance certificate in accordance with subsection (c).

(2) Electronic surveillance authorized under this subsection may be authorized for the period necessary to achieve its purpose, except that—

(A) if the target of the surveillance is not a foreign power, the period of the surveillance may not exceed ninety days; and

(B) if the target of the surveillance is a foreign power, the period of the surveillance may not exceed one year.

(3) Electronic surveillance authorized under this subsection may be reauthorized in the same manner as an original authorization, but all statements required to be made under subsection (c) for the initial issuance of a surveillance certificate shall be based on new findings.

(4)(A) Upon the issuance of a surveillance certificate under this subsection, the Attorney General may direct a specified communication common carrier—

(i) to furnish any information, facility, or technical assistance necessary to accomplish the electronic surveillance unobtrusively and in such a manner as will protect the secrecy of such surveillance and will produce a minimum of interference with the services that such common carrier provides its customers: and

(ii) to maintain any records concerning such surveillance or the assistance furnished by such common carrier that such common carrier wishes to retain under security procedures approved by the Attorney General and the Director of Central Intelligence.

(B) Any such direction by the Attorney General shall be in writing.

(C) The Government shall compensate any communication common carrier at the prevailing rate for assistance furnished by such common carrier pursuant to a direction of the Attorney General under this paragraph.

(c) A surveillance certificate issued under subsection (b)(1) shall be issued in writing and under oath by the Attorney General and an executive branch official or officials designated by the President from among those officials employed in the area of national security or national defense who were appointed by the President by and with the advice and consent of the Senate, and shall include—

(1) a statement—

(A) identifying or describing the target of the electronic surveillance, including a certification of whether or not the target is a foreign power or an agent of a foreign power; and

(B) certifying that each of the facilities or places at which the surveillance is directed is being used or may be used by a foreign power or an agent of a foreign power;

(2) a statement of the basis for the certification under paragraph (1)—

(A) that the target of the surveillance is a foreign power or an agent of a foreign power; and

(B) that each of the facilities or places at which the surveillance is directed is being or may be used by a foreign power or an agent of a foreign power;

(3) a statement of the proposed minimization procedures;

(4) a statement that the information sought is foreign intelligence information;

(5) a statement that the purpose of the surveillance is to obtain foreign intelligence information;

(6) if the target of the surveillance is not a foreign power, a statement of the basis for the certification under paragraph (4) that the information sought is foreign intelligence information;

(7) a statement of the period of time for which the surveillance is required to be maintained;

(8) a statement of the means by which the surveillance will be effected;

(9) if the nature of the intelligence gathering is such that the approval of electronic surveillance under subsection (b) should not automatically terminate when the described type of information has first been obtained, a statement of the facts indicating that additional information of the same type will be obtained thereafter;

(10) a statement indicating whether or not an emergency authorization was made under section 105(e); and

(11) if more than one electronic, mechanical, or other surveillance device is to be involved with respect to such surveillance, a statement specifying the types of devices involved, their coverage, and the minimization procedures that will apply to information acquired by each type of device.

Page 47, strike out lines 4 through 14 and redesignate the succeeding subsections accordingly.

Page 48, line 24, strike out ", if the target is a United States person,".

Page 50, strike out line 22 and all that follows down through line 6 on page 51, and redesignate subsections (d) through (g) accordingly

Page 51, line 9, strike out ", except that" and all that follows down through line 13 and insert in lieu thereof: ".".

Page 51, line 17, strike out ", except that an" and all that follows down through line 23 and insert in lieu thereof: ".".

Page 52, strike out lines 11 and 12 and insert in lieu thereof the following:

(2) the factual basis exists for the authorization of such electronic surveillance;

Page 52, beginning on line 14, strike out "if a judge" and all that follows through the period on line 20 and insert in lieu thereof the following: "if the otherwise applicable procedures of this title are followed as soon as practicable, but not more than twenty-four hours after the Attorney General authorizes such surveillance. In addition, if the target of such electronic surveillance is a United States person, the Attorney General or his designee shall at the time of such authorization inform a judge having jurisdiction under section 103 that the decision has been made to employ emergency electronic surveillance.".

Page 52, beginning on line 23, strike out "for the issuance of a judicial order".

Page 52, line 24, insert "or surveillance certificate" after "a judicial order".

Page 53, line 5, strike out "such" and insert in lieu thereof "an".

Page 53, line 5, insert "or a surveillance certificate is not issued" after "approval is denied".

Page 53, line 6, insert "or surveillance certificate" after "order".

Page 59, line 3, strike out "application, order," and insert in lieu thereof "application and order or the surveillance certificate".

Page 59, line 18, strike out "applications or orders" and insert in lieu thereof "applications, orders, or surveillance certificates".

Page 60, line 8, strike out "application, order," and insert in lieu thereof "application and order or surveillance certificate".

Page 60, line 14, insert "surveillance certificate," after "order,".

Page 68, line 12, insert "or surveillance certificate" after "order".

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. BAUMAN. Mr. Speaker, reserving the right to object. I do so only to ask the gentleman from Illinois (Mr. McCLORY) a question.

The pending amendment now to be voted on is not a series of amendments en bloc, but only the amendment which was adopted yesterday in the Committee of the Whole: is that correct?

Mr. McCLORY. If the gentleman will yield, that is correct. The only thing that has occurred since the adoption of the McClory amendment yesterday was the adoption today by unanimous consent of two conforming amendments.

We had attempted to have those conforming amendments embodied in the bill yesterday, but that request was refused; so we did offer those conforming amendments today.

Mr. BOLAND. Mr. Speaker, if the gentleman will yield, in response to the question of the gentleman from Maryland, let me say that the amendment that we will be voting on is the McClory amendment No. 2, which deletes the warrant requirements of U.S. persons. The other amendments which were offered and accepted today by the Committee were accepted en bloc. But they are conforming amendments which will conform to the amendment that was offered yes-

terday by the gentleman from Illinois and accepted by the Committee.

Mr. McCLORY. Mr. Speaker, if the gentleman will yield further, I would say that there is this aspect involved, too: There was the Railsback amendment to my amendment which was adopted today, and I do not see how we can have a separate vote on that by putting them all en bloc. I think that what we require is separate votes, a separate vote on my amendment, and, if you wish to have a separate vote on other amendments, to request them separately.

Mr. BAUMAN. Mr. Speaker, further reserving the right to object, I just want the assurance of the Chair that we are voting on nothing but the McClory amendment adopted last night by the Committee. Is that correct?

The SPEAKER. The Chair must say, as modified today by the Railsback amendment.

Mr. BAUMAN. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to dispensing with further reading of the amendment?

There was no objection.

The SPEAKER. The question is on the amendment.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. McCLORY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 176, nays 200, not voting 56, as follows:

[Roll No. 735]

| Duncan, Oreg. | Pettis | Young, Alaska |
| Fary | Pressler | Young Tex. |
| Fraser | Quie | Zeferetti |
| Frey | Quillen | |

The Clerk announced the following pairs:

On this vote:

Mr. Waggonner for, with Mr. Richmond against.

Mr. Teague for, with Mr. Zeferetti against.

Mr. Kasten for, with Mrs. Burke of California against.

Mr. Symms for, with Mr. Dent against.

Mr. Hagedorn for, with Mr. Diggs against.

Mr. Fuqua for, with Mr. Yatron against.

Mr. Guyer for, with Mr. Drinan against.

Mr. Kemp for, with Mr. Hawkins against.

Mr. Rhodes for, with Mr. Mikva against.

Mr. Badham for, with Mr. Miller of California against.

Mr. Hansen for, with Mr. Fary against.

Until further notice:

Mr. Byron with Mr. Abdnor.

Mr. Duncan of Oregon with Mr. Burke of Florida.

Mr. Fraser with Mr. Cochran of Mississippi.

Mr. Gibbons with Mr. Johnson of Colorado.

Mr. Ammerman with Mr. Caputo.

Mr. Huckaby with Mr. Armstrong.

Miss Jordan with Mr. Krueger.

Mr. Lehman with Mrs. Pettis.

Mr. Rangel with Mr. Del Clawson.

Mr. Rooney with Mr. Thone.

Mr. Shipley with Mr. Crane.

Mr. Sisk with Mr. Pressler.

Mr. Thornton with Mr. Wiggins.

Mr. Tsongas with Mr. Young of Alaska.

Mr. Frey with Mr. Quie.

Mr. Skubitz with Mr. Quillen.

So the amendment was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. EVANS of Colorado). The Clerk will report the conforming amendments upon which a separate vote has been demanded.

The Clerk read as follows:

Conforming amendments: Page 50, strike out line 22 and all that follows down through line 13 and insert in lieu thereof: ".".

Page 51, line 17, strike out ", except that an" and all that follows down through line 23 and insert in lieu thereof: ".".

The SPEAKER pro tempore. The question is on the conforming amendments.

The conforming amendments were rejected.

The SPEAKER pro tempore. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. M'CLORY

Mr. McCLORY. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. McCLORY. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. McCLORY moves to recommit the bill, H.R. 7308, to the Select Committee on Intelligence with the instructions to report back the same to the House forthwith with the following amendments:

Page 39, strike out line 10 and all that follows down through line 17 and insert in lieu thereof: "at a foreign power as defined in section 101(a) (1), (2), or (3); and".

Page 47, strike out line 4 and all that follows down through line 14, and redesignate subsections (c) and (d) accordingly.

Page 50, strike out line 22 and all that follows down through line 6 on page 51, and redesignate subsections (d) through (g) accordingly.

Page 51, line 9, strike out ", except that" and all that follows down through line 13 and insert in lieu thereof ".".

Mr. McCLORY (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. McCLORY) is recognized for 5 minutes in support of his motion to recommit.

Mr. McCLORY. Mr. Speaker, this motion to recommit with instructions would impose much narrower restrictions with respect to the elimination of a warrant requirement. In other words, it is narrower than the so-called McClory amendment which would have eliminated all foreign agents and all foreign powers from the requirement that the intelligence agencies would have to go to court to get a warrant.

This would merely eliminate the warrant requirement with regard to a foreign government or a component thereof—an embassy, for instance—or to a faction of a foreign government—the Eritrean Liberation Front, or the PLO—or an entity openly directed and controlled by a foreign government—such as Aeroflot—or some agency like that that is operating here in our country but is owned and controlled by a foreign government. In other words, it seems to me for us to impose upon ourselves a requirement that we go and get a judicial warrant to engage in electronic surveillance of the Soviet Embassy means that we would be required to get a warrant if we wanted to be there with radio interception, or television surveillance, or whatever it might be, and that just seems to me to be completely absurd.

When I talk to individuals about this, they wonder what in the world we are getting ourselves into that we want our intelligence agencies to go to a court and get a judge to decide whether or not we should have electronic surveillance of foreign powers and foreign agents in power such as this.

When I say "foreign agents," I mean foreign spies who might be in this country, and yet we could not engage in electronic surveillance of that foreign spy under this legislation unless we first go to a court and get a court order. To what absurd length must we go in order to cleanse ourselves of some abuses that took place some years ago? The evidence before our committee is without question that there have been no abuses, no abuses of any rights of any American, during the period that we have had executive guidelines. The amendment embodied in the motion to recommit was intended to be offered by our colleague, the gentleman from Louisiana (Mr. WAGGONNER), if he were here. I know that the gentleman from Texas (Mr. HALL), is also supporting this position, and I hope that the Members will vote favorably on this motion to recommit.

Mr. BOLAND. Mr. Speaker, I rise in opposition to the motion to recommit with instructions.

Mr. Speaker, I cannot say with surety that the gentleman from Louisiana (Mr. WAGGONNER) would be offering this amendment or would propose it in the motion to recommit. The gentleman from Illinois (Mr. McCLORY) would probably have better knowledge of that than I. But be that as it may, the same arguments that prevailed with respect to the McClory amendment prevail in this, too. So, Mr. Speaker, without delaying the time of this House—they have been awfully patient—this motion to recommit ought to be rejected, just as the McClory amendment was rejected in the separate vote.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. McCLORY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 164, nays 207, not voting 61, as follows:

[Roll No. 736]

Mr. Breckinridge with Mr. Caputo.
Mr. Byron with Mr. Duncan of Oregon.
Mr. Milford with Mr. Thornton.
Mr. Moss with Mr. Young of Alaska.

Mr. BROWN of Michigan changed his vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to authorize electronic surveillance to obtain foreign intelligence information.".

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. FOLEY). Pursuant to the provisions of House Resolution 1266, the Committee on the Judiciary is discharged from the further consideration of the Senate bill (S. 1566) to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves to strike out all after the enacting clause of the Senate bill S. 1566 and to insert in lieu thereof the provisions of H.R. 7308, as passed by the House, as follows:

That this Act may be cited as the "Foreign Intelligence Surveillance Act of 1978".

TABLE OF CONTENTS

Sec. 110. Civil liability.

TITLE II—CONFORMING AMENDMENTS

Sec. 201. Amendments to chapter 119 of title 18, United States Code.

TITLE III—EFFECTIVE DATE

Sec. 301. Effective date.

## TITLE I—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

### DEFINITIONS

SEC. 101. As used in this title:

(a) "Foreign power" means—

(1) a foreign government or any component thereof, whether or not recognized by the United States;

(2) a faction of a foreign nation or nations, not substantially composed by United States persons;

(3) an entity that is openly acknowledged by a foreign government or governments to be directed and controlled by such foreign government or governments;

(4) a group engaged in international terrorism or activities in preparation therefor;

(5) a foreign-based organization, not substantially composed of United States persons; or

(6) an entity that is directed and controlled by a foreign government or governments.

(b) "Agent of a foreign power" means—

(1) any person other than a United States person, who—

(A) acts in the United States as an officer, member, or employee of a foreign power; or

(B) acts for or on behalf of a foreign power which engages in clandestine intelligence activities in the United States contrary to the interests of the United States, when the circumstances of such person's presence in the United States indicate that such person may engage in such activities in the United States, or when such person knowingly aids or abets any person in the conduct of such activities or knowingly conspires with any person to engage in such activities; or

(2) any person who—

(A) knowingly engages in clandestine intelligence gathering activities for or on behalf of a foreign power, which activities involve or may involve a violation of the criminal statutes of the United States;

(B) pursuant to the direction of an intelligence service or network of a foreign power, knowingly engages in any other clandestine intelligence activities for or on behalf of such foreign power, which activities involve or are about to involve a violation of the criminal statutes of the United States;

(C) knowingly engages in sabotage or international terrorism, or activities that are in preparation therefor, for or on behalf of a foreign power; or

(D) knowingly aids or abets any person in the conduct of activities described in subparagraph (A), (B), or (C) or knowingly conspires with any person to engage in activities described in subparagraph (A), (B), or (C).

(c) "International terrorism" means activities that—

(1) involve violent acts or acts dangerous to human life or property that are or may be a violation of the criminal laws of the United States or of any State, or that might involve a criminal violation if committed within the jurisdiction of the United States or any State;

(2) appear to be intended—

(A) to intimidate or coerce a civilian population;

(B) to influence the policy of a government by intimidation or coercion; or

(C) to affect the conduct of a government by assassination or kidnapping; and

(3) occur totally outside the United States, or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum.

(d) "Sabotage" means activities that involve or may involve a violation of chapter 105 of title 18, United States Code, or that might involve such a violation if committed against the United States.

(e) "Foreign intelligence information" means—

(1) information that relates to and, if concerning a United States person, is necessary to the ability of the United States to protect against—

(A) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;

(B) sabotage or international terrorism by a foreign power or an agent of a foreign power; or

(C) clandestine intelligence activities by an intelligence service or network of a foreign power or by an agent of a foreign power; or (2) information with respect to a foreign power or foreign territory that relates to and, if concerning a United States person, is necessary to—

(A) the national defense or the security of the United States; or

(B) the conduct of the foreign affairs of the United States.

(f) "Electronic surveillance" means—

(1) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire or radio communication sent by or intended to be received by a particular, known United States person who is in the United States, if the contents are acquired by intentionally targeting that United States person, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes;

(2) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire communication to or from a person in the United States, without the consent of any party thereto, if such acquisition occurs in the United States;

(3) the intentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States; or

(4) the installation or use of an electronic, mechanical, or other surveillance device in the United States for monitoring to acquire information, other than from a wire or radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes.

(g) "Attorney General" means the Attorney General of the United States (or Acting Attorney General) or the Deputy Attorney General.

(h) "Minimization procedures", with respect to electronic surveillance, means—

(1) specific procedures, which shall be adopted by the Attorney General, that are reasonably designed in light of the purpose and technique of the particular surveillance, to minimize the acquisition, retention, and dissemination of nonpublicly available information concerning unconsenting United States persons consistent with the need of the United States to obtain, produce, and disseminate foreign intelligence information;

(2) procedures that require that nonpublicly available information, which is not foreign intelligence information, as defined in subsection (e)(1), shall not be disseminated in a manner that identifies any individual United States person, without such person's consent, uless such person's identity is necessary to understand foreign intelligence information or assess its importance;

(3) notwithstanding paragraphs (1) and (2), procedures that allow for the retention and dissemination of information that is evidence of a crime which has been, is being, or is about to be committed and that is to be retained or disseminated for the purpose of preventing the crime or enforcing the criminal law; and

(4) notwithstanding paragraphs (1), (2), and (3), with respect to any electronic surveillance approved pursuant to section 102 (a), procedures that require that no contents of any communication to which a United States person is a party shall be disclosed, disseminated, or used for any purpose or retained for longer than twenty-four hours unless a court order under section 105 is obtained or unless the Attorney General determines that the information may indicate a threat of death or serious bodily harm to any person.

(i) "United States person" means a citizen of the United States, an alien lawfully admitted for permanent residence (as defined in section 101(a)(20) of the Immigration and Nationality Act), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence, or a corporation which is incorporated in the United States, but does not include a corporation or an association which is a foreign power, as defined in subsection (a)(1), (2), or (3).

(j) "United States", when used in a geographic sense, means all areas under the territorial sovereignty of the United States and the Trust Territory of the Pacific Islands.

(k) "Aggrieved person" means a person who is the target of an electronic surveillance or any other person whose communications or activities were subject to electronic surveillance.

(l) "Wire communication" means any communication while it is being carried by a wire, cable, or other like connection furnished or operated by any person engaged as a common carrier in providing or operating such facilities for the transmission of interstate or foreign communications.

(m) "Person" means any individual, including any officer or employee of the Federal Government, or any group, entity, association, corporation, or foreign power.

(n) "Contents", when used with respect to a communication, includes any information concerning the identity of the parties to such communication or the existence, substance, purport, or meaning of that communication.

(o) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and any territory or possession of the United States.

### AUTHORIZATION FOR ELECTRONIC SURVEILLANCE FOR FOREIGN INTELLIGENCE PURPOSES

SEC. 102. (a)(1) Notwithstanding any other law, the President, through the At-

torney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods of up to one year if the Attorney General certifies in writing under oath that—

(A) the electronic surveillance is solely directed at—

(i) communications exclusively between or among foreign powers, as defined in section 101(a) (1), (2), or (3); or

(ii) the acquisition of technical intelligence from property or premises under the open and exclusive control of a foreign power, as defined in section 101(a) (1), (2), or (3); and

(B) the proposed minimization procedures with respect to such surveillance meet the definition of minimization procedures under section 101(h); and

if the Attorney General shall report such minimization procedures and any changes thereto to the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence at least thirty days prior to their effective date, unless the Attorney General determines immediate action is required and notifies the committees immediately of such minimization procedures and the reason for their becoming effective immediately.

(2) An electronic surveillance authorized by this subsection may be conducted only in accordance with the Attorney General's certification and the minimization procedures adopted by him.

(3) With respect to electronic surveillance authorized by this subsection, the Attorney General may direct a specified communication common carrier to—

(A) furnish all information, facilities, or technical assistance necessary to accomplish the electronic surveillance in such a manner as will protect its secrecy and produce a minimum of interference with the services that such carrier is providing its customers; and

(B) maintain under security procedures approved by the Attorney General and the Director of Central Intelligence any records concerning the surveillance or the aid furnished which such carrier wishes to retain.

The Government shall compensate, at the prevailing rate, such carrier for furnishing such aid.

(b) Applications for a court order under this title are authorized if the President has, by written authorization, empowered the Attorney General to approve applications to a United States district court having jurisdiction under section 103, and a judge to whom an application is made may, notwithstanding any other law, grant an order, in conformity with section 105, approving electronic surveillance of a foreign power or an agent of a foreign power for the purpose of obtaining foreign intelligence information, except that the court shall not have jurisdiction to grant any order approving electronic surveillance directed solely as described in paragraph (1)(A) of subsection (a) unless such surveillance may involve the acquisition of communications of any United States person.

JURISDICTION

SEC. 103. (a) The United States district courts shall have jurisdiction to receive applications for court orders under this title and to issue orders under section 105 of this title.

(b) Proceedings under this title shall be conducted as expeditiously as possible. If any application to the United States district court is denied, the court shall record the reasons for that denial, and the reasons for that denial shall, upon the motion of the party to whom the application was denied, be transmitted under seal to the United States court of appeals.

APPLICATION FOR AN ORDER

SEC. 104. (a) Each application for an order approving electronic surveillance under this title shall be made by a Federal officer in writing upon oath or affirmation to a judge having jurisdiction under section 103. Each application shall require the approval of the Attorney General based upon his finding that it satisfies the criteria and requirements of such application as set forth in this title. It shall include—

(1) the identity of the Federal officer making the application;

(2) the authority conferred on the Attorney General by the President of the United States and the approval of the Attorney General to make the application;

(3) the identity, if known or a description of the target of the electronic surveillance;

(4) a statement of the facts and circumstances relied upon by the applicant to justify his belief that—

(A) the target of the electronic surveillance is a foreign power or an agent of a foreign power; and

(B) each of the facilities or places at which the electronic surveillance is directed is being used, or is about to be used, by a foreign power or an agent of a foreign power;

(5) a statement of the proposed minimization procedures;

(6) a detailed description of the nature of the information sought and the type of communications or activities to be subjected to the surveillance;

(7) a certification or certifications by the Assistant to the President for National Security Affairs and an executive branch official or officials designated by the President from among those executive officers employed in the area of national security or defense and appointed by the President with the advice and consent of the Senate—

(A) that the certifying official deems the information sought to be foreign intelligence information;

(B) that the purpose of the surveillance is to obtain foreign intelligence information;

(C) that such information cannot reasonably be obtained by normal investigative techniques;

(D) that designates the type of foreign intelligence information being sought according to the categories described in section 101(e); and

(E) including a statement of the basis for the certification that—

(i) the information sought is the type of foreign intelligence information designated; and

(ii) such information cannot reasonably be obtained by normal investigative techniques;

(8) a statement of the means by which the surveillance will be effected;

(9) a statement of the facts concerning all previous applications that have been made to any judge under this title involving any of the persons, facilities, or places specified in the application, and the action taken on each previous application;

(10) a statement of the period of time for which the electronic surveillance is required to be maintained, and if the nature of the intelligence gathering is such that the approval of the use of electronic surveillance under this title should not automatically terminate when the described type of information has first been obtained, a description of facts supporting the belief that additional information of the same type will be obtained thereafter; and

(11) whenever more than one electronic, mechanical or other surveillance device is to used with respect to a particular proposed electronic surveillance, the coverage of the devices involved and what minimization procedures apply to information acquired by each device.

(b) Whenever the target of the electronic surveillance is a foreign power, as defined in section 101(a) (1), (2), or (3), and each of the facilities or places at which the surveillance is directed is owned, leased, or exclusively used by that foreign power, the application need not contain the information required by paragraphs (6), (7)(E), (8), and (11) of subsection (a), but shall contain such information about the surveillance techniques and communications or other information concerning United States persons likely to be obtained as may be necessary to assess the proposed minimization procedures.

(c) The Attorney General may require any other affidavit or certification from any other officer in connection with the application.

(d) The judge may require the applicant to furnish such other information as may be necessary to make the determinations required by section 105.

ISSUANCE OF AN ORDER

SEC. 105. (a) Upon an application made pursuant to section 104, the judge shall enter an ex parte order as requested or as modified approving the electronic surveillance if he finds that—

(1) the President has authorized the Attorney General to approve applications for electronic surveillance for foreign intelligence information;

(2) the application has been made by a Federal officer and approved by the Attorney General;

(3) on the basis of the facts submitted by the applicant there is probable cause to believe that—

(A) the target of the electronic surveillance is a foreign power or an agent of a foreign power: *Provided*, That no United States person may be considered a foreign power or an agent of a foreign power solely upon the basis of activities protected by the first amendment to the Constitution of the United States; and

(B) each of the facilities or places at which the electronic surveillance is directed is being used, or is about to be used, by a foreign power or an agent of a foreign power;

(4) the proposed minimization procedures meet the definition of minimization procedures under section 101(h); and

(5) the application which has been filed contains all statements and certifications required by section 104 and, if the target is a United States person, the certification or certifications are not clearly erroneous on the basis of the statement made under section 104(a)(7)(E) and any other information furnished under section 104(d).

(b) An order approving an electronic surveillance under this section shall—

(1) specify—

(A) the identity, if known, or a description of the target of the electronic surveillance;

(B) the nature and location of each of the facilities or places at which the electronic surveillance will be directed;

(C) the type of information sought to be acquired and the type of communications or activities to be subjected to the surveillance;

(D) the means by which the electronic surveillance will be effected;

(E) the period of time during which the electronic surveillance is approved; and

(F) whenever more than one electronic, mechanical, or other surveillance device is to be used under the order, the authorized coverage of the devices involved and what minimization procedures shall apply to information subject to acquisition by each device; and

(2) direct—

(A) that the minimization procedures be followed;

(B) that, upon the request of the applicant, a specified communication or other common carrier, landlord, custodian, or other specified person furnish the applicant forthwith any and all information, facilities, or technical assistance necessary to accomplish the electronic surveillance unobtrusively and in such manner as will protect its secrecy and produce a minimum of interference

with the services that such carrier, landlord, custodian, or other person is providing that target of electronic surveillance;

(C) that such carrier, landlord, custodian, or other person maintain under security procedures approved by the Attorney General and the Director of Central Intelligence any records concerning the surveillance or the aid furnished that such person wishes to retain; and

(D) that the applicant compensate, at the prevailing rate, such carrier, landlord, custodian, or other person for furnishing such aid.

(c) Whenever the target of the electronic surveillance is a foreign power, as defined in section 101(a) (1), (2), or (3), and each of the facilities or places at which the surveillance is directed is owned, leased, or exclusively used by that foreign power, the order need not contain the information required by subparagraphs (C), (D), and (F) of subsection (b)(1), but shall generally describe the information sought, the communications or activities to be subjected to the surveillance, and the type of electronic surveillance involved, including whether physical entry is required.

(d)(1) An order issued under this section may approve an electronic surveillance for the period necessary to achieve its purpose, or for ninety days, whichever is less, except that an order under this section shall approve an electronic surveillance targeted against a foreign power, as defined in section 101(a) (1), (2), or (3), for the period specified in the application or for one year, whichever is less.

(2) Extensions of an order issued under this title may be granted on the same basis as an original order upon an application for an extension and new findings made in the same manner as required for an original order, except that an extension of an order under this chapter for a surveillance targeted against a foreign power, as defined in section 101(a) (4), (5), or (6), may be for a period not to exceed one year if the judge finds probable cause to believe that no communication of any individual United States person will be acquired during the period.

(3) At the end of the period of time for which electronic surveillance is approved by an order or an extension, the judge may assess compliance with the minimization procedures by reviewing the circumstances under which information concerning United States persons was acquired, retained, or disseminated.

(e) Notwithstanding any other provision of this title, when the Attorney General reasonably determines that—

(1) an emergency situation exists with respect to the employment of electronic surveillance to obtain foreign intelligence information before an order authorizing such surveillance can with due diligence be obtained; and

(2) the factual basis for issuance of an order under this title to approve such surveillance exists;

he may authorize the emergency employment of electronic surveillance if a judge having jurisdiction under section 103 is informed by the Attorney General or his designee at the time of such authorization that the decision has been made to employ emergency electronic surveillance and if an application in accordance with this title is made to that judge as soon as practicable, but not more than twenty-four hours after the Attorney General authorizes such surveillance. If the Attorney General authorizes such emergency employment of electronic surveillance, he shall require that the minimization procedures required by this title for the issuance of a judicial order be followed. In the absence of a judicial order approving such electronic surveillance, the surveillance shall terminate when the information sought is obtained, when the application for the order is denied, or after the expiration of twenty-four hours from the time of authorization by the Attorney General, whichever is earliest. In the event that such application for approval is denied, or in any other case where the electronic surveillance is terminated and no order is issued approving the surveillance, no information obtained or evidence derived from such surveillance shall be received in evidence or otherwise disclosed in any trial, hearings, or other proceeding in or before any court, grand jury, department, office, agency, regulatory body, legislative committee, or other authority of the United States, a State, or political subdivision thereof, and no information concerning any United States person acquired from such surveillance shall subsequently be used or disclosed in any other manner by Federal officers or employees without the consent of such person, except with the approval of the Attorney General if the information may indicate a threat of death or serious bodily harm to any person. A denial of the application made under this subsection may be reviewed as provided in section 103.

(f) Notwithstanding any other provision of this title, officers, employees, or agents of the United States are authorized in the normal course of their official duties to conduct electronic surveillance not targeted against the communications of any particular person or persons, under procedures approved by the Attorney General, solely to—

(1) test the capability of electronic equipment, if—

(A) it is not reasonable to obtain the consent of the persons incidentally subjected to the surveillance;

(B) the test is limited in extent and duration to that necessary to determine the capability of the equipment; and

(C) the contents of any communication acquired are retained and used only for the purpose of determining the capability of the equipment, are disclosed only to test personnel, and are destroyed before or immediately upon completion of the test;

(2) determine the existence and capability of electronic surveillance equipment being used by persons not authorized to conduct electronic surveillance, if—

(A) it is not reasonable to obtain the consent of persons incidentally subjected to the surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to determine the existence and capability of such equipment; and

(C) any information acquired by such surveillance is used only to enforce chapter 119 of title 18, United States Code, or section 605 of the Communications Act of 1934, or to protect information from unauthorized surveillance; or

(3) train intelligence personnel in the use of electronic surveillance equipment, if—

(A) it is not reasonable to—

(i) obtain the consent of the persons incidentally subjected to the surveillance;

(ii) train persons in the course of surveillances otherwise authorized by this title; or

(iii) train persons in the use of such equipment without engaging in electronic surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to train the personnel in the use of the equipment; and

(C) no contents of any communication acquired are retained or disseminated for any purpose, but are destroyed as soon as reasonably possible.

(g) Certifications made by the Attorney General pursuant to section 102(a) and applications made and orders granted under this title shall be retained for a period of at least ten years from the date of the application and shall be stored at the direction of the Attorney General under security procedures approved by the Director of Central Intelligence.

USE OF INFORMATION

SEC. 106. (a) Information acquired from an electronic surveillance conducted pursuant to this title concerning any United States person may be used and disclosed by Federal officers and employees without the consent of the United States person only in accordance with the minimization procedures required by this title. No otherwise privileged communication obtained in accordance with, or in violation of, the provisions of this title shall lose its privileged character. No information acquired from an electronic surveillance pursuant to this title may be used or disclosed by Federal officers or employees except for lawful purposes.

(b) No information acquired pursuant to this title shall be disclosed for law enforcement purposes unless such disclosure is accompanied by a statement that such information, or any information derived therefrom, may only be used in a criminal proceeding with the advance authorization of the Attorney General.

(c) Whenever the Government intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, against an aggrieved person, any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the Government shall, prior to the trial, hearing, or other proceeding or at a reasonable time prior to an effort to so disclose or so use that information or submit it in evidence, notify the aggrieved person and the court or other authority in which the information is to be disclosed or used that the Government intends to so disclose or so use such information.

(d) Whenever any State or political subdivision thereof intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of a State or a political subdivision thereof, against an aggrieved person any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the State or political subdivision thereof shall notify the aggrieved person, the court or other authority in which the information is to be disclosed or used, and the Attorney General that the State or political subdivision thereof intends to so disclose or so use such information.

(e) Any person against whom evidence obtained or derived from an electronic surveillance to which he is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, a State, or a political subdivision thereof, may move to suppress the evidence obtained or derived from such electronic surveillance on the grounds that—

(1) the information was unlawfully acquired; or

(2) the surveillance was not made in conformity with an order of authorization or approval.

Such a motion shall be made before the trial, hearing, or other proceeding unless there was no opportunity to make such a motion or the person was not aware of the grounds of the motion.

(f) Whenever a court or other authority is notified pursuant to subsection (c) or (d), or whenever a motion is made pursuant to subsection (e) and the Government

concedes that information obtained or derived from an electronic surveillance pursuant to the authority of this title as to which the moving party is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding, the Government may make a motion before the court to determine the lawfulness of the electronic surveillance. Unless all the judges of the Special Court are so disqualified. The motion may not be heard by a judge who granted or denied an order or extension involving the surveillance at issue. Such motion shall stay any action in any court or authority to determine the lawfulness of the surveillance. In determining the lawfulness of the surveillance, the Court shall, notwithstanding any other law, if the Attorney General files an affidavit under oath with the court that disclosure would harm the national security of the United States or compromise foreign intelligence sources and methods, review in camera the application, order, and such other materials relating to the surveillance as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the court may disclose to the aggrieved person, under appropriate security procedures and protective orders, portions of the application, order, or other materials if there is a reasonable question as to the legality of the surveillance and if disclosure would likely promote a more accurate determination of such legality, or if such disclosure would not harm the national security.

(g) Except as provided in subsection (f), whenever any motion or request is made pursuant to any statute or rule of the United States or any State before any court or other authority of the United States or any State to discover or obtain applications or orders or other materials relating to surveillance pursuant to the authority of this title or to discover, obtain, or suppress any information obtained from electronic surveillance pursuant to the authority of this title, and the court or other authority determines that the moving party is an aggrieved person, if the Attorney General files with the United States court of appeals an affidavit under oath that an adversary hearing would harm the national security or compromise foreign intelligence sources and methods and that no information obtained or derived from an electronic surveillance pursuant to the authority of this title has been or is about to be used by the Government in the case before the court or other authority, the Special Court of Appeals shall, notwithstanding any other law, stay the proceeding before the other court or authority and review in camera and ex parte the application, order, and such other materials as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the court of appeals shall disclose, under appropriate security procedures and protective orders, to the aggrieved person or his attorney portions of the application, order, or other materials relating to the surveillance only if necessary to afford due process to the aggrieved person.

(h) If the court pursuant to subsection (f) or the court of appeals pursuant to subsection (g) determines the surveillance was not lawfully authorized and conducted, it shall, in accordance with the requirements of the law, suppress the evidence which was unlawfully obtained or derived from electronic surveillance of the aggrieved person or otherwise grant the motion of the aggrieved person. If the court pursuant to subsection (f) or the court of appeals pursuant to subsection (g) determines the surveillance was lawfully authorized and conducted, it shall deny the motion of the aggrieved person except to the extent that due process requires discovery or disclosure.

(i) Orders granting or denying motions or requests under subsection (h), decisions under this section as to the lawfulness of electronic surveillance, and, absent a finding of unlawfulness, orders of the district court or court of appeals granting or denying disclosure of applications, orders, or other materials relating to a surveillance shall be final orders and binding upon all courts of the United States and the several States except the court of appeals and the Supreme Court.

(j) In circumstances involving the unintentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States, such contents shall be destroyed upon recognition, unless the Attorney General determines that the contents may indicate a threat of death or serious bodily harm to any person.

(k) If an emergency employment of electronic surveillance is authorized under section 105(e) and a subsequent order approving the surveillance is not obtained, the judge shall cause to be served on any United States person named in the application and on such other United States persons subject to electronic surveillance as the judge may determine in his discretion it is in the interest of justice to serve, notice of—

(1) the fact of the application;

(2) the period of the surveillance; and

(3) the fact that during the period information was or was not obtained.

On an ex parte showing of good cause to the judge the serving of the notice required by this subsection may be postponed or suspended for a period not to exceed ninety days. Thereafter, on a further ex parte showing of good cause, the court shall forego ordering the serving of the notice required under this subsection.

REPORT OF ELECTRONIC SURVEILLANCE

SEC. 107. In April of each year, the Attorney General shall transmit to the Administrative Office of the United States Courts and to Congress a report setting forth with respect to the preceding calendar year—

(a) the total number of applications made for orders and extensions of orders approving electronic surveillance under this title; and

(b) the total number of such orders and extensions either granted, modified, or denied.

CONGRESSIONAL OVERSIGHT

SEC. 108. (a) On a semiannual basis the Attorney General shall fully inform the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence concerning all electronic surveillance under this title. Nothing in this title shall be deemed to limit the authority and responsibility of those committees to obtain such additional information as they may need to carry out their respective functions and duties.

(b) The Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate may periodically review the information provided under subsection (a). If either such committee determines that an electronic surveillance of a United States person under this title has produced no foreign intelligence information and that the disclosure of the fact of such surveillance to such United States person would not harm the national security, such committee shall inform such person of the fact of such surveillance and that no foreign intelligence information was derived from such surveillance.

PENALTIES

SEC. 109. (a) OFFENSE.—A person is guilty of an offense if he intentionally engaged in electronic surveillance under color of law except as authorized by statute.

(b) DEFENSE.—It is a defense to a prosecution under subsection (a) that the defendant was a law enforcement or investigative officer engaged in the course of his official duties and the electronic surveillance was authorized by and conducted pursuant to a seach warrant or court order of a court of competent jurisdiction.

(c) PENALTY.—An offense described in this section is punishable by a fine of not more than $10,000 or imprisonment for not more than five years, or both.

(d) JURISDICTION.—There is Federal jurisdiction over an offense under this section if the person committing the offense was an officer or employee of the United States at the time the offense was committed.

CIVIL LIABILITY

SEC. 110. CIVIL ACTION.—An aggrieved person, other than a foreign power or an agent of a foreign power, as defined in section 101 (a) or (b)(1)(A), respectively, who has been subjected to an electronic surveillance or whose communication has been disseminated or used in violation of section 109 shall have a cause of action against any person who committed such violation and shall be entitled to recover—

(a) actual damages, but not less than liquidated damages of $1,000 or $100 per day for each day of violation, whichever is greater;

(b) punitive damages; and

(c) reasonable attorney's fees and other investigation and litigation costs reasonably incurred.

AUTHORIZATION DURING TIME OF WAR

Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods up to one year during a period of war declared by the Congress.

## TITLE II—CONFORMING AMENDMENTS

AMENDMENTS TO CHAPTER 119 OF TITLE 18, UNITED STATES CODE

SEC. 201. Chapter 119 of title 18, United States Code, is amended as follows:

(a) Section 2511(2)(a)(ii) is amended to read as follows:

"(ii) Notwithstanding any other law, communication common carriers, their officers, employees, and agents, landlords, custodians, or other persons, are authorized to provide information, facilities, or technical assistance to persons authorized by law to intercept wire or oral communications or to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, if the common carrier, its officers, employees, or agents, landlord, custodian, or other specified person, has been provided with—

"(A) a court order directing such assistance signed by the authorizing judge, or

"(B) a certification in writing by a person specified in section 2518(7) of this title or the Attorney General of the United States that no warrant or court order is required by law, that all statutory requirements have been met, and that the specified assistance is required,

setting forth the period of time during which the provision of the information, facilities, or technical assistance is authorized and specifying the information, facilities, or technical assistance required. No communication common carrier, officer, employee, or agent thereof, or landlord, custodian, or other specified person shall disclose the existence of any interception or surveillance or the device used to accomplish the interception or surveillance with respect to which the

person has been furnished an order or certification under this subparagraph, except as may otherwise be required by legal process and then only after prior notification to the Attorney General or to the principal prosecuting attorney of a State or any political subdivision of a State, as may be appropriate. No cause of action shall lie in any court against any communication common carrier, its officers, employees, or agents, landlord, custodian, or other specified person for providing information, facilities, or assistance in accordance with the terms of an order or certification under this subparagraph.".

(b) Section 2511(2) is amended by adding at the end thereof the following new provisions:

"(e) Notwithstanding any other provision of this title or section 605 or 606 of the Communications Act of 1934, it shall not be unlawful for an officer, employee, or agent of the United States in the normal course of his official duty to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, as authorized by that Act.

"(f) Nothing contained in this chapter, or section 605 of the Communications Act of 1934, shall be deemed to affect the acquisition by the United States Government of foreign intelligence information from international or foreign communications by a means other than electronic surveillance as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, and procedures in this chapter and the Foreign Intelligence Surveillance Act of 1978 shall be the exclusive statutory means by which electronic surveillance, as defined in section 101 of such Act, and the interpretation of domestic wire and oral communications may be conducted.".

(c) Section 2511(3) is repealed.

(d) Section 2518(1) is amended by inserting "under this chapter" after "communication".

(e) Section 2518(4) is amended by inserting "under this chapter" after both appearances of "wire or oral communication".

(f) Section 2518(9) is amended by striking out "intercepted" and inserting "intercepted pursuant to this chapter" after "communication".

(g) Section 2518(10) is amended by striking out "intercepted" and inserting "intercepted pursuant to this chapter" after the first appearance of "communication".

(h) Section 2519(3) is amended by inserting "pursuant to this chapter" after "wire or oral communications" and after "granted or denied".

TITLE III—EFFECTIVE DATE

EFFECTIVE DATE

SEC. 301. The provisions of this Act and the amendments made hereby shall become effective upon the date of enactment of this Act, except that any electronic surveillance approved by the Attorney General to gather foreign intelligence information shall not be deemed unlawful for failure to follow the procedures of this Act, if that surveillance is terminated or an order approving that surveillance is obtained under title I of this Act within ninety days following such date of enactment.

Amend the title so as to read: "An act to authorize electronic surveillance to obtain foreign intelligence information.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to authorize electronic surveillance to obtain foreign intelligence information.".

A motion to reconsider was laid on the table.

A similar House bill (H.R. 7308) was laid on the table.

## AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 7308

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that the Clerk may be authorized to make any necessary corrections in section numbers, cross references, and punctuation in the engrossment of the bill, H.R. 7308.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

## APPOINTMENT OF CONFEREES ON H.R. 6536, DISTRICT OF COLUMBIA RETIREMENT REFORM ACT

Mr. DIGGS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6536) to establish an actuarially sound basis for financing retirement benefits for policemen, firemen, teachers, and judges of the District of Columbia and to make certain changes in such benefits, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. DERWINSKI. Mr. Speaker, reserving the right to object, may I ask the gentleman from Michigan if this procedure has been discussed with the ranking minority member of the committee.

Mr. DIGGS. If the gentleman will yield, it has, and I have the recommended conferees from the minority side.

Mr. DERWINSKI. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan? The Chair hears none, and, without objection, appoints the following conferees: Messrs. DIGGS, DELLUMS, FAUNTROY, MAZZOLI, MCKINNEY, and WHALEN.

There was no objection.

## APPOINTMENT OF CONFEREES ON HOUSE CONCURRENT RESOLUTION 683, REVISING CONGRESSIONAL BUDGET FOR THE U.S. GOVERNMENT FOR FISCAL YEAR 1979

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the concurrent resolution (H. Con. Res. 683) revising the congressional budget for the U.S. Government for the fiscal year 1979, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut? The Chair hears none, and, without objection, appoints the following conferees: Messrs. GIAIMO, WRIGHT, LEGGETT, MITCHELL of Maryland, BURLESON of Texas, DERRICK, OBEY, SIMON, MINETA, LATTA, CONABLE, DUNCAN of Tennessee, and REGULA.

There was no objection.

## REQUEST TO CONCUR IN SENATE AMENDMENTS TO H.R. 1337, AMENDING THE INTERNAL REVENUE CODE OF 1954 WITH RESPECT TO EXCISE TAX ON CERTAIN TRUCKS, BUSES, TRACTORS, ET CETERA

Mr. CORMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 1337) to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera, with Senate amendments thereto, concur in the Senate amendment to the title of the bill, and concur in the Senate amendment to the text of the bill with amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert:

SECTION 1. EXCISE TAX ON CERTAIN TRUCKS, BUSES, TRACTORS, ETC.

(a) IN GENERAL.—Paragraph (1) of section 4216(b) of the Internal Revenue Code of 1954 (relating to constructive sale price) is amended by inserting after the second sentence thereof the following new sentence: "In the case of an article the sale of which is taxable under section 4061(a) and which is sold at retail, the computation under the first sentence of this paragraph shall be a percentage (not greater than 100 percent) of the actual selling price based on the highest price for which such articles are sold by manufacturers and producers in the ordinary course of trade (determined without regard to any individual manufacturer's or producer's cost)".

(b) CONFORMING AMENDMENT.—The second sentence of paragraph (1) of such section 4216(b) is amended by inserting "(other than an article the sale of which is taxable under section 4061(a))" after "sold at retail".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to articles sold by the manufacturer or producer on or after the first day of the first calendar quarter beginning 30 days or more after the date of enactment of this Act.

SEC. 2. HOME PRODUCTION OF BEER AND WINE.

(a) EXEMPTION FROM TAX ON WINE.—Section 5042(a)(2) of the Internal Revenue Code of 1954 (relating to production of wine for personal consumption) is amended to read as follows:

"(2) WINE FOR PERSONAL OR FAMILY USE.—Subject to regulations prescribed by the Secretary—

"(A) EXEMPTION.—Any adult may, without payment of tax, produce wine for personal or family use and not for sale.

"(B) LIMITATION.—The aggregate amount of wine exempt from tax under this paragraph with respect to any household shall not exceed—

"(i) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(ii) 100 gallons per calendar year if there is only 1 adult in such household.

"(C) ADULTS.—For purposes of this paragraph, the term 'adult' means an individual who has attained 18 years of age, or the minimum age (if any) established by law applicable in the locality in which the household is situated at which wine may be sold to individuals, whichever is greater.

(b) EXEMPTION FROM TAX ON BEER.—

(1) IN GENERAL.—Section 5053 of such Code (relating to exemptions from excise tax on beer) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new section:

"(e) BEER FOR PERSONAL OR FAMILY USE.—

Subject to regulations prescribed by the Secretary, any adult may, without payment of tax, produce beer for personal or family use and not for sale. The aggregate amount of beer exempt from tax under this subsection with respect to any household shall not exceed—

"(1) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(2) 100 gallons per calendar year if there is only 1 adult in such household.

For purposes of this subsection, the term 'adult' means an individual who has attained 18 years of age or the minimum age, if any, established by law applicable in the locality in which the household is situated for individuals to whom beer may be sold, whichever is greater."

(2) ILLEGALLY PRODUCED BEER.—

(A) Section 5051 of such Code (relating to imposition and rate of tax) is amended by adding at the end thereof the following new subsection:

"(c) ILLEGALLY PRODUCED BEER.—The production of any beer at any place in the United States shall be subject to tax at the rate prescribed in subsection (a) and such tax shall be due and payable as provided in section 5054(a)(3) unless—

"(1) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(2) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).".

(B) Section 5054(a)(3) of such Code (relating to illegally produced beer) is amended to read as follows:

"(3) ILLEGALLY PRODUCED BEER.—The tax on any beer produced in the United States shall be due and payable immediately upon production unless—

"(A) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(B) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).".

(3) DEFINITION OF BREWER.—Section 5092 of such Code (defining brewer) is amended to read as follows:

"SEC. 5092. DEFINITION OF BREWER.

"Every person who brews beer (except a person who produces only beer exempt from tax under section 5053(e)) and every person who produces beer for sale shall be deemed to be a brewer.".

(4) EXEMPTION FROM CERTAIN PROVISIONS RELATING TO DISTILLING MATERIALS.—Section 5222(a)(2)(C) of such Code (relating to certain exemptions) is amended by striking out "; or" and inserting in lieu thereof "or 5053(e); or".

(5) PENALTY FOR UNLAWFUL PRODUCTION OF BEER.—

(A) Section 5674 of such Code (relating to penalty for unlawful removal of beer) is amended to read as follows:

"SEC. 5674. PENALTY FOR UNLAWFUL PRODUCTION OR REMOVAL OF BEER.

"(a) UNLAWFUL PRODUCTION.—Any person who brews beers or produces beer shall be fined not more than $1,000, or imprisoned not more than 1 year, or both, unless such beer is brewed or produced in a brewery qualified under subchapter G or such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).

"(b) UNLAWFUL REMOVAL.—Any brewer or other person who removes or in any way aids in the removal from any brewery of beer without complying with the provisions of this chapter or regulations issued pursuant thereto shall be fined not more than $1,000, or imprisoned not more than 1 year, or both.".

(B) The item relating to section 5674 in the table or sections for part III of subchapter J of chapter 51 of such Code is amended to read as follows:

"Sec. 5674. Penalty for unlawful production or removal of beer.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the first day of the first calendar month which begins more than 90 days after the date of the enactment of this Act.

SEC. 3. REFUNDS TO BE MADE TO AERIAL APPLICATORS IN CERTAIN CASES.

(a) ENTITLEMENT OF AERIAL APPLICATORS TO REFUND OF GASOLINE TAX IN CERTAIN CASES.—Subsection (c) of section 6420 of the Internal Revenue Code of 1954 (defining use on a farm for farming purposes) is amended by redesignating paragraph (4) as paragraph (5) and by inserting after paragraph (3) the following new paragraph:

"(4) CERTAIN FARMING USE OTHER THAN BY OWNER, ETC.—In applying paragraph (3)(A) to a use on a farm for any purpose described in paragraph (3)(A) by any person other than the owner, tenant, or operator of such farm—

"(A) the owner, tenant, or operator of such farm shall be treated as the user and ultimate purchaser of the gasoline, except that

"(B) if the person so using the gasoline is an aerial applicator who is the ultimate purchaser of the gasoline and the person described in subparagraph (A) waives (at such time and in such form and manner as the Secretary shall prescribe) his right to be treated as the user and ultimate purchaser of the gasoline, then subparagraph (A) of this paragraph shall not apply and the aerial applicator shall be treated as having used such gasoline on a farm for farming purposes."

(b) ENTITLEMENT OF AERIAL APPLICATORS TO REFUND OF SPECIAL FUELS TAX IN CERTAIN CASES.—The second sentence of subsection (c) of section 6427 of such Code (relating to use for farming purposes) is amended to read as follows: "For purposes of this subsection, if fuel is used on a farm by any person other than the owner, tenant, or operator of such farm, the rules of paragraph (4) of section 6420(c) shall be applied (except that 'liquid taxable under section 4041' shall be substituted for 'gasoline' each place it appears in such paragraph (4))."

(c) CONFORMING AMENDMENT.—Subparagraph (A) of section 6420(c)(3) of such Code is amended by striking out "except that" and all that follows down through the semicolon at the end of such subparagraph (A).

(d) EFFECTIVE DATE.—The amendments made by the first section of this Act shall take effect on the first day of the first calendar quarter which begins more than 90 days after the date of the enactment of this Act.

SEC. 4. PARTIAL ROLLOVERS OF LUMP SUM DISTRIBUTIONS.

(a) PARTIAL ROLLOVER PERMITTED.—Paragraph (5) of section 402(a) of the Internal Revenue Code of 1954 (relating to rollover amounts) is amended to read as follows:

"(5) ROLLOVER AMOUNTS.—

"(A) GENERAL RULE.—If the balance to the credit of an employee in a qualified trust is paid to him within his taxable year in a termination or discontinuance distribution or in a lump sum distribution and he transfers all or a portion of the total taxable amount (as defined in subsection (e)(4)(D)) of the distribution to an eligible rollover source, then the amount transferred shall not be included in gross income.

"(B) DEFINITIONS.—For purposes of this paragraph—

"(i) QUALIFIED TRUST.—The term 'qualified trust' means an employees' trust described in section 401(a) which is exempt from tax under section 501(a).

"(ii) TERMINATION OR DISCONTINUANCE DISTRIBUTION.—The term 'termination or discontinuance distribution' means a distribution on account of a termination of the plan of which a qualified trust is a part, or, in the case of a profit-sharing or stock bonus plan, a complete discontinuance of contributions under the plan.

"(iii) LUMP SUM DISTRIBUTIONS.—The term 'lump sum distribution' means a distribution described in subparagraph (A) of subsection (e)(4) (determined without regard to subparagraph (B) of that subsection).

"(iv) ELIGIBLE ROLLOVER SOURCE.—The term 'eligible rollover source' means—

"(I) an individual retirement account described in section 408(a),

"(II) an individual retirement annuity described in section 408(b) (other than an endowment contract),

"(III) a retirement bond described in section 409,

"(IV) a qualified trust, or

"(V) an annuity plan described in section 403(a).

"(C) SPECIAL RULES.—

"(i) TRANSFER TREATED AS ROLLOVER CONTRIBUTIONS UNDER SECTION 408.—A transfer described in subparagraph (A) to an eligible rollover source described in subclause (I), (II), or (III) of subparagraph (B)(iv) shall be treated as a rollover contribution as described in section 408(d)(3).

"(ii) SELF-EMPLOYED INDIVIDUALS AND OWNER-EMPLOYEES.—Qualified rollover sources described in subclause (IV) or (V) of subparagraph (B) shall not be treated as qualified rollover sources for transfers of a distribution if any part of the distribution is attributable to a trust forming part of a plan under which the employee was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan.

"(iii) PROPERTY ROLLED OVER MUST BE THE PROPERTY RECEIVED.—Subparagraph (A) shall not apply to a transfer of property other than money unless the property transferred is the property which was received in the distribution.

"(iv) TRANSFER MUST BE MADE WITHIN 60 DAYS OF RECEIPT.—Subparagraph (A) shall not apply to any transfer of a distribution made after the 60th day following the day on which the employee received the property distributed.".

(b) TAXATION OF PORTION EXCLUDED FROM ROLLOVER.—Paragraph (6) of section 402(a) of such Code (relating to special rollover rules) is amended—

(1) by striking out "For purposes of paragraph (5)(A)(i)—" and inserting in lieu thereof "For purposes of paragraph (5)—". and

(2) by adding at the end thereof the following new subparagraph:

"(C) TAXATION OF NONROLLOVER PORTION.—If the total taxable amount of a distribution described in paragraph (5)(A) exceeds the amount transferred in a transfer described in such paragraph, then—

"(i) subsection (e) and section 62(11) shall not apply with respect to the distribution, and

"(ii) to the extent that the total taxable amount of such distribution exceeds the amount transferred, the excess shall be treated as ordinary income (or loss)."

(c) SPECIAL RULE.—For the purpose of applying the amendment made by subsection (a) of this section in the case of a taxpayer whose attempt to comply with the requirements of section 402(a)(5) of the Internal Revenue Code of 1954 (relating to rollover amounts) for a taxable year beginning before the date of enactment of this Act failed to meet the requirement of such section that all property received in a distribution be transferred, the provisions of such section (as amended by subsection (a)) shall be applied by treating any transfer of

property made on or before the later of December 31, 1978, or the 60th day after the date of enactment of this Act as if it were made on or before the 60th day after the day on which the taxpayer received such property. For purposes of this subsection, a transfer of money shall be treated as a transfer of property received in a distribution to the extent that the amount of the money transferred does not exceed the fair market value of the property distributed on (or at any time within 60 days after) the date on which the taxpayer received the distribution.

(d) EFFECTIVE DATE.—The amendment made by subsections (a) and (b) shall apply with respect to taxable years beginning after December 31, 1974.

SEC. 5. CASH PAYMENT IN LIEU OF FOOD STAMPS TO RECIPIENTS OF SSI BENEFITS.

(a) Section 8(d) of Public Law 93-233 is amended by adding at the end thereof the following new sentences: "For purposes of this subsection, if the State requests the Secretary to make the finding specified in the first sentence of this subsection and to make an additional cash payment under title XVI in lieu of food stamps, in the amount and the manner described below, to every individual in the State who does not have an eligible spouse and who receives a supplementary payment pursuant to an agreement under section 1616(a) of the Act (other than an individual who (i) receives such a supplementary payment at a level prescribed by the State by reason of his or her residence in an institution, or other living arrangement in which board and care are provided, or (ii) receives payments pursuant to section 212 of Public Law 93-66 at a level in excess of the level applicable to such individual as established by the State under such agreement), the Secretary shall make such payments if he finds that the conditions of paragraph (1) has been met (and for this purpose the conditions of paragraph (1) shall be considered to have been met to the extent that they involve amounts payable under the law referred to in paragraph (1)(B) notwithstanding the suspension in 1978 of the cost-of-living increase in State supplementary payments under such law) for months beginning with the first month in which, as determined by the Secretary, such additional cash payment can be made, and ending with the month before the first subsequent month for which the conditions of paragraph (1) are met without regard to this sentence (and the requirements of paragraph (2) shall also be considered to have been met, effective on the first day of such first subsequent month, for purposes of applying the first sentence of this subsection to that month and succeeding months). For purposes of the preceding sentence, the amount of an additional cash payment under title XVI in lieu of food stamps shall equal the cash value of the minimum allotment specified by section 8 (a) of the Food Stamp Act of 1977 for one-person households, and such additional cash payment shall be appropriately included in or with the check issued to such individual in payment of his supplementary security income benefit (or supplementary payment under such section 1616(a)).".

(b) No additional cash payment under title XVI of the Social Security Act may be made pursuant to the third sentence of section 8(d) of Public Law 93-233 (as added by subsection (a) of this section) for any month beginning before October 1, 1978, or ending after September 30, 1979.

Amend the title so as to read: "An Act to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera, home production of beer and wine, refunds of the taxes on gasoline and special fuels to aerial applicators, and partial rollovers of lump sum distributions.".

Mr. CORMAN (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the Senate amendments be dispensed with, and that they be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the House amendments to the Senate amendments.

The Clerk read the House amendments to the Senate amendments as follows:

Page 3, line 25, of the Senate engrossed amendments, insert a comma after "18 years of age".

Page 4 of the Senate engrossed amendments, strike out lines 1 through 5 and insert the following: age (if any) established by law applicable in the locality in which the household is situated at which beer may be sold to individuals, whichever is greater."

Page 4, line 19, of the Senate engrossed amendments, strike out "illegally produced beer" and insert in lieu thereof "to illegally produced beer".

Page 8, line 7, of the Senate engrossed amendments, strike out "paragraph (4)" and insert in lieu thereof "paragraph (4))".

Page 8, beginning in line 12, of the Senate engrossed amendments, strike out "the first section of this Act" and insert in lieu thereof "this section".

Page 8 of the Senate engrossed amendments, strike out line 16 and all that follows down through line 9 on page 13, and insert:

SEC. 4. PARTIAL ROLLOVERS OF LUMP SUM DISTRIBUTIONS.

(a) PARTIAL ROLLOVER FROM EMPLOYEES' TRUSTS PERMITTED.—Paragraph (5) of section 402(a) of the Internal Revenue Code of 1954 (relating to rollover amounts) is amended to read as follows:

"(5) ROLLOVER AMOUNTS.—

"(A) GENERAL RULE.—If—

"(i) the balance to the credit of an employee in a qualified trust is paid to him in a qualifying rollover distribution,

"(ii) the employee transfers any portion of the property he receives in such distribution to an eligible retirement plan, and

"(iii) the amount so transferred consists of the property (other than money) distributed,

then such distribution (to the extent so transferred) shall not be includible in gross income for the taxable year in which paid.

"(B) MAXIMUM AMOUNT WHICH MAY BE ROLLED OVER.—In the case of any qualifying rollover distribution, the maximum amount transferred to which subparagraph (A) applies shall not exceed the fair market value of all the property the employee receives in the distribution, reduced by the employee contributions.

"(C) TRANSFER MUST BE MADE WITHIN 60 DAYS OF RECEIPT.—Subparagraph (A) shall not apply to any transfer of a distribution made after the 60th day following the day on which the employee received the property distributed.

"(D) DEFINITIONS.—For purposes of this paragraph—

"(i) QUALIFYING ROLLOVER DISTRIBUTION.—The term 'qualifying rollover distribution' means 1 or more distributions—

"(I) within 1 taxable year of the employee on account of a termination of the plan of which the trust is a part or, in the case of a profit-sharing or stock bonus plan, a complete discontinuance of contributions under such plan, or

"(II) which constitute a lump sum distribution within the meaning of subsection (e)(4)(A) (determined without reference to subsection (e)(4)(B)).

"(ii) EMPLOYEE CONTRIBUTIONS.—The term 'employee contributions' means—

"(I) the excess of the amounts considered contributed by the employee (determined by applying section 72(f)), over

"(II) any amounts theretofore distributed to the employee which were not includible in gross income.

"(iii) QUALIFIED TRUST.—The term 'qualified trust' means an employees' trust described in section 401(a) which is exempt from tax under section 501(a).

"(iv) ELIGIBLE RETIREMENT PLAN.—The term 'eligible retirement plan' means—

"(I) an individual retirement account described in section 408(a),

"(II) an individual retirement annuity described in section 408(b) (other than an endowment contract),

"(III) a retirement bond described in section 409,

"(IV) a qualified trust, and

"(V) an annuity plan described in section 403(a).

"(E) SPECIAL RULES.—

"(i) TRANSFER TREATED AS ROLLOVER CONTRIBUTION UNDER SECTION 408.—For purposes of this title, a transfer described in subparagraph (A) to an eligible retirement plan described in subclause (I), (II), or (III) of subparagraph (D)(iv) shall be treated as a rollover contribution described in section 408(d)(3).

"(ii) SELF-EMPLOYED INDIVIDUALS AND OWNER-EMPLOYEES.—An eligible retirement plan described in subclause (IV) or (V) of subparagraph (D)(iv) shall not be treated as an eligible retirement plan for the transfer of a distribution if any part of the distribution is attributable to a trust forming part of a plan under which the employee was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan."

(b) PARTIAL ROLLOVER OF ANNUITY CONTRACTS PERMITTED.—Subsection (a) of section 403 of such Code (relating to taxability of beneficiary under a qualified annuity plan) is amended by striking out paragraphs (4) and (5) and inserting in lieu thereof the following new paragraph:

"(4) ROLLOVER AMOUNTS.—

"(A) GENERAL RULE.—If—

"(i) the balance to the credit of an employee in an employee annuity described in paragraph (1) is paid to him in a qualifying rollover distribution,

"(ii) the employee transfers any portion of the property he receives in such distribution to an eligible retirement plan, and

"(iii) the amount so transferred consists of the property (other than money) distributed,

then such distribution (to the extent so transferred) shall not be includible in gross income for the taxable year in which paid.

"(B) CERTAIN RULES MADE APPLICABLE.—Rules similar to the rules of subparagraphs (B) through (E) of section 402(a)(5) and of paragraph (6) of section 402(a) shall apply for purposes of subparagraph (A)."

(c) TAXATION OF PORTION NOT ROLLED OVER.—

(1) GENERAL.—Paragraph (6) of section 402(a) of such Code (relating to special rollover rules) is amended by adding at the end thereof the following new subparagraph:

"(C) TREATMENT OF PORTION NOT ROLLED OVER.—If any portion of a lump sum distribution is transferred in a transfer to which paragraph (5)(A) applies, paragraph (2) of subsection (a), and paragraphs (1) and (3) of subsection (e) shall not apply with respect to such lump sum distribution."

(2) CONFORMING AMENDMENTS.—Paragraph (6) of section 402(a) of such Code is amended—

(A) by striking out "For purposes of paragraph (5)(A)(i)",

(B) by striking out "A complete" in subparagraph (A) and inserting in lieu thereof "For purposes of paragraph (5)(D)(i), a complete", and

(C) by inserting "For purposes of paragraph (5)(D)(i)—" after "Assets.—" in subparagraph (B).

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a), (b), and (c) shall apply with respect to taxable years beginning after December 31, 1974.

(2) VALIDATION OF CERTAIN ATTEMPTED ROLLOVERS.—If the taxpayer—

(A) attempted to comply with the requirements of section 402(a)(5) or 403(a)(4) of the Internal Revenue Code of 1954 for a taxable year beginning before the date of the enactment of this Act, and

(B) failed to meet the requirements of such section that all property received in the distribution be transferred,

such section (as amended by this section) shall be applied by treating any transfer of property made on or before December 31, 1978, as if it were made on or before the 60th day after the day on which the taxpayer received such property. For purposes of the preceding sentence, a transfer of money shall be treated as a transfer of property received in a distribution to the extent that the amount of the money transferred does not exceed the highest fair market value of the property distributed during the 60-day period beginning on the date on which the taxpayer received such property.

Mr. CORMAN (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the House amendments to the Senate amendments be dispensed with, and that they be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from California?

Mr. STEIGER. Mr. Speaker, reserving the right to object, I reserve the right to object in order to give the gentleman from California an opportunity to briefly explain the amendments proposed by the other body and included in the text of the bill.

Mr. CORMAN. Mr. Speaker, will the gentleman yield?

Mr. STEIGER. I will be happy to yield to the gentleman.

Mr. CORMAN. I thank the gentleman for yielding.

Mr. Speaker, H.R. 1337, as passed by the Senate, is a combination of three small bills which have been passed by the House plus several Senate amendments.

The first section of the bill provides that the use of the administratively developed "cost floor" rule is specifically prohibited as an alternative tax base for purposes of computing the excise tax on trucks, buses, and other highway equipment sold by manufacturers at retail. Under a Senate amendment to the House bill, the September 30, 1977, effective date was changed so that this rule will apply prospectively beginning with the first calendar quarter which begins more than 30 days after enactment.

In this connection, I want to emphasize that the intent of the Committee on Ways and Means concerning the constructive sale price percentage for a type of taxable article is that the percentage is to be determined by reference to a comparison between the price at which these articles are sold at retail and the price at which these articles are predominately sold at other than retail, even though these latter sales may comprise a minority of the total sales of such articles.

The second section of the bill deals with Excise taxes on beer and wine. It corrects problems in interpreting present law so that an adult may brew beer or make wine in limited quantities for personal and family use without incurring beer or wine excise taxes or being subject to certain penalties. Under a Senate amendment to the House-passed provisions, which were contained in H.R. 2028, the treatment of home-brewing is made parallel to the treatment of home winemaking so that home brewers will be able to brew up to 200 gallons of beer each year without being subject to the 30-gallon-on-hand limitation and the registration requirement contained in the House bill. However, there are several clarifying amendments that are made to conform the language contained in the Senate amendment to that of the House bill.

The third section of the bill expands the farming exemption from fuel taxes to enable an aerial crop duster who uses fuel for farming purposes to claim the tax refund or credit. A Senate amendment to the House-passed provision, which was contained in H.R. 2852, requires that the farmer must waive his right to the refund or credit in order for the crop duster to claim it. A technical amendment is made to correct the effective date as contained in the Senate amendment.

The fourth section of the bill is a Senate provision which would allow tax-free treatment for any portion of a lump-sum distribution from a qualified retirement plan which is deposited in an individual retirement account or another qualifying plan. There is also a special makeup rule for individuals who previously attempted to make a rollover deposit but failed to transfer the required amount.

In addition to various technical amendments, an amendment is made to this Senate amendment which is necessary to extend the relief provided by the bill to plans funded by annuity contracts. A similar makeup rule would apply to individuals who previously attempted to roll over distributions from annuity plans, but failed to transfer the entire amount of the distribution.

The final section of the Senate-passed bill deals with supplemental security income and is identical to H.R. 13814, which was favorably reported by the Committee on Ways and Means on August 16. It addresses a problem which has recently arisen regarding the SSI program in California.

The Senate amendment contained in section 5 of H.R. 1337 amends section 8(d) of Public Law 93-233. It provides that, upon the request of the State of California, the Secretary of Health, Education, and Welfare would make a monthly cash payment equal to the minimum food stamp allotment for an eligible one-person household ($10) to noninstitutionalized, SSI recipients who do not have an eligible spouse. This additional payment would be included in or with the individual's SSI check. Eligible SSI individuals would receive this $10 monthly cash payment in place of food stamps. These cash payments in lieu of food stamps could not be made before October 1, 1978 nor continue beyond September 30, 1979.

This amendment is identical to a bill, H.R. 13814, that has been approved by the Committee on Ways and Means and is scheduled to be considered by the House under a suspension of the rules.

The purpose of the Senate amendment and the committee approved bill is to provide eligible SSI individuals in California with a Federal payment equivalent to their food stamp entitlement in a manner that reduces administrative procedures and costs. Under both, noninstitutionalized SSI individuals in the State would receive a monthly $10 cash payment in lieu of food stamps. The amendment would allow California to resume the "cash-out" status for SSI recipients that has been in effect since the SSI program was implemented in January of 1974.

The Congressional Budget Office (CBO) estimates that, for fiscal 1979, the payments provided under this amendment will cost approximately $60 million; $57 million for benefits and $3 million for administration. CBO estimates that if this amendment is not enacted, and SSI recipients in California remain eligible for food stamps, annual Federal food stamp cost will increase by $50 million, $30 million of which would be for benefits and $20 million for the Federal share of administrative expenditures. Since States pay half the food stamp administrative costs, the CBO estimate indicates that California would pay an additional $20 million in yearly administrative costs if SSI recipients remain eligible for food stamps. In other words, it would cost approximately $40 million ($20 million Federal and $20 million State) to administer $30 million in food stamp benefits. Whereas, under this Senate amendment and the committee bill, it would cost only $3 million to administer $57 million in benefits. Almost twice as many needy aged, blind, and disabled individuals would receive the Federal benefits to which they are entitled at a fraction of the administrative cost, and at a comparable total cost to the Federal Government.

Mr. Speaker, I urge that the House concur in the Senate amendments, with the modifications just described.

Mr. STEIGER. Mr. Speaker, further reserving the right to object, I very much appreciate the explanation of the gentleman from California (Mr. CORMAN).

I would hope that the House might unanimously agree to this request. These amendments are in fact sensible. I urge their adoption.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, the gentleman from California (Mr. CORMAN) was good enough to discuss this matter with me before he made his request, and I indicated I had some questions about the procedure being followed. The gentleman has adequately described the problem, but I think the question is larger than just the immediate bill before us.

We are constantly faced with bills from the Committee on Ways and Means and from the other body containing a number of unrelated provisions.

There are some good provisions in this bill, but the Members should understand precisely the full implications of section 5 which was added by the other body. It would not be uncharitable to characterize this section as a direct result of the action taken by the voters in California who voted overwhelmingly in favor of proposition 13.

As I understand the explanation of what the gentleman from California (Mr. CORMAN) is asking, it would require the Federal Government to come up with $60 million to take the place of funds that the State of California was required to appropriate by law for SSI recipients. The California legislature did not provide these funds, because they wished to cut down on welfare costs in the wake of proposition 13.

The basic question, it seems to me, is why the Congress should step in and bail out California's welfare program in this instance, particularly when the Committee on Ways and Means has already reported out on August 17 a bill, H.R. 13814, that can be in due course considered by the House and acted on when there is chance for debate and amendment.

Mr. Speaker, I would hope that the gentleman from California (Mr. CORMAN) would withdraw his request at this time so it would be in order for us to debate this section 5, the other body's amendment, in proper order.

Mr. CORMAN. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from California.

Mr. CORMAN. Mr. Speaker, I might explain to the gentleman from Maryland (Mr. BAUMAN) that this does not give any SSI recipient in California any more Federal welfare benefits than the existing law does. The existing law requires the Federal Government to give $10 in food stamps to noninstitutionalized SSI recipients in California who do not have an eligible spouse. It is estimated that $30 million would be spent for these food stamp benefits in fiscal 1979.

Additionally, the Federal Government will pay one-half of administrative costs and the State the other half of the costs of making these food stamp payments. The Congressional Budget Office estimates that total administrative costs associated with the payment of the $30 million in food stamp benefits will be $40 million in fiscal 1979, half paid by the Federal Government and half by the State of California.

Mr. BAUMAN. Mr. Speaker, further reserving the right to object, I would have to say to the gentleman that, according to the information before me, there is an additional cost of $10 million to the Federal Government, if this bill is passed, over and above what it would cost for the State of California to go into the food stamp program for the supplemental benefits. But the greater additional cost if they go into the food stamp program, as I understand it, will result because California will have to come up with the money for the administrative costs, which could be considerable. That seems to me to be the problem of the current government of California, in the wake of the wise decision of their electorate on proposition 13.

Mr. CORMAN. If the gentleman will yield, half of the administrative costs will be paid by the State of California and half will come from the Federal Government. All of the food stamp benefit costs will be paid by the Federal Government. It is uncertain as to how many aged, blind, or disabled people who are eligible for food stamps would actually go down to the welfare office, apply and go through the bureaucratic process required to get that $10 worth of food stamps. The $10 million net cost of the bill estimated by the Congressional Budget Office assumes substantially less than 100 percent participation in the food stamp program. If all who are eligible for food stamps collected them, the Senate amendment under consideration would result in substantial savings to the Federal Government, because of the lower administrative costs.

I would urge the gentleman to consider the importance of time. As soon as we can get this bill passed, HEW can begin making their computer adjustments, and they can abandon the process necessary to get several hundred thousand people processed and eligible for food stamps.

When this bill is passed, the basic administrative procedure will be to make the adjustment to the checks of those eligible for the additional $10. They are presently entitled to that $10 from the Federal Government; but they are now entitled to $10 of food stamps rather than the cash.

Mr. BAUMAN. Mr. Speaker, further reserving the right to object, I understand the gentleman's concern, but I also think there are better procedures available for the House to consider a request of this nature. Other States may wisely adopt spending and taxing limitation policies as did the California electorate, to control State officials, because of their inability to control themselves. But the request before us sets a precedent for the Federal Government to step in in each instance and bail out those States. Indeed, in this case it will cost $60 million, $10 million net more. I do not wish to set such a precedent.

I think we should debate the full issue in due course and not under unanimous consent. Unless the gentleman wishes to withdraw his request, I would object.

Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

---

## CIVIL SERVICE REFORM ACT OF 1978

Mr. UDALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 11280) to reform the civil service laws.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 307, nays 10, answered "present" 1, not voting 114, as follows:

Mr. LIVINGSTON changed his vote from "nay" to "yea."

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 11280, with Mr. DANIELSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on August 11, 1978, all time for general debate on the bill had expired.

Pursuant to the rule, the Clerk will now read by titles the committee amendment in the nature of a substitute recommended by the Committee on Post Office and Civil Service now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk proceeded to read the bill.

POINT OF ORDER

Mr. MEEDS. Mr. Chairman, I make a point of order against titles IX and X, based on their violation of clause 7, rule XVI, in that they are nongermane to the bill before us.

Title IX deals with two groups of em-

ployees not covered in the original bill. It includes postal workers and District of Columbia employees. There is much precedent which indicates that we have classes of subjects not covered by the basic proposition before us, which renders the new material nongermane. That is precisely what title IX does by adding two new subjects.

Title X, on the other hand, introduces new subject matter, the pay of firefighters that is not covered in the original bill. Title X deals exclusively with hours of work and wages of firefighters, while the original bill deals with the institution of the merit system within the system. Where hours or wages are included, it is only incidental to the basic proposition of the merit system, so both of these titles should be stricken for the above reason, and for the added reason that neither proposition amends the original bill. Rather, both seek to amend existing and basic law.

The CHAIRMAN. The gentleman from Washington (Mr. MEEDS) makes a point of order against titles IX and X.

Mr. CLAY. Mr. Chairman, I rise in opposition to this point of order.

For the life of me, I cannot understand how and why title IX should be treated in this discriminatory manner.

The facts are fairly obvious—and the connections between Hatch Act reform and the rest of H.R. 11280 are quite strong—

First, the bill, in section 2302 (on page 138, beginning on line 24) defines improper political activities as a prohibited personnel practice. Title IX of the bill states exactly what these improper political activities are.

Second, the bill charges the special counsel of the Merit System Protection Board (MSPB) with responsibility for not only investigating prohibited personnel activities in general but improper political activities in particular. (See page 160, beginning on line 24.) Title IX of the bill defines more fully these activities which apply to Federal civilian as well as postal employees.

Mr. Chairman, it is inconceivable to me that this bill—which touches on virtually every aspect of civil service—should have political activities and firefighters singled out for this kind of shabby treatment.

Title IX is virtually identical to H.R. 10, the Federal Employees' Political Activities Act of 1977, which passed the House on June 7, 1977, by a vote of 244 to 164. The only major differences between title IX and H.R. 10 is that title IX designates the special counsel of the Merit Systems Protection Board as the enforcing authority and the Board as the adjudicatory authority. H.R. 10 designated the general counsel of the Civil Service Commission as the enforcing authority while the Commission would have been the adjudicatory authority. These changes assume that the Civil Service Commission will be superceded by the Office of Personnel Management (OPM) and the Merit Systems Protection Board established under reorganization plan No. 2 of 1978. The investigative procedures of H.R. 10 were deleted to parallel those established in H.R. 11280.

Although both the committee and the House approved this legislation in the last two Congresses by overwhelming margins, it has become increasingly clear to me that the other body will not act on Hatch Act reform this year. I offered my amendment in committee in order to insure that both Houses of Congress have the opportunity to work their will in considering reform of the Hatch Act. Many of us have worked long and hard in pressing for passage of this and other legislation in recent years only to see it languish and die in the other body.

Mr. Chairman, the issue of full political participation for Federal employees and protection of the public interest should be addressed here and now.

Finally, inclusion of Hatch Act reform does not constitute a "burden" on civil service reform. Civil service reform and Hatch Act reform are inextricably interrelated. Each insures that the people's business—the business of our Government—is conducted in a fair and impartial manner.

Inclusion of Hatch Act reform in this bill is not "untimely" as the administration would like the public to believe. There can be nothing more "timely" than providing Federal employees with the right to full participation in the political process of our Nation.

Mr. Chairman, it is inconceivable to me that this bill, which touches on virtually every aspect of civil service, should have political activities and firefighters singled out for this kind of shabby treatment. Title IX is virtually identical to H.R. 10, the Federal Employees Political Activities Act of 1977, which passed this House on June 7 of last year by a vote of 264 to 164.

Mr. Chairman, I think that it is unfortunate that the kind of heavy-handed activity and pressure is taking place to combine both title IX and title X into the same point of order as permitted by the rule. Personally, I resent that kind of heavy-handed activity on the part of the leadership of this House and on the part of the administration of this Nation.

Mr. Chairman, I urge that the point of order not be sustained.

Mr. HARRIS. Mr. Chairman, I rise in opposition to the point of order.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, the point of order under the rule applies to titles IX and X, and comes before this House in a most unusual, and indeed a peculiar, way that the Chair perhaps would have to rule against the germaneness of one title that will be germane, because it is connected in the rule to another title that the Chair may consider nongermane.

I think it is unfortunate that the House must consider the matter in that fashion. I would point out to the Chair with regard to this point of order that title X, in fact, does pass the jurisdictional test. It was in fact with the same jurisdiction committee, the Committee on Post Office and Civil Service, as this bill is brought; therefore, it passes that jurisdictional test as far as the case is concerned.

I would point out further that the firefighter bill was actually reported out of this committee and came before this House; it passed by almost a 2-to-1 margin. Again, it reaches the fundamental purpose test.

The bill itself is for the reform of the civil service system by title. This bill is for the reform of the working conditions of the firefighters, a part of the civil service system by title. The fundamental purpose of both bills are exactly the same, that is, reform of the system.

All the titles are not across-the-board application in this bill. I refer the Chair specifically to title IV, which deals with a very small segment of the civil service system, that is the senior executives. This title deals only with 9,000 senior executives of the civil service. The firefighters bill deals with 11,000 civil service employees. If in fact we would hold that the firefighters failed the germaneness test, because it dealt with a smaller group than an across-the-board structure, we would certainly have to argue that on title IV. Title IV deals with a subgroup. Title X deals with a subgroup. It deals with a particular application.

I can cite precedents to indicate that when a bill deals with several particulars, one particular may be held to be germane.

In fact, this class is the same as the other titles of the bill. A bill may be amended by a specific proposition of the same class.

I would be happy to quote to the Chair about a dozen precedents that make this point.

If in fact we were to deal with the whole civil service system, dealing with a particular part of that system, that is the firefighters and their work rules is a particular matter within that system. Therefore, I would urge the Chair to overrule the point of order and hold title X as germane.

The CHAIRMAN. The gentleman from Washington makes a point of order against titles IX and X of the committee amendment in the nature of a substitute recommended by the Committee on Post Office and Civil Service, on the grounds that those titles would not have been germane if offered as an amendment to the bill H.R. 11280, as introduced.

As indicated by the gentleman from Washington, the special order providing for consideration of this measure, House Resolution 1307, allows the Chair to entertain a point of order on the basis stated by the gentleman, that titles IX and X would not have been germane as a separate amendment to H.R. 11280 in its introduced form.

The bill as introduced and referred to the Committee on Post Office and Civil Service, although broad in its coverage of reform proposals within the competitive service and in the executive branch of the Government, is limited to merit system principles and personnel management within the civil service of the U.S. Government. Title IX of the

committee amendment is designed to characterize and to protect appropriate political activities of employees of the District of Columbia and Postal Service as well as civil service employees, by amending the Hatch Act. The Chair agrees with the argument of the gentleman from Washington that the amendment would add an entirely new class of employees to that covered by the bill, and for that reason is not germane.

Accordingly the Chair sustains the point of order.

Pursuant to the rule the Clerk will now read by titles the substitute committee amendment without titles IX and X, recommended by the Committee on Post Office and Civil Service, now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read the bill.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of section 2, and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. CHARLES H. WILSON of California. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk continued the reading of the bill.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of section 3; and that it be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. CHARLES H. WILSON of California. Reserving the right to object, Mr. Chairman, this is an extremely important bill that some Members are trying to pass through in this Congress. I think it is extremely important that those of us who are here on the floor know what is in this bill.

There have been many agreements made in connection with parts of the bill with members of the committee who are extremely concerned about labor provisions and about other provisions affecting this new section by which they are going to destroy the civil service system which we have known for so many years.

Mr. Chairman, I do not think that this is something we should take so lightly. That is the reason I am asking that the bill be read. I think it is important enough to every member of this committee that we do have this bill read and that we understand what is in it.

Therefore, Mr. Chairman, I am going to have to continue to object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk continued to read.

POINT OF ORDER

Mr. CHARLES H. WILSON of California. Mr. Chairman, I have a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I know the Clerk is not deliberately skipping some of these lines. He must be getting tired, but he is beginning to go a little fast over some of these lines. I think that all of the lines should be read.

The CHAIRMAN. The Chair will state that the Chair observes that the Clerk is proceeding in regular order.

The Clerk will read.

The Clerk continued to read.

Mr. DERWINSKI (during the reading). Mr. Chairman, I have been impressed by the attention of the House, so therefore, I would ask unanimous consent that the remainder of the title be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

Mr. CHARLES H. WILSON of California. Mr. Chairman, reserving the right to object, right up to now I have been very impressed with the principles of this bill, and it sounds pretty good so far, but I have to have the rest of it read, I will say to the gentleman from Illinois (Mr. DERWINSKI), because there may be something in here that is going to change my opinion about it. I think right up to now it sounds beautiful, but I will have to object.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. CHARLES H. WILSON of California. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding. Is it not possible for the gentleman to read by himself?

Mr. CHARLES H. WILSON of California. The gentlewoman is certainly correct. I think the gentlewoman understands what is going on here.

Mrs. FENWICK. If the gentleman will yield, I honestly do not.

Mr. CHARLES H. WILSON of California. I object to the legislation, and I am using the rights that are guaranteed to me as a Member of this body to exercise my opposition to the legislation. It has been done on the gentlewoman's side; it has been done on our side.

Mrs. FENWICK. If the gentleman will yield further, I know. Will the gentleman, though, consider that the people's time is involved here. Our time is short until we are supposed to adjourn, and we are not unpaid volunteers; we are paid public servants.

Mr. CHARLES H. WILSON of California. I realize that.

Mrs. FENWICK. I think we should be using our time in the most effective way for the public benefit.

Mr. CHARLES H. WILSON of California. If the Speaker will pull this bill off the calendar, we can proceed with the important business of the Congress. I do not think this bill is so important that it has to be passed in this Congress.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. CHARLES H. WILSON of California. I yield to the gentleman from New York.

Mr. BIAGGI. I thank the gentleman for yielding.

I would like to comment in response to the gentlewoman from New Jersey. We are aware of our responsibilities, and we are aware of the people's concerns, and we are aware that there are many people in this country in government employment who would rather not have this bill see the light of day. We are exercising whatever legitimate tactic is made available to us through parliamentary procedure. To impugn the conduct that is procedural and proper, in my judgment, is strictly out of order, and I think it is unfortunate.

Mrs. FENWICK. I resent very much the fact that the gentleman from New York suggests that I impugn anything. I merely asked if we could not proceed in a more orderly manner.

The CHAIRMAN. All Members will suspend. The gentleman from New York (Mr. BIAGGI) will suspend, and all other Members will suspend.

The Chair will state that the time is under the control of the gentleman from California (Mr. CHARLES H. WILSON).

Mr. CHARLES H. WILSON of California. Mr. Chairman, still reserving the right to object, I would like to say to the gentlewoman from New Jersey (Mrs. FENWICK) that she is absolutely correct in any observation that she makes. That does not offend me at all at this point.

Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk continued to read.

POINT OF ORDER

Mr. CHARLES H. WILSON of California (during the reading). Mr. Chairman, I again make a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I think the Clerk forgot to read line 6 on page 142. I recognize the burden placed upon him; however, I must have all of the lines read, if I can.

The CHAIRMAN. The Clerk will read line 6 on page 142, commencing with line 6, "through affirmative action * * *"

The Clerk concluded the reading of title I.

The text of title I reads as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Civil Service Reform Act of 1978".

SEC. 2. The table of contents is as follows:

TABLE OF CONTENTS

Sec. 1. Short title.
Sec. 2. Table of contents.
Sec. 3. Findings and statement of purpose.

TITLE I—MERIT SYSTEM PRINCIPLES

Sec. 101. Merit system principles; prohibited personnel practices.

TITLE II—CIVIL SERVICE FUNCTIONS; PERFORMANCE APPRAISAL; ADVERSE ACTIONS

Sec. 201. Office of Personnel Management.
Sec. 202. Merit Systems Protection Board and Special Counsel.
Sec. 203. Performance appraisals.
Sec. 204. Adverse actions.
Sec. 205. Appeals.

TITLE III—STAFFING

Sec. 301. Volunteer services.
Sec. 302. Definitions relating to preference eligibles.
Sec. 303. Noncompetitive appointment of certain disabled veterans.

Sec. 304. Examination, certification, and appointment of preference eligibles.
Sec. 305. Retention preference.
Sec. 306. Training.
Sec. 307. Travel, transportation, and subsistence.
Sec. 308. Retirement.
Sec. 309. Extension of veterans readjustment appointment authority.
Sec. 310. Notification of vacancies in the civil service.
Sec. 311. Dual pay for members of the uniformed services.
Sec. 312. Minority recruitment program.
Sec. 313. Effective date.

TITLE IV—SENIOR EXECUTIVE SERVICE

Sec. 401. General provisions.
Sec. 402. Authority for employment.
Sec. 403. Examination, certification, and appointment.
Sec. 404. Retention preference.
Sec. 405. Performance rating.
Sec. 406. Awarding of ranks.
Sec. 407. Pay rates and systems.
Sec. 408. Pay administration.
Sec. 409. Travel, transportation, and subsistence.
Sec. 410. Leave.
Sec. 411. Disciplinary actions.
Sec. 412. Retirement.
Sec. 413. Conversion to the Senior Executive Service.
Sec. 414. Limitations on executive positions.
Sec. 415. Effective date; experimental application.

TITLE V—MERIT PAY

Sec. 501. Pay for performance.
Sec. 502. Technical and conforming amendments.
Sec. 503. Effective date.

TITLE VI—RESEARCH, DEMONSTRATION, AND OTHER PROGRAMS

Sec. 601. Research programs and demonstration projects.
Sec. 602. Intergovernmental Personnel Act amendments.
Sec. 603. Amendments to the mobility program.

TITLE VII—FEDERAL SERVICE LABOR-MANAGEMENT RELATIONS

Sec. 701. Federal service labor-management relations.
Sec. 702. Backpay in case of unfair labor practices and grievances.
Sec. 703. Technical and conforming amendments.
Sec. 704. Miscellaneous provisions.

TITLE VIII—GRADE AND PAY RETENTION

Sec. 801. Grade and pay retention.

TITLE IX—POLITICAL ACTIVITIES

Sec. 901. Federal employees' political activities.
Sec. 902. State and local employees' political activities.
Sec. 903. Effective date.
Sec. 904. Study concerning political participation by Federal employees.

TITLE X—FIREFIGHTERS

Sec. 1001. Basic workweek of firefighters.
Sec. 1002. Effective date.

TITLE XI—MISCELLANEOUS

Sec. 1101. Study on decentralization of governmental functions.
Sec. 1102. Savings provisions.
Sec. 1103. Authorization of appropriations.
Sec. 1104. Powers of President unaffected except by express provisions.
Sec. 1105. Technical and conforming amendments.
Sec. 1106. Effective date.

FINDINGS AND STATEMENT OF PURPOSE

SEC. 3. It is the policy of the United States that—

(1) the merit system principles which shall govern in the competitive service and in the executive branch of the Federal Government should be expressly stated to furnish guidance to Federal agencies in carrying out their responsibilities in administering the public business, and prohibited personnel practices should be statutorily defined to enable Government officers and employees to avoid conduct which undermines the merit system principles and the integrity of the merit system;

(2) Federal employees should receive appropriate protection through increasing the authority and powers of the independent Merit Systems Protection Board in processing hearings and appeals affecting Federal employees;

(3) the authority and power of the Special Council should be increased so that the Special Counsel may investigate prohibited personnel practices and reprisals against Government employees for the lawful disclosure of certain information and may file complaints, against agency officials and employees who engage in such conduct;

(4) the function of filling positions and other personnel functions in the competitive service and in the executive branch should be delegated in appropriate cases to the agencies to expedite processing appointments and other personnel actions, with the control and oversight of this delegation being maintained by the Office of Personnel Management to protect against prohibited personnel practices and the use of unsound management practices by the agencies;

(5) a Senior Executive Service should be established to provide the flexibility needed by agencies to recruit and retain the highly competent and qualified managers needed to provide more effective management of agencies and their functions, and the more expeditious administration of the public business;

(6) in appropriate instances, pay increases should be based on quality of performance rather than length of services;

(7) research programs and demonstration projects should be authorized to permit Federal agencies to experiment, subject to congressional review, with new and different personnel management concepts in controlled situations to achieve more efficient management of the Government's human resources and greater productivity in the delivery of service to the public; and

(8) the training program of the Government should include retraining of employees for positions in other agencies to avoid separations during reductions in force and the loss to the Government of the knowledge and experience that these employees possess.

TITLE I—MERIT SYSTEM PRINCIPLES

MERIT SYSTEM PRINCIPLES; PROHIBITED PERSONNEL PRACTICES

SEC. 101. (a) Title 5, United States Code, is amended by inserting after chapter 21 the following new chapter:

"Chapter 23—MERIT SYSTEM PRINCIPLES

"Sec.
"2301. Merit system principles.
"2302. Prohibited personnel practices.
"2303. Responsibility of the General Accounting Office.
"2304. Coordination with certain other provisions of law.

"§ 2301. Merit system principles

"(a) This section shall apply to—

(1) an Executive agency;

"(2) the Administrative Office of the United States Courts; and

"(3) the Government Printing Office.

"(b) It is the policy of the Congress that in order to provide the people of the United States with a highly competent, honest, and productive Federal workforce reflective of the Nation's diversity, and to improve the quality of public service, Federal personnel management should be implemented consistent with the merit system principles.

"(c) The merit system principles are as follows:

"(1) Recruitment should be from qualified individuals from appropriate sources in an endeavor to achieve a work force from all segments of society, and selection and advancement should be determined solely on the basis of relative ability, knowledge, and skills, after fair and open competition which assures that all receive equal opportunity.

"(2) All employees and applicants should receive fair and equitable treatment in all aspects of personnel management without regard to political affiliation, race, color, religion, national origin, sex, marital status, age, or handicapping condition, and with proper regard for their privacy and consttutional rights.

"(3) Equal pay should be provided for work of equal value, with appropriate consideration of both national and local rates paid by employers in the private sector, and appropriate incentives and recognition should be provided for excellence in performance.

"(4) All employees should maintain high standards of integrity, conduct, and concern for the public interest.

"(5) The Federal work force should be used efficiently and effectively.

"(6) Employees should be retained on the basis of the adequacy of their performance; inadequate performance should be corrected, and employees should be separated who cannot or will not improve their performance to meet required standards.

"(7) Employees should be provided effective education and training in cases in which education and training would result in better organizational and individual performance.

"(8) Employees should be—

"(A) protected against arbitrary action, personal favoritism, or coercion for partisan political purposes, and

"(B) prohibited from using their official authority for the purpose of interfering with or affecting the result of an election or a nomination for election.

"(9) Employees should be protected against reprisal for the lawful disclosure of information which the employees reasonably believe evidences—

"(A) a violation of law, rule, or regulation,

"(B) mismanagement, a waste of funds, or an abuse of authority, or

"(C) a substantial and specific danger to public health or safety.

"(d) The President shall take actions, including the issuance of rules, regulations, or directives, as the President determines are necessary to carry out the policy set forth in subsection (b) of this section.

"§ 2302. Prohibited personnel practices

"(a)(1) For the purpose of this title, 'prohibited personnel practice' means any action described in subsection (b) of this section.

"(2) For the purpose of this section—

"(A) 'personnel action' means—

"(i) an appointment;

"(ii) a promotion;

"(iii) an action under chapter 75 of this title or other disciplinary or corrective action;

"(iv) a detail, transfer, or reassignment;

"(v) a reinstatement;

"(vi) a restoration;

"(vii) a reemployment;

"(viii) a performance evaluation under chapter 43 of this title;

"(ix) a decision concerning pay, benefits, or awards, or concerning education or training if the education or training may reasonably be expected to lead to an appointment, promotion, performance evaluation, or other action described in this paragraph; and

"(x) a substantial change in duties or responsibilities which may reasonably be expected to result in a reduction in pay or grade;

with respect to an employee in, or applicant for, a position in the competitive service in an agency or a position in the excepted service in an agency (other than a position which is excepted from the competitive service be-

cause of its confidential, policy-determining, or policy advocating character), or to a career appointee in the Senior Executive Service in an agency.

"(B) 'agency' means an Executive agency, the Administrative Office of the United States Courts, and the Government Printing Office, but does not include—

"(i) a Government corporation;

"(ii) the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, or any Executive agency or unit thereof which is designated by the President and which conducts foreign intelligence or counterintelligence activities; or

"(iii) the General Accounting Office.

"(b) Any employee who has authority to take, direct others to take, recommend, or approve any personnel action, shall not, with respect to such authority—

"(1) discriminate for or against any employee or applicant for employment—

"(A) on the basis of race, color, religion, sex, or national origin, as prohibited under section 717 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–16);

"(B) on the basis of age, as prohibited under sections 12 and 15 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631, 633a);

"(C) on the basis of handicapping condition, as prohibited under section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791);

"(D) on the basis of marital status or political affiliation, as prohibited under this title; or

"(E) on any basis prohibited under the provisions of any other law, rule, or regulation;

"(2) solicit or consider any recommendation or statement, oral or written, with respect to any individual who requests or is under consideration for any personnel action unless the recommendation or statement is based on the personal knowledge or records of the person furnishing it and consists of—

"(A) an evaluation of the work performance, ability, aptitude, or general qualifications of the individual; or

"(B) an evaluation of the character, loyalty, or suitability of the individual;

"(3) coerce the political activity of any person (including the providing of any political contribution or service), or take any action against any employee or applicant for employment as a reprisal for the refusal of any person to engage in such political activity;

"(4) deceive or obstruct any person with respect to the person's right to compete for Federal employment;

"(5) influence any person to withdraw from competition for any position for the purpose of improving or injuring the prospects of any other person for employment;

"(6) grant any preference or advantage not authorized by law, rule, or regulation to any employee or applicant for employment (including defining the scope or manner of competition or the requirements for any position) for the purpose of improving or injuring the prospects of any person for Federal employment;

"(7) appoint, employ, promote, advance, or advocate for appointment, employment, promotion, or advancement, in or to a civilian position, any individual who is a relative (as defined in section 3110(a)(3) of this title) of an employee if the position is in the agency in which the employee is serving as a public official (as defined in section 3110(a)(2) of this title) or over which the employee exercises jurisdiction or control as a public official (as defined in section 3110(a)(2) of this title);

"(8) take or fail to take a personnel action with respect to any employee or applicant for employment as a reprisal for—

"(A) a disclosure of information by an employee or applicant which the employee or applicant reasonably believes evidences—

"(i) a violation of any law, rule, or regulation, or

"(ii) mismanagement, a waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety.

if such disclosure is not specifically prohibited by law or if such information is not specifically required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs; or

"(B) a disclosure to the Special Counsel of the Merit Systems Protection Board, or to the Inspector General of an agency or another employee designated by the head of the agency to receive such disclosures, of information which the employee or applicant reasonably believes evidences—

"(i) a violation of any law, rule, or regulation, or

"(ii) mismanagement, a waste of funds, or an abuse of authority, or a substantial and specific danger to public health or safety;

"(9) take or fail to take a personnel action with respect to any employee or applicant for employment as a reprisal for the exercise of any right of appeal granted by law, rule, or regulation;

"(10) discriminate for or against any employee or applicant for employment on the basis of conduct which does not adversely affect the performance of the employee or applicant or the performance of others, except that nothing in this paragraph shall prohibit an agency from taking into account in determining suitability or fitness any conviction of the employee or applicant for any crime of violence or moral turpitude under the laws of any State, of the District of Columbia, or of the United States; or

"(11) take or fail to take any personnel action on the basis of personal favoritism.

"(c) The head of each agency shall be responsible for the prevention of prohibited personnel practices, the compliance with and enforcement of applicable civil service laws, rules, and regulations and other aspects of personnel management. Any individual to whom the head of an agency delegates authority for personnel management, or for any aspect thereof, shall be similarly responsible within the limits of the delegation.

"(d) This section shall not be construed to extinguish or lessen any effort to achieve equal employment opportunity through affirmative action or any right or remedy available to any employee or applicant for employment in the civil service under—

"(1) section 717 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–16), prohibiting discrimination on the basis of race, color, religion, sex, or national origin;

"(2) sections 12 and 15 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631, 633a), prohibiting discrimination on the basis of age;

"(3) section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791), prohibiting discrimination on the basis of handicapping condition;

"(4) the provisions of this title, and rules and regulations thereunder, prohibiting discrimination on the basis of marital status or political affiliation; or

"(5) the provisions of any other law, rule, or regulation prohibiting discrimination on any such basis.

"§ 2303. Responsibility of the General Accounting Office

"If requested by either House of the Congress (or any committee thereof), or if considered necessary by the Comptroller General, the General Accounting Office shall conduct audits and reviews to assure compliance with the laws, rules, and regulations governing employment in the executive branch and in the competitive service and to assess the effectiveness and soundness of Federal personnel management.

"§ 2304. Coordination with certain other provisions of law

"No provision of this chapter, or action taken under this chapter, shall be construed to impair the authorities and responsibilities set forth in section 102 of the National Security Act of 1947 (61 Stat. 495; 50 U.S.C. 403), the Central Intelligence Agency Act of 1949 (63 Stat. 208; 50 U.S.C. 403a and following), Public Law 86–36 (73 Stat. 63; 50 U.S.C. 402), and Public Law 88–290 (78 Stat. 168; 50 U.S.C. 831–835).".

"(b)(1) The table of chapters for part III of title 5, United States Code, is amended by adding after the item relating to chapter 21 the following new item:

"23. Merit system principles..... 2301."

(2) Section 7203 of title 5, United States Code (as redesignated in section 703(1) of this Act) is amended—

(A) by striking out "Physical handicap" in the section heading and inserting in lieu thereof "Handicapping condition"; and

(B) by striking out "physical handicap" each place it appears in the text and inserting in lieu thereof "handicapping condition".

AMENDMENTS OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. HARRIS: Page 136, line 4, after "(b)" insert "or (c)".

Page 138, strike out paragraph (2) beginning on line 13 and ending on line 23 and redesignate the following paragraphs accordingly.

Page 141, after line 19 insert the following:

"(c)(1) No employee may accept or consider, or influence or direct, or attempt to influence or direct any other employee to accept or consider, with respect to any personnel action, any recommendation unless—

"(A) the recommendation is furnished pursuant to a request made by an authorized representative of the United States solely to determine whether the individual involved in the personnel action meets the loyalty, suitability, and character requirements for employment; or

"(B) the recommendation—

"(i) is furnished pursuant to a request of an employee who is responsible for taking (or directing others to take), recommending, processing, or approving the personnel action; and

"(ii) consists solely of an evaluation of the work performance, ability, aptitude, character, or general qualifications of the individual involved in the personnel action.

"(2) Any employee who receives a written recommendation prohibited by paragraph (1) of this subsection shall return such recommendation to the person who provided it, with an appropriate indication that the acceptance or consideration of such recommendation would be in violation of this subsection.

"(3) Any employee who receives an oral recommendation which is prohibited by paragraph (1) of this subsection shall advise, in an appropriate manner, the person providing such recommendation that the acceptance or consideration of such recommendation would be in violation of this subsection.

"(4) For the purpose of this subsection—

"(A) 'recommendation' means any communication, oral or written, made directly or indirectly by—

"(i) a Member of Congress or a candidate for such office;

"(ii) a Congressional employee, as defined in section 2107 of this title (determined without regard to whether or not the employee's pay is paid by the Secretary of the Senate or the Clerk of the House of Representatives);

"(iii) an employee appointed by the President; or

"(iv) an employee in a position which is excepted from the competitive service because of its confidential or policymaking character;

"(B) 'recommendation' does not include an inquiry which is limited solely to a request—

"(i) for a statement on the status of any personnel action; or

"(ii) for an explanation of the basis on which a personnel action has been taken.

Page 141, line 20, strike out "(c)" and insert in lieu thereof "(d)".

Page 142, line 4, strike out "(d)" and insert in lieu thereof "(e)".

Mr. HARRIS (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HARRIS. Mr. Chairman, this is an amendment to this very important bill which would make sure that we eliminated all unwarranted political influence in the civil service personnel matters. I think the important matter that civil service reform is designed to assure or should be designed to assure is that the merit system is not influenced by political recommendations or political pressures but is operated on the basis of merit and handled on the basis of a competitive service as it should be. This can be strengthened by the adoption of this amendment to clearly eliminate unwarranted political recommendations in hiring and promotions and other personnel actions.

Under my amendent the political recommendations from Members of Congress or staff or White House officials and political appointees in the executive branch would be explicitly prohibited. The notion that elected political officers ought to determine who gets what job in the career merit system is simply wrong.

Some argue that it is a fact of life. If so, that fact of life is wrong. It is time to stop working on that system. I think we should be making it clear to people that the hiring and promotion and firing is on the basis of merit, on the basis of competence and job performance, and not on the basis of whom one knows or who makes a recommendation for one.

If in fact we are going to make a case here that we are going to have a merit system that is not influenced by politics or political pressure, then we ought to have the clear language in this bill which says, as this amendment will make it clear, that such a recommendation may not be accepted. I think we should tell to every American that he can be considered for a merit system job if he has the competence and will enter the competitive examination and is qualified, and therefore the recommendation of a politician, an elected official or one appointed in the executive branch will have no bearing on his job application.

If we are really serious about civil service reform, we will put this language in very clearly and precisely, as my amendment does. I cannot imagine having any objection, but I offer it as an amendment and urge that it be adopted.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I will be happy to yield to my good friend and colleague, the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, I would ask the gentleman from Virginia (Mr. HARRIS) if this is the amendment that we defeated in the committee rather overwhelmingly?

Mr. HARRIS. As I recall—and I am not sure whom my colleague refers to as "we."

Mr. ROUSSELOT. Well, I am still on the committee, I am part of the committee.

Mr. HARRIS. I do not think it was a partisan effort at all. The amendment was offered in the committee and was not adopted in the committee.

Mr. ROUSSELOT. It was defeated?

Mr. HARRIS. Yes. And if I may continue, I thought that my amendment was defeated more by proxies than it was by people in the committee and I wanted to give the full house a chance to vote on it where proxies may not have the full effect on it as they do in the committee.

Mr. ROUSSELOT. I think the gentleman is right, proxies do not work here.

But it was defeated in the committee, is that right?

Mr. HARRIS. My colleague is correct, or I would not be offering it here on the floor, I might point out to my colleague.

Mr. ROUSSELOT. I thank the gentleman.

Mr. DERWINSKI. Mr. Chairman, I rise reluctantly, of course, to oppose the amendment offered by the gentleman from Virginia (Mr. HARRIS).

Mr. Chairman, I would also like to use this amendment to emphasize the seriousness of this measure, the importance of this measure to the well-being of this country and its citizenry and the absolute need for this Congress to pass this civil service reform which our noble President has so properly, legitimately and heroically requested.

I would first point out to my dear friend, the gentleman from Virginia (Mr. HARRIS) that I believe he used some weak logic in supporting his amendment. He first stated that it was a fact of life he was trying to correct. You do not correct facts of life, they are there.

Secondly, the gentleman referred to the fact that he lost the amendment in committee because proxies were in other people's hands. That sounds to me as if he is admitting that certain other Members had more charm and were able to exercise the use of proxies because often the person handling the proxies is the one you have the greatest confidence in, the one whose judgment you respect.

Mr. HARRIS. Mr. Chairman, will my colleague yield on that point?

Mr. DERWINSKI. Certainly.

Mr. HARRIS. I want to make it clear to this body, and to my colleague, that there is no question of a contest on charm between my colleague and me, there is no doubt about it, my colleague has the charm.

Mr. DERWINSKI. Mr. Chairman, I think I will put that statement in my campaign literature.

But, here is the point. Under the gentleman's amendment, it would prohibit Members of Congress and Presidential appointees from submitting a recommendation on the application of any person for Federal career employment. Note, it only says Members of Congress and Presidential appointees. It would not prohibit national committeemen or party chairmen, ward committeemen, or local political leaders. Or, to use the gentleman from Virginia's term, politicians should not influence career appointments. What he is saying is that we, as Members of Congress, are politicians. Presidential appointees are politicians, but a Chicago ward committeeman is not a politician.

I do not know if the gentleman has studied politics across the country, but a Chicago ward committeeman is a noble kind of politician. He is a powerful politician, and to say in this amendment, as you do, that a ward committeeman of the city of Chicago could recommend someone for Federal employment, but our distinguished majority leader, the gentleman from Illinois (Mr. ROSTENKOWSKI) could not, is a denial of practical politics.

So, as much as this amendment may have some unique appeal in the suburban areas surrounding Washington, D.C., it does not really square with the facts of life across the country.

There is nothing wrong with a dedicated Presidential appointee or a dedicated Congressman legitimately recommending someone for Federal employment.

I am not aware that there have been particular abuses in this field. I do not think Members of Congress should be denied that responsibility.

In summing up my point of view, may I point out that we will have hundreds of amendments, gosh knows how many days we will be on this bill, but we must not forget the noble goal ahead of us. That noble goal is to give the President of the United States a legitimate reform of the civil service. But I suggest that this amendment does not square with the overall concept of reform.

It is unneeded, it is unworkable. It actually discriminates against Members of Congress and Presidential appointees.

Mr. Chairman, I suggest a very effective rejection of the amendment.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from California, my distinguished friend.

Mr. CHARLES H. WILSON of California. Mr. Chairman, the gentleman has been the principal advocate within the committee for the administration on this legislation, he and the gentleman from Arizona (Mr. UDALL).

Is this one of the amendments which has to be defeated in order to retain the solid support of the Republicans for this legislation?

Mr. DERWINSKI. The Republicans are

not politically motivated by this legislation other than in recognizing the nobility of the Presidential request. The Republicans have risen above partisanship on this issue. We are totally nonpartisan. We want the President of the United States to have a good civil service reform bill.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Unfortunately, we must oppose this amendment, and I would not want the Members left with the impression that, in fact, it was the Republican members of the committee who made up the majority which defeated the amendment in committee. The vote in committee was 16 to 5 against the amendment when it was considered in committee.

Mr. Chairman, what should be borne in mind is that it was not considered in a vacuum as an alternative to no control on the recommendations of the employees to the civil service versus the Harris amendment. What he seeks to do in his amendment is substitute his restriction for the one which we carefully worked out in the bill.

Mr. Chairman, if the Members will look at lines 13 through 23 on page 138, they will see that we already restrict the people who would be covered by the Harris amendment to making a recommendation solely on the basis of their personal knowledge or record. In other words, if one of your employees is seeking a civil service position and puts you down as a recommendation, you can, in fact, say in the recommendation that the employee performed the duty of a legislative assistant and worked on certain kinds of legislation, that the employee came to work on time, and that the employee had good character and good work habits.

However, one could only say those things which he knew about the person, based on his personal knowledge and the records of his office.

Mr. Chairman, the Harris amendment would not only prohibit one from answering such an inquiry, but it would prohibit any other employee, not only of our individual offices, but an employee of a committee could not answer an inquiry from a Federal agency about a job applicant who had previously been employed in that agency.

Further, Mr. Chairman, I point to the fact that the kind of recommendation that congressional employees and Presidential appointees would be permitted to make under the committee bill as it comes to us is limited further to an evaluation of the work performance, ability, aptitude, or general qualifications of the individual.

Again, we are putting a greater restriction on Members of Congress and their employees and Presidential appointees than we put on the Chicago ward heeler or ward committeeman—that is a kinder word—or the chairman of either political party; but we recognize the very special nature of the relationship of the Congress and its employees to the civil service; and the committee bill already restrains and restricts recommendations by the Members of Congress and their employees far beyond that restraint or restriction that is put on any other political officeholder.

Mr. Chairman, I would urge the Members to support the committee and reject the Harris amendment.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, my colleague and I tried to have most of my amendment read so that our colleagues would understand it.

My colleague, the gentleman from Michigan (Mr. FORD) may oppose my amendment; but I wish that he would not oppose it for a provision which is not in there.

Mr. Chairman, I read to my colleague the body of the amendment, which says that the recommendation may be considered if it is furnished pursuant to a request of an employee who is responsible for taking—or directing others to take—recommending, processing, or approving the personnel action; and consists solely of an evaluation of the work performance, ability, aptitude, character, or general qualifications of the individual involved in the personnel action.

I am sure my colleague, Mr. Chairman, will now admit that the amendment as drafted will permit any Member of Congress or staff member of Congress to make a recommendation with regard to merit system employment if it did in fact consist of an evaluation of the work performance of the Member of Congress or staff member.

Mr. FORD of Michigan. I think the gentleman is making a comparison. If the Members will look at lines 22 and 23 on page 138, they will see that the committee bill will permit an evaluation of the character, loyalty, or suitability of the individual, all of which are specifically excluded by the gentleman. It is just an unsatisfactory last-minute attempt to further narrow the position worked out by the committee, and it should be defeated.

Mr. UDALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, under the direction of the leadership in just a few minutes I am going to try to get an agreement on limitation of time and vote on this simple and uncomplicated amendment. Before we do that, I want to kind of advise my colleagues where I think we are going on this legislation and what I see as being at stake. The clock is running on all of us. The elections are not too many weeks away, and adjournment time is coming rapidly upon us. We have got a whole load of the public's business to dispose of—tax legislation, energy, all the rest.

I chatted with the Speaker a moment or two today. The load is horrendous. I think it is incumbent upon all of us to make this a proud time of the House and act with dispatch on important legislation between now and the time we adjourn.

There is broad support for this bill. I do not think there is any question in anybody's mind that if we took a vote on final passage at this time, it would pass by a very large margin, possibly 2 to 1 or better. It has broad support among labor management people and business groups. It will give perhaps a little bit of ability to manage.

A group of us met with the Vice President today, and he told us about the President going off to Bonn to the Economic Summit. One of the things he could do, he could do administratively, and the frustration of all Presidents was there. He asked one of the bureaus—and I will not name which one—to give him a report in 60 days where he could get a fight going on inflation. When he asked for it, their response was, we are not ready yet. The President wrote a handwritten note to the director of that agency and said, "I am going to Bonn and want to take this with me. Will you have it ready when I come back?" The report came back from the bureau saying, "You don't really need it, and we probably won't be able to do what you want us to do." That type of thing has frustrated Presidents from time immemorial.

The American people are angry at the inexpressiveness of the Federal Government, and we are trying to give the President the tools with which to make this executive branch work.

Here we are with two eminent colleagues—and I love them both—the gentleman from California (Mr. CHARLES H. WILSON), and the gentleman from Missouri (Mr. CLAY) on the committee who do not want a bill. They are sincere about it. They do not want a bill this year. They are using procedures in the House rules and threatening to continue to use them. But I want the Members of the House to know what is at stake here.

We heard a charge here by the gentleman from California that we are acting hastily. Let me give you some of the history. The bill was introduced on March 3, had 13 long days of hearings. We heard from every segment all over this country. It was suggested by some that the Democratic members of the committee ought to get our act together. We met day after day and night after night, haggling over every section of the bill, and came up with the consensus of our party. The committee went to markup day after day, in night sessions, over a period of from June 21 to July 19. We finally got a bill. It was voted out by a big bipartisan consensus. The gentleman from Illinois (Mr. DERWINSKI), and a lot of good people on the other side helped bring it out by a vote of 18 to 7. There was general debate on August 11. Everybody has had time to study the amendments. Dozens of them are printed in the RECORD now. This is our President's major domestic bill, a bill our Speaker and the majority leader have given high priority to before the House. It is not going to go away. There is another body down at the other end of this building whose members can talk and decide what priorities and legislative schedules we will have, but this bill is going to be acted on in this session.

One of our options in scheduling is to

go tomorrow, quit at 3:30. The other option that will give the Members an idea of the importance of this legislation is that all suspensions are going to be knocked off on Monday. We will work on this bill all day Monday. We will stay Monday night to finish it. A lot of people are going to get hurt by having suspensions taken off of the calendar on Monday. I have some business on the Suspension Calendar. I think everybody has a stake in processing those important bills before we leave here. Some of them require conferences with the Senate.

So I would simply appeal to my colleagues who have strong feelings about this bill to work with us and let the legislative process work.

We are not going to shut off any Member. We have serious amendments to consider. There are a lot of amendments pending, and we want to give full consideration to them and then either vote them up or down.

Let me say to the Members, particularly my friends on this side, let us not go home having to say that the President and the Democratic Congress cannot even act in 6 or 8 months on this major piece of legislation to give us some flexibility and some management direction in the executive branch. This is a fine thing that we could take home to our constituents as one accomplishment of this Congress.

Mr. Chairman, I ask unanimous consent that all debate on the pending Harris amendment and all amendments thereto do now cease.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, will the gentleman from Arizona (Mr. UDALL) tell us what the program will be for tomorrow, since he has already indicated what might happen?

Mr. UDALL. Mr. Chairman, if the gentleman will yield, if we have some expression of cooperation, I think we might finish this bill tomorrow. We will come in at 10, and we could be out of here by 3 o'clock. Unless I have those assurances, I am going to accept the offer of the leadership to put the bill off until Monday.

In that event, the suspension calendar is going to be bumped, and then we will be in here on Monday and go as late as need be to finish this bill on Monday. That is our option.

Mr. Chairman, I would prefer to proceed tomorrow in an expeditious kind of way and decide these things on their merits. But if we are going to be forced to read every line and every section of a 300-page bill, considerable time will be taken.

Mr. BAUMAN. Mr. Chairman, let me assure the gentleman that I will be glad to cooperate with him.

Mr. UDALL. The gentleman from Maryland (Mr. BAUMAN) is always cooperative.

Mr. BAUMAN. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. HARRIS. Mr. Chairman, reserving the right to object, I listened carefully to my colleague, the distinguished vice chairman of the committee, when he made his comments, and I wondered if my colleague would be kind enough to tell me this: The gentleman did not mention the amendment, and I was wondering if he is for it or against it.

Mr. Chairman, may the RECORD show that my colleague, the gentleman from Arizona (Mr. UDALL), put his thumb down toward the floor in a gesture meaning that he opposes the amendment, I assume.

Mr. UDALL. Mr. Chairman, if the gentleman will yield, I told the Member that was my position, for the reasons stated by my friend, the gentleman from Michigan (Mr. FORD), and for those stated by that great Hart, Schaffner and Derwinski clothing firm.

Mr. HARRIS. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. UDALL. Mr. Chairman, I move that all debate on the pending Harris amendment and all amendments thereto do now cease.

The CHAIRMAN. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The question was taken; and on a division (demanded by Mr. HARRIS) there were—ayes 11, noes 57.

So the amendment was rejected.

Mr. UDALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DANIELSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11280) to reform the civil service laws, had come to no resolution thereon.

## REPORT ON RESOLUTION PROVIDING FOR FURTHER EXPENSES OF THE SELECT COMMITTEE ON ASSASSINATIONS

Mr. PANETTA, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–1555) on the resolution (H. Res. 1276) providing for the further expenses of the Select Committee on Assassinations, which was referred to the House Calendar and ordered to be printed.

## PARLIAMENTARY INQUIRY

(Mr. CHARLES H. WILSON of California asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. CHARLES H. WILSON of California. Mr. Speaker, I was a little disappointed to hear my good friend, the gentleman from Arizona (Mr. UDALL), state what his plans would be in the event those of us who oppose the civil service reform legislation continue to utilize the House rules to take advantage of whatever we have to do to hold up the legislation.

The gentleman made an implied threat that if we do not let him go ahead tomorrow with the bill, he will arrange to have all the suspensions removed from the calendar on Monday, and then we will work until some unlimited time on Monday night.

I would like to know, Mr. Speaker, what the calendar is for tomorrow and what the program is, and I think the Members of the House are entitled to know.

The SPEAKER. Is the gentleman making a parliamentary inquiry?

Mr. CHARLES H. WILSON of California. Mr. Speaker, I make such a parliamentary inquiry, yes.

The SPEAKER. The Chair will advise the gentleman at the present time that the bill that we have before us, the civil service reform bill, will be postponed until Monday, and we will go forward with the schedule as scheduled for Friday.

Mr. CHARLES H. WILSON of California. I thank the Speaker.

## PERMISSION FOR SELECT COMMITTEE ON ASSASSINATIONS TO SIT TOMORROW AND THROUGHOUT NEXT WEEK DURING 5-MINUTE RULE

Mr. STOKES. Mr. Speaker, I ask unanimous consent that the Select Committee on Assassinations may be permitted to sit on Friday, September 8, 1978, and throughout next week during the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the chairman of that distinguished committee could confine his request to tomorrow, and perhaps he could ask tomorrow, when we know what the schedule will be.

There might be days when very important bills are up and Members ought to be on the floor.

Mr. STOKES. Mr. Speaker, if the gentleman will yield, tomorrow the committee will be hearing witnesses who will be giving a specialized type of technical scientific testimony.

Next week we will be hearing from similar types of witnesses.

Mr. BAUMAN. Further reserving the right to object, Mr. Speaker, the gentleman's problem is the uncertainty of being able to sit because of scheduling of witnesses; is that the problem?

Mr. STOKES. No, it is merely trying to comply with the House rules so that we are in conformity with the House rules.

Mr. BAUMAN. Further reserving the right to object, Mr. Speaker, I have no wish to impede the progress of the gentleman and his committee, but it seems to me that in the last 3 or 4 weeks of the session—we have just received a lecture on what we should be doing on the floor—the committee might tailor its activities to the fact that we are all Members of the House of Representatives and there are numerous committees.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, do I understand that we are going to have another request for money for this committee?

Mr. STOKES. If the gentleman will yield, Mr. Speaker, there is a funding resolution which was voted out of the Committee on House Administration this morning which will be coming to the floor of the House at some date in the future.

Mr. ROUSSELOT. Further reserving the right to object, Mr. Speaker, I will ask the gentleman this question: Why do we need so much more money? What have we already spent, 4 million bucks, or what is it?

Mr. STOKES. If the gentleman will yield, Mr. Speaker, I can say to the gentleman that at the time we last appeared before the Committee on House Administration it was made clear at that time that we would have to return for a supplemental resolution funding in order to complete the work of the committee. We anticipated it would be around the time that we begin public hearings on both the Kennedy and King assassinations.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, does the gentleman really need the whole time next week? Does the gentleman need to deny the members of his committee the right to be on the floor all that time? Could the gentleman maybe do it for a couple of days, or were those witnesses all scheduled a long time ago, or what is the problem?

Mr. STOKES. If the gentleman will yield, I will say to the gentleman that over 2 months ago, in a speech I made in the well of the House, I apprised the House of the schedule of this committee. We advised the House at that time that we would commence hearings, public hearings, on the Kennedy assassination on the 7th of September, and we would run those hearings throughout the entire month of September.

We further advised the House that, commencing immediately after the elections in November, we would return, notwithstanding the fact that the House would be in recess, that we would return and commence hearings on the King assassination throughout the entire month of November, and that we would further come back and have hearings in December in order to give final recommendations to the House.

Mr. ROUSSELOT. Further reserving the right to object, Mr. Speaker, the gentleman is telling us that all of these witnesses were scheduled 2 or 3 months ago for this coming week?

Mr. STOKES. If the gentleman will yield further, I cannot say to the gentleman that all of these witnesses were scheduled, if the gentleman means did we actually have them under subpena for that time.

Over the past 15 months we have been conducting hearings in executive session, and many of these witnesses were kept under continued subpena so that at such time as the committee called them for public hearings, that they would be available to the committee.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

## PERMISSION FOR SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS OF COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO SIT FRIDAY, SEPTEMBER 8, DURING 5-MINUTE RULE

Mr. BARNARD. Mr. Speaker, I ask unanimous consent that the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce be permitted to sit on Friday, September 8, during the 5-minute rule.

Mr. Speaker, it is my understanding that this has been cleared with the minority. The purpose of the hearing is for testimony only.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, what was the time frame?

Mr. BARNARD. One day.

Mr. ROUSSELOT. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

## LEGISLATION TO PROVIDE FISCAL RELIEF TO STATES AND LOCALITIES

(Mr. ZEFERETTI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

● Mr. ZEFERETTI. Mr. Speaker, today I am introducing, along with Mr. NOWAK and Mr. GREEN a bill to provide fiscal relief to States and localities, and to begin movement toward the type of welfare reforms that are so urgently needed throughout the country.

This legislation is identical to S. 3470, introduced on August 25 by Senators MOYNIHAN, CRANSTON, and LONG. Effective July 1, 1979, the bill would eliminate the present AFDC funding mechanism which is based on Federal payment of a percentage of each State's AFDC costs. Instead, the bill would substitute a two-part block grant. The first part of the block grant to each State would be based on the actual Federal funding provided to that State for its AFDC costs in fiscal 1978. The second part of the block grant would be a fiscal relief element allocated among the States in proportion of their June 1978 AFDC expenditures and in proportion of their general revenue sharing allocations. Both elements of the block grant would be updated annually to reflect changes in the cost of living. For fiscal year 1980, the fiscal relief element is estimated to total $1.5 billion. The Senate Subcommittee on Public Assistance will be holding hearings on this bill Tuesday, September 12, 1978.

While it is no longer possible to enact comprehensive welfare reform legislation during this Congress, I think it is essential that we take immediate steps to provide some fiscal relief to State and local taxpayers who are struggling under the current costs of our welfare system. The Federal Government should assume for all States the present non-Federal share of benefit payments for the aid to families with dependent children and emergency assistance to families programs.

The arguments for increased Federal funding for public assistance programs are numerous and need not be repeated in detail here. Poverty is a national problem that is manifested in States and localities. Nationally induced economic and demographic trends have produced concentrations of public assistance recipients in urban and, increasingly, suburban areas that erode the financial base of these governments. States and localities did not cause and cannot cure the poverty problem in the Nation.

It costs every American taxpayer $548 to support the 25 million persons receiving public assistance. Behind the waste and failure of the $45 billion system is the Federal Government's lack of a uniform policy to prevent abuse, relieve the States of staggering and unfair financial burdens or insure equitable and sufficient coverage.

Mr. Speaker, the current system of public assistance in the United States is so poor that the words, "welfare" and "mess" have become inextricably linked in our political vocabulary. The most important unanimous conclusion is that the present welfare programs should be scrapped and a totally new system implemented. I believe Congress must take the initiative here and acknowledge this well-recognized fact. As my distinguished colleague from New York, Senator MOYNIHAN pointed out, this bill does not contain all that we would like to see done. But it does contain worthwhile changes and presents us with a real opportunity to enact substantial improvements to a welfare network that has long been riddled with both inefficiencies on the part of its administrators and unfairness suffered by its recipients.●

## CAROL FOREMAN GOES FROM FAVORITISM TO CRONYISM

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ASHBROOK. Mr. Speaker, Assistant Secretary of Agriculture Carol Tucker Foreman obviously intends to turn the position of Administrator of the Food Safety and Quality Service into a political patronage plum for a junior member of the White House Georgia Mafia.

The appointment of Sid Butler as Acting Administrator of the Food Safety and Quality Service following the resignation of Dr. Robert Angelotti last month is a clear signal that politics comes be-

fore qualifications in Mrs. Foreman's assessment of what is needed in filling critical positions in the Agriculture Department.

Although the Food Safety and Quality Service requires a person knowledgeable in scientific and technical areas, Sid Butler's sole qualification for serving even as Acting Director is that his brother Landon Butler works for Hamilton Jordan in the White House. Sid Butler may be well qualified as a lawyer and Carter campaign worker, but he has had no formal training or experience in microbiology or any of the other scientific-technical disciplines needed in a Food Safety and Quality Administrator.

It is my understanding that Assistant Secretary Foreman intends to put Sid Butler's name forward as permanent Administrator. This is simply another case of the White House Georgia Mafia's playing "All in the Family" with critical administrative positions in the executive branch. Far from seeking the best qualified replacement for Mr. Angelotti, Mrs. Foreman seems satisfied to fill this position on considerations of political favoritism.

This has been the consistent pattern followed by Mrs. Foreman in conducting her office. Under her jurisdiction, her former employer, the Consumer Federation of America, has been favored with special agriculture study grants funded by the Department. I have asked for an investigation into this questionable favoritism. Now we see this favoritism extend to the appointment of key Agriculture personnel.

Inasmuch as the Food Safety and Quality Administrator's office has jurisdiction in areas involving the Federal school lunch program, I intend to pursue the matter of Butler's appointment.

It is ironic, to say the least, that for all the high-sounding talk that has emanated from Mrs. Foreman's office regarding the need to upgrade the school feeding program, a job as vital as that of Food Safety and Quality Service Administrator should be treated by the Assistant Secretary as pure political favoritism.

I do not believe the Congress should sit idly by while the White House and Assistant Secretary Foreman disregard the need for a qualified scientist-technician to replace Dr. Angellotti. The questionable appointment of Sid Butler showed concern all of my colleagues, especially those who have agricultural constituencies.

## AN AGRICULTURE MARKET IN JAPAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, it is disappointing news which reached me this morning, that after the second day of the 3-day talks between Japanese trade officials and our Special Representative for Trade, Bob Strauss, little progress has been made on proposals to reduce tariffs for U.S. agricultural products exported to Japan.

I have taken a special interest in these negotiations, Mr. Speaker, because of the importance of the citrus industry to my congressional district. It is my understanding that the citrus issue was being considered today, but the lack of success in the first 2 days of these talks is cause for concern. While it would be desirable for our agriculture interests to see a complete lifting of the 45,000 tons per year quota on orange shipments, a doubling of our tonnage for export would be a boost to the industry, and help to turn the tide on our balance-of-trade deficit.

It is my understanding that the Japanese are not inclined to budge on this issue. The sale of citrus and beef to Japan, which is the topic of today's discussions between the Strauss team, Japanese Trade Envoy Nobuhiko Ushiba, and their Agriculture Minister Ichiro Nakagawa, amounts to less than $50 million a year for U.S. exporters. But the potential to sell more to Japan far exceeds this amount.

I know it is politically difficult for the Japanese to buckle under the pressure from the 700,000 growers of the tangerine-like mikans. More than half the seats in Japan's parliament are controlled by their domestic farm interests, and already they have protested over the mere prospect that concessions will be made to the United States. Many of my colleagues, I am sure, saw the ads in the Washington Post and Los Angeles Times last month, in which Japanese producers of citrus crops complained that the U.S. negotiators "threatened their livelihood."

Yesterday Secretary Blumenthal explained to the Japanese Vice Minister of Finance, Takehiro Sagami, of plans by our Government to improve the position of the dollar abroad. The United States sincerely wants to carry out its trade policies in an atmosphere favorable to the world economy. This, of course, will involve a concerted effort by both our country and the Japanese to reach some agreement mutually beneficial to our commercial activity in the international market.

In an effort to make the House aware of the ramifications of the present situation, I would like to share the observations of one of my constituents who recently returned from a trip to the Orient. Jacqueline Sherman of Woodland Hills, Calif., in a published letter to the editor of the Los Angeles Times, yesterday's edition, told of oranges costing 80 cents a piece in Japan. That is $1.60 a pound. A glass of orange juice is $6 there. Just a few days later she and her husband visited Hong Kong where a single orange cost only 15 cents, or 30 cents a pound. A glass of orange juice costs just 50 cents a glass there.

Clearly, it would serve the interest of the Japanese consumer to have the opportunity to purchase the less expensive American grown fruit. But this would mean that the Japanese Government would have to contend with the political consequenses of such an action, and I do not know if they are about to take that risk.

Let me conclude, Mr. Speaker, by adding that I have full faith in Ambassador Strauss in his efforts to obtain greater access for American exporters of citrus to Japan. These are an important 3 days for us, Mr. Speaker, and the cooperation and flexibility of the Japanese Government would do much to improve our relationship with them for the future.●

## QUESTIONS AND ANSWERS ON THE KEMP-ROTH LEGISLATION TO REDUCE INDIVIDUAL INCOME TAX RATES ACROSS THE BOARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 15 minutes.

● Mr. KEMP. Mr. Speaker, I had an opportunity during the just-concluded recess to compile, and to reflect further upon, the criticisms which were leveled at the Roth-Kemp legislation during the course of our recent debate on the Revenue Act of 1978.

The provisions of Roth-Kemp which pertain to individual income tax rate reductions of about 33 percent over the next 3 years were offered by me, through a motion to recommit with instructions to include those provisions in the Revenue Act, during the course of that debate. The motion failed on a surprisingly and regrettably partisan vote.

I want to raise the more obvious questions and also comment for a few moments on the criticisms and responding to them point by point.

### WHAT HARD DATA IS THERE THAT TAX RATE REDUCTIONS WORK?

"We are in a stage with persistently high inflation and one of our largest budget deficits ever. Now ROTH and KEMP are asking the country to take a bold economic gamble based largely on historic anecdotes that show major tax cuts will increase revenues. What hard economic data support such a notion?" This is an important, central question.

Today a growing number of economists believe our present inflation and large budget deficits are chiefly the result of a major inefficiency in the U.S. economy, one caused largely by high marginal tax rates. Individuals are not saving, investing, or working at desirable rates or in desirable ways.

A clear sign of this inefficiency is the existence of today's large "cash" or "subterranean" marketplace outside the taxable economy. The Government provides no hard economic data on this marketplace, because it exists outside the vision of the tax collector. But estimates are on the order of $200 billion. Lower marginal tax rates on capital and labor would draw part of this cash economy into the official tax paying economy by reducing Government's percentage in taxes of the reward for such activity, making the total economy more efficient and expanding the tax base.

Today's stock market is perhaps even harder evidence of inefficiency in the economy. The stock market is a precise measure of the value, after taxes, of the

Nation's capital stock, that is the economy's ability to produce a given flow of goods and services in the future and to reward the producers so they will sense the value of their efforts.

The Dow Jones industrial average (DJI) touched 1,000 in February 1966, as the market forecast highly efficient production flows from the capital stock. The DJI has not been close to 1,000 since then, in 1966 dollars; it is not below 900 in current dollars. For the stock market to now value the Nation's capital stock as highly as it did in 1966, the DJI would have to be roughly 2,500 or more.

One might say the economy today is not so much unemployed as it is underemployed, with individual workers and investors operating well below potential, to the detriment of the economy as a whole. They operate below their potential because tax rates are discouragingly high, standing as impediments to commerce.

Much has been said about the revenue reflows from Roth-Kemp, but not enough has been said of the effects of increased savings. Let us do so. Chase Econometrics estimates that personal savings, retained earnings, and other capital inflows will rise enough from the tax rate reductions found in Roth-Kemp to cover any added deficit, should there be such, and still have enough saving left over to increase net investment substantially. This would deliver an enormous noninflationary boost to real growth and productivity.

WHERE IS THE U.S. ECONOMY ON THE LAFFER CURVE?

Where is the U.S. economy today on the so-called Laffer curve, the graphic depiction of the relationship between tax rates and tax revenues by Prof. Arthur B. Laffer of the University of Southern California?

It is inappropriate to ask where a nation as a whole is on the Laffer curve. That curve is an instrument to analyze only "individual" economic actions. Some individuals face low marginal tax rates, and some face confiscatory rates. The Laffer curve looks at the latter, and we know these people exist in increasing numbers. The measure of total economic activity is the result of the summation of all of these individual calculations.

A nation as a whole does not face a marginal tax rate and thus cannot be placed on the Laffer curve, except as a rough, anecdotal expression of the collective problem of excessive taxation of individuals.

It is clear though that millions of individuals work and save less because they have been pushed into higher marginal tax brackets. Thus, if tax rates were reduced at the margin, saving and growth would increase and tax revenues from the expanded tax base from such savings and growth would increase. The Laffer curve is so true it is a truism.

WHY A 33-PERCENT REDUCTION IN INDIVIDUAL RATES?

I hear, "How did Roth-Kemp arrive at the 33-percent tax cut figure, 10 percent each year for 3 years cumulatively?

"If inflation is the major fear of enactment of Roth-Kemp, why not expand the tax cut time frame to 5 years, beginning the first year at a relatively low tax cut rate, increasing it year by year at an increasing rate?"

Roth-Kemp is designed as an after-the-fact adjustment of tax rates to offset the debilitating inflation rates of the 1970's.

If the progressive income tax rates had been indexed since 1970 to annually adjust for the rate of inflation, thereby preventing real increases in tax rates from occurring, the income thresholds would have been adjusted upward by more than 60 percent in that period, except that if the rates had been indexed, the deficits, contraction and inflation would not have been as severe as we have experienced.

In light of this, Roth-Kemp's 33-percent tax cut over 3 years is a relatively modest attempt to return to a sense of reasonableness in Federal income taxation.

As to the second question, I originally planned a 1-year adjustment but conceded to requests for a protracted phase-in. To extend that phase-in over 5 years would not adjust for the inflation the Carter administration forecasts for the future, let alone the last 8 years of inflation.

WHY NOT REDUCE PAYROLL TAXES INSTEAD OF LESS BURDENSOME PERSONAL INCOME TAXES?

I read, "Roth-Kemp aims its major tax cuts at the personal income tax. Yet, payroll taxes (social security, et cetera) have become far more burdensome to the average worker.

"If you really want to reduce labor costs (and thus slow inflation), raise employment, and provide incentives to invest, why not reduce the worker payroll tax and forget about the less burdensome personal income tax?"

This question confuses the difference between the burden of taxation and the incidence of taxation. There is an important distinction, which can be explained with this brief scenario.

If Government spends $x$ amount of the economy's resources, it must raise $x$ amount of resources through taxation. It places certain tax rates on one portion of the economy, say income recipients of all kinds. This is the incidence of the taxation.

If some of those income recipients are discouraged by the high tax rates, they can choose leisure over income, or lower nontaxable income over higher taxable income. To the degree they do this, the Government falls short of the $x$ amount of resources it has decided to spend, and the burden of providing $x$ falls on the remaining taxpayers who do not have the option to choose leisure on nontaxable income.

Thus, it is possible that raising tax rates on incomes can, in fact, increase the burden of taxation on other elements of society, such as people paying for public insurance programs like social security. As the wealthy withdraw from the tax economy, the rest pay more of a percentage of total taxes. As the wealthy come back into the taxable economy, the rest pay less of that percentage.

Government, after all, must provide x amount of resources to recipients of social security, to return to that example. If it does not get this amount by contributions to Social Security, it must place the incidence of taxation on some other element of the economy. Where will this be, if other elements of the economy are already slipping the incidence of taxation via leisure and nontaxed income because of high marginal tax rates?

As to social security taxes, they have become more burdensome because earlier contributors to the system, now retired, were promised benefits that presumed a level of wealth in the economy that does not now exist. It does not exist, many supply-side economists now believe, because of the disincentive effects of high marginal tax rates.

By lowering rates on incomes, the economy would draw capital and labor out of leisure and nontaxable income sources—bartering, loopholes—and both the incidence and burden of the now lower tax rates would fall, removing burdens from other elements of the economy. The now higher level of real national wealth can more easily provide the x amount of resources promised social security recipients.

WHY NOT SIMPLY REDUCE TAX RATES ON UNEARNED INCOME?

"If the Kennedy tax cuts of the early 1960's led to increased productivity, why didn't we see the same increase in productivity in the early 1970's when tax rates on earned income were cut from a maximum of 70 percent to 50 percent?

"Could it be that increased productivity only results from a decrease of tax rates on unearned income? If so, why not simply reduce tax rates on unearned income, a la the Hansen-Steiger bill to reduce capital gains tax rate, and forget Roth-Kemp?"

Let me respond to that.

In 1970, at the same time tax rates on "earned" income were falling from 70 percent to 50 percent in the highest marginal tax bracket, the tax rate on "unearned" income, including capital gains, was doubled. Had the rate on "earned" income not been reduced, the economic duress of the last several years would have been intensified.

Almost all economists now agree the prohibitive tax rates on "unearned" income must be reduced, "unearned" income merely being a perjorative way of describing income from capital. But Hansen-Steiger takes up only partly back to where income from capital was being taxed in 1969. The addition of Roth-Kemp would reduce tax rates on both capital and labor across the board, offsetting the debilitating effects of several years of inflation on the progressive tax system. Both actions—Hansen-Steiger and Roth-Kemp—are necessary to achieve the greatest leap in productivity over the next several years, a process already underway in mere anticipation of some amelioration of tax rates this year.

WHY SO MUCH WEIGHT ON THE INDIVIDUAL TAX RATE SIDE? SHOULDN'T THERE BE MORE FOR CORPORATIONS?

I hear from spokesman for business, "If the goal of Roth-Kemp is to generate economic expansion on the supply side of the economy, why is the proposal so stingy with cuts in the corporate income tax? Shouldn't the corporate income tax cuts be at least equal in magnitude to the personal income tax cuts to accomplish your called-for rate of economic expansion?"

It is a mistake to think of corporate taxes as taxes on capital and personal taxes as taxes on consumption. Both are taxes on production, with the former applied selectively to corporate income, the latter applied to all forms of productive income. Think about that; learn it.

In the final analysis, all income flows through to individuals, which is why Roth-Kemp emphasizes cuts in personal income taxes. An across-the-board reduction in individual income tax rates treats all forms of primary income sources without bias. In other words, individuals receive taxable income from wages and salaries, interest, dividends, royalties and capital gains, and all of these must encounter the personal income tax schedules.

There is a second reason why personal income tax cuts are so important. Any tax plan that cuts business taxes but neglects personal income taxes will do nothing to raise the rate of return on work effort. Nor will it increase the after-tax rate of return on savings. And increased savings is an important and sought byproduct of any tax cut plan.

Consider the administration's proposed tax plan, which would cut the corporate taxes while doing little to encourage increased individual work effort and savings. Businesses would be encouraged to expand. They would rush to the credit markets—today retained earnings and the investment tax credit meet only a fraction of business capital needs—and find Government trying to borrow back the tax cut it just granted. Interest rates would soar. The Federal Reserve would see this as crowding out, increase the money supply, and thus guarantee inflation.

The flaw, then, in a tax plan that fails to cut personal income taxes is that it provides no mechanism with which to expand savings. The Business Roundtable, the Conference Board, and so forth, should make note of that.

On the other hand, under Roth-Kemp, firms would reach the credit market, find a large increase in savings, providing funds for both themselves and Government, with no increase in interest rates, no crowding out, and no inflationary increase in the money supply.

The point is, we cannot modernize American industry simply by cutting taxes for business without cutting personal income taxes to encourage increased saving.

ISN'T ROTH-KEMP ANOTHER TAX RELIEF PROGRAM FOR THE RICH?

I hear from some critics:

"The Roth-Kemp bill has achieved the image of progressivity, yet its actual tax cuts would be aimed heaviest at high income taxpayers. For example, under Roth-Kemp a family of four with an adjusted gross income of $8,000 would save only $108 in taxes. A family of four with an adjusted gross income of $40,000 would save $2,616. Is not Roth-Kemp just another tax relief program for the rich?"

This question misdefines the notion of progressivity and taxes.

Although the actual dollar tax cut for higher income families as a result of Roth-Kemp is greater than for lower income families, the proposed tax cut applies equal percentage tax decreases across-the-board. The percentage decreases are equal to avoid the disincentive effect of the economy of shifting the tax burden from one income group to another.

In any event, the object of Roth-Kemp is not to put money into people's pockets. It could not do so in any case, the way this question is put. After all, where would the $108 and $2,616 come from? From Federal borrowing, or other tax increases.

The object of the Roth-Kemp proposal is to increase the efficiency of the entire economy, and thereby the level of wealth of the entire economy. In our particular economic climate today, it does no good to increase the aftertax rewards of lower income groups if this means the aftertax rewards of upper income groups must be decreased.

After all, it has traditionally been in the upper income levels where we find the managerial ability necessary to the assembling of enterprises. If the rewards associated with this activity are confiscated, or reduced to a level not matching the effort and risk entailed in attaining these capabilities, where will new job opportunities come from for lower income individuals who want to move up the ladder? The will not come, or will come in less number.

There is another misunderstanding embodied in this question. A tax rate reduction applies to future productivity, not past performance. The individual in the $8,000 AGI class should know that if he or she works productively and sharpens skills required to move toward the $40,000 AGI class, the greater reward will match the effort. And the individual in the $40,000 AGI class should know a slackening of effort, or leisure, will result in a greater loss of reward than was the case previously.

Roth-Kemp is designed to give the worker greater incentive to increase his work effort. It does this by increasing the yield from his labor.

WHY WOULD ROTH-KEMP RESULT IN HIGHER LEVELS OF CORPORATE INVESTMENT?

"Supporters of Roth-Kemp point to the high levels of business investment as a result of the Kennedy tax cuts in the 1960s. But didn't corporate investment increase because, at around the same time of the Kennedy tax cuts, the investment tax credit was introduced along with the much-needed reform of depreciation guidelines?

"Granted, Roth-Kemp may raise dividends and retained earnings, but there's no reason to believe it would result in dramatically higher levels of corporate investment."

Let me comment on this too?

The investment tax credit and reform of depreciation guidelines had beneficial effects on business expansion. But these measures are biased toward favoring mature enterprises; they do little to encourage new growth and young enterprise. Yet it is that new growth enterprise which our economy sorely needs today to renew itself.

The investment tax credit probably has not been as beneficial to the economy on the whole as its proponents believe. Why? It explicitly prejudices the entrepreneur's selection of the factors of production in favor of physical capital, against labor. To the degree labor is displaced, even temporarily, the cost to Government of social support programs increases.

With Roth-Kemp, higher levels of corporate investment would flow, in the first sentence, from encouragement of new enterprise and new corporate investment, as the pretax costs of all factors of production would fall and the potential rewards to risk capital would increase dramatically, facing not a marginal tax rate at the top of 70 percent, but of 50 percent.

WOULD NOT THE CAPITAL INVESTMENT SURGE CREATE MORE PROBLEMS THAN IT SOLVES?

"Dr. Norman Ture estimates the Roth-Kemp tax cuts will increase capital investment by $113 billion—more than a 30-percent jump—in 'real' dollars. This would be an investment boom without precedent; larger than the jump in investment between 1965 and 1972.

"But, writing in the National Journal, journalist Robert Samuelson comments that 'even if business wanted to increase investment that much, shortages in supplies and the needed machinery and materials almost certainly would rise.' Samuelson adds that without offsetting cuts in Federal expenditures, such huge tax reductions would risk creating an enormous surge in spending which would lead either to a dangerous accelerating of inflation or to a crippling credit crunch."

It is beyond our understanding of all variety of economic theory how a privately financed boom in capital investment could do all the terrible things imagined by Mr. Samuelson. Economists of all theoretical schools, including Marxists, would dismiss the Samuelson scenario. Any economist would welcome a $113 billion increase in capital investment, privately financed, if he could get it.

The more pertinent question goes to Dr. Ture's estimate of a 30-percent increase in real terms, greater than the investment jump between 1965 and 1972.

Supply-side economists believe such an increase within the realm of possibility because they believe the U.S. economy in 1978 is operating well below its potential, certainly at a far lower speed than it was achieving in 1965. Government statisticians, who can only measure quantity of production and static utilization rates—based on past rates of capital investment—dispute the supply-side theorists. But the electorate seems well aware that the economy is dragging along, espe-

cially in quality measures, relative to the preinflation era.

ISN'T ROTH-KEMP INFLATIONARY, ESPECIALLY IN THE SHORT-RUN

Much of our debate focused on inflation. Opponents said, "What about Roth-Kemp and its inflationary effects? Won't Roth-Kemp create a sudden and huge surge in consumer spending, creating the inflationary situation of too many dollars chasing too few goods? Even if investment spending increases at this time as capital stock is put in place, won't this too be inflationary, particularly in the short run?"

There are two effects of a tax rate reduction along the lines of Roth-Kemp. One, which this question addresses, is the increase in after-tax incomes of workers and investors.

In the first year of Roth-Kemp, this increase "in consumer pockets" would amount to $20 billion in a gross economy 100 times as large. But while $20 billion goes, in effect, into consumer pockets, $18 billion comes right out as a result of increased social security taxes and inflation-related tax increases. This $2 billion net is only one-thousandth the size of the economy itself—hardly enough to overwhelm capacity with great surges in consumer demand as the gloomy inflation scenarios predict.

In addition, to the degree the economy sees that this $2 billion must be paid back to finance the bonds that make it available, the economy will save, not spend, the $2 billion. Particularly in the lowest income classes, where credit is often necessary for survival, the net results of Roth-Kemp would tend to pay down debt, thus going into savings, not consumption.

The second, more important effect of Roth-Kemp is to remove unnecessarily high barriers to production. That is, a lower tax rate not only affects the current paycheck—or interest payment, or dividend check. It holds out greater incentive to work, save or invest in the future. The increased willingness of workers to produce plus the increased willingness of capital to assemble workers in new or added enterprise—there now being a greater reward for such effort—lifts the entire economy to a higher level of efficiency. Even if the physical effort expanded, in aggregate, remains the same, production of goods and services increases by increased efficiency, productivity.

As to the effects of increased investment spending, a tax rate reduction cannot focus on either labor or capital to the exclusion of the other. If tax rates on labor were zero and tax rates on capital 100 percent, there would be no employment, thus no enterprise, and no revenues. Roth-Kemp, of course, applies across-the-board on the incomes of workers, savers, and investors.

There would also be no short-run inflationary effect from Roth-Kemp. The economy simply does not await actual passage of a tax cut to begin expanding work, saving, and investment. The closer Congress gets to passing Hansen-Steiger and Roth-Kemp, and as White House resistance subsides, the more buoyant the economy will become.

Federal, State, and local tax revenues have, without doubt, increased already on the mere anticipation of lower Federal rates. That is, as individual workers, savers and investors "gear up" to take advantage of the lower rates, their taxed transactions and incomes provide increased revenue flows.

WOULD KEMP-ROTH OVERWHELM OUR EXISTING CAPACITY WITH "A TIDAL WAVE OF INCREASED DEMAND?"

Prof. Walter Heller says the Roth-Kemp tax cuts "would simply overwhelm our existing productive capacity with a tidal wave of increased demand and sweep away all hopes of curbing deficits and containing inflation". He is wrong.

Professor Heller and other opponents of Roth-Kemp think of a tax cut only in terms of the number of dollars it dumps into the economy. This is supposed to stimulate "demand" and purchasing power and be spent about twice over to increase GNP by a multiple of the tax cut. This line of reasoning is badly out of date, but for our purposes this afternoon, let's adopt it.

Opponents of Roth-Kemp then claim the proposed tax cut is too large and the resulting increase in spending would greatly exceed our unused capacity, currently between $70 and $90 billion. But is the net result of Roth-Kemp really that large?

Chase Econometrics estimates that social security tax increases and the tax increase from inflation, as it pushes people into higher tax brackets, will amount to $332.8 billion over the next 5 years. Yet, the Roth-Kemp tax cut itself totals only $383.1 billion for the same 5 years. Who is fooling whom about great spending surges?

Given that social security and other inflation-related tax increases will amount to $26.4 billion in 1979, $40.9 billion in 1980, $66.1 billion in 1981, $89.5 billion in 1982, and $109.9 billion in 1983, the net result of Roth-Kemp is only $12.8 billion in 1980, $15.9 billion in 1981, $16.1 billion in 1982, and $9.1 billion in 1983.

So how can Roth-Kemp overwhelm our existing productive capacity and generate wild inflation, even given Professor Heller's demand-multiplier analysis?

Clearly, if we ignore a $332-plus billion social security, inflation-related tax increase over the next several years without some offsetting tax relief, we will have a severe recession which will generate perhaps the largest deficits in history. That is what Roth-Kemp seeks to avoid.

WILL KEMP-ROTH CREATE SHORT-RUN PROBLEMS BECAUSE OF INADEQUATE CAPACITY ON THE SUPPLY SIDE?

I have heard it said here that, "Professor Laffer now admits Roth-Kemp may cause 'short-run' problems to the economy because of inadequate capacity on the supply side."

I do not agree.

Laffer's statement has been taken far out of context by economic journalists. Supply-side economists may "admit" to the possibility of short-term supply problems with Roth-Kemp, but only because as econometricians they refrain from making absolute statements. This, unfortunately, has not been the case with opponents of Roth-Kemp. In other words, while it is difficult for supply-side economists to imagine short-run supply problems—especially given the nature of the extended phase-in period, when asked, they will admit there is always the possibility such problems could occur.

These so-called problems, though, are only those temporary difficulties often associated with real growth. In periods of real expansion, some fragment of the economy will always run out of capacity before the rest of the economy, causing a short-term shift in relative prices that pushes the economy to seek substitutes, that is, imports or substitute goods.

But, if the fragment of the economy that runs out of capacity first believes the increased incentives to produce will be permanent—not a temporary "shot in the arm"—it will add capacity—putting on extra shifts, adding plant and equipment, training new workers—and in the midterm the relative prices will readjust.

In any event, are not temporary growing pains, if there be such, always preferable to shrinking pains?

WOULDN'T ROTH-KEMP SEND INTEREST RATES SOARING?

If the Roth-Kemp tax cut proposal were enacted today, how would interest rates be affected in 1979, 1980, and 1981?

Interest rates are, for the most part, a function of monetary policy. But if we can assume for analytical purposes, that monetary policy stays constant, interest rates would be lower with Roth-Kemp. This is because supply-side economists believe marginal tax rates are now in the prohibitive range of the Laffer Curve, and Roth-Kemp would expand the productive base, the tax base and revenues. The economy's savings pool would expand with production and there would be "crowding in," not "crowding out" in the capital markets.

Remember, too, that income tax rates are part of the wedge between borrowers and lenders. That is, there is an "interest rate paid" by the borrower and an "interest rate received" by the lender. The difference is the amount taken by the Government in taxes. When this wedge is reduced through a lowering of the tax rate, we would expect the interest rate paid by the borrower to fall, even though a part of the decreased wedge goes to a greater interest rate received by the lender.

AREN'T THE KENNEDY AND OTHER HISTORICAL EXAMPLES MISLEADING?

I hear partisans on the other side of the aisle say, "You continually say the Kennedy tax cuts of the early 1960's led to increased productivity. Why not consider the inverse situation? Was there a marked slowdown in economic growth and productivity in 1913 when the personal income tax was first imposed? Was there a marked slowdown in 1968 with the imposition of the 10 percent surcharge on income which went to finance the Vietnam war?"

What is the answer?

It is often misleading to relate tax rate and productivity changes by examining Government statistics. Markets do not respond with surges, up or down, on the official dates of change in tax laws, or any other laws. When the market gets the first inkling of a change in the wedge between effort and reward, it begins the adjustment process, so by the time the change is officially made, it often has already been fully discounted by the market.

Drawing economic assumptions based on marked slowdowns or surges in Government statistics can be a deceiving process. For example, economist Walter Heller argues that if, as Roth-Kemp supporters claim, the Kennedy tax cuts unleashed incentives by triggering a great leap forward on the supply side of the economy, where is the sudden bulge in productivity and GNP potential in the economic statistics of the mid-1960's? Heller concludes there was no bulge.

The answer is that there was a bulge in capacity, which is evident from the simple fact that without a tax cut in 1964 the economy would have been in a recession shortly thereafter. In fact, much of the support for the Kennedy tax cut was generated by the expectation that a recession was imminent. Professor Heller can answer his own question by comparing capacity after the cut to what would have happened to the economy had there not been a cut.

SHOULDN'T KEMP-ROTH BE COUPLED WITH A SPENDING LIMITATION TO ELIMINATE ANY RISK OF INFLATION-CAUSING DEFICITS?

I hear from some of the conservative Keynesians, "What about Roth-Kemp helping to maintain or even enlarge our present Federal deficit? Deficits have the inflationary effect (Federal borrowing, crowding out, and so forth) of pushing up interest rates, which usually results in pressure on the Federal Reserve to increase the money supply. Isn't the only safeguard against inflation in this situation some kind of accompanying cut or limitation in Federal spending?"

This is very important, so let me deal within several ways.

First, prudence—restraint in the expenditure of public funds—is always helpful to the Treasury and Federal Reserve in the management of public finance. And today's vigilant congressional efforts to restrain spending should be maintained.

But it is the opinion of a growing number of economists that not more than a reasonable fraction of the congressional effort should be invested in this endeavor. By this they mean that if half of Congress devotes itself to increasing Federal outlays, and the other half devotes itself to decreasing Federal outlays, there remains no political leadership devoted to economic growth. Yet this, essentially, has been the condition of the past dozen years.

Moreover, it does not seem realistic to expect that $50- or $60-billion level deficits can be ended suddenly by trimming back Federal outlays. The public demands collective expenditures for social-support programs during periods of collective economic contraction, which the United States has been experiencing for more than a decade. In fact, the public will even tolerate large waste in spending programs to insure that as many of their fellow citizens as possible are assisted, by collective effort, during this contraction period.

The approach Roth-Kemp takes is to end the economic contraction—which brought about most of the increase in Federal expenditures in the first place—and invite a period of economic growth by removing tax disincentives to commerce.

Both proposals are a suggestion that the time and intellectual resources of Congress be concentrated on expanding the economy's productive base, which, of course, expands the tax base as well. In such an expansion, we would expect the public demand for Federal outlays to diminish as the threat to their fellow citizens caused by contraction is ameliorated.

Second, if, in economic expansion, demand for Government services declines, as expected with Roth-Kemp, a budget cut occurs naturally, whether or not it has been anticipated. And a formal budget limitation becomes superfluous.

But if, for unforeseen reasons, a contraction occurs in the future—a hypothetical tariff war in Europe, for example—it is my opinion the average American would not appreciate his Government's hands being tied by a spending limitation.

The public expects Government to be flexible in managing the public economy, in good times and bad, and legislated spending limits are the equivalent of price controls in the private sector, for which the general electorate also has little enthusiasm.

In any event, supply-side economists predict the Roth-Kemp tax cuts will increase incentives for output and employment, while reducing demand for Federal outlays for unemployment and social welfare spending. But as to a forced accompanying budget cut or spending limitation it is as Irving Kristol put it in The Wall Street Journal of August 10, naive even to think that Congress can face down the spending lobbies until after it has cut taxes.●

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. SARASIN) is recognized for 5 minutes.

● Mr. SARASIN. Mr. Speaker, on August 16, 1978, I was absent for part of the legislative session of the House of Representatives. Had I been present, I would have voted in the following fashion:

Rollcall No. 712: House Concurrent Resolution 683: Second budget resolution. The House rejected a substitute amendment that sought to provide for a balanced budget, "yes"; and

Rollcall No. 713: House Concurrent Resolution 683: Second budget resolution. The House agreed to the concurrent resolution revising the congressional budget for the U.S. Government for the fiscal year 1979, "no."

On August 17, 1978, I was absent from the legislative session of the House of Representatives. Had I been present, I would have voted in the following fashion:

Rollcall No. 715: H.R. 13467: Second supplemental appropriations. The House agreed to the conference report on the measure making supplemental appropriations for the fiscal year ending September 30, 1979, "no";

Rollcall No. 716: H.R. 13467: Second supplemental appropriations. The House rejected motions to recede from its disagreement and concur in Senate amendments Nos. 48 and 82, "no";

Rollcall No. 717: H.R. 12935: Legislative branch appropriations. The House agreed to the conference report to the measure making appropriations for the legislative branch for the fiscal year ending September 30, 1979, "yes";

Rollcall No. 718: H.R. 12927: Military construction appropriations. The House agreed to the conference report on the measure making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, "yes";

Rollcall No. 719: H.R. 13468: District of Columbia appropriations. The House agreed to the conference report on the measure making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, "yes";

Rollcall No. 720: S. 9: Outer Continental Shelf. The House agreed to the conference report on the measure, Outer Continental Shelf Lands Act Amendments of 1978, "yes";

Rollcall No. 721: H.R. 12240: Intelligence authorization. The House agreed to the conference report on the measure to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System, "yes";

Rollcall No. 722: H.R. 10898: USRA authorization. The House agreed to the rule (H. Res. 1321) under which the bill was considered, "yes"; and

Rollcall No. 723: H.R. 10898: USRA authorization. The House passed the measure to amend the Regional Rail Reorganization Act of 1973 to authorize appropriations for the U.S. Railway Association for fiscal year 1979, "yes".●

## CONSUMER EDUCATION AND ELECTRONIC BANKING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, crimes against the elderly have reached staggering proportions. What better victim is there for the hardened criminal than a frail senior citizen seen leaving the bank? And, older Americans are particularly vulnerable to attack at the first of the month, when many citizens receive Government benefits and social security checks.

Partly in response to this disgusting trend, there is a movement afoot to make Governments benefits subject to electronic banking. This would entail requiring senior citizens to set up a bank account to which their Government checks are directly deposited, via the rapidly growing system of electronic fund transfers (EFT's). This would eliminate the hazards senior citizens encounter when cashing their checks, proponents maintain.

This problem and possible solution were recently discussed by Bill Gold in his daily column, "The District Line," in the August 25 edition of the Washington Post. After considering the possibility of making EFT a condition of Government or employee benefit, Mr. Gold concluded that the best way to approach this situation is through improved consumer education of EFT systems, with a special emphasis on educating senior citizens.

Although I am greatly disturbed by the crimes being perpetrated against our Nation's senior citizens, I agree with Mr. Gold's conclusions. There is no room in the developing system of electronic banking for required use. One of the conditions of H.R. 13007, the Electronic Fund Transfer Act, which I sponsored and which passed the House August 11, is prohibition of such mandatory use. No person may be required to use electronic fund transfers as a condition of employment or Government benefit.

Consumers are traditionally slow to accept change. Consider the massive advertising campaign the banking industry launched to convince consumers to use checks. Bank customers had to be assured that checks are sometimes better than cash—that checks are like proof of payment, that checks could be stopped if merchandise is found faulty, and so on.

A similar campaign heralded the advent of credit cards. And today both checks and credit cards are an accepted way of life.

And now, the public is being asked to accept banking by computer, an inherently cold and dehumanized approach to transacting their money. And unfortunately for consumers, the banking industry has little ammunition to promote the new service. Only a handful of States have laws governing EFT transactions. There is no Federal law covering electronic banking.

Many consumers assume that because a debit card—the card used to activate electronic banking terminals—resembles a credit card, that the same laws govern the two. Nothing could be further from the truth.

The truth is if a consumer's life savings are wiped out through the use of a stolen debit card, the consumer has as much redress under Federal law as when a thief steals money from him on the street.

The most important provision of H.R. 13007 corrects this disparity by establishing a $50 consumer liability limit, very similar to that currently in effect for credit card holders. The bill further protects consumers by prohibiting the issuance of unsolicited, validated cards through the mail. H.R. 13007 also requires prompt error resolution and requires that detailed monthly statements are sent to card holders. The bill also requires that a card holder receives a receipt at the time of each transaction.

H.R. 13007 passed the House on August 11, by an overwhelming 314–2 margin. Still, the bill faces tough opposition in the Senate where a number of crippling amendments are already proposed. It will be a close race to see a comprehensive EFT bill passed this session.

I agree with Mr. Gold that consumer education is needed in the field of electronic fund transfers. And the first order of that education is letting consumers know that, as it stands, they have virtually no rights under the system.●

## MASTERS CHAMPION RUNNER, RAY GORDON: PROOF THAT YOU CAN STAY ACTIVE AND FIT AS YOU GET OLDER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, I would like to bring to the attention of my colleagues the outstanding achievements of Alexander R. "Ray" Gordon, Jr., age 60, who won the national title for persons over 60 in the 400-meter dash, 800-meter run, and the 1,500-meter run, at the National Masters AAU Track and Field Championships in Atlanta, Ga., July 7–9 of this year. Ray, the president of the Shenandoah Valley Runners, now holds the world record for the half mile for persons over 60 and holds other age-group records in the quarter-mile, 1,500-meter run, and may long distance cross-country and road races.

At the University of Alabama, in 1918, I ran on the cross-country team. I ran 10 miles a day during practices. While I do not run 10 miles a day now, I walk as fast as I can everywhere I go and often play 18 holes of golf.

You do not have to roll over and play dead as you get older. Ray Gordon is living proof of the potential of exercise to help one lead a vital life as one gets older. I commend him for his accomplishments and hope that Ray's achievements will serve as a model to encourage others to stay active and fit as they approach later years. By so doing, I am convinced people can live not only healthier, but longer lives.●

## IRRESPONSIBLE CONDUCT BY THE WASHINGTON POST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. FOUNTAIN) is recognized for 5 minutes.

● Mr. FOUNTAIN. Mr. Speaker, on August 5, the Washington Post ran an editorial "Urban Aid in Distress" on the administration's supplementary fiscal assistance proposal which contained two completely untrue allegations.

The Post alleged that the subcommittee which I chair has never been hospitable to urban aid plans and that I personally did not entertain any amendments before the subcommittee voted on that bill.

In addition to making these two allegations—which are demonstrably not true—the Post editorial displayed a lack of understanding about the relationship between unemployment rates and the fiscal condition of local governments.

I sent a hand-delivered letter to the Post's editor 2 days later (August 7) requesting that my response be printed while the untrue allegations were still fresh in the readers' minds.

I believe any person who is singled out for criticism in an editorial is entitled to an opportunity to defend himself and to have his response printed on a timely basis.

The Washington Post, I am sorry to report, has denied me an opportunity to reply to the untrue statements in its editorial. Moreover, it has done so in an inconsiderate and arrogant manner.

When my letter to the editor did not appear by August 11, I asked my staff to phone the Post to inquire when it would appear. Only then was I informed, through my staff, that the letter was considered too lengthy for the available space. My staff was advised that it would be printed more quickly if compressed into 850 words and rewritten as an op-ed piece.

Acting on that understanding, I took the time from a very busy schedule that same afternoon to rewrite the letter in accordance with the Post's specifications, and it was picked up by a Post messenger late in the day. What did I get for that effort? Dead silence from the Post. The Op-Ed piece did not appear, and I have never received even the courtesy of a call or letter of acknowledgement.

After repeated, unproductive phone calls to the Post's editorial office, my staff learned yesterday afternoon from Mr. Philip L. Geyelin, the paper's editorial page editor, that the Post has no intention of printing my response. So much for fair play.

I firmly believe that a free press is an essential component of a democratic society. But it is equally important that the rights and privileges accorded to the press be exercised with a sense of responsibility and a high regard for the rights of individuals.

Mr. Speaker, the Post editorial conveyed the erroneous impression that the subcommittee I chair acted hastily in voting to postpone further consideration of the supplementary fiscal assistance bill, and that I refused to consider amendments. That false impression has also been conveyed repeatedly by a subcommittee member who was on the losing side. What that member fails to disclose is the fact that he did not offer any amendment or alternative either in our Democratic caucus or in the subcommittee meeting, nor did he inform the chairman before the meeting of his intention to offer an amendment.

The truth is that the bill was fully and carefully examined in 3 days of public hearings, an executive session. a caucus, by in-depth staff analysis, and in numerous discussions among the Members. It was evident before the subcommittee meeting on August 2 that a majority of

the Members could not support the bill, and no amount of discussion would have changed the outcome. Indeed, the President personally sought to persuade at least one Member to change his position, and failed.

As for the false charge that the Chair did not permit amendments to be offered, the official stenographic record of the meeting clearly shows that I actually invited amendments on three separate occasions. This is shown on pages 7, 8, and 10 of the record. I would be delighted to furnish that transcript to interested Members.

Mr. Speaker, I request that my August 7, 1978, letter to the editor of the Washington Post be included at this point for the information of my colleagues and other readers of the CONGRESSIONAL RECORD.

The letter follows:

LETTER TO EDITOR, WASHINGTON POST

HOUSE OF REPRESENTATIVES,
*Washington, D.C., August 7, 1978.*

Your editorial, "Urban Aid in Distress", (Washington Post for August 5), makes the unwarranted assertion that the Subcommittee I chair "has never been too hospitable to urban-aid plans." I know of no factual basis for that statement. On the contrary, the Inter-governmental Relations and Human Resources Subcommittee was deeply concerned with urban problems and Federal-State-local relations long before these subjects became fashionable in Washington.

It would be correct to say that the Fountain Subcommittee has never been hospitable to unsubstantiated claims, the misuse of statistical data, and political slogans when it comes to spending the public's money.

The Subcommittee opposed the Antirecession Fiscal Assistance (countercyclical) program last year because it was poorly constructed and could not possibly serve the objectives stated for it. It was claimed the program was needed to help compensate State and local governments for their recession-related revenue losses, even though the recession had ended two years earlier. It was argued that the State and local governments would spend their allocations promptly, thereby stimulating the national economy. This argument ignored the legal reality that governments are required to follow budget procedures which preclude the rapid spending of temporary assistance. Further, a government qualified for aid if its unemployment rate exceeded 4.5 percent, a lower figure than the rate considered "full employment" by the Presidents' Council of Economic Advisers.

The use of local unemployment rates as the mechanism for targeting money to needy governments was the fatal flaw of the countercyclical program. Those rates are so unreliable that the Commissioner of Labor Statistics has described their fluctuations as no better than "random numbers" for communities under 50,000 population. Worse still, actual rates have been developed for fewer than 5,000 governments, with the vast majority of units receiving allocations on the basis of assigned "balance of the county" rates which bear little or no resemblance to the local situation. As a result, many of the wealthiest communities in the United States, located in counties like Nassua, Suffolk and Westchester in New York State, have been receiving assistance. And they would continue to receive money under the proposed new program.

Even if unemployment rates could be made reliable, they would still not be a useful measure of local need because these rates are wholly unrelated to a governments service responsibilities and fiscal condition. By an interesting coincidence, the lead story in the August 5 Washngton Post dealt with black teen-age unemployment. I agree that minority youth unemployment is a serious problem, and one which we have not yet addressed satisfactorily. It is important to note in this regard that approximately half of the national unemployment rate is attributable to youth unemployment, Youth unemployment, therefore, accounts for an even larger percentage of the high unemployment rates found in a great many central cities.

It is essential to ask in this connection what fiscal responsibility a particular local government has for this group or for the unemployed in general. The answer for most cities is "very little". There are, of course, exceptions. The cities mentioned in your editorial illustrate this point. Cleveland, New Orleans and Buffalo have no responsibility for financing any part of the costly public assistance and medicaid programs. These costs are borne by an overlying county for Buffalo and Cleveland and by the State in the case of New Orleans. Moreover, the public schools are the fiscal responsibility of independent school boards in both Cleveland and New Orleans.

In sharp contrast, a small number of cities, including New York and San Francisco, are required by their States to pay part of the non-Federal share of public assistance and medicaid costs, and they also support public education out of the municipal budget.

The fact is that local governments have widely differing responsibilities, revenue sources, and fiscal arrangements with their State governments. As a result, it is highly misleading to compare cities, especially across State lines, or to measure local need and tax effort without taking the total State fiscal system into account. And it is just plain silly to conclude a city is in fiscal need or distress on the basis of an unemployment rate or any other available socioeconomic indicator. Our Subcommittee has studied this problem, with the counsel of the Nation's leading experts, for the past several years. Like many social problems, this one is not susceptible to easy solutions.

The Washington Post has helped create the false impression that the Subcommittee acted hastily in votng to postpone consideration of the Administration's bill. The bill was carefully and fully examined in hearings, executive session, caucus, staff analyses, and in numerous discussions among the Members before last week's meeting. I am convinced that every Subcommittee member had made up his mind before the meeting, and no amount of discussion would have changed the outcome. It should be noted that not a single amendment was offered when the Chair made amendments in order on three separate occasions.

The defects of the proposed Supplementary Fiscal Assistance program are so fundamental that the bill is beyond salvage. Far from being a program to aid distressed communities, it would allocate money to fully 70 percent of the Nation's local governments. The quirks in the allocation formula result in its favoring wealthy communities over poorer ones.

How the program would operate in the Washington metropolitan area is instructive. The District government is treated as the third most distressed city among the country's one hundred largest municipalities, and would receive a per capita payment of $14.29. Among the one hundred largest cities, only Newark and New York would receive larger per capita amounts. On the other hand, no other large city or any county in the Washington area would receive a penny. However, payments would be made to such wealthy places as Chevy Chase Village, Chevy Chase Town, and Somerset. It would be difficult to devise a more irrational formula.

This legislation would surely encourage local governments to become permanently dependent on the Federal budget for such basic local services as police and fire protection and trash collection.

The local perception of need is a very flexible one when the Federal Government stands ready to hand out money. Last week, for example, I received a mailgram from the mayor of Jacksonville, Florida, which read: "Needless to say, these funds are most urgently needed and important to Jacksonville." This is the same city for which large advertisements were recently placed in the Wall Street Journal announcing its "property taxes are among the lowest in the nation and they've been going down . . . There is no State or local income tax. And independent research shows the cost of living for an executive is $10,000 a year lower here than in New York."

There is no justification for another general revenue sharing program when we already have one providing almost $7 billion a year in assistance. This is especially true at this time when the Federal Government has an astronomical national debt, a huge budget deficit, and when inflation is the most critical domestic problem facing all of us. Moreover, it is not widely known that the existing general revenue sharing program targets money more effectively to the large central cities than the Administration's proposal.

I believe there is need for a carefully designed program to help those local governments that are genuinely distressed as the result of long-term economic decline, and I plan to give this matter priority attention early next year. However, it would be a disservice to the American people to create the impression that a "quick fix" is possible now through political negotiation in the Congress.

Sincerely,

L. H. FOUNTAIN,
*Chairman, Intergovernmental Relations and Human Resources Subcommittee.*●

## THE NEED TO PROVIDE EQUAL ACCESS TO PUBLIC TRANSPORTATION FOR THE HANDICAPPED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, for the Nation's 30 million handicapped citizens, the Rehabilitation Act of 1973, the bill outlining a broad program to insure that Federal funds are spent in a manner that would promote accessibility and eliminate traditional obstacles, was a source of hope.

The hope carried in the bill was that the handicapped would soon be able to move about freely in a world that had, for years, been filled with impassable barriers.

A cornerstone in this quest for equal access is the Transbus, the vehicle that would give the infirm and handicapped the freedom of movement now enjoyed by the rest of the population.

The Secretary of Transportation in 1977 ordered that by September 1979 all public transportation must be accessible to the handicapped by use of the Transbus.

I am firmly committed to the concept of equal accessibility and feel that any

proposal aimed at delaying this program would undermine the intent of Congress as expressed in the Rehabilitation Act of 1973.

It has been brought to my attention that, due to a lack of technical know-how, the mandate requiring the Transbus would have to be scuttled.

The debate to determine the best possible system has been raging for over 5 years and now, according to opponents of the Transbus, we are still at step 1.

I cannot accept any further delays in the right to accessible transportation for the handicapped and urge the Congress and the Secretary of Transportation to act to insure that the intent of the Rehabilitation Act be carried out so that public transportation is provided to all Americans.●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. RANGEL (at the request of Mr. WRIGHT), for after 6 p.m. today and for September 8 and 11, on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GREEN) to revise and extend their remarks and include extraneous material:)

Mr. GOLDWATER, for 5 minutes, today.
Mr. KEMP, for 15 minutes, today.
Mr. SARASIN, for 5 minutes, today.

(The following Members (at the request of Mr. BARNARD) to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. FOUNTAIN, for 5 minutes, today.
Mr. ST GERMAIN, for 5 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SIKES, in two instances and to include extraneous matter.

(The following Members (at the request of Mr. GREEN), and to include extraneous matter:)

Mr. FINDLEY in four instances.
Mr. DERWINSKI in three instances.
Mr. MICHEL.
Mr. COLLINS of Texas in three instances.
Mrs. HOLT.
Mr. SNYDER.
Mr. STEIGER.
Mr. ARCHER.
Mr. DORNAN in two instances.
Mr. RUDD.
Mr. WHALEN.
Mr. HOLLENBECK in two instances.
Mr. SARASIN in two instances.
Mr. WALKER.
Mr. STEERS.

(The following Members (at the request of Mr. BARNARD), and to include extraneous material:)

Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. ROGERS in five instances.
Mr. RYAN.
Mr. REUSS.
Mr. IRELAND.
Mr. LONG of Maryland.
Mr. YOUNG of Missouri.
Mr. BRECKINRIDGE in five instances.
Mr. BLOUIN.
Mr. TEAGUE in three instances.
Mr. MINETA.
Mr. MCDONALD.
Mr. VANIK.
Mr. HARKIN.
Mr. HARRIS.

## ENROLLED BILL SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 6669. An act to establish a comprehensive and coordinated national climate policy and program, and for other purposes.

## BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on September 6, 1978, present to the President, for his approval, bills and joint resolutions of the House of the following titles:

H.R. 185. To amend section 2632 of title 10, United States Code, to provide the Secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from certain places of employment;

H.R. 2931. To amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage by preempting certain State or local laws which are inconsistent with such contracts, and for other purposes;

H.R. 2952. For the relief of M/Sgt. William E. Boone, U.S. Army, retired;

H.R. 3532. To amend chapter 639 of title 10, United States Code, to enable the Secretary of the Navy to change the name of a publication of the Naval Observatory providing data for navigators and astronomers;

H.R. 7161. To amend title 10, United States Code, to allow nationals, as well as citizens, of the United States to participate in the Junior Reserve Officers' Training Corps program;

H.R. 7162. For the relief of Stephanie Johnson;

H.R. 8342. To amend title 5, United States Code, to provide for the application of local withholding taxes to Federal employees who are residents of such locality;

H.R. 8397. To provide that a certain tract of land in Pinal County, Ariz., held in trust by the United States for the Papago Indian Tribe, be declared a part of the Papago Indian Reservation;

H.R. 8471. To authorize the Governor of the State of Wyoming to exhibit the Nameplate, ship's bell, and silver service of the U.S.S. *Wyoming* without restriction as to the place of such exhibition;

H.R. 8771. To amend title 5, United States Code, to authorize the Civil Service Commission to comply with the terms of a court decree, order, or property settlement in connection with the divorce, annulment, or legal separation of a Federal employee who is under the civil service retirement system, and for other purposes;

H.R. 10878. To extend until October 1, 1981, the voluntary insurance program provided by section 7 of the Fishermen's Protective Act of 1967, and for other purposes;

H.R. 10899. To provide for Federal regulation of participation by foreign banks in domestic financial markets;

H.R. 12106. To amend the Independent Safety Board Act of 1974 to authorize additional appropriations;

H.R. 12240. To authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes;

H.R. 12602. To authorize certain construction at military installations for fiscal year 1979, and for other purposes;

H.R. 12927. Making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes;

H.R. 13235. For the relief of James Thomas Lantz, Jr., David D. Bulkley, and Arthur J. Abshire;

H.R. 13467. Making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes;

H.R. 13468. Making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes;

H.J. Res. 773. Authorizing and requesting the President of the United States to issue a proclamation designating the seven calendar days beginning September 17, 1978, as "National Port Week"; and

H.J. Res. 1014. Designating April 28 and 29 of 1979 as "Days of Remembrance of Victims of the Holocaust."

## ADJOURNMENT

Mr. BARNARD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 8 minutes p.m.) the House adjourned until tomorrow, Friday, September 8, 1978, at 10 o'clock a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4932. A letter from the Director of Legislation, Department of the Navy, transmitting notice of the Navy's intention to donate a Japanese flying boat (Kawanishi H8K2: code name Emily) to the Japanese Foundation for the Promotion of Maritime Science, Tokyo, Japan, pursuant to 10 U.S.C. 7545; to the Committee on Armed Services.

4933. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense services to Saudi Arabia (transmittal No. 78–66), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4934. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain military equipment to Saudi Arabia (transmittal No. 78–68), pursuant to section 36(b) of the Arms Export Control Act; the Committee on International Relations.

4935. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to

sell certain defense services to Saudi Arabia (transmittal No. 78–87), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4936. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting, a monthly report on sales of retail gasoline for April 1978, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

4937. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting a monthly report on sale of retail gasoline for May 1978, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act; to the Committee on Interstate and Foreign Commerce.

4938. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting a monthly report on sales of refined petroleum products for May 1978, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act; to the Committee on Interstate and Foreign Commerce.

4939. A letter from the National Commander, Military Order of the Purple Heart, transmitting the report on the audit of the Order for the year ended June 30, 1978, pursuant to section 3 of Public Law 88–504; to the Committee on the Judiciary.

4940. A letter from the Chairman, National Transportation Safety Board, transmitting the Board's budget request for fiscal year 1980, pursuant to section 304(b)(7) of Public Law 93–633; jointly, to the Committees on Appropriations, Interstate and Foreign Commerce, and Public Works and Transportation.

4941. A letter from the Comptroller General of the United States, transmitting a report on the Agency for International Development's housing investment guaranty program (ID–78–44, September 6, 1978); jointly, to the Committees on Government Operations, and International Relations.

4942. A letter from the Secretary of Transportation, transmitting a report on the study of highway needs to solve energy problems, pursuant to section 153(b) of Public Law 94–280; jointly, to the Committees on Public Works and Transportation, and Ways and Means.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ZABLOCKI: Committee of conference. Conference report on H.R. 12222 (Rept. No. 95–1545). Ordered to be printed.

Mr. ZABLOCKI: Committee of conference. Conference report on S. 3075 (Rept. No. 95–1546). Ordered to be printed.

Mr. FOLEY: Committee on Agriculture. S. 409. An act to designate the Meat Animal Research Center located near Clay Center, Nebr., as the "Roman L. Hruska Meat Animal Research Center" (Rept. No. 95–1547). Referred to the House Calendar.

Mr. FOLEY: Committee on Agriculture. H.R. 7432. A bill to designate the U.S. Department of Agriculture's Bee Research Laboratory in Tucson, Ariz., as the "Carl Hayden Bee Research Center" (Rept. No. 95–1548). Referred to the House Calendar.

Mr. FOLEY: Committee on Agriculture. H.R. 11123. A bill to designate the U.S. Department of Agriculture's Pecan Field Station in Brownwood, Tex., as the "W. R. 'Bob' Poage Pecan Field Station" (Rept. No. 95–1549). Referred to the House Calendar.

Mr. FOLEY: Committee on Agriculture. H.R. 11079. A bill to amend the Farm Credit Act of 1971 (85 Stat. 583) to extend the term for production credit association loans to producers or harvesters of aquatic products; with amendment (Rept. No. 95–1550). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. H.R. 13675. A bill to amend section 103(f)(1) of the Agricultural Act of 1949 by deleting the third sentence thereof in order to insure that interest rates on price support loans for upland cotton are not less favorable to producers than the interest rates for such loans on other commodities (Rept. No. 95–1551). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. S. 2946. An act to authorize the Secretary of Agriculture to relinquish exclusive legislative jurisdiction over lands or interests under his control (Rept. No. 95–1552). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. S. 2951. An act to authorize the Secretary of Agriculture to accept and administer on behalf of the United States gifts or devises of real and personal property for the benefit of the Department of Agriculture or any of its programs (Rept. No. 95–1553). Referred to the Committee of the Whole House on the State of the Union.

Mr. KASTENMEIER: Committee on the Judiciary. H.R. 13331. A bill to amend title 28 of the United State Code to make certain changes in the places of holding Federal district courts, in the divisions within judicial districts, and in judicial district dividing lines; wth amendment (Rept. No. 95–1554). Referred to the Committee of the Whole House on the State of the Union.

Mr. DENT: Committee on House Administration. House Resolution 1276. Resolution providing for the further expenses of the Select Committee on Assassinations (Rept. No. 95–1555). Referred to the House Calendar.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COCHRAN of Mississippi (for himself, Mr. BOWEN, Mr. BUTLER, Mr. EVANS of Georgia, Mr. JOHNSON of Colorado, Mr. LOTT, Mr. MCDONALD Mr. STEED, and Mr. STOCKMAN):

H.R. 14002. A bill to clarify the circumstances under which territorial provisions in licenses to manufacture, distribute, and sell trademarked soft drink products are lawful under the antitrust laws; to the Committee on the Judiciary.

By Mr. DAVIS:

H.R. 14003. A bill to amend title XVIII of the Social Security Act with respect to the payment, under the medicare program, of services of physicians rendered in a teaching hospital; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. GRADISON (for himself, Mr. BLOUIN, Mr. BOWEN, and Mr. WYDLER):

H.R. 14004. A bill to amend the Internal Revenue Code of 1954 to provide for automatic cost-of-living adjustments in the income tax and withholding rates; to the Committee on Ways and Means.

By Mr. RICHMOND (for himself, Mr. AKAKA, Mr. BONIOR, Mr. PHILLIP BURTON, Mr. CARR, Mrs. CHISHOLM, Mr. CORRADA, Mrs. COLLINS of Illinois, Mr. EILBERG, Mr. GARCIA, Mr. GREEN, Mr. HARRINGTON, Ms. KEYS, Mr. KRUEGER, Mr. LEDERER, Mr. LOTT, Mr. MITCHELL of Maryland, Mr. NOLAN, Mr. OTTINGER, Mr. PEASE, Mr. PEPPER, Mr. RANGEL, Mr. SIMON, Mrs. SPELLMAN, and Mr. STARK):

H.R. 14005. A bill to provide more effectively for the use of interpreters in courts of the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. EVANS of Indiana:

H.R. 14006. A bill to prohibit the Secretary of Agriculture from prohibiting the use of nitrites as food preservatives as the basis of any carcinogenic effect nitrates may be represented to have until a satisfactory substitute is commercially available; to the Committee on Agriculture.

H.R. 14007. A bill to prohibit the Secretary of HEW from prohibiting the use of nitrites as food preservatives as the basis of any carcinogenic effect nitrates may be represented to have until a satisfactory substitute is commercially available; to the Committee on Interstate and Foreign Commerce.

By Mr. HARSHA:

H.R. 14008. A bill to amend the Packers and Stockyards Act, 1921, for purposes of requiring persons who purchase meat or meat food products from packers to pay for such purchases within 8 days; to the Committee on Agriculture.

By Mr. STEIGER (for himself, Mr. GEPHARDT, Mr. HORTON, Mr. FUQUA, Mr. GRADISON, Mr. WIRTH, Mr. HILLIS, Mr. HEFTEL, Mr. ERTEL, Mr. VOLKMER, Mr. BLANCHARD, Mr. GLICKMAN, Mr. YOUNG of Missouri, Mr. FINDLEY, and Mr. JOHN T. MYERS):

H.R. 14009. A bill to require biennial reports to Congress on the effectiveness of Government programs, and for other purposes; to the Committee on Government Operations.

By Mr. WATKINS:

H.R. 14010. A bill to change the name of Clayton Lake which is an element of the flood control project for the Clayton and Tuskahoma Reservoirs, Kiamichi River, Okla., to Sardis Lake; to the Committee on Public Works and Transportation.

By Mr. ZEFERETTI (for himself, Mr. NOWAK, and Mr. GREEN):

H.R. 14011. A bill to amend the Social Security Act to improve the operation of the aid to families with dependent children program and thereby provide fiscal relief for State and local welfare costs; to the Committee on Ways and Means.

By Mr. HARRIS (for himself, Mr. DIGGS, Mr. FAUNTROY, Mr. FISHER, Mrs. SPELLMAN, Mr. MCKINNEY, and Mr. STEERS):

H.R. 14012. A bill to amend the National Capital Transportation Act of 1969 to authorize additional Federal contributions for the cost of construction of the regional rail system of the Washington Metropolitan Area Transit Authority, to provide an orderly method for the retirement of bonds issued by such Authority, and to provide an annual operation and maintenance subsidy to such Authority to reflect the special Federal relationship to such system; to the Committee on the District of Columbia.

By Mr. LEACH (for himself, and Mr. BLOUIN):

H.R. 14013. A bill to amend title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 to provide mandatory social security coverage for Members of Congress, offsetting against any benefits based on such coverage the amount of any civil service annuities simultaneously

payable (on the basis of such coverage) to such Members or their survivors; to the Committee on Ways and Means.

By Mr. QUAYLE (for himself, Mr. ABDNOR, Mr. AUCOIN, Mr. ANDERSON of Illinois, Mr. BADHAM, Mr. BAFALIS, Mr. BUTLER, Mr. CAVANAUGH, Mr. CONTE, Mr. FORSYTHE, Mr. FITHIAN, Mr. GOLDWATER, Mr. GRADISON, Mr. GUYER, Mr. HANSEN, Mr. HARRINGTON, Mrs. HECKLER, Mr. HOLLENBECK, Mr. KILDEE, Mr. LAGOMARSINO, Mr. LEACH, Mr. MCCLOSKEY, Mr. MCKINNEY, Mr. MAGUIRE, and Mr. MITCHELL of Maryland):

H.R. 14014. A bill to secure and protect the rights of citizens and protect the freedom of the press; to the Committee on the Judiciary.

By Mr. QUAYLE (for himself, Mr. MURPHY of Pennsylvania, Mr. NOLAN, Mr. PANETTA, Mr. PATTERSON of California, Mr. PATTISON of New York, Mr. RANGEL, Mr. SCHEUER, Mrs. SPELLMAN, Mr. SYMMS, Mr. THONE, Mr. WALKER, Mr. WALGREN, and Mr. WEISS):

H.R. 14015. A bill to secure and protect the rights of citizens and protect the freedom of the press; to the Committee on the Judiciary.

By Mrs. SMITH of Nebraska:

H.R. 14016. A bill to provide indemnities to beef, goat, or sheep producers or owners when import quotas are used to suppress market prices: jointly, to the Committees on Agriculture and Ways and Means.

By Mr. WALKER:

H.R. 14017. A bill to limit foreign assistance to programs relating to food production and nutrition and military assistance; to the Committee on International Relations.

By Mr. ADDABBO (for himself and Mrs. COLLINS of Illinois):

H.J. Res. 1131. Joint resolution to authorize and request the President to issue a proclamation designating November 30, 1978, as "National Postal Workers' Recognition Day"; to the Committee on Post Office and Civil Service.

By Mr. COLLINS of Texas (for himself, Mr. HAGEDORN, Mr. HYDE, and Mr. SYMMS):

H. Con. Res. 705. Concurrent resolution expressing the sense of the Congress that merit employment in the civil service be preserved; jointly, to the Committees on Education and Labor, and Post Office and Civil Service.

By Mr. SOLARZ (for himself, Mr. HORTON, Mr. PEASE, and Mr. JEFFORDS):

H. Con. Res. 706. Concurrent resolution expressing the sense of Congress that the Attorney General, under the authority of the Immigration and Nationality Act, should parole into the United States Cambodian refugees currently held in camps in Thailand; to the Committee on the Judiciary.

By Mr. VENTO:

H. Con. Res. 707. Concurrent resolution expressing the sense of Congress regarding the withdrawal of Syrian troops in Lebanon; to the Committee on International Relations.

By Mr. STEERS (for himself, Mr. MOFFETT, Mr. MOORHEAD of California, and Mr. COHEN):

H. Res. 1340. Resolution calling upon the President to communicate to the Government of the Soviet Union the concern of the United States that Issac Zlotver be granted permission to emigrate to Israel in order to be reunited with his family; to the Committee on International Relations.

## MEMORIALS

Under clause 4 of rule XXII,

469. The SPEAKER presented a memorial of the Legislature of the State of California, relative to Vietnamese refugees; to the Committee on the Judiciary.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. MCFALL introduced a bill (H.R. 14018) for the relief of Ignacio Aguila Ramos, which was referred to the Committee on the Judiciary.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 8729

By Mr. MINETA:

—Page 42, strike out line 18 and all that follows down through page 43, line 23.

—Page 43, strike out lines 16 through 21.

Page 43, line 22, strike out "(4)" and insert in lieu thereof "(2)".

H.R. 11280

By Mr. COLLINS of Texas:

—Page 147, after line 22, insert the following:

"(d)(1) In establishing and enforcing standards applicable to appointment or retention of any individual in any position in the Food and Drug Administration, the Drug Enforcement Administration, the National Institute on Drug Abuse, the Office of the Attorney General, or any other Executive agency designated by the Office of Personnel Management the functions of which relate to enforcement of laws relating to controlled substances, the Office shall provide for the investigation of such individual relating to the past and present use of controlled substances.

"(2) For the purpose of this section, the term 'controlled substance' has the meaning set forth in section 102(6) of the Controlled Substances Act.

H.R. 11280

By Mr. CORCORAN of Illinois:

—Page 305, beginning on line 14, strike out "Except as provided under subsection (e) of this section, if" and insert in lieu thereof "If".

Page 308, strike out line 3 and all that follows down through line 23.

Page 308, line 24, strike out "(f)" and insert in lieu thereof "(e)".

Page 309, line 3, strike out "(g)" and insert in lieu thereof "(f)".

Page 309, line 7, strike out "(h)" and insert in lieu thereof "(g)".

Page 310, line 12, strike out "(i)" and insert in lieu thereof "(h)".

H.R. 11280

By Mr. MCCLOSKEY:

—Page 244, after line 20, insert the following new subsection:

"(d)(1) Subject to paragraph (2) of this subsection, effective for pay periods beginning in October, November, and December of each year after calendar year 1980, each annual rate of basic pay determined under subsections (a) through (c) of this section shall be decreased or increased (as the case may be) so that the average of that annual rate (taking into account such adjustment) for all pay periods beginning in the calendar year is the same percentage of that annual rate of pay (disregarding any adjustment under this subsection) as the percentage that—

"(A) the revenues received by the United States during the fiscal year ending immediately before such 3-month period is of

"(B) the budget outlays made by the United States during such fiscal year.

"(2) For purposes of this subsection—

"(A) the average annual rate referred to in paragraph (1) shall be rounded to the nearest multiple of $100 (or if midway between multiples of $100, to the next highest multiple of $100); and

"(B) the percentages referred to in paragraph (1) shall be rounded to the nearest multiple of a tenth of a percent (or if midway between multiples of a tenth of a percent, to the next highest multiple of a tenth of a percent).

"(3) In applying subsection (b) of this section for pay periods beginning during such 3-month period, the rates of pay for level GS–16 and for level IV referred to in subsection (b) shall be adjusted in accordance with paragraph (1) of this subsection.

"(4) Effective for pay periods beginning after the 3-month period, the rate which shall apply, unless otherwise adjusted under this section, shall be that rate which would have been applicable for those pay periods if no adjustment had been made under this subsection.

"(5) For the purpose of this subsection, the Secretary of the Treasury shall determine and make public after the end of each fiscal year the revenues received and the budget outlays made during such fiscal year. The terms 'revenues' and 'budget outlays' shall be used for purposes of this subsection as those terms are used in the Congressional Budget and Impoundment Control Act of 1974.

Page 244, line 21, strike out "(d)" and insert in lieu thereof "(e)".

H.R. 11280

By Mr. PANETTA:

—Page 238, line 8, strike out "service" and insert in lieu thereof the following: service, including any significant reduction in paperwork".

—Page 265, line 9, strike out "service" and insert in lieu thereof the following: "service, including any significant reduction in paperwork".

Page 267, line 21, insert after "operations" the following: "or achieves a significant reduction in paperwork".

Page 268, line 6, insert after "operations" the following: "or achieves a significant reduction in paperwork".

Page 270, insert after line 16 the following new section:

INCENTIVE AWARDS AMENDMENTS

SEC. 502. (a) Section 4503(1) of title 5, United States Code, is amended by inserting after "operations" the following: "or achieves a significant reduction in paperwork".

(b) Section 4504(1) of title 5, United States Code, is amended by inserting after "operations" the following: "or achieves a significant reduction in paperwork".

Page 270, line 18, strike out "Sec. 502." and insert in lieu thereof "Sec. 503".

Page 272, line 19, strike out "Sec. 503." and insert in lieu thereof "Sec. 504.".

Page 130, in the table of contents, strike out the items relating to sections 502 and 503 and insert in lieu thereof the following:

Sec. 502. Incentive awards amendments.
Sec. 503. Technical and conforming amendments.
Sec. 504. Effective date.

H.R. 11280

By Mrs. SPELLMAN:

—Page 208, line 4, after "recruited" insert "(including from within the civil service)".

Page 208, after line 12, insert the following new subsection:

"(d)(1) The regulation under subsection (c) of this section shall provide that in filling any position in an Executive agency for which a recruitment program under subsection (c) is being conducted by that agency for women, to the maximum extent practicable, an individual not entitled to status as a preference eligible under section 2108(3) (A) or (C) for purposes of preference in consideration for appointment shall be entitled, with respect to consideration for appointment to that position, to the preference

available to an individual having the status of a preference eligible under section 2108 (3) (A) if the individual—

"(A) is a woman; and

"(B) has completed, in the aggregate, at least 5 years of civilian service.

"(2) Such regulation shall provide, to the maximum extent practicable, that no individual shall be excluded from consideration for appointment by reason of the application of this subsection."

Page 208, line 13, strike out "(d)" an insert in lieu thereof "(e)".

Page 208, line 26, strike out "(e)" and insert in lieu thereof "(f)".

—Page 209, after line 12, insert the following new subsection:

INTERPRETING ASSISTANTS FOR DEAF EMPLOYEES

SEC. 313. (a) Section 3102 of title 5, United States Code, is amended—

(1) by redesignating paragraph (4) of subsection (a) as paragraph (5), by striking out "and" at the end of paragraph (3), and inserting after paragraph (3) the following new paragraph (4):

"(4) 'deaf employee' means an individual employed by an agency who establishes, to the satisfaction of the appropriate authority of the agency concerned under regulations of the head of that agency, that the employee has a hearing impairment, either permanent or temporary, so severe or disabling that the employment of an interpreting assistant or assistants for the employee is necessary or desirable to enable such employee to perform the work of the employee; and";

(2) in subsection (b), by inserting "and interpreting assistant or assistants for a deaf employee" after "or assistants for a blind employee", and amending the last sentence to read as follows: "A reading assistant or an interpreting assistant, other than the one employed or assigned under subsection (d) of this section, may receive pay for services performed by the assistant by and from the blind or deaf employee or a nonprofit organization, without regard to section 209 of title 18."

(3) in subsection (c), by inserting "or deaf" after "blind"; and

(4) by inserting at the end thereof the following new subsection:

"(d) The head of each agency may also employ or assign, subject to section 209 of title 18 and to the provisions of this title governing appointment and chapter 51 and subchapter VIII of chapter 53 of this title governing classification and pay, such reading assistants for blind employees and such interpreting assistants for deaf employees as may be necessary to enable such employees to perform their work.".

(b) (1) The analysis of chapter 31 of title 5, United States Code, is amended by striking out the item relating to section 3102 and inserting in lieu thereof the following:

"3102. Employment of reading assistants for blind employees and interpreting assistants for deaf employees.".

(2) The caption for section 3102 of title 5, United States Code, is amended to read as follows:

"§ 3102. Employment of reading assistants for blind employees and interpreting assistants for deaf employees.".

(c) Section 410(b)(1) of title 39, United States Code, is amended by inserting after "open meetings)" a comma and "3102 (employment of reading assistants for blind employees and interpreting assistants for deaf employees),".

Page 209, line 14, strike out "313." and insert in lieu thereof "314.".

Conform the table of contents accordingly.

# EXTENSIONS OF REMARKS

## KEEPING AN EYE ON AIRBUS

### HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. HANNAFORD. Mr. Speaker, I have been monitoring with great interest Airbus Industrie negotiations with China Airlines for the purchase of several wide-bodied jet aircraft. This is because I have received information indicating that the French Government has taken the extraordinary step of offering landing rights in Paris to the Chinese if they purchase the Airbus A300. Such an offer would violate international agreements between France and the United States and compel us to take Government precautions against similar future anticompetitive actions on the part of our European competitors.

When this matter first came to my attention, I wrote to Secretary of the Treasury Blumenthal alerting him to the problem it posed. I insert both that letter as well as his response for the RECORD:

WASHINGTON, D.C., *August 1, 1978.*

Hon. W. MICHAEL BLUMENTHAL,
*Secretary of the Treasury,*
*Washington, D.C.*

DEAR MR. SECRETARY: As you know from our telephone conversation of yesterday, I am extremely upset at the apparent violation of the 1975 Aircraft Understanding of the Organization for Economic Development and Cooperation by the French with regard to a pending aircraft sale to China Airlines. The Nationalist Chinese were considering the purchase of two Douglas Aircraft DC-10s with options for two more. The Airbus A300 was a competitor for this sale. Reportedly the French have offered the Chinese landing rights in Paris if they purchase the A300 (a privilege they do not presently enjoy), and reportedly the Chinese have responded favorably to this offer with a letter of intent.

The OECD Understanding prohibits the use of extraordinary sales or financing terms by any government to secure a sale of aircraft. The tie-in of landing rights with an aircraft sale is clearly extraordinary and unfair to American private aircraft manufacturers. Consequently, I urge you to take immediate action to persuade the French to rescind these extraordinary terms and allow the competition on these particular four planes to be decided on the merits of the aircraft.

While I am pursuing a legislative solution to this kind of predatory competition, I hope your efforts will secure an expeditious settlement to the problem at hand. Let me know if I can be of any assistance to you in the endeavor.

Sincerely,

MARK W. HANNAFORD,
*Member of Congress.*

WASHINGTON, D.C.,
*August 15, 1978.*

Hon. MARK W. HANNAFORD,
*House of Representatives,*
*Washington, D.C.*

DEAR MARK: Thank you for your letter of August 1, in which you restated your strong feeling that the French may have violated the OECD Aircraft Understanding by offering landing rights to China Airlines in return for purchasing the A-300 Airbus.

As I mentioned in our phone conversation of July 31, we are equally disturbed by the report that the French Government may be linking landing rights to purchases of the Airbus. As a result, we have inquired about this. Initial reports from our Embassies indicate that although Airbus Industrie may have offered to intercede on behalf of China Airlines for landing rights in Paris, it is not the policy of the French Government to offer landing rights for such reasons. The French state, moreover, that such an offer would be contrary to their policy towards Peking.

We are seeking further information on this matter from the Republic of China and have indicated to them our concern about linking landing rights with Airbus purchases. Should the McDonnell Douglas report be confirmed, we would intend to take up the issue with the French. We share your view very strongly that such extraordinary government intervention in a commercial sale is both inappropriate and unfair.

At present, the OECD Understanding does not exclude the use of such special inducements, although they run counter to the stated policy of both France and the United States. For this and other reasons, we hope to broaden the Understanding such that only market considerations—price, quality and service—will influence the choice of aircraft by an airline.

I hope we have your support in our efforts to strengthen the OECD Understanding.

Sincerely,

W. MICHAEL BLUMENTHAL.●

## ALCOHOL POWERS AUTOS IN BRAZIL

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. FINDLEY. Mr. Speaker, while we were in our home districts during the recess, the Washington Post printed on August 30 an account of the growing use of alcohol as a motor fuel in Brazil. The Brazilians are moving ahead rapidly in this petroleum-saving technology. Within 2 years it is planned that gas stations in Brazil will offer only pure alcohol or as gasohol mixture of 20 percent alcohol and 80 percent gasoline.

If the United States were to make a similar effort, I am certain, we could benefit from the widespread use of gasohol in this country. Gasohol use would reduce our need to import foreign oil, help our balance of payments, and provide a new use for American agricultural products. The Brazilian example shows what is possible with determined effort.

The Post article is well worth noting, and I commend it to my colleagues.

Text of article follows:

GAS GUZZLERS BECOMING ALCOHOLICS IN BRAZIL

(By Larry Rohter)

SAO PAULO, BRAZIL.—For the last year, hundreds of state-owned cars with stickers saying "This Vehicle Is Powered by Alcohol" have been driven around this city of more than 8 million people.

Local auto parts shops sell a $200 kit to convert conventional gasoline engines to run on pure alcohol.

A nearby industrial center has just ordered a fleet of non-polluting alcohol-powered buses. In half a dozen major cities, Brazilians now fill the tanks of their car with "gasohol"—a mixture of 80 percent gasoline and 20 percent ethyl alcohol.

That mixtures requires no engine modification. By 1980, when alcohol production is to reach 1 billion gallons annually, all pumps are to offer only gasohol or alcohol.

The president of the Brazilian Automobile Manufacturers' Association, Mario Carnero, has predicted that by 1981 more than 16 percent of all cars built here—currently 1 million per year—will come equipped with engines that burn pure alcohol.

Only a few year ago, none of these projects would have been considered practical. In the heady days of Brazil's economic upsurge in the early 1970s, planners here followed the example of the United States and other industrialized countries and looked to cheap gasoline to fuel the booming economy. They gave little thought to "nonconventional" energy sources.

Today, however, Brazil imports 83 percent of its petroleum, costing $4 billion yearly—the largest oil import bill in the Southern Hemisphere. Now, Brazil is seeking its salvation in one of the oldest and most plentiful substances known to man: alcohol distilled from sugar cane, manioc and other tropical plant that grow abundantly in this giant land.

The effort is already far enough along that energy experts consider Brazil the world leader in using alcohol as a motor fuel. This year alone, Brazil's alcohol program will result in the consumption of 635 million gallons of ethyl alcohol either as a gasoline substitute or supplement.

"This is one area of energy research and development in which the Brazilians have an advantage not only over us, but over everybody else," said a White House aide during President Carter's March visit here, when the United States and Brazil agreed on an energy information exchange program. "There are really a lot of things for us to learn from them."

The process by which vegetable material—or "biomass," as it is technically known—is transformed into alcohol fuel is simple. Brazilians have been converting sugar cane into alcohol by fermentation since colonial days, and ethyl alcohol was mixed with gas as early as the 1930s, when record low prices of sugar brought on by the worldwide depression forced Brazil to divert part of its bumper crop into fuel.

But systematic investigation of the large-scale use of alcohol as a gasoline substitute or additive began only with the advent of the international energy crunch in 1973. In the last five years, Brazil's National Alcohol Commission has approved some 170 projects and earmarked $800 million for biomass conversion and engine modification efforts.

"The emphasis has been not so much on research and development as on the expansion and implementation of programs that already existed on paper," says an American official in Brasilia. "They've mostly done things like modernize old sugar mills and improve their distribution system."

But at the aerospace and technology Center, a government research facility near here, scientists have undertaken 34 different programs to design engines that will run on pure alcohol or to convert gasoline engines to alcohol at minimum cost. Elsewhere, agronomists are engaged in genetic research in an attempt to increase yields of crops that will be distilled into alcohol.

Thus far, sugar cane alcohol has received more attention from the Brazilians, but Petrobras, the giant state oil monopoly, has recently begun operating a manioc distillery near the industrial city of Belo Horizonte that turns out 16,000 gallons of manioc alcohol daily.

Experimental programs conducted in major cities have shown that alcohol, whether derived from sugar cane or manioc, has several major advantages over ordinary gasoline. Although it leaves a slight odor, it burns cooler, cleaner and more efficiently, giving virtually the same mileage as gasoline, but without leaving lead or sulphur pollutants. Hydrocarbon residues "can be lowered to negligible levels," according to a recent study.

While alcohol engines are harder to start than ones that run on gasoline, this is less of a problem in Brazil's tropical climate than it would be in the temperate United States. The Brazilians attach a gadget to the motor that starts the car each day on a small quantity of pure gasoline. After that, they say, the residual heat is sufficient for the pure alcohol to catch without difficulty.

The converted cars use normal gas tanks and the experts say they have encountered no problems with evaporation. For all the interest in alcohol as fuel, the government—which is pouring billions of dollars into nuclear and hydroelectric energy programs—has proven more reluctant to take what one foreign energy expert calls "the big leap" to pure alcohol.

"There are no technological reasons whatsoever to prevent alcohol from eventually taking the place of gasoline," said Professor Jose Goldemberg of the University of Sao Paulo, president of the Brazilian Society of Physics and one of the strongest advocates of the biomass program. "What's holding them back are political and economic considerations."

"Petrobras opposes the alcohol program because the pump price it charges for gasoline is a purely artificial one that is four times the actual cost," Goldemberg said. "Since alcohol currently costs twice as much to make as gasoline, that means both Petrobras' profits and government tax revenues would drop if a crash program to replace gasoline with alcohol were put into effect."

Proponents of the alcohol program say these economic shortcomings are offset by other gains. In widely publicized speeches recently, two influential government ministers argued that a full-scale pure alcohol effort would generate jobs in Brazil and that all expenses incurred would be in cruzeiros, not dollars—thus avoiding adverse effects on Brazil's uncertain balance-of-payments situation.

In the long run, say both foreign and Brazilian energy experts, there is no doubt that alcohol will emerge as an economically attractive source of energy, both for Brazil and for other nations.

"The trend seems to be that while oil prices will rise, the price of alcohol will continue to drop, perhaps by as much as 20 percent as methods of production become more efficient," says a U.S. official.

Some Brazilian officials are already looking ahead a decade and predicting that their nation will be able to export alcohol and alcohol technology to Africa, Latin America and perhaps even the industrialized world. Patents have already been taken out by Brazil on engine modifications and distillery improvements that have been developed here.

"Biomass energy just may be the wave of the future," said the U.S. official. "If it is, the Brazilians are going to have the jump on the rest of us."

Biomass fuels were once associated with underdevelopment and Brazilians have had to overcome their pride to enter the field. They note, however, that others are following—West German and Scandanavian scientists have bought the results of Brazilian studies.●

## TRIBUTE TO SPONSOR AND BOARD OF TRUSTEES OF ST. ELIZABETH MEDICAL CENTER, COVINGTON, KY.

### HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. SNYDER. Mr. Speaker, I would like to take a moment of my colleagues' time to pay a well deserved tribute to a small group of people whose commitment and foresight make them worthy of recognition. I refer to the sponsor and board of trustees of the St. Elizabeth Medical Center in Covington, Ky.

Since 1860, St. Elizabeth Medical Center has provided the northern Kentucky area with exemplary, personalized health care. And it does not plan to stop doing so in the foreseeable future.

Some 10 years ago, the medical center's sponsor, the Most Reverend Richard H. Ackerman, S.T.D., Bishop of Covington, and the board of trustees recognized the limitations imposed by the center's downtown location in view of the southward expansion and general suburban growth in the area. So they went to the drawing board and drew up a dream—an outlying medical village with a new unit of the St. Elizabeth Medical Center as its core. Today that dream has been pushed from the drawing board to reality and, in mid-October, will open its doors to the public, providing accessible medical care for northern Kentucky for many years to come.

The value of any facility lies in its ability to change with the needs of the community it serves and its ability to plan for and fulfill future needs as well. The foresight and dedication of Bishop Ackerman and the trustees has insured that St. Elizabeth Medical Center will be able to provide northern Kentucky—a changing community—the same high quality of medical care it has come to expect from St. Elizabeth Medical Center.

Following is a list of the medical center's trustees:

The Most Reverend Richard H. Ackerman, Sponsor, John L. Cassidy, M.D., Charles H. Deters, Merwin Grayson, Jr., Julie Greene, Sr. Karen J. Hartman S.F.P., Henry M. Mann, William J. Mersch, M.D., William H. Middendorf, Ph.D., Donald H. Niehaus, Charles R. Perry, M.D., Rev. Msgr. John J. Rolf, James Simpson, Jr., Sr. Yvonne Thranow, D.C., George E. Weidner, A. Martin Zalla, and Paul C. Bellendorf, Administrator.

The foresight of these people and their commitment to the health needs of their community pushed a dream to reality, and the opening of the St. Elizabeth Medical Center-South Unit is a monument to their careful planning and their dedication to that dream.●

## HAZARDOUS WASTE CONTROLS

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. FINDLEY. Mr. Speaker, last Monday there appeared an excellent article in the Washington Post discussing the problems of burying hazardous chemical wastes, which I commend to all my colleagues. Within my district, in the town of Wilsonville, Ill., lies a hazardous waste treatment facility which was recently ordered shut down by an Illinois circuit court judge, because of the dangerous health hazards it posed to the local community.

Legislation I have introduced, H.R. 8657, is designed to deal with the dangers of treating and burying hazardous chemical wastes by requiring that waste treatment facilities and dumps be constructed on lands away from populated areas and dedicated to public ownership. Those hazardous waste disposal sites already in operation would also be acquired by the Federal Government after they have ceased operations to insure forever the highest safety and maintenance standards.

The people of Niagara Falls, N.Y., are painfully aware of the potential for tragedy which can result from the improper burial of chemical wastes. A chemical waste dump which was covered over 35 years ago now has a school and subdivision on top of it. Birth defects are abnormally high and people in the neighborhood see their lives slipping away from them. I would encourage my colleagues to read the following article from the Washington Post which outlines the growing and dangerous problem of hazardous chemical waste dumps:

OOZING EARTH—PAYING FOR CLEANUP OF BURIED CHEMICALS POSES NEW NIGHTMARE FOR OFFICIALDOM

(By Bill Richards)

The first inkling that something had gone wrong in rural Hardeman County, Tenn., came last winter when the local kitchen sinks started turning brown.

Then came reports from puzzled residents of the southwestern Tennessee farming region that their well water had developed a peculiar insecticide-like odor. When a rash of unexplained cases of stomach cramps and dizzy spells hit the area, federal and state health investigators moved in.

Their discovery—some 350,000 leaky 55-gallon drums of legally buried chemical waste on a nearby ridgetop owned by the Chicago-based Velsicol Chemical Co.—is likely to add another chapter to what is rapidly becoming a recurring chemical-age nightmare.

Velsicol admits that between 1965 and 1972 it dumped chemical waste at the site from its Memphis pesticide plant. But a company spokesman insists there is no concrete proof that 17 chemical contaminants identified thus far in the local well water came from its dump. Moreover, Velsicol says its dumping was perfectly legal under state laws at the time.

That leaves federal and state officials with a virtual sea of toxic chemicals—including some known carcinogens—apparently flowing into the local water supply and no clear villain on whom to place the blame.

If the Hardeman County problem seems Herculean it is by no means unique. Across the nation, new stores of nearly forgotten, highly toxic chemical waste seem to be oozing into the headlines every week. Federal officials estimate there may be as many as 400 more suspicious hazardous waste sites around the country. And no one seems to know who will pay to clean them up.

Some recent examples:

Authorities in Michigan, nervously keeping tabs on toxic chemicals leaking from a company dump in Montague into Lake Michigan, recently checked and were horrified to discover it could cost $100 million to clean up similar hazardous waste sites around the state. "There's no way we're going to ask the taxpayers to ante up for that," said a state official.

In Massachusetts, health officials got an emergency $1.3 million from the state legislature to remove 17,000 barrels of toxic chemicals leaking from an abandoned lot in Lowell into the Merrimac River, the water source for several downstream communities. State officials are pledged to try to recover the cleanup money from financial backers of the bankrupt disposal firm and those who originally shipped the waste to the site. But a state official concedes glumly: "We're not holding our breath waiting to get paid."

In the widely publicized Love Canal situation in Niagara Falls, N.Y., officials have estimated that preliminary cleanup costs alone will run to $8 million. "And that," says an Environmental Protection Agency official "is just to make the area liveable. We're not even talking about relocation costs."

Nearly 200 families may eventually have to be permanently moved out of the area where thousands of drums of cancer-causing chemicals have leaked into backyards and basements.

Who will pay? "There's no provision for the federal government to come riding to the rescue," says Fred Lindsey, an EPA official in charge of the agency's implementation section.

"It's kind of confusing," admits another EPA official. "I guess the one who pays is whoever gets left holding the bag."

That could include, says EPA's senior hazardous waste official Steffen Plehn, any of an estimated 425,000 firms which generate toxic chemical waste, or the 25,000 or so firms that transport it, or another 25,000 firms that store, treat or dispose of it.

Beyond that broad spectrum, Plehn admits, the focus of the blame becomes less clear. "If a company is still legally tied to the stuff then I guess it's theirs," says Plehn. "If they've been able to unload it then I guess the blame goes with it."

In the end, Plehn said, the answer may lie with efforts by EPA to set up a national trust to pay to clean hazardous waste sites. The trust would come from a per-ton tax on waste as it is dumped and would be held for emergencies such as the Love Canal disaster.

The problem with such a solution, however, is that it will tax waste generators who may be complying with the law today for the environmental sins of others in the past. "It's not fair, and more important it probably isn't legal," complained a chemical industry official who asked not to be identified.

Thus far, only Michigan has sought to force chemical waste generators to pay for the cleanup of hazardous sites, even though they may not be directly involved in the problem.

Earlier this year Michigan Attorney General Frank Kelly went to court to recoup $1 million the state spent to clean out a site in Pontiac. The site was so dangerous, officials said, that a spell of hot weather could have caused some of the chemicals to explode and send a toxic chemical cloud floating over the city's wealthy suburbs.

The state's efforts to force the issue were sidetracked, however, when about 17 big waste generators, including such names as Ford and Dow-Corning, agreed to come up with an out-of-court settlement.

Right now Michigan is closely watching another site owned by the Hooker Chemical and Plastics Corp. in Montague. There, quantities of C-56—a chemical building block for several carcinogenic pesticides—is leaking into White Lake, an arm of Lake Michigan.

Hooker's disposal site, as well as others in the state, may be legal, said Stewart Freeman, an assistant state attorney general. "But even assuming it is legal we can still say: all right you contain it or you pay for it," he said.

Hooker also operated the Love Canal site in Niagara Falls before deeding the site to a local school district under threat, according to the company, of condemnation proceedings against it.

Under a preliminary agreement, Hooker agreed to pay up to $280,000 to help clean up the Love Canal site. A company spokesman said Hooker also is spending several hundred thousand dollars on its Montague, Mich., disposal site where 11,000 tons of toxic chemicals are buried.

But the spokesman said Hooker will not admit legal liability in either case. "There's no way you could get us to say we're responsible for what happened at Love Canal," he said. Hooker or any company would "fight like hell" in court if the cleanup bills were turned over to them, he said.

That test could come in Tennessee. So far no one has formally blamed Velsicol for the polluted water in Hardeman County. But state officials note there does not appear to be another source for the unusual array of chemicals—including suspected carcinogens such as chlorobenzine, tetrachloroethelene and toluene—that have turned up in the area's water. In addition, a still-unreleased federal study has also concluded that chemicals from Velsicol's disposal site have leaked into nearby wells.

Velsicol officials are preparing to do their own study of the situation. Some have even hinted darkly that perhaps local residents put the chemicals in the wells themselves in an effort to force blame on the company.

"This is a puzzle and all the parts aren't together yet," says one Velsicol official. "We do know that once that ridge was supposed to be an ideal dumping location. Now there's some question whether it was so idea after all." ●

## PERSONAL EXPLANATION

### HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

Mr. YOUNG of Missouri. Mr. Speaker, I was unavoidably absent from the floor due to a prior commitment in the district. Had I been present, I would have voted as follows:

Rollcall No. 616, an amendment to H.R. 12432 by Mr. BUTLER, "no";

Rollcall No. 617, an amendment to H.R. 12432 by Mr. BUTLER, "yes";
Rollcall No. 657, an amendment to H.R. 13635 by Mrs. HECKLER, "no";
Rollcall No. 659, an amendment to H.R. 13635 by Mr. BROWN, "no";
Rollcall No. 660, an amendment to H.R. 13635 by Mr. CONTE, "yes"; and
Rollcall No. 661, an amendment to H.R. 13635 by Mr. HARKIN, "no."●

## HOW TO GET A CHECK OUT OF UNCLE SAM

### HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mrs. HOLT. Mr. Speaker, among the most traditional and popular publications on the American scene is the mail-order catalog. In recent times, the Government has composed a similar product called the "Catalogue of Federal Domestic Assistance," from which State and local governments and other service organizations can prepare their shopping lists by browsing through more than 1,000 programs.

It seems that we somehow forgot to publish a catalog of programs available to individual citizens, but do not be concerned about that oversight. A private company is operating a mass mailing to advertise its catalog of "137 perfectly legal ways to get a check out of Uncle Sam." It charges $8.98 for the book.

The flyer mailed to one of my constituents identifies the company as Instant Learning, Inc., 770 Lexington Ave., New York, N.Y. It apparently also has a facility known as a "Fulfillment Center," at 120 Smith St., Farmingdale, N.Y.

Advertising the wondrous book this company is peddling, the flyer announces that the results are "Guaranteed. This startling report must show you how to qualify for a minimum of $500 in Government checks this year alone * * * or you don't pay a penny."

The advertisement quotes the editor of the report as saying:

I'm beginning to wonder if there's a single adult American who isn't entitled to at least one of these government checks Or two! Or more!

Mr. Speaker, I would not blame any private company for attempting to make a profit from the spend-crazy follies of the Congress. Over many years, the Congress has created such a galaxy of programs, and stripped the people of so much of their substance to fund them, that many people are tempted to abandon the virtue of self-sufficiency to pursue the handouts available from Government.

The Congress has created the society of the big hustle. People who are perfectly capable of self-sufficiency are hustling to get an easy living from their fellow citizens through the Federal Treasury. The Federal Government has confiscated so much of the national treasure from the citizenry that many people reach the obvious conclusion: the Government is the source of money and you can get it just for the asking if you find the right program and follow the necessary procedures.

So, it is no wonder that a private company is selling information on how to pursue the goodies. This is just a symptom of the moral rot that is eating away the vitals of America.

Here we have a country committed since its earliest days to the ideal of individual liberty, but over many years Congress has behaved in a manner calculated to make every citizen a dependent of the Central Government, to some degree.

The Congress has taxed honest work and production to the extent that more and more people are doing less work and investing. The people become more and more dependent on Government, moving more and more toward the time when we will have a national mentality of serfs.

Mr. Speaker, the strength and freedom of American are being eroded.●

## A NATIONAL TRAGEDY

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. DORNAN. Mr. Speaker, a recent edition of the National Enquirer carried a story about the late "King" of rock and roll, Mr. Elvis Presley. At an age when most performers would be looking toward many more fruitful years, Mr. Presley's life was cut short, so it seems, by habituation to legal, prescriptive drugs, made available by licensed physicians.

It is my judgment that Dr. E. Eric Muirhead, who has made the charge that Elvis died from drug usage and not heart disease, should be invited to testify before the Select Committee on Narcotics Abuse and Control. If Dr. Muirhead's contention about the true cause of Elvis' death is true, then we in Congress, charged with protecting the health and welfare of Americans, should make a national self-assessment about the growing prescriptive drug dependency that is rapidly becoming a life style among the famous and the ordinary.

Elvis Presley had fans in virtually every nation on the planet whose citizens had record players. If Elvis did die from a legal form of drug abuse, what does that say about us as a nation? Is it really true that the kids need marihuana, the parents need valium to merely cope with the beauty and challenge of life?

Wake up, America. Your vitals are being consumed by the worm of self-indulgence.

The article follows:

EXCLUSIVE: SECRET AUTOPSY REPORT . . . IT CONTRADICTS MEDICAL EXAMINER'S OFFICIAL FINDINGS

Memphis officials have whitewashed the true facts behind the tragic death of Elvis Presley—covering up official autopsy findings that Presley actually died from a drug overdose, an Enquirer investigation has uncovered.

"There are some who say if this were a Joe Doe instead of Elvis Presley, drugs would be indicated as the cause of death . . . without question," declared Maurice Elliott, the vice president and official spokesman for Baptist Memorial Hospital in Memphis, where Presley's autopsy was performed.

The Shelby County medical examiner's official report states that Presley died of heart disease.

But Baptist Memorial Hospital refused to agree with the medical examiner. In an exclusive bombshell interview with The Enquirer, hospital spokesman Elliott disclosed for the first time that Presley's official autopsy report contains the opinion by top medical experts that Presley actually died of a drug overdose.

And medical experts from across the nation—asked by Baptist Memorial Hospital to review its autopsy findings on Presley—back up in the autopsy report itself that drugs were to blame for Elvis Presley's death.

After Presley died on Aug. 16, 1977, a team of pathologists at Baptist Memorial Hospital performed an autopsy on the star's body. Their findings went into the autopsy report, kept secret under orders from Elvis' father, Vernon Presley.

No report of any kind was ever publicly issued by the hospital.

But two months later, Shelby County Medical Examiner Dr. Jerry Francisco, who had reviewed the autopsy report, called a press conference and officially announced that—although eight different prescription drugs had been found in Presley's body—"drugs played no part in his death."

Dr. Francisco listed the cause of death as "hypertensive heart disease with coronary artery disease as a contributing factor."

The drugs found in Presley's body were barbiturates, a sleeping medication methaquaalone, a painkiller codeine and ethinamate, a sedative.

The chief pathologist at Baptist Memorial Hospital, Dr. E. Eric Muirhead, is still angry at Dr. Francisco's announcement that the cause of Presley's death was heart disease.

"His interpretation is not my interpretation!" said Dr. Muirhead.

"What I want to know is what authority did he have to call a press conference and interpret my autopsy?" he fumed.

Tennessee State Senator Jim White, a Memphis attorney, charges: "The public has never been given all the facts surrounding the tragic death of Elvis Presley.

"Under Tennessee law an autopsy report is public record," he said. But since the autopsy was ordered by Vernon Presley, local officials "contend the autopsy is a private matter. Thus we have what amounts to a legal sham calculated to circumvent Tennessee law."

Dr. Francisco, the county medical examiner, defended his official conclusions as to the death of Elvis Presley, though he admitted: "I wouldn't like to see the autopsy report made public.

"I feel comfortable with my findings," he added: "They don't need to be vindicated. We covered up nothing. My final report is the fact.

"People can like it or they can lump it."

But Dr. Francisco did admit that "half of the comments on the autopsy report disagree with the conclusions that I drew."

The mystery behind Elvis Presley's death "will never end," said Dr. Francisco. "I think it's possible that Vernon Presley doesn't want the report made public as a way to perpetuate the mystery and the Presley myth."●

## U.S. CITRUS INDUSTRY POSITION ON UNITED STATES-JAPANESE TRADE

### HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. IRELAND. Mr. Speaker, as you well know, one of the high visibility items now at issue between Japan and the United States in the ongoing trade negotiations is the question of increased access for United States citrus to Japan.

Last month a group of Japanese growers placed ads in the Washington Post and the Los Angeles Times urging the American public to support their position of restricted access to their market. Their basic argument is that the U.S. position, which is being vigorously and effectively pushed by Ambassador Strauss, is somehow unfair. Our position is, quite simply, that if they wish to continue to do business with us, the Japanese must grant us the same access to their market as we grant them to ours.

Mr. Speaker, all of us here have an enormous stake in the future of United States-Japanese trade. Therefore, I want to take this opportunity to share with our colleagues, the citrus industry's response to the Japanese growers ad campaign.

I am confident that you will find our position to be completely open and fair, and consistent with the principles we must adhere to if we are to have free trade worldwide.

Thank you, Mr. Speaker.

The statement follows:

JOINT U.S. CITRUS INDUSTRY STATEMENT

The following statement is endorsed by the California-Arizona citrus industry, the Florida citrus industry and the Texas citrus industry and is in response to an advertisement by the Mandarin Orange Growers of Ehime Prefecture, Japan, which appeared in the Washington Post and Los Angeles Times on August 18, 1978.

The advertisement is an effort on the part of the Japanese citrus growers to convince the American citrus industry and the United States Government to cease their demands that Japan eliminate quotas on importation of fresh oranges, orange juice and grapefruit juice, which are illegal under the General Agreement on Tariffs and Trade (GATT).

The Japanese mandarin growers claim that agriculture should be separated from industrial goods in discussing trade imbalances between the United States and Japan. This is impossible. The overall trade picture should be examined, and trade in citrus is only one part of the full trade problem.

The Japanese Minister of Trade and Industry recently forecast a trade surplus of up to $24 billion for this fiscal year, and trade with the United States is expected to create a favorable balance of $10 billion. Increased agricultural exports to Japan can help to offset this.

However, the heart of the matter is the fact that the present quotas on citrus are illegal under GATT. It would be just as illegal if the United States were to try to limit the import of Japanese automobiles. Long ago, Japan became a developed country and assumed status as a major economic force in the world. It must live up to its GATT treaty provisions, as do the other signers of the treaty.

It was interesting to note that in the same edition of the Los Angeles Times in which the advertisement appeared, there was an advertisement for Toyotas, and a major article appeared in the financial section headlined, "Nissan Will Push Top Line Cars in U.S." There were also numerous ads for Japanese stereo sets and cameras.

The Japanese citrus industry cites overproduction as the reason for wanting to maintain their illegal quotas. The overproduction of their industry is in reality the results of their own protectionist attitude in defense of the quota system. Much of the citrus acreage now under cultivation in Japan was planted after Japan had agreed in the early 1970's to move towards liberalization of imported citrus.

The advertisement contends that there is a surplus of frozen concentrated orange juice in Japan, and that attempts to create a market for it have been unsuccessful. The U.S. citrus industry says that if the quotas are removed, American promotion could easily develop the market for a blended juice comprising both U.S. and Japanese juice, thus assisting both countries' growers.

The Japanese claim that 340,000 Japanese households produce citrus, primarily mandarins, with only 11 percent holding more than one hectare of orchard acreage. The reason the word "household" was used is because most of these so-called growers are what are called backyard producers. They are hobbyists, or part-time growers, who do not make their living from the land, but instead work in other jobs, many of which are in factories producing products that will be sold in the United States. Because of these backyard producers, returns to the commercial producers in Japan have been lower than would be expected without them.

The Japanese new import quotas for oranges are less than 2% of the total Japanese production and only represent 2½ oranges per person per year. Yet their advertisement cites the large numbers of oranges that have entered Japan following increase of the quotas from 15,000 metric tons per year to 45,000 metric tons per year.

It is ironical that when U.S. television manufacturers recently petitioned the International Trade Commission to limit import of Japanese color television receivers to 62 percent of U.S. production, Japan prevailed with its argument that this was unreasonably restrictive. Yet American citrus imports to Japan, under the expanded quotas, remain at only 2 percent of Japanese production.

Does this mean that the Japanese would agree to limiting U.S. import of automobiles to just 2 percent of U.S. television production? Of course not. Nor would Americans agree to such a proposal.

Despite the increases in imported oranges, the price of Japanese fruit remains at the same level. And the price of American oranges remains quite high, too—as much as $1.00 per orange when and if the consumer can get them. The real loser in this is the Japanese consumer, who must continue to pay a premium price for something that should be readily available at a much lower price.

The Japanese growers have said that so-called "off-season" citrus production in Japan has allowed development of a year-round distribution system, and that there should be no difference between the Mikan season and the "off" season. The U.S. citrus industry agrees. Both seasons should be treated the same—with complete liberalization.

The U.S. citrus industry is sorry if the Japanese mandarin producers are upset and their patience is being tried because of the U.S. demands for market access for citrus, as the advertisement states. We are sure the same can be said of U.S. citizens in the automobile and electronic industries who are watching Japanese automobiles, television sets and cameras move into the United States marketplace.

In the advertisement, the Japanese growers make a statement, "We are in favor of importing products from the United States if they are in short supply in Japan". Let's carry this logic to the other side of the Pacific Ocean. Our own domestic manufacturers of cars and television sets can adequately supply the U.S. market, so why should we import these products from Japan?

Fortunately, the U.S. citrus industry doesn't agree with this line of reasoning. It believes in fair and just trade with equal access to all markets for all commodities with reasonable tariff and protective measures, which would allow for orderly and equitable entry of products from one country to another.

The U.S. citrus industry does agree with the Japanese growers that America and Japan have been reliable and faithful trading partners. It wants to continue to buy Datsun forklifts for their packing houses, they want to continue to drive Toyotas, watch Panasonic television sets, listen to Sony radios and tell time by their Seiko watches.

All we ask in return is fair and just access for our citrus in the Japanese market place as required by the General Agreement on Tariffs and Trade.●

## THE VA'S DOUBLE-BARRELED EDUCATION PROGRAM

### HON. RAY ROBERTS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. ROBERTS. Mr. Speaker, I have often commented on the superb professional staff of the Veteran's Administration. At hand is yet another example of how VA officials have gone far beyond duty to meet a community need. Under the leadership of John G. Miller, director of the Los Angeles VA regional office, and Jack Dweck, that office's loan guaranty officer, the VA has developed a program that costs the Government little, yet helps young people help themselves. It is described in the August issue of American Education:

THE VA'S DOUBLE-BARRELED EDUCATION PROGRAM

(By Clif Stallings)

Educators and government officials who are scratching their heads over what to do with their old surplus school buildings might take heart from one government agency that, richly experienced in being swamped with excess real estate, has come up with a canny way to make its shoddy buildings bright and serviceable—and to serve as teaching aids in the transition. Of course, the problems are not parallel, the Veterans Administration—that experienced government agency—having little or no traffic in school buildings. But the lesson is that perseverance will prevail over the knottiest surplus building problem, whether the buildings are schools or houses.

Some may be surprised to know that the Veterans Administration is among the largest real estate operators in the country. The

VA didn't intend it that way, but when an agency runs a guaranty loan program that over three decades has helped close to ten million veterans buy homes valued at more than $140 billion, some identity as a real estate operator is almost inevitable. As inevitable as some defaults in a volume of ten million loans. Each time the VA makes good on its guaranty of a loan in default, it acquires the property.

Since 1944, the VA has acquired some 405,000 properties, which comes to about four percent of the almost ten million homes for which loans were guaranteed for veterans. During that same interval VA has sold more than 390,000 of these properties and currently has title to about 11,000 others. Allowing for those undergoing repairs, adversely occupied, or burdened in other respects, there are about 7,300 vacant properties for sale. The turnover in VA sales averages about 1,300 monthly.

In order to recover its guaranty or as much of it as possible, the VA seeks to place acquired properties in a condition that compares favorably with competitive neighborhood properties. With rare exception the houses require only redecoration or modest repairs to place them in salable condition. Nevertheless, there are some that were abandoned and vandalized before VA acquired title, and appropriate repairs needed to be made.

California, housing more than ten percent of the nation's 30 million veterans, leads in VA home loan guaranty activities. The VA regional office in Los Angeles—one of three in California—acquired about 50,000 properties over the past 30 years, and sold virtually all of these shortly after they came into VA ownership. Today, that office has fewer than 600 houses on hand, and the sales rate runs almost 100 properties per month.

In a program started by the Los Angeles VA Regional Office five years ago, students at ten area high schools have contributed toward the rehabilitation of a number of abandoned houses while gaining valuable vocational training. Working as volunteers, the young men and women refurbish the houses, making minor repairs without doing any job that would require a license. The VA provides all tools and equipment and determines by appraisal of the property the amount that should be spent for materials. The program, currently being carried out in San Diego and Compton, has drawn praise not only from students and educators, but from area residents as well.

"The place next door was a dilapidated shack before the VA let those kids in there," recalls Compton resident Del Burnett, whose home is adjacent to a student-refurbished house now up for sale. "It had been broken into and vandalized. It looked terrible and made the whole neighborhood look bad. When the kids came to fix it, I was skeptical. Kids that age don't have too good a reputation these days. But those kids were something else. They turned that dump into a nice place. I never would have believed kids could do work like that."

According to Onward Montgomery, director of Vocational Education and Federal and State Projects for the Compton School District, students in the housing rehabilitation program have had a marked effect on every neighborhood in which they have worked. "The recurring sight of teenagers doing something beneficial for the neighborhoods has done a lot to restore people's confidence in our community youngsters," Montgomery says. "And in most cases, the program also seems to have left area residents with a fresh sense of community pride. Invariably, a completed project is followed by a general sprucing-up of neighboring properties."

Montgomery also notes that student-rehabilitated houses are seldom targets for vandals. "I think this is because the kids themselves, some of whom have probably vandalized other properties, use what influence they have among peer groups to protect what they've helped to restore."

Montgomery says that though school officials and Compton residents have praised the program as practical, productive education, the students themselves have voiced the most enthusiastic approval. Montgomery adds, "This program, besides providing a welcome break from classroom routine, offers youngsters a chance to expend energy in a useful way and learn directly applicable skills at the same time."

Compton High School student John Sims mentions that he has already learned things that he's been able to repeat in his own home. "I've learned enough so far to help me get a job," he says. "I can set tile, do roof repairs, handle regular carpenter work, and paint. I couldn't learn all that in a classroom."

Ernestine Pettigrew, also of Compton High, one of six girls from the district who has been involved in the program, feels that it provides needed opportunities for young women to gain experience that could help them maintain their homes or find employment in the construction industry. Says Pettigrew, "I think it's a good thing for women to be able to take advantage of the same opportunities that men have. This is a new time for women, and we need to prepare for it. I've really enjoyed this program and have learned a lot."

Montgomery also points out that the housing rehabilitation program in his district has been particularly helpful to youths with extensive juvenile records. "Some of the kids have gang-related problems, some have been involved in thefts or burglaries, and others have engaged in vandalism or just plain mischief," Montgomery says. "Probably the main reason they got into trouble is that they didn't have much of anything else to do. This program has given them something to do, along with a sense of pride and satisfaction, and has been the therapy these kids have needed to stay out of trouble."

A tribute to the VA housing rehabilitation program is the story of 20-year-old Lennon Hunter, who graduated from Compton High School two years ago. "I didn't have anything going for me before I got into that program," Hunter recalls. "I was bored with school, uncertain about the future, and had no skill or experience that I could apply toward a job.

"The rehab program opened up a new world for me. I found out I could do something worthwhile, something that I enjoyed. Even before I graduated from school I started working for contractors on weekends and earning a little money. One thing led to another, and now I have my own contracting business." To help others along his successful path, Hunter employs former housing rehabilitation participants and offers part-time employment to students in the program.

The housing rehabilitation program was initiated in Southern California in March of 1973 through an agreement between the Los Angeles VA Regional Office and the William S. Hart Union High School District in northern Los Angeles County. Since then, more than 130 students from Hart High School have participated in the refurbishment of 12 VA repossessed homes. In 1975 the Compton and San Diego Unified School Districts joined the program, which has now accounted for 29 completed projects.

Jack Dweck, VA Loan Guaranty Officer in Los Angeles, says the success of the rehabilitation program is primarily dependent upon two "musts": Distressed VA repossessed houses must be available, and school districts must make necessary administrative and funding arrangements for student participation.

"We've found that where we've encountered difficulties or delays in trying to establish a rehab program within a school district, it usually has been due to problems associated with transportation for the students, the hiring of a qualified vocational instructor, or a lack of complete school district support," says Dweck.

On occasion there has been misunderstanding of VA motives with respect to the use of students in place of commercial contractors. "There are those who have thought that the VA saves a considerable amount of money by letting the youngsters do the work of contractors," says Dweck. "While it's true that we pay only the cost of materials and equipment for a student-rehabilitated house, it takes students months to finish a job that a contractor could finish in days. This is partly due to the fact that the kids work only a few hours a day and only on certain days."

Additionally, students work under the supervision of an instructor who must ensure that, according to the terms of the school district's contract, all repairs meet VA specifications. "If the kids don't do the job right, the instructor has them do it over," Dweck says. "Nor are students allowed to perform electrical or plumbing repairs. We pay licensed contractors to do that." Consequently, during the extra time the student-refurbished houses are on our books, VA expenses include the likes of taxes, insurance, and certain maintenance supervisor fees. These pretty well offset the difference between the costs of students' equipment and the amount of contractors' bills."

Dweck emphasizes that the VA makes the program available solely for its beneficial educational and social effects, which have been lauded on numerous occasions by community and school district officials. Last year the Compton City Council issued a special resolution expressing appreciation to the Los Angeles VA Regional Office for the beneficial effects of the housing rehabilitation program. The council credited the VA not only with upgrading neighborhoods but also with "instilling a sense of pride in accomplishment on the part of the students who performed the work, and a spirit of pride on the part of area residents for the positive accomplishments of teenagers."

Home repair programs similar to the one sponsored by the VA in Los Angeles have been conducted elsewhere in the nation by state and local authorities and by some citizen organizations. Says Dweck, "These activities also have given disadvantaged youth valuable skills and, in some instances, have helped mental patients on their way to recovery. The VA is proud to be included in such community activity."

Unquestionably, it would add to VA pride if the rehabilitation program were to offer the headscratchers who worry over what to do with old school buildings some insight into their own peculiar problems.●

## LET'S RANK GOVERNMENT EFFECTIVENESS

### HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. STEIGER. Mr. Speaker, a little over a month ago, Senator CHUCK PERCY

and I called a press conference to introduce a proposal of ours, inspired by a recent article by former Ambassador Larry Silberman, to better enable Congress to put a rein on increased Government spending.

Our proposal, the Government Accountability Act of 1978, would require a biennial ranking by the President and the Director of the Office of Management and Budget of all programs within a department. The ranking would be made available to the public. Thus, we provide the advantage of a comprehensive review of all programs, along with a safeguard through public input against an administration attempting to sabotage a program or agency for ideological or other reasons.

Support for our legislation has grown over the past month. On August 3, DICK GEPHARDT, DON FUQUA, and FRANK HORTON joined me in introducing the measure, H.R. 13723. Since then, we have gained 31 additional cosponsors, 11 of whom are going on the bill I am introducing today. Though we clearly cannot anticipate action on the legislation this late in the session, this provides an excellent base of support to build on in the 96th Congress.

Michael Novak, in an August 30 Washington Star column, referred to our proposal as "a shrewd technique to make big government accountable." He pointed out:

In the private sector competition helps. A ranking system will make the public sector competitive. . . . It restores a piece of invisible government to visibility. It will help presidents to get a handle on the monster they manage.

As we try to come to grips with the growing bureaucracy and increased Federal programs, we need better management tools than we now have. The Government Accountability Act provides those tools. For the benefit of those concerned about improving Government accountability, I am including for the RECORD the Novak column. Along with it, I am inserting a report I wrote on the proposal, articles from the August 6 Milwaukee Journal and August 9 Education Daily discussing it, and an editorial from the August 11 Savannah Morning News endorsing this new approach.

The article follows:

WASHINGTON REPORT

(By Congressman WILLIAM A. STEIGER)

A major focus of the media and Congress in recent months has been the growing taxpayers' revolt. The passage of Proposition 13 in California and the overwhelming support for the idea of cutting the tax on capital gains have shown clearly that the average taxpayer has a sophisticated understanding of our economic problems and sees the need for change.

With all the attention on efforts to reduce taxes has come a renewed awareness of another need—that of putting a rein on government spending. One approach has been to propose across-the-board 2 percent cutbacks on appropriations bills for various departments and agencies. This approach serves the immediate purpose of cutting spending, but it doesn't resolve the long-range problem.

After searching for a mechanism to help Congress better put the brakes on government spending, I read a recent article by former Ambassador Larry Silberman who suggests a proposal I'm confident can do the job. Senator Chuck Percy and I with bipartisan sponsors last week introduced the "Government Accountability Act," a measure that would require the Administration to give Congress a report card on the performance and cost-effectiveness of federal programs.

The bill would require biennial reports to Congress on the relative effectiveness of these programs. The President and the Director of the Office of Management and Budget would rank all programs within a department with all others in that department. Our bill sets forth a reasonably objective standard for ranking.

Though there have been other efforts aimed at ranking federal programs—the Carter Administration asked Members of Congress to do so in 1977—this proposal provides the advantage of a comprehensive review of all programs. More important, this ranking will be made available to the public.

The importance of public release of the rankings cannot be overstated. This will provide the opportunity for input by individuals and organizations affected by a particular program. By so doing, we provide a safeguard against an administration attempting to sabotage a program or agency for ideological or other reasons.

A high ranking by the Administration will not necessarily mean Congress will approve continuation of a program intact or with the authorization level requested by the Administration. Neither will a low ranking mean that a program is destined for elimination.

What the rankings will mean is that Congress can get a better handle on determining which federal programs could be improved or weeded out and which deserve more or less money than they're currently being given. They will also allow us to deal with the problems of overlapping or of contrasting goals.

The report would be filed at the beginning of each new Congress. It will thus enable responsible House and Senate committees to strengthen their oversight efforts. The key to effective, efficient management of programs oftentimes rests on the quality of oversight process in each Congress.

Too often, Congress creates new programs, then fails to follow up to see whether they're run as they should be and whether they're accomplishing the goals for which they're intended. For the first time, we would have a clearly spelled out, simple and inexpensive means of beginning the oversight process in each Congress.

Our proposal will not solve all the problems we have in bringing government spending under control. It will, though, offer an important tool to more effectively deal with the issue.

As we near the close of the 95th Congress, it is doubtful this proposal will be passed before the end of the session. My hope is that we can begin the education process and build bipartisan support for this legislation so that it will receive quick action in the 96th Congress.

LET'S RANK GOVERNMENT EFFECTIVENESS

(By Michael Novak)

I wish Democrats had thought of this idea first: a shrewd technique to make big government accountable. "Rank the bastards!" might be its battle cry.

My colleague at the American Enterprise Institute, former Ambassador Laurence H. Silberman, spelled out the idea in the new Republican intellectual journal Commonsense (310 First St. NE., Washington, D.C. 20003). Each year the president of the United States would be required to report to Congress on the rank of every program in each department of the executive branch according to its effectiveness. Then the Congress—and the people—would get an idea of the least effective programs in each department.

Every single program would be ranked. Each would be rated in comparison to other programs within its own department. Good programs would get due notice. So would poor ones. Silberman proposes three mandatory criteria for distinguishing them: (a) coherence of statutory objectives; (b) design of the program; (c) quality of management. The ranking system would give government programs something like the major-league baseball standing: a mandatory finish line with clear winners and losers each year.

The director of the Office of Management and Budget would be required to identify programs within the government that have contradictory aims (i.e., encouraging tobacco growers but discouraging smokers). The OMB director would be entitled to propose to Congress the elimination of ineffective programs. Good managers might welcome that opportunity.

Would this particular presidential report be buried from sight? Both journalists and the public would love it. Would budget-wise administrators place the most popular programs at the lowest ranking, to protect them? Lobbies for popular programs would almost certainly begin fighting for a high ranking months before the report was due.

Some ineffective but popular programs would always be at the bottom and some of the worst would be sure to be among them. Besides, the president would have to supply a rationale for each ranking. He would not want to appear to be naive.

Some administrators might try to hide poor programs within larger categories. But astute administrators would have an incentive to break programs down into smaller measurable units. In order to keep their empires as large as possible, some would sacrifice only smaller units at the bottom. Year by year, the worst of these could be pruned away.

Actually, Silberman notes, good managers of federal departments have been doing something like this for years. Faced with tighter budgets, they informally rank their programs when they allocate scarce resources. A new law would force them to make these rankings formal, analytically precise and public.

How can one compare apples and oranges? When you have a limited amount of money for fruit, you have to. A Government Accountability Act would force managers to compare real programs with read programs, on the basis of clear technical analysis. Over the years, evaluative techniques will become sharper. For the only way to diminish controversy will be to develop clear, objective, communicable criteria.

Recall that when students in college used to be ranked, each single one received a relative position. Nowadays, when students are not ranked, "grade inflation" occurs; the bottom half moves upward in an anonymous mass. In the old days, even if all passed, each knew where he stood. Ranking improves techniques of evaluation.

Most subcabinet officers today stay in one position less than two years. To make a name for themselves, some find an incentive to launch a "new" program. No one notices or rewards tough managerial skills (which usually provoke internal dissension).

Under a ranking system, new appointees would face the threat of seeing their program slip lower, compared to previous years, and some would hit bottom. Standards of excellence would change, as incentives changed.

In the private sector, competition helps. A ranking system will make the public sector competitive.

Leaders in the House and Senate have recently proposed a Government Accountability Act based on Ambassador Silberman's shrewd techniques. Democrats, who favor good government as well as big government,

should favor this act for the best of populist reasons.

It restores a piece of invisible government to visibility. It will help presidents to get a handle on the monster they manage.

---

[From the Savannah Morning News, Aug. 11, 1978]

ACCOUNTABILITY SOUGHT

We doubt that a private enterprise would remain in business long if it never assessed the profit and loss of its operations.

But this is standard procedure for the federal government. Congress will debate a measure, pass a law and regularly appropriate money for the resulting program. In more cases than not, however, Congress directs few inquiries as to how well the program is working and whether or not it is meeting the goals that its sponsors set forth.

Sen. Charles Percy (R-Ill.) and Rep. William Steiger (R-Wis.) are disturbed by this situation and they have proposed legislation that would help Congress measure the success of failure of its handiwork.

Under this bill—The Government Accountability Act of 1978—the president and the Office of Management and Budget director would submit bi-annual ratings of programs within executive branch departments. The rating designations would be "Excellent," "Adequate" and "Satisfactory."

"Like any business," Senator Percy affirms, "the federal government should have a system of ranking programs on performance. Without such a system there is virtually no accountability to the taxpayers who support federal programs.

The passage of California's Proposition 13 has heralded 1978 as the year of the taxpayer. The proposed accountability act is a fitting step to celebrate the occasion. Too many old and useless programs never die and fade away. Congress needs prompting to shut them down.

---

[From the Milwaukee Journal, Aug. 6, 1978]

BILL PROPOSES AGENCY RATINGS

WASHINGTON, D.C.—If Rep. William Steiger (R–Wis.) and Sen. Charles Percy (R–Ill.) get their way, each federal agency will get a "report card" every two years from the president.

The accounting would not include A's and F's, but it would rate each agency in terms such as "excellent," "adequate" or "unsatisfactory." And within each department, the performance of various agencies would be listed in the order of their relative efficiency.

Last week, Percy and Steiger introduced a bill entitled the Government Accountability Act of 1978 to accomplish their aims. They think it would fit in nicely with President Carter's crusade to reform the federal bureaucracy.

Under provisions of the bill, the biennial reports on each agency would be prepared by the president's Office of Management and Budget and would be submitted to Congress with the federal budget every two years.

The plan has the support of four former Republican budget directors—George Shultz, Roy Ash, Caspar Weinberger and James Lynn. And Percy and Steiger credit Laurence H. Silberman, a former Republican undersecretary of labor and deputy attorney general, for the research leading to the idea.

"Since there is no uniform method of evaluating programs," Silberman has written, "generating a national political consensus as to prime targets for elimination is extremely difficult."

The idea behind the bill, Percy said, is to provide not only a ranking, but also a presidential explanation of the ranking.

Obviously, such a requirement could present problems for any administration because a president would have to identify programs that were operating inefficiently under his jurisdiction.

PROBLEMS TO OVERCOME

Steiger and Percy conceded that this could present some problems, but they contended that such problems could be overcome.

Could a chief executive with some ax to grind try to get rid of a certain agency by giving it unfairly low ratings?

Steiger said that congressional committees would have to watch for this and protect agencies that deserve to continue their work.

But, he said: "Too often, government programs develop lives of their own long after they've lost their usefulness or effectiveness. Our bill will provide a mechanism for evaluating these programs and give Congress a better means of determining which ones could be improved or which ones could be weeded out."

Rating all of the departments and agencies might be a chore for any president.

But Percy and Steiger would spare the White House from one impossible task—judging its own performance.

---

[From the Education Daily, Aug. 9, 1978]

BILLS CALL FOR RANKING GOVERNMENT PROGRAMS EVERY 2 YEARS

Sen. Charles Percy, R-Ill., and Rep. William Steiger, R-Wis., last week introduced identical bills, S. 3366 and H.R. 13723, aimed at evaluating the effectiveness of federal programs.

Called the Government Accountability Act of 1978, the Percy-Steiger measure would require the president to rank all federal programs every two years in a report to Congress. The ranking would be based on three criteria: clarity of the statutory objective; design of the program; and the quality of its management.

Every program ranked would carry with it a presidential explanation of the ranking and a rating of excellent, adequate or satisfactory. "Federal programs" are defined as those "carried out pursuant to separate statutory authorization or for which federal expenditures are specifically allocated by the Federal Government." The bills exclude independent regulatory agencies and the executive office of the president from the ranking procedure.

IMB's Role.—The legislation also would require the director of the Office of Management and Budget to identify programs that appear to have aims contradictory to other federal programs and recommend steps to correct the situation. In addition, OMB is called on to recommend "the termination or modification of any program whose relative ineffectiveness no longer justifies continued Federal expenditures or only justifies a lower level of Federal expenditures."

In introducing the bill last week, Percy noted his objective is "to provide the public and Congress with a ranking of federal programs so that those glaringly ineffective and mismanaged will stand out." He also noted that the legislation doesn't specify what steps Congress must take when the report is received.

In a prepared statement, Steiger said, "I wish to emphasize the concept of strengthening ineffective programs. Ranking a program as least effective should not be tantamount to elimination. It should assure action that will result in more for our tax dollars." ●

## BOURNE DECISION SMACKS OF CRONYISM

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. FINDLEY. Mr. Speaker, the decision by Virginia and Federal officials not to prosecute Dr. Peter Bourne but instead to prosecute only the young woman who tried to fill the prescription for Dr. Bourne's secretary, is an unconscionable miscarriage of justice and smacks of cronyism at its worst in the White House. Virginia law enforcement officials state that Bourne will elude them because of technicalities and "an oversight" in the law, but Toby Long will not, even though she was not even the intended user of the drug Bourne illegally prescribed and, according to the Virginia prosecutor, is "the least culpable of the bunch." She now faces a possible 5 years in prison and a $15,000 fine, penalties which Dr. Bourne only narrowly escaped.

U.S. Attorney Carl S. Rauh, who has the prime responsibility for enforcement of Federal laws in the District of Columbia where the crime was committed, gives no intelligible reason for failing to bring Bourne to the bar of justice. He simply states that:

We originally deferred to Virginia authorities to decide whether to prosecute or not in this case. They've made their decision and as far as this office is concerned, that's the end of the matter.

Curiously enough, this bit of sleight of hand comes from the very office that had major responsibility for the prosecution of the Watergate burglars. It was Mr. Rauh's predecessor, Earl Silbert, a Republican, who prosecuted the burglars who broke into Democratic National Headquarters. I cannot see why Mr. Rauh, Silbert's successor and presumably a Democrat, should be under any less compulsion to prosecute White House crimes of the Carter administration. Perhaps he is afraid that if he upholds the law in this case his boss the Attorney General might see to it that he follows in David Marston's footsteps. Rauh cannot have missed the significance of the fact that Deputy Attorney General Benjamin Civiletti, and presumably the Attorney General, knew of Bourne's falsification of the prescription a full week before it was publicly revealed and took no action. He was also probably aware of President Carter's description of Bourne as "about the closest friend I have in the world."

The facts are clear. Dr. Bourne violated both Federal laws and those of the District of Columbia by writing a false prescription. There is no possible legal or ethical justification for Mr. Rauh turning his back on this illegal conduct and refusing to prosecute. If Mr. Rauh is kept on the job after this miscarriage of justice, and after David Marston was fired, then it is clear that this administration has a double standard of justice.

During his campaign, President Carter set forth his own code of ethics. He said:

As President, I will be responsible for the conduct of the Executive Branch of government. Errors will be immediately revealed and an explanation given to the public, along with corrective action to prevent any recurrence of such actions. There is only one person in this nation who can speak with a clear voice, who can set a standard of morals, decency and openness. That person is the President.

Dr. Bourne may have been "an able and dedicated public servant" as the

President described him after he had left the White House, but those words have an all too familiar ring, recalling former President Nixon's testament to Haldeman and Erlichman just a few short years ago. The question now is whether this administration will stand by the President's code of ethics, or stand by President Carter's long-time friend as Nixon stood loyally by his, ignoring the fact that the laws have been violated.

My hope is that Attorney General Griffin Bell will yet personally direct the Justice Department to investigate fully the illegal conduct of Dr. Bourne and take whatever steps are required—regardless of party or friendship. After Watergate, the American people deserve no less.

The medical societies of the District of Columbia, Georgia, California, and Colorado, all of which Dr. Bourne is a member, must also fulfill their own separate responsibilities. Officials of the American Medical Association, the American Psychiatric Association, and the D.C. Medical Association all agree that the use of a fictitious name in prescribing a controlled substance like Quaalude violates the law and therefore the standards of professional conduct. Dr. Bourne's actions must be reviewed by each medical society and appropriate disciplinary action taken. Just as most of the White House lawyers who participated in the Watergate scandal were disbarred, so too must Dr. Bourne pay the appropriate penalty for violating the ethics of his profession.

Following is an editorial from the Christian Science Monitor that is right on point:

CLEAR THE BOURNE CLOUD

"Bourne got off, why pick on me?" It is all too easy to imagine this kind of reaction from less privileged violators of drug laws than Dr. Peter Bourne, whose offense occurred while he was still President Carter's chief adviser on drugs and health. Indeed, if Dr. Bourne's falsification of a drug prescription can blandly be allowed to fall between the cracks of the legal system, a new encouragement to deception of all kinds is offered to impressionable young people—or their impressionable elders, for that matter.

We are not suggesting a personal hounding of Dr. Bourne. But his case has become symbolic of lapsed integrity at the top. And whatever the proper legal judgment on his admitted deceit may be, the nation needs a sense that the full legal process has been pursued—and that the administration *cares* about pursuing it.

As it is, the legal authorities in Washington get out from under by leaving a decision on prosecution up to authorities in Virginia, where the fabricated-in-Washington prescription was presented to a druggist. The Virginia authorities get out from under by disclaiming jurisdiction over Dr. Bourne's violation "outside the state." Attorney General Bell gets out from under on the grounds that the case did not reach his "level."

Of course, the country's main guardian of justice cannot be forced to swat gnats all the time. But it is no mere gnat when a high White House aide flouts the law, whatever lofty motives he claims. If Americans cannot expect concern for an uncompromising sense of ethics in the White House, where can they expect it?

Mr. Carter conveyed such a concern to many who voted for him. If he is to keep faith with them—not to mention with the office of the presidency—he cannot wash his hands of a case like this by leaving it to Virginia.

The swift elimination of Dr. Bourne from the administration was an improvement on the long clinging to Bert Vance. The President must not, of course, abuse his power by interfering with due legal process. But at the same time, he must help ensure the atmosphere in which that full process goes forward, without double standards, letting the chips fall where they may. The Bourne case cannot be left in legal limbo between Pennsylvania Avenue and Prince William County. The Attorney General, if no one else, ought to be able to find somebody willing to accept jurisdiction for carrying the case through.●

## CAPITAL GAINS AND EQUITY

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. DORNAN. Mr. Speaker, Thomas Jefferson, in his first inaugural address, remarked that "A wise and frugal government, which shall restrain men from injuring one another, which shall leave them otherwise free to regulate their own pursuits of industry and improvement, and shall not take from the mouth of labor the bread it has earned. This is the sum of good government . . ." It is indeed unfortunate, Mr. Speaker, that we have not taken to heart Mr. Jefferson's words. I refer in particular to the capital gains tax.

There is a great deal of talk these days, Mr. Speaker, about "equality of opportunity." But is there really equality of opportunity when in the past 10 years the capital gains tax has increased from 25 percent to 49 percent? Is there equality of opportunity when some 25 million stockholders are forced to pay homage to the Government on profits that rightfully belong to them? Is there equality of opportunity, Mr. Speaker, to tax those who work, plan, and save in order to support an increasing army of bureaucrats and those who rely on governmental largesse?

The principle involved here, I respectfully submit, Mr. Speaker, is not the principle of equality of opportunity but rather that of reverse discrimination, couched in the euphemistic terminology of "transfer payments." Those who through foresight and intelligence have accumulated savings and invested it in property and stocks are progressively discriminated against in direct proportion to the success of their investment.

It is no coincidence, Mr. Speaker, that the nations of Japan, Germany, France, Belgium, and the Netherlands, countries with the strongest currencies and lowest inflation rates in the free world, will not tolerate a capital gains tax. Is it not ironic that the most successful country on the face of the Earth does not recognize the debilitating effect of the capital gains tax on investment? Since 1969 there has been a 17-percent decline in individual stock market participation and a negligible percentage of equity issues for new high technology firms. If businesses do not find it profitable to invest in new ventures can a decline in productivity and a rise in unemployment be far behind? In addition, investors often feel "locked in" if their assets or investments have increased significantly in value. As a result, they may hesitate to sell because of the existence of a capital gains tax, with a resulting distortion of business and investment decisions.

The issue, Mr. Speaker, is pathetically simple and clear. If a people is to remain free and productive, they must be encouraged to exercise the virtues of an earlier era, the virtues of frugality, foresight, and planning (private sector planning). They must be permitted, within broad limits, to keep and use their resources as they think best, receiving the benefits and bearing the costs of their own decisions. Such a course of action, and only such a course, will lead to true equality of opportunity. The alternative, Mr. Speaker, is the road to serfdom.

I should consider it a great privilege at this time to incorporate the eloquent remarks of Mr. William F. Buckley, Jr., on this vital issue.

TURNING CAPITAL GAINS UPSIDE DOWN

(By William F. Buckley, Jr.)

A conservative journal of opinion leads off this week with a pithy item. "A small semantic milestone was passed in New Jersey on Aug. 16 when the Trentonian editorially blasted senatorial candidate Jeffrey Bell's tax-cut proposal. Allowing people to keep their own money, growled the Trentonian, is a 'giveaway.'"

The liberal counterpart of this journal, the New Republic, fired off during the same week with a long editorial entitled "Alms for the Rich," by managing editor Michael Kinsley.

Mr. Kinsley is talking about the tax bill which is certain to do something about capital gains taxes. There are several proposals on the floor. Most publicity has attached to the Steiger Amendment, which would return the tax code to the status quo ante, taxing only 50 per cent of a capital gain.

There are variations, trending up to President Carter's original position, now abandoned like the neutron bomb, in which it was proposed not to decrease the capital gains tax but to increase it. What is interesting is less the disputed figure than the underlying philosophical premises. These are nicely introduced by the semantic inversion quoted above. Under current practice, the decision to permit a man to keep the money he has earned is—a giveaway.

The New Republic lays its prejudices bare as though it were addressing its psychiatrist. "Indeed the present capital gains provisions are a layered history of the ebb and flow of favoritism and half-hearted reform." That sentence is as terminologically straightjacketed as anything Freud ever wrote. "Favoritism" sounds (pick one of the following): 1) Bad 2) Neutral 3) Good. The answer is of course: Bad. Why? If we could answer that question easily, we could easily peel off layer after layer of socialist superstition.

Let us put it in another way. The man who leaves his money to his son is 1) Good 2) Bad 3) Don't know. That question itself is heuristic, because the answerer finds himself worrying over the generic question, "Should a father be permitted to leave money to his son?" There are of course those who believe in the total taxation of inheritance. Unless that question is answered, how do you go on to answer the subsidiary question?

What is favoritism? Is favoritism as easy as pointing out that, numerically, only a few benefit? "Since less than 6 per cent of all

taxpayers have capital gains at all," the New Republic writes, "this means the Steiger Amendment would benefit about four taxpayers out of a thousand." That does sound like a chancy criterion does it not?

But try this one: That provision in the Bill of Rights which forbids Congress from passing any law affecting the freedom of the press directly benefits about one person out of one hundred thousand. Is it therefore favoritism?

And note, of course, the handy uses of the loaded word, "reform." Legislation to increase the taxes levied on Americans who make $100,000 or more per year are (mark one): 1) Desirable 2) Undesirable 3) Don't know. A reform is, by common semantic sanction, that which is more desirable than the antecedent situation. By the simple standards of the New Republic, a "reform" is that which increases the tax of the "rich."

This, of course, becomes troublesome at the margin, as Sen. George McGovern discovered in 1972 when he proposed that everybody who earned more than the average should turn over enough money to pay out $1,000 per year to those who earn less than the average. A lot of people thought that was a marvelous idea until the news broke that that meant that everybody earning more than $12,000 per year should be taxed an extra thousand dollars.

What is remarkable is that these are the same people who talk about a land of opportunity. A land of opportunity to do what? To qualify to pay more taxes to the government? There is a lot of common sense going around, of which Proposition 13 is an expression, but the real revolution will not take place until the good guys recapture the philosophical categories.

This means that a society of men committed to the proposition that people ought to be free not only to earn money but to keep the money they earn, is not more outrageous than a society committed to the proposition that people ought to be free to start newspapers and buy magazines even if they inherited the money to buy them with. Right? ●

## BALTIMORE COUNTY SUCCESS WITH CETA

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. LONG of Maryland. Mr. Speaker, the Baltimore County CETA (Comprehensive Employment and Training Act) program has achieved widespread recognition for its commendable goal of placing trained enrollees in unsubsidized jobs within the short period of 18 months. Over the last 2 years, two-thirds of the county's CETA enrollees have been placed in permanent unsubsidized jobs in the private sector.

Not only does this approach alleviate unemployment, but it also enables the county to use Federal funds to assist greater numbers of the unemployed.

I am pleased to share with my colleagues this paper "Managing Public Service Employment With an 18-Month Termination Policy: Turning Anxiety to Creative Energy" authored by Myra Shapiro, CETA Administrator; David Saunders, Senior Manpower Specialist; and Rona Blank, Director of Counseling; which describes the county's program.

MANAGING PSE WITH AN 18-MONTH TERMINATION POLICY: TURNING ANXIETY TO CREATIVE ENERGY

As of this writing, Congress is finishing hearings on the reenactment of CETA (Comprehensive Employment and Training Act). One key provision, section 121 (CLAI) may create major changes in the management of Public Service Employment (PSE) Programs by limiting PSE enrollment to 18 months, thus focusing the PSE effort on private sector unsubsidized placement.

On a national level, three-quarters of a million currently enrolled CETA-PSE enrollees will be moving from the CETA payrolls to private sector jobs or to unemployment insurance or public assistance. Enrollees will be terminating at the same rate at which they were hired. If a jurisdiction had a hiring goal of 100 slots per month, they will eventually have a termination schedule of nearly 100 enrollees per month.

From the start of CETA, Baltimore County, Maryland has planned PSE as a transitional program preparing employees for unsubsidized jobs within an 18-month enrollment period. To meet the goal of private sector placement, a multi-faced approach evolved based on strong linkages with first-line supervisors, creative use of career development workshops, a sound foundation of economic and learning theory and a humanistic approach to the anxieties of a transitional employee.

The positive placement rate of forced terminations has increased each month from 50 percent to 70 percent with an average of 66 percent (N-243) over the last two years. About two-thirds (65 percent) of the positive placements have been with local business and industry. The placement rate was improved by the cooperation of first-line supervisors, after they understood the goals of CETA.

WPA/CCC AND THE FIRST-LINE SUPERVISION

At first, regular county employees saw CETA as an extension of welfare. They were reluctant to get involved, slow in hiring, and generally treated the "CETA workers" with skepticism. On the other hand, CETA workers were eager, productive, and competing hard for the few merit system vacancies. The seeds of discord were sown long before the Economic Stimulus Act made CETA a high impact program of increasing importance to local jurisdictions.

The local CETA administration approached with trepidation an invitation to give over 120 merit system first-line supervisors part of a supervisory skills course. The workshops, limited to about 20 supervisors each, turned into a chess game, as attackers and defenders of CETA parried. CETA moved first with an analogy to WPA and CCC. "Anyone who worked in CCC or WPA please raise your hand. Tell us your experience." Every group had at least two WPA or CCC workers. Those who were positive about WPA/CCC tended to be supportive of CETA, those critical of WPA/CCC complained about CETA.

A pattern developed in each successive workshop. It became apparent that supervisors needed an outlet to vent frustrations. Novel special projects, unskilled workers, added responsibilities and the need to retrain a new CETA-PSE worker every 18 months irked the supervisors. However, after the antipathy for CETA-PSE workers was expressed, the workshop atmosphere changed.

A video-tape of job-finding workshops brought home the message that CETA was temporary. Supervisors were asked to imagine their own jobs ending in 18 months. The workshops built a new line of communication between supervisors and the CETA-PSE counseling unit. As a result, first-line supervisors became an arm of the counseling unit. Supervisors saw that under CETA local government had a responsibility to train workers for the private sector. Supervisors started taking initiative, they became advocates for CETA-PSE workers, and motivated dozens into finding private sector jobs.

The courting of first-line supervisors has really just begun. The effort has resulted in placements; on the drawing board is a follow up for 400 first-line supervisors on how to be better on-the-job trainers.

ECONOMIC THEORY AND PRIVATE SECTOR PRODUCTIVITY

Private business, department heads, middle-managers and locally elected officials also needed indepth briefings on CETA-PSE. A more esoteric approach was chosen, built on American history, economic theory and a hypothesis for increasing private sector productivity.

First, most briefings started with a retrospective look at the 1930's at which time the government intervened to combat the great Depression. A brief description of the War Manpower Commission that operated in the 1940's was followed by a quick review of the economic and technological changes that led to the 1958–1961 recession. This discussion was highlighted by recalling memories of the Baltimore County plant closing of the Martin-Marietta Corporation that resulted in 30,000 layoffs. The urban riots and Johnson's Great Society programs set the stage for an economic analysis of CETA.

Second, every college economic textbook contains a description of the multiplier effect, which readily explains the rationale for CETA as economic stimulus.

Third, the group is told about the following hypothesis that Baltimore County CETA wants to test: Workers are more productive if they go through a systematic process of vocational choice. As shall be described in the next section, each CETA-PSE worker is given an opportunity to examine his/her own skills, interests and aptitudes. When they return to the labor market, they do so with a specific vocational target.

Our hypothesis is that if workers make an intelligent vocational choice, then they will be more productive on the job. In the workshop setting, an intelligent vocational choice comes from self-assessment of skills, interest and aptitudes. It is the hope of the Baltimore County CETA office that someday it can demonstrate that CETA-PSE workers who attend career development workshops are more productive than the general labor force.

OCCUPATIONAL THEORY AND CREATIVE CAREER DEVELOPMENT

The experience of conducting briefings on CETA demonstrated that a strategy was needed to convince people that indeed it was possible to find private sector jobs in a tight labor market.

Fortuitously, the Baltimore County CETA office had the services of Ray Ziegler, former labor commissioner for the State of Oregon and professor at Dundalk Community College. Mr. Ziegler in the March, 1963 issue of Readers Digest theorized that, at any given moment, 4% of the total jobs are vacant and that anyone with the right job-finding skills can get one of those vacant slots.

The community college, at no cost to CETA, conducted dozens of Ziegler's "Creative Career Development Workshops." Hundreds of CETA workers took the workshops, examined their skills, interests, likes and dislikes, and wrote detailed resumes. To follow Ziegler's method of resume writing, CETA-PSE workers would paraphrase passages from the Dictionary of Occupational Titles that described in great technical detail aspects of their work history. This resulted in high quality resumes prepared in a relatively short period of time. DOT books became a highly valued resource and the scarce copies were closely guarded!

PAID RELEASE TIME AND COMMON COURTESY

The enrollee workshops had tapped an energy source in CETA-PSE workers who started to clamor to workshops and private sector job interviews Ziegler's workshop technique relied entirely on the CETA workers doing their own job development. A policy of paid time off for verified job search was initiated at an early stage. Complaints came from some departments that CETA-PSE workers were too frequently attending workshops, or going to job interviews. CETA administrators wanted to maximize job search activities, while not upsetting the daily scheduling of tasks. Permission slips for every workshop and job interview seemed cumbersome, so a compromise called "common courtesy" was initiated requiring negotiations between the enrollee and the supervisor for paid release time. All paid release time was verified by the counseling office. No amount of coercion from CETA administration could substitute for genuine concern of the first-line supervisor.

PERFORMANCE, ATTENDANCE AND COMMONLY HELD MYTHS

In the continual process of developing rapport with first-line supervisors, attitudinal problems were prevalent. A commonly held myth was that first-line supervisors were dissatisfied with CETA-PSE workers. Contrary to the stereotyped view of CETA workers as being poor performers and excessively absent, the CETA administration was pleased when the research data on the matter were tabulated.

The Baltimore County data reveal a 92% satisfactory and above performance evaluation, and a 90% satisfactory attendance record. The proportion of poor performance and excessive absence was 8% and 10% respectively, barely statistically significant, and certainly not high enough to stereotype 1500 CETA workers. These research findings were often shared with supervisors and enrollees to the disbelief of both. Myths proved difficult to dispel.

COMMUNITY RESOURCES AND CONSTANTLY EVOLVING WORKSHOPS

The educational and training needs of over a thousand enrollees were far greater than could be provided by the small CETA counseling unit. Attention was turned to existing educational and training resources that were found to be plentiful in the community.

The community colleges gladly set up classes right in the county office building. They taught career development along with a few specialized courses involving the artificial barriers women face in the labor market and popular courses such as stress management and values clarification. The stress management course grew out of a very real need expressed by CETA-PSE enrollees who faced the end of training just 18 months away.

Quickly surfacing also was the need for high school diplomas. Young and old alike, CETA-PSE workers who never finished high school found this a detriment when applying for private sector jobs. The county's public school adult education component, at no cost to CETA, supplied a certified GED instructor who came to the county office building each week. CETA-PSE enrollees, after diagnostic tests, came to weekly classes for individual self-paced instruction. There has been a total enrollment of 141; of these, 24 passed the GED, 10 failed, and 55 are currently enrolled to be tested at future dates. As word of the class spread, the enrollment doubled from 47 in 1976 to 97 in 1977. After curriculum adjustments for this particular group of adult learners, the drop-out rate dropped from 59% in 1976 to 25% in 1977.

Another inexpensive and often overlooked source of locally relevant career information is the private employers themselves. Personal invitations and a well designed program brought local businessmen, trades people, technical specialists from areas such as construction, retail, and personnel management to Career Opportunity Workshops (COW). Often the biggest problem with these workshops was finding a conference room large enough for the dozens of CETA enrollees who eagerly sought career information.

Workshops, although they can be categorized under orientation, technical skills, coping skills and job-finding skills, were most successful if they evolved from locally expressed needs. For example, a new workshop has just begun for CETA-PSE enrollees who are in danger of being fired for poor attendance.

TRANSFERS AND OPPORTUNITIES

The counseling unit was unable, on occasion, to resolve supervisor/employee conflicts. Rather than fire the CETA-PSE worker, an experimental transfer policy was initiated. Although each transfer generated a massive amount of paperwork, the CETA-PSE enrollee usually coped better in the new environment. One supervisor developed a special knack for handling enrollees who were unacceptable in other departments. After a few months of training, the supervisor's skill as a motivator and leader turned this group of problem workers into a hard-working, effective competent, workforce. They incidently had the job of cleaning a polluted county waterway, hauling debris out of the river, and handling the frequent fish kills. On rainy days, the "river rats" as they are called, went on job-finding excursions to local factories. The crew's dump trucks were regularly used for practice driving, and many of these enrollees used the county trucks to take the test for a truck driver Grade B license.

SUMMARY

CETA-PSE program operators need to prepare for the scheduled terminations that eventually must come if PSE is a truly transitional program. Enrollees properly prepared can locate the vacancies due to frictional employment, but their support should come from their day-to-day contacts with first-line supervisors, as well as workshops and counseling sessions.●

## CALLS FOR A DRUG INVESTIGATION: PARTISAN OR PRAISEWORTHY?

### HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. MICHEL. Mr. Speaker, on June 16, 1976, candidate Jimmy Carter appeared before the Platform Committee of the Democratic Party to present his platform proposals. Among those proposals, listed under title "An Open and Honest Government: Code of Ethics for the Federal Government," was this one:

Errors or malfeasance in the Executive Branch should be *immediately* revealed by the President and an explanation given to the public along with corrective action, where appropriate, to prevent any recurrence of such actions. (emphasis in the original)

One month later, on the night of July 15, 1976, Jimmy Carter gave his acceptance speech in Madison Square Garden. In that speech he said:

It is time for our government leaders to respect the law no less than the humblest citizen, so that we can end once and for all a double standard of justice. I see no reason why big shot crooks should go free and the poor ones go to jail.

Those two statements can be said to reflect Jimmy Carter's deepest convictions about how high level officials should conduct themselves. The rules Carter has set down for those who would work in his administration are clear and unambiguous. His own duty as President—to "reveal" errors or malfeasance on the part of his subordinates and to give an "explanation" to the public—is no less clear.

Recent charges of widespread use of illegal drugs among the White House staff bring these Carter statements to mind. How has the President lived up to his own high standards of conduct in light of these charges? The answer to that question can tell us much about the seriousness and the sense of purpose of the Carter administration.

The first point that must be made is that at the moment we have only second-hand testimony that illegal drug activities have taken place at the Carter White House or by members of his staff outside the White House. Dr. Peter Bourne, former White House drug expert has stated that marihuana and cocaine are used by White House aides. Various accounts in the media have reported that widespread use of drugs among White House staffers is well-known among journalists. One reporter has written that he knows the names of two high level White House staff members who use illegal drugs and that such drugs have been used at White House functions and even on Presidential trips.

If these charges are true, criminal activity has been going on in the White House. If they are false, a close friend and former high-ranking aide of President Carter and prestigious newsmen are deliberately telling lies. In either event, the response of the President has been curious, to say the least. It would appear that the first thing the President should have done was to immediately ask Bourne to either prove or retract his statement. If Bourne knows who has been breaking the law in the White House he has a moral and legal obligation to say who it is. If he does not know, he should be exposed as one who recklessly smeared the reputation of high-level officials and former associates. But President Carter has neither asked Bourne to provide evidence of his charges nor demanded that he apologize.

And what of the press accounts of drug use at the White House? The President has not publicly questioned the accuracy of these reports nor has he suggested he is a victim of press bias, which he most certainly would have done if he believed such serious charges to be false. It is to say the least untypical of the Carter White House (or any White House for that matter) to silently tolerate false reports of criminal wrongdoing among high level officials. The only logical reason that the President has not attacked the media on this point is that he believes or perhaps even knows the allegations are true. If he has any doubts whatsoever, his duty would be to save the reputations of innocent White House staff

members by having a full investigation of the charges. But he has not done so.

Since the President has not acted to either clear the air by publicly asking Bourne to name names or to conduct an investigation that will set the record straight, what is to be done?

Obviously someone else has to do what the President himself should be doing and, indeed, promised the American people he would do. Someone has to demand that an investigation of Bourne's charges be made so as to either clear the reputations of the White House staffers or to demonstrate that illegal drugs have been used and that "corrective action" is to be taken.

As matters now stand a "double standard of justice" is being used, no matter how you look at the situation. If Bourne is allowed to simply walk away from the serious charges he has made, it will appear that the President has one set of standards for his friends and another for everyone else, for it is inconceivable that the President would remain silent if such allegations were made, without supporting evidence, by someone outside his official family. And, of course, if Bourne's allegations are true, then the President, by not investigating the charges is allowing his high level aides to show disrespect for the law and even to break the law without revealing such conduct to the public.

The President will not do what must be done. No Democrat has asked the President to do what must be done. The media has thus far not demanded an investigation. So it remains for Republicans to do so. Senator HOWARD BAKER has suggested an investigation should be held and Congressman HENRY HYDE has written to the Attorney General asking for an investigation.

But some critics says that if Republicans demand that a thorough and impartial investigation be made by the Justice Department or a special prosecutor, partisanship will have reared its ugly head. Republicans—or so it has been argued—are simply trying to discredit the White House, to exploit a minor incident, to stir up trouble. Republicans who ask for such an investigation are simply trying to "get back" at the Democrats for Watergate.

This is an unconvincing argument because it focuses attention not on the merits of the proposal that is made, or the seriousness of the charges involved, but on the supposed motivations of those who make it. Since no Republican can prove he is not acting from "partisanship"—how can you prove a negative?—it would appear that the public will never be told the truth about drugs and the Carter White House.

But is it really partisan politics to remind the President of the United States of what he himself swore to do? Is it really partisan politics to, at the very least, seek to discover if Bourne is smearing Government officials or, if his charges prove to be correct, if Carter aides have been doing exactly the opposite of what he said his White House aides would do? Is it really partisan politics to ask if Bourne's charges about big shots at the White House have any basis in fact?

Even if it could be shown that Republicans who ask for an investigation are acting from the most ignoble, base, partisan motives—so what? Let the media report those motives and let the public judge. But get on with the investigation.

There have been arguments made, not by the White House, but in the press, that even if Bourne's charges are true, too much is being made about them. It is argued that many members of the generation currently occupying high level positions at the White House smoke pot and use cocaine. They are simply doing what many Americans of their age and class do. Why all the fuss about the breaking of an unpopular law?

To his credit Jimmy Carter has already stated that he does not agree with such an evaluation of the charges. He knows that charges like these strike to the very heart of public trust and public confidence. Carter does not share the casual attitude toward law that has marked the comments of many in and out of the media concerning these charges. He knows that if it is indeed true that members of his staff have been breaking the law with impunity, they have made a mockery of his principles and disgraced his administration.

Knowing all of this, why has the President not demanded an investigation that will either clear the White House of this cloud or bring to justice or to public attention those who feel it is not yet "time for our government leaders to respect the law"?

The truth about these charges must be known. There is no other fair way to go about it than to have an investigation and have Bourne and possibly others testifying under oath. If Bourne is a liar the White House has nothing to fear from such an investigation and the charges will be publicly laid to rest. But if Bourne is correct, the public deserves to know the names of Carter's aides who, big shots that they are, have treated with contempt laws that have put some "humble" citizens behind bars.

President Carter promised he would end "once and for all a double standard of justice." All the President has to do now is follow through on his sacred promise to the American people.

Nationally syndicated columnist Michael Novak recently addressed himself to the Bourne allegations. At this time I want to insert in the RECORD "Where's Carter's Ethic in the Bourne Case," by Michael Novak, published in the Washington Star, August 23, 1978.

The newspaper article follows:

[From the Washington Star, Aug. 23, 1978]

WHERE'S CARTER'S ETHIC IN THE BOURNE CASE?

(By Michael Novak)

On drug use at the White House the stone wall of silence is about to crack. An official of conscience in the Justice Department has grown uneasy about the cover-up. He talked by telephone from his home recently: "Here is a president who can lecture lawyers about equal justice for the downtrodden and the big shots. A ghetto kid caught with a small amount of marijuana can go to jail, but his own drug adviser—a federal official—escapes without even a federal investigation. If the president wants to crack down on big shots, he can begin right in his own office."

According to my source, the Justice Department is doing nothing about the Peter Bourne case. According to federal drug law, "controlled substances" may be given out by prescription only with three precautions: The name and address of the prescribing physicians, the amount, and the name and address of the patient must be registered in writing. Failure in one or more of these might normally lead to a federal investigation, especially since a federal official is involved.

If Dr. Bourne falsified the name and address of a patient—as he self-admittedly did—then he may be subject to these penalties: (1) revocation of his right to prescribe controlled substances; (2) civil charges; (3) criminal charges. The infringement is federal. It is not solely a local or a state matter. A federal investigation is called for in the case of ordinary folks.

Why isn't the Justice Department making an inquiry? Why isn't the president interested in "big shots"?

A U.S. attorney in Virginia not long ago had an employee on his payroll who was caught with a small amount of marijuana. To protect the integrity of his own office, the U.S. attorney prosecuted the minor employee, who went to jail. "Are only little fish to go to jail?" my informant at Justice asked.

"What exactly is the Justice Department doing, then?" he was asked.

"We are doing nothing," he said in disgust. "You'd think the era of cover-ups had passed."

Why is the White House doing nothing? There have been published allegations to the following effect: (1) Dr. Peter Bourne himself smoked marijuana and snorted cocaine at a Washington party. (2) Dr. Peter Bourne asserted that there was frequent marijuana use and occasional use of cocaine among the White House staff. (3) Jody Powell, the president's press secretary, asserted that Dr. Bourne had prescribed "controlled substances" on at least four occasions, not counting "diet pills" (alleged by others to be controlled substances, of multiple purpose) for Hamilton Jordan. (4) Hunter S. Thompson of *Rolling Stone* magazine has alleged that "a few" White House staffers have joined reporters in the use of drugs presently not legal.

The implication of these allegations is that illegal activity has reached to very high levels in the White House, touching federal officials very close to the president. So far as is known, no agency of the federal government is investigating these allegations. The White House has stonewalled. On one occasion, for which he later apologized, Powell made veiled threats against White House news personnel who might also be implicated.

President Carter promised "open" government. Why, my informant asked, is there not an open, public, federal investigation of alleged charges of illegal activity on the part of high federal officials close to the president, and part of his official family?

Highest among the Justice Department's declared priorities are white-collar crime, organized crime and narcotics abuse. At least two of these elements are, or may be, involved at the White House since, clearly, such illegalities as are alleged constitute: (a) white-collar crime; and (b) abuse of narcotics laws.

In the 12-month period ending March 31, 1978, more than 10 per cent of all federal criminal prosecutions (3,932 of 37,380) were for drug law violations. President Carter received praise for handling the Peter Bourne affair more quickly than he handled the Bert Lance affair. But a cover-up is going on in the former even more clearly than in the latter. The drug matter may be a more serious threat to the pillars of the Carter administration than the Lance affair.●

BALANCE(S) OF POWER SERIES BOOK III (F)—SOUTHERN AFRICA

## HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, today's selection in the continuing regional balance series trains its sights still further south on the African Continent. The balance of forces in southern Africa defies a comprehensive accounting, since guerrilla warfare conditions create an ebb and flow of loosely aligned revolutionary forces across national boundaries. It is essential, however, to maintain a position balance of forces to resist the incursion of these spoilers in the turbulent setting of southern Africa.

Of particular concern today are armed rebel forces within and around Rhodesia, seeking to influence and benefit from the political changes in that beseiged country. Today's article, "Chimurenga," by D. F. S. Fourie, shows that the insurgent forces are still of insufficient strength to impose a solution by force of arms. But it also shows that continued armed struggle in the face of existing odds are perpetuating a situation of unrest and instability in Rhodesia and in the southern part of Africa.

This article, which first appeared in the Bulletin of the Africa Institute in the fall of 1977, follows:

CHIMURENGA—THE WAR IN RHODESIA [1]

Rhodesia's war, is much in evidence today. Soldiers and armed civilians are a common sight. Commerce and industry are being disrupted by repetitive military call ups. Rural life has been disrupted by terror, by counter-insurgency measures and reprisals, the movement of villagers to new settlements and by the imposition of curfews.

It has become commonplace among observers—newspapermen, academics and politicians—to forecast the downfall of the Rhodesian government. Some even suggest that it would be in South Africa's interests if this were to happen. The arguments are based on what are perceived to be the weakening factors in Rhodesian security—manpower limits, foreign exchange shortage and general stress on the economy as the result both of sanctions and world-wide inflation.

In a war of this nature however, where there are no conclusive engagements, no defined fronts and no specific areas disputed by force predictions about the outcome are unwise and risky. It is appropriate to recall the words of D E H Russell in his book *Rebellion, Revolution and Armed Force: a comparative study of fifteen countries with special emphasis on Cuba and South Africa* [2] when he says "If it is true—that no mass rebellion can succeed without the defection of some of the régime's armed forces, then it helps revolutionaries not one jot to act in ignorance of this . . . In a situation where people are rebelling the behavior of the armed forces has been shown to be a decisive factor in the outcome of the rebellion".

If Russell is right, and his opinion is shared by others such as J. Bowyer Bell of Columbia University, then it is not the present campaign that will bring down the Rhodesian government while it continues to command the loyalty of the armed forces, black and white.

A military conclusion it seems would only result from the intervention of conventional force and it would appear that such a force would have to come from outside the African continent south of the Sahara. The Rhodesian war has gone through several phases. The first commenced in 1966, scon after UDI, and ended to the discredit of the insurgents in March 1970.

Thereafter followed a period of relative inactivity that ended in December 1972 after the military wing of ZANU had established itself among the rural inhabitants of the north-eastern districts around Centenary and Mount Darwin, using persuasion, intimidation and witchcraft. This second phase, beginning with Operation Hurricane, has continued until the present.

In 1974 prospects for the insurgents improved when the government of Prime Minister Caetano fell and Portugal summarily ended the colonial rule on Mocambique. With the effective ending of allied control of Rhodesia's eastern border, the insurgents were free to move along the frontier establishing bases and crossing into Rhodesia unhampered. It was to counter these operations that Operation Thrasher was mounted by the Rhodesian security forces in 1975. This extension of operations has been marked by a break down of relations with Moçambique and has resulted in strikes into Moçambique against bases and camps where considerable casualties have been reported amongst the insurgents.

DETAINED LEADERS RELEASED

The year 1974 was also significant in that a number of detained ZANU and ZAPU leaders were released as part of the South African accords respecting détente. Later, in 1975 South African Police units were finally withdrawn from Rhodesia, having been withdrawn from operational areas in 1974.

Many blacks, insurgents and uncommitted people, interpreted these events as a defeat for the Rhodesian government, particularly when the ZANU insurgents in the north-east continued to operate in defiance of the cease fire agreement. In the belief that the government was no longer able to protect them from terrorism many blacks switched their passive support from the security forces to the insurgents. Until then black support for the security forces had been a significant factor in the bush war, particularly as it provided a flow of intelligence of considerable and significant proportions. The intensification and spread of the war to new sections of the border lead to security forces having to undertake counter-insurgency operations south of Umtali (Operation Repulse) and between Victoria Falls and Beit Bridge (Operation Tangent).

A feature of the war on the eastern border has been the use of numbers of virtually untrained troops by the insurgents—frequently schoolboys who are no match of Rhodesia's security forces—counted among the best anti-insurgency forces in the world. During 1976 it was believed that some 1,700 insurgents would be sent; into Rhodesia between January and October—an imposing number when compared to the 260 believed to have been the highest number present in Rhodesia at any one time before that.

The Rhodesian response was a series of preamptive strikes against Mocambique between August and November 1976 which effectively reduced the danger of large scale incursions. One raid resulted the seizure of 50 tons of equipment and also valuable intelligence documents.

On the Zambian and Botswana side ZAPU has been engaged in much more limited operations (designated Operation Tangent by the security forces) using better trained forces, with only about 60 men in Rhodesia at any one time and only about 400 reported to be in reserve. They have concentrated on soft targets such as the Victoria Falls Hotel, lone travellers, farms, the Wankie mine and its compound and the railway from Zambia.

PSYCHOLOGICAL SIDE

Although there have been strikes as close as 30 km from Salisbury, these have been exceptions rather than the rule. It is clear from this that the insurgents have not been able to establish themselves far from the border, their refuge and source of supplies. The problem experienced with this kind of campaign is that isolated incidents are often spectacular beyond their significance, whereas the actual overall picture of the campaign shows that insurgents make little headway. A factor adversely affecting the government's political and psychological position is the number of civilians who have been killed by security forces while breaking the curfew that restricts night movement in the rural areas. There is no set picture of a campaign developing in the operations, but the numerous incidents have an adverse affect on the public at large. This is because the public, black and white, is influenced by the frequency of reports of incidents and because military service has become such a prominent feature of life in the country—Asians, Coloureds and whites all undertake national and operational service. Consequently, a feeling of uncertainty and fear is inevitable. Even the constant presence of uniforms and weapons does not dispel the fear and create an impression of protection, since the interpretation is that uniforms proliferate because things are going badly. Certainly, this is the way a number of observers interpret the situation, although how general the feeling is, is difficult to establish. This is of course, one of the characteristic problems of insurgency, namely that the psychological impact often outweighs the actual physical impact.

In Rhodesia's case the interpretation is further exaggerated by the tension between Rhodesia and neighbouring countries, and by the tension with the Catholic Church as a consequence of the dilemma in which missionaries find themselves when they have to support both sides for their own safety. (This has resulted departure of some nuns and missionaries). Then there is the tension generated by uncertainty about the future, notably among the whites and among the black civil servants, police and 2,500 soldiers whom Robert Mugabe had threatened with retribution. For them in particular, the future may be grim.

In such circumstances there is an inevitable tendency to regard a collapse as unavoidable. Superficial comparisons are drawn with experience in countries such as Kenya, Malaya, Vietnam, Angola and Mocambique to persuade one of the inevitability of military defeat. This disregards what actually led to a change of government in those countries—such as British policy to divert itself of colonies, a decision made long before the first postwar insurgency began. It also disregards the actual course of wars and how they were actually terminated, in favour of more subjectively acceptable interpretations.[3]

This results not only in unwarranted pessimism on one side but in injustifiable overoptimism on the other, and over-optimism that has led many a young Rhodesian black to a premature grave. (Table 1). Losses in action have been very heavy especially on the eastern border. This has been offset by the large numbers who are either willingly or forcibly recruited to take up arms and of course, by the seemingly unlimited resources available to them.

However long the war may continue there seems little evidence at present to suggest that the outcome will be settled to the satisfaction of the insurgents by the kind of military action being undertaken at present. To launch a campaign which can make a significant impact on the Rhodesian security forces will require a force of considerable quality.

[1] The name given to the rebellion of 1896, now used by the insurgents to arouse the spirit of the past.

| Black civilians*: | | | |
| Killed | 1,005 | ±600 | 1,053 |
| Injured | 1,338 | — | 1,424 |

Notes:

1. All kinds of injuries and causes of death related to the war, including battle, accident and terrorism.

2. Figures derived from various sources. Exact details as to figures for particular times require checking.

*Black civilians attacked by terrorist gangs, mine incidents, etc.●

## CONGRESS SHOULD ENACT CONSTITUTIONAL AMENDMENT MANDATING A BALANCED BUDGET

### HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. BLOUIN. Mr. Speaker, I would like to call to the attention of the House that today I have filed a discharge petition for House Journal Resolution 468, a proposed constitutional amendment mandating a balanced budget by 1980 and repayment of the national debt over the next 20 years. This has been designated as Discharge Petition No. 11.

As we are all aware, three separate amendments were offered and defeated during the consideration of the second concurrent budget resolution which would have significantly reduced this year's projected deficit. While I did not support two of these particular amendments, I did support the amendment offered by Congressman FISHER of Virginia which would have reduced budget authority and outlays by $5 billion each respectively, thus reducing the projected deficit to $35 billion the same deficit figure offered as part of the Holt amendment without the corresponding excessive tax cuts that accompanied this proposal. Unfortunately, and to my surprise, the Fisher amendment failed by a larger note than the two previously offered amendments.

Based on the House's recent action, it now appears obvious that collectively the Congress appears unwilling to even modestly reduce Federal expenditures. given this fact, I believe that it is time to show the American public that their interests, and not that of "special interests" are protected from irresponsible spending.

The people of Iowa, as well as the people of this country, are well within their rights to expect that the Federal Government operate within the amount that is taken in annually in revenues.

In fact, in a questionnaire that I recently sent to my constituents on the subject of Federal spending, of the literally thousands that responded, the overwhelming consensus was that a balanced budget was the number one priority.

It is for this reason that I trust that the Members of the House will demonstrate their desire to begin consideration of this matter by joining me in signing Discharge Petition No. 11, which will provide for a balanced budget by 1980.●

## MIDDLE EAST OIL SUPPLIES

### HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. SIKES. Mr. Speaker, I am concerned that continued U.S. delays in military and economic assistance to Somalia and North Yemen could seriously threaten assured access to oil for the West and undermine Saudi Arabian efforts for peace and stability in the Middle East.

It was my privilege, in this connection, during the August congressional recess, to hold lengthy conversations with officials in Saudi Arabia and North Yemen. Included were Crown Prince Fahd, Deputy Prime Minister; Prince Sultan, Minister of Defense and Aviation; Prince Saud, Minister of Foreign Affairs, all from Saudi Arabia; and President Salih, Foreign Minister Al-Asnaj, Deputy Prime Minister for Economic and Financial Affairs, and Acting Prime Minister Junayd, Deputy Prime Minister Al-Kibse, Vice President and Chairman of the Peoples Constituent Assembly Al-Arashi from North Yemen.

There are many who hold strongly to the view that failure of the U.S. Government to move swiftly when overtures were made to the United States by South Yemen may have contributed to the assassination of the President and the rapid consolidation by the Russians of their hold on that country. An estimated 500 to 700 Cubans have been positioned at the important port of Aden and in the surrounding area. Another port development reputedly under development near Oman will further strengthen Russia's ability to threaten shipments of oil essential to the West and supplies necessary to the Middle East. Oman also is a target for Russian incursion.

The reconquest of Eritrea with Russian arms and Cuban support can be expected to open the Port of Massawa, giving the Russians the ability to dominate shipping both from the Persian Gulf and the Red Sea to the Indian Ocean and the Suez Canal. The Port of Aden already largely compensates the Russians for the loss of Berbera in Somalia.

The North Yemenese are very apprehensive about an invasion by their southern neighbor. Heretofore, North Yemen has accepted Russian arms and advisors. They see a continuation of this policy to be an acceptance of Communist control. They now seek United States support and alliance with Saudi Arabia. The Saudis realize the threat of continuing Communist encroachment as a very real danger which would leave Western oriented. anti-Communist powers encircled by Russian guns.

I must state regretfully that at present the United States is still following a policy of too little and too late. The nations which oppose communism are afraid to depend upon us. A promise of weapons to Somalia at the time that nation expelled the Russians from the strategic port of Berbera on the Horn of Africa—equally as important as Aden—still has not been kept. A year ago President Siad Barre of Somalia told me the Russians planned a force of 15,000 Cubans in Ethiopia for their conquest of Ogaden. The State Department insisted the number would be nearer 500. The actual number was 17,000. The Government of Somalia is now threatened from within because of U.S. dealliance. We simply cannot play games and maintain a posture of significance worldwide.

At the beginning of the August recess, I participated in the United Nations Conference Committee on Disarmament in Geneva, met with SALT officials there, attended military briefings in Ramstein, Germany, and NATO briefings in Brussels. Then flew to Baghdad in Iraq for discussions of that nation's hard line policies toward the West and the United States in particular.

I found that Iraq, which is now one of the world's major oil producers, is pursuing a policy of internal development which can open some trade doors to the United States, but there is no indication of a change in their hard line official attitude. The Iraqis blame the United States for the Arab problem with Israel. Iraq still poses a threat to the continued existence and security of Kuwait. They have never relinquished their claim for Kuwaite territory. Since Iraq also borders on Saudi Arabia, their militant stand causes apprehension in that country also.●

## HUMAN RIGHTS AND INTERNATIONAL FINANCIAL INSTITUTIONS

### HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. HARKIN. Mr. Speaker, in September 1977, the House of Representatives rejected the International Financial Institutions Act of 1977 because it failed to contain strong human rights language. Immediately following this rejection, the House adopted the same conference report except that the human rights language originally adopted by the House was reinstated.

Now that a year has passed since this crucial vote, time has come to assess the effectiveness of the human rights language. The following memo done by Jim Morell of the Center for International Policy for Senator MARK HATFIELD does just that. I think the record clearly shows that the House's decision to maintain its firm human rights position was correct.

Soon the House may be faced with the same situation in regard to another multilateral funding mechanism. It is very likely that the conference report establishing the supplementary financing facility of the International Monetary Fund will not contain any language referring to human rights or human needs. In the last few years our U.S. foreign policy has come a long way in recognizing the plight of the poor and the oppressed. If we authorize an expenditure of more than $1.8 billion through an international funding institution in which our U.S. representative does not have to acknowledge these valid policy concerns, we will be taking a giant leap backwards. I do not think Congress or the American people want this to occur.

I include the following:

A HUMAN RIGHTS SUCCESS STORY: THE HARKIN AMENDMENT ON THE INTERNATIONAL BANKS

A memo from Jim Morrell, Associate, Center for International Policy to Jack Robertson of Sen. Mark Hatfield's office.

The Harkin amendment on the international banks has been perhaps the most successful of all the human-rights amendments passed by Congress since 1974. The amendment, Section 701 of the International Financial Institutions Act of 1977 (PL 95–118), passed by the House April 6, 1977 and signed into law October 3, 1977, has stimulated the Carter administration to take more specific actions to advance human rights through aid policy than any of the similar amendments governing U.S. military aid, Agency for International Development programs, PL–480 loans, or Export-Import Bank financing authorizations. Since enactment of this amendment and its predecessor legislation, Section 28 of the Inter-American Development Bank Act, approved May 31, 1976, the Carter administration has voted "no" on 11 loans and abstained on 21 loans to human-rights violators, and the Ford administration voted "no" on one loan. (See Table 1).

TABLE 1.—U.S. HUMAN RIGHTS POLICY ACTIONS IN THE IFI'S

| Country | Action | Date | Institution | Project |
|---|---|---|---|---|
| (A) DURING CARTER ADMINISTRATION | | | | |
| Argentina | Abstention | June 16, 1977 | IBRD | Industrial credit. |
| Do | do | do | IFC | Soybean processing. |
| Do | No vote | Oct. 27, 1977 | IDB | Gas pipeline. |
| Do | do | Dec. 1, 1977 | IDB | Cellulosel. |
| Do | do | Dec. 8, 1977 | IDB | Petrochemical. |
| Do | Abstention | Feb. 21, 1978 | IBRD | Grain storage. |
| Do | do | Mar. 14, 1978 | IFC | Juan Minetti, South America. |
| Do | do | Apr. 25, 1978 | IFC | Massuh, South America. |
| Do | do | May 9, 1978 | IBRD | Agricultural credit. |
| Do | do | May 30, 1978 | IFC | IPAKO polyethyline. |
| Benin | do | May 26, 1977 | IDA | Roads. |
| Do | do | do | IDA | Regional development technical assistance. |
| CAE | do | Oct. 20, 1977 | AfDF | Education. |
| Chile | No vote | Dec. 8, 1977 | IDB | Roads. |
| Do | do | Mar. 2, 1978 | IDB | Rural public health. |
| El Salvador | Abstention | May 18, 1978 | IBRD | Telecommunications. |
| Ethiopia | Abstention | May 10, 1977 | IDA | Irrigation. |
| Do | do | do | IDA | Roads. |
| Do.[1] | do | Apr. 4, 1978 | IDA | Grain marketing and storage. |
| Guinea | do | Nov. 23, 1977 | AfDF | Kenaf production. |
| Korea | do | Oct. 31, 1977 | ADB | Asan Bay power. |
| Do | do | Dec. 22, 1977 | ADB | Mineral resources. |
| Paraguay | No vote | Mar. 7, 1978 | IBRD | Highways V. |
| Do | do | Mar. 23, 1978 | IDB | Trans-Chaco Road. |
| Do | do | May 25, 1978 | IDB | ANDE electrical transmission. |
| Philippines | Abstention | Nov. 29, 1977 | ADB | Development bank. |
| Do | do | Dec. 9, 1977 | ADB | Hydropower. |
| Do | do | Apr. 25, 1978 | IBRD | PISO Development Bank. |
| Do | do | May 18, 1978 | IBRD | Industrial credit III. |
| Uruguay | No vote | Dec. 21, 1977 | IDB | Paso Severino water supply. |
| Do | do | do | IDB | Coastal roads. |
| Yemen, PDR | do | Feb. 14, 1978 | IDA | Wadi Tuban agriculture. |
| (B) DURING FORD ADMINISTRATION | | | | |
| Chile | do | June 1976 | IDB | Industrial credit. |

[1] Abstention took into consideration concerns with expropriation as well as the human rights situation.

While these policy actions within the international financial institutions (IFIs) certainly reflect the Carter administration's own commitment to advancing human rights abroad, the passage of the Harkin amendment has also considerably strengthened the hand of human-rights advocates within an administration that is grievously divided on this issue. For although President Carter, Secretary of State Vance and Deputy Secretary Warren Christopher have all exerted pressure from the top for advancing human rights through our aid decisions, the majority of the State and Treasury Departments at the outset opposed this policy and it is still unpopular within the administration. As a result, human-rights advocates find themselves badly outnumbered within this administration. The existence of legal instructions and a definite Congressional mandate have made a clear difference.

Althouogh it is impossible to establish a direct cause-and-effect relationship between U.S. human-rights policy actions in the IFIs pursuant to the Harkin amendment and specific improvements in human-rights performance abroad, U.S. actions in the IFIs encouraged progress in four key countries:

TABLE 2

Human Rights Progress Encouraged by Harkin Amendment in IFIs

*Argentina.*—The right of option and release of names of 10 prisoners, and some releases since January 1978.

*The Philippines.*—Some prisoner releases, especially the prompt release of the 600 picked up after the elections.

*Chile.*— Some changes and a conditional easing of repression.

*South Korea.*—Releases in December 1977–January 1978 followed adverse U.S. votes in Asian Development Bank; these votes did register and influence Korean government decision.

Despite limited improvements as noted above, the State Department and non-governmental organizations continue to find serious human-rights problems persisting in these four countries. A further difficulty in precisely gauging the effect of U.S. policy actions in the IFIs under the Harkin amendment is the fact that other purely bilateral aid sanctions have also contributed to U.S. pressure for human rights improvements. In the case of Argentina and Chile, U.S. military aid has been discontinued (except for deliveries under prior-year agreements); in Chile, bilateral economic assistance has been cut to $6 million in FY 1979; and in the cases of the Philippines and South Korea, PL–480 Title I aid was temporarily deferred. Nevertheless, in coordination with these bilateral actions, U.S. action in the IFIs have exerted definite pressure for human-rights improvements.

Apart from the specific improvements cited in Table 2, the Harkin amendment has had three other beneficial effects. It has extended our policy to an arena, the international banks, that involves substantially larger flows of resources than bilateral aid, thus increasing the leverage for improvements; it has provided opportunities for internationalizing U.S. human-rights concerns; and it has focused attention, both in the U.S. government and in the international banks, on determining who are the beneficiaries of economic aid projects and whether they serve basic human needs.

*Extending policy to cover larger resource flows.*—Since early 1977, an inter-agency committee chaired by Deputy Secretary Christopher has met to review upcoming AID, PL–480 and international bank loans using human-rights criteria. Usually the international bank loans in question are many times larger than bilateral U.S. economic assistance programs. In FY 1977, for example, South Korea received $77.4 million in direct U.S. economic assistance, and $155 million in military aid (military aid is not reviewed for human rights by the Christopher committee but by the Arms Export Control Board) for a total of $232.4 million in U.S. bilateral assistance programs, while receiving $545.8 million from the international banks. The Philippines received $124.9 million in direct U.S. assistance and $474.8 million from the international banks. The figures for Indonesia were $175 million in direct U.S. assistance and $540.6 million from the banks.

In one other important area as well, the Harkin amendment on the IFI's extends the

scope of U.S. policy actions. Human-rights amendments on both bilateral and multilateral aid require U.S. opposition to loans unless they serve basic human needs. Today AID claims all its programs serve such needs (note: The Center for International Policy estimates that some 62 per cent of AID programs meet this standard), and thus automatically qualify for the exemption. But the majority of international bank projects coming before the Christopher committee are directed toward industry, infrastructure and balance-of-payments functions that clearly fall short of the basic human needs criteria. (Note: The Center for International Policy considers 55 percent of the World Bank's $9 billion FY 1979 lending program as directed toward industry, infrastructure or balance-of-payments functions rather than basic human needs.) The Christopher committee has followed a consistent policy of recommending U.S. "no" votes or abstentions on non-basic human needs projects in countries with serious human-rights problems and of the 32 loans the United States opposed by "no" votes or abstentions, all but four fell in the non-basic needs category.

*Internationalizing U.S. human-rights concerns.*—Once the Christopher committee has decided on a "no" vote or abstention on an upcoming IFI loan, the U.S. executive director and other U.S. officials consult with the other major donor members of the bank seeking to coordinate policy. In a number of instances the United States has induced other countries to follow its example. Here, the Harkin amendment has stimulated the United States to take the lead in advancing human rights—a clear advance from the previous situation when the major European countries in the World Bank opposed loans to Chile while the Ford administration continued to vote for them. Deputy Secretary Christopher earlier this year led a mission to Europe to explore a common human-rights policy with our major allies. Recipient countries who once denounced human rights as a unilateral U.S. crusade (despite the fact they are all signatories to the U.N. Universal Declaration of Human Rights, from which the phraseology of the Harkin amendment in derived) now increasingly face a coordinated front of donor countries.

During the first six months of application of the policy, the Treasury Department was apprehensive of politicization of the banks, but in recent months Treasury has taken a more relaxed view as human rights have been pursued with no visible ill effect on the functioning of the banks. The banks have not crumbled, and in recent inter-agency meeting Treasury has refrained from raising the politicization issue.

*Focusing on basic human needs.*—The Harkin amendment requires the United States to oppose any loan to human-rights violating countries unless it serves basic human needs. As already discussed, the administration has acted in the spirit of this legislation in the IFI votes. For each of the over 300 separate bilateral and multilateral aid agreements that the Christopher committee each month reviews for human-rights problems, a detailed one-page description of the project is prepared. The description includes a very careful review of the beneficiaries of the project. If a gray area arises, Christopher asks AID or Treasury and the bank in question to submit a more detailed description of the beneficiaries. This detailed and quite conscientiously applied review process, by clearly the basic human needs exemption, greatly increases the incentive for the banks and recipient countries to fashion projects to directly benefit the needy—a predictable although perhaps unintended consequence of the Harkin amendment.

The intensive review process and wide variety of actions taken by the Christopher committee illustrate another advantage of the Harkin amendment—its flexibility. In the spring of 1977, administration spokesmen somewhat melodramatically warned that the Harkin amendment would "tie the administration's hands." In opposition to this alarmist view, the Center for International Policy testified to the House Banking Committee in March 1977:

The broad areas of determination are, first, whether a loan directly benefits the neediest, which is an area where the administration has considerable flexibility; second, whether a country qualifies as a gross and consistent violator of human rights.

It is our feeling, in terms of human rights violations, that most countries in the world violate human rights on some scale or another. However, the language of the Harkin amendment is such that a country would have to work overtime in order to qualify as a consistent and gross violator of human rights.

This also gives the administration certain flexibility when these loans come before the banks. Consideration of the loans is a rather long process, sometimes taking years and always many months.

During this period the administration can work with both the bank officials and with authorities in the country in question and remind and prod the authorities in the country in question to improve their human rights record. It is thus left to the administration to determine whether or not release of a certain number of prisoners and an improvement in the human rights situation has in fact been made. This allows considerable flexibility, so certainly the Harkin language is not a straitjacket.

Eight months after passage of this legislation, it is clear that the administration has had wide latitude under the Harkin amendment to implement concrete policies, and no one today in the State Department contends the amendment ties their hands. The administration has retained full discretion to define a human rights violator simply by refraining from officially identifying any country as engaging in "a consistent pattern of gross violations of internationally recognized human rights", the language in the legislation; instead it has identified countries with "serious human rights problems," thus avoiding formally invoking the Harkin amendment. Likewise, in determining what projects serve basic human needs, it has retained freedom of action. The administration has acted within the spirit of the Harkin amendment on the IFIs; policy and legislative intent are in accord.

Overall, the Harkin amendment in the IFI's has done much to add substance and integrity to U.S. human rights policy, although much more remains to be done. The legislation backs up with action the President's recent warning at the Organization of American States conference that repressive regimes should know the price of their inhuman conduct: the forfeiting of U.S. and international cooperation, including financial cooperation. Pragmatically, the Harkin amendment and U.S. policy actions in the IFIs stimulated by it play a key role, for a violating government may calculate it can survive a deterioration of political relations with the United States. It can ignore cuts in small bilateral programs, and it can continue to obtain private bank loans. But any third-world government must think twice before jeopardizing the large amounts flowing through the international banks. The international banks are therefore the only remaining arena of effective U.S. government leverage for human-rights improvements in many countries. Many violating governments initially considered that President Carter's words were meant for domestic consumption. The Harkin amendment and U.S. policy actions show that the message is intended precisely for them.●

## TAXPAYERS AND GOVERNMENT INVOLVEMENT

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. DERWINSKI. Mr. Speaker, at a time when tax reform legislation, budget appropriations, as well as economic proposals effecting Federal, State, and local governments, are major items facing us, I wish to direct to the Members an editorial appearing in one of the newspapers serving my district, the Des Plaines Valley News, by the distinguished editor of that publication, Harry "Scoop" Sklenar. The editorial, which follows, depicts the grassroots viewpoint of the taxpayer about Government involvement:

BOTH WAYS IMPOSSIBLE—

Both organized political parties are currently circulating petitions asking for a limitation on taxes. The U.S. Congress has recently approved a tax cut plan.

Taxpayer groups in many areas are revolting against state and local tax levies. With November elections rapidly approaching, many candidates have adopted a cut-taxes campaign.

The trouble is that there are citizen groups, there are social service organizations, school officials, village and city authorities standing in line asking for either a state or federal grant at the same time.

Summit village learned last week that slow reimbursements caused a financial problem in that a sum of $50,000 had to be borrowed to pay CEDA workers since the village must wait 30 to 60 days to be repaid for salaries expended.

Now this happens in practically every grant provided. Ask your school boards. The school board depends on its state aid for a portion of its budget. The state aid sum at times is cut without notice, or other state funding is reduced. Thus the anticipated dollars fail to meet expectations. All social service agencies securing grants have a similar problem.

What must be learned is that a taxpayer cannot expect to have a tax cut and then expect to secure a money grant at the same time.

There seems to be a growing dependency on federal funding. Each village now is alloted a share of the income tax. Each village secures a share of the revenue sharing funding. Each village secures a share of their village sales tax. Right?

Now what's wrong about securing grants? Note that the threat of withholding federal grants or state grants has been increasingly used to secure compliance with regulations, creating a significant loss of local control and greater centralization of governmental power.

The bureaucrats say, you either do this or that or else the requested aid grant will be denied.

Secondly, that grant funding is taken from your taxes in some form or another, or in borrowing funds at an interest rate from banks.

In 1950 the federal aid to state and local governments was $6.5 billion, while in 1979, the figure is estimated at $85 billion. Then you are worrying about inflation!

Note that the value of the American dollar

dropped sharply during the past year or two. Prices are rising rapidly each month, creating a situation where workers ask pay increases to meet their cost of living, since they find they are buying less and less with the money they have been earning.

Now, a situation arose in Germany during World War II, where the money was so abundant that it almost took a wheelbarrow full to buy a postage stamp. In the United States, the stamp cost went from 3 cents to 15 cents. Gasoline is now nearing 75 cents a gallon with taxes at the state level, at the federal level, and RTA level in that sum.

Note that local property taxes are increasing annually. Note that your federal social security tax is increasing annually. Note that industries are being forced to build plants in Mexico, Canada, Ireland, and elsewhere, simply because the payroll taxes, the federal and state taxes, as well as the regulations, are becoming an increasing burden.

When you buy an article do you examine the country of manufacture? Look over those clothing racks today, and count how many articles are made elsewhere, rather than in the United States. Note the number of foreign autos on the streets. Note that recently another watch firm moved to Switzerland and an auto industry moved to Canada, and another to Ireland.

This week, two groups in Congress are battling over establishing a new hospitalization plan. Now, just who do you suppose is to fund either of the plans? Your taxes and mine, that's who.

The idea that on one hand one can secure a tax cut, and on the other hand secure a new service, without any more taxes added should be discarded, or else face increasing bureaucratic control over your life, from cradle to the grave.●

## ONE HUNDREDTH ANNIVERSARY OF THE PENNS GROVE RECORD

### HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. HUGHES. Mr. Speaker, I would like to take this opportunity to offer my heartiest congratulations to the Penns Grove Record on the occasion of its 100th anniversary as a weekly newspaper in Penns Grove, N.J.

Penns Grove, N.J., is my hometown, so I am especially delighted to have the opportunity to call to my colleagues' attention the fact that this small town newspaper has been publishing the news each week for the last century. The Record, in the great tradition of American small town papers, provides a spark that keeps the local residents of Penns Grove informed and aware of local activities and events. It has an outstanding history of service to the local community. For many residents of Penns Grove, the Record's weekly publication each Wednesday is a real high point.

So today, Mr. Speaker, I salute the Penns Grove Record and send my sincere congratulations and best wishes for its continuing success in meeting the community's informational needs.●

## WILL MR. CARTER NOW TAKE HEED?

### HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. ARCHER. Mr. Speaker, I would like to share with my colleagues in the House of Representatives the following disturbing article which appeared in the August 7 edition of the Daily Telegraph in London, England.

If there ever was any doubt in the minds of any in this Chamber that the lapses of judgment which have so characterized this administration are having a major negative impact on our Nation's image abroad, this article should be most educational.

Mr. Carter should indeed take heed. The editorial follows:

CARTER DRUG SCANDAL IS NOT OVER

(By Robert Moss)

It is little more than a fort-night since Dr. Peter Bourne, President Carter's English-born adviser on drug abuse, was obliged to resign in the midst of dramatic allegations that he had supplied narcotics to an attractive assistant under a false name and sniffed cocaine at a Washington party.

Yet the scandal seems all but forgotten. Many were astonished to find that, after all that it suffered through Watergate, the American presidency could still be subjected to new indignities.

Who, before the Bourne affair, would have presumed to ask the President in front of the television cameras whether he himself had been supplied with drugs?

All the same, there seems to be widespread readiness to accept that Dr. Bourne's use of drugs, like Mr. Hamilton Jordan's table manners, is just one more case of the frivolity of the Carter entourage, something we might as well grin and bear.

I believe that it would be as mistaken to dismiss the Bourne affair as a casual peccadillo as to shrug off Mr. Andrew Young's pronouncements on the state of the world as slips of the tongue—rather than calculated attempts to undermine the chances of an effectively anti-Soviet-American foreign policy.

BIG QUESTIONS

We have barely begun to scratch the surface of the Bourne affair, and it will be interesting to see how deep America's much-vaunted new breed of "investigative reporters" will care to dig. There are two very big questions to be answered:

(1) How did Dr. Bourne, with his long record as a radical activist on political issues, as well as the drug question, become a trusted adviser of the President, with wide-ranging responsibilities in the White House?

(2) How far have other radicals—many of them associated with the Institute for Policy Studies (IPS)—succeeded in penetrating the Carter Administration?

Dr. Bourne's role as health adviser gave him a say in the selection of American doctors for foreign leaders who requested medical help. He also had broader duties—for example, a watching brief over international organisations that made him a regular visitor to Geneva.

It has also been alleged that he acted informally as the President's personal consultant since before his election as Governor of Georgia.

Dr. Bourne's position of influence—prior to the scandal—is the more remarkable given his earlier political career. He was a leading light in a radical organisation called Vietnam Veterans Against the War (VVAW), some of whose members led violent demonstrations at the Republican National Convention in Miami in 1972.

MARIJUANA CAMPAIGN

His involvement in the campaign to "decriminalise" marijuana was well known.

Less known and more intriguing was his role as a trustee of an outfit called the Institute for Southern Studies (ISS), founded in Atlanta, Georgia, in March, 1970, as a direct subsidiary of IPS in Washington.

One of Dr. Bourne's fellow trustees was Mr. Marcus Raskin, co-director of IPS, who has recently been a moving figure in the anti-intelligence campaign (and in a group providing legal support for the Socialist Workers Party (US) campaign to expose FBI informants).

According to ISS literature, its staff consisted of "active participants in the struggles of the sixties"—in other words, the radical anti-Vietnam student movements.

Atlanta's first radical think-tank declared its resolve to collect embarrassing data on private corporations in order to break their "colonial domination" of the southern states. The ISS has been notably active in campaigning against local defence projects.

One wonders how many of the people who voted for Mr. Carter in Georgia in 1976 were aware of the existence of this institute, let alone the involvement of Dr. Bourne, described in Carter's campaign material as a "long-term personal friend and adviser."

The link with IPS is striking. The Institute for Policy Studies had been described as the "link between the revolutionary and the respectable Left" in Washington.

It is dedicated to (a) promoting a socialist economic system; (b) encouraging unilateral disarmament; (c) the disruption and ultimate disbanding of the intelligence services in their present form; and (d) support for radical governments and guerrilla movements in the Third World.

In a society as visoerally conservative as the United States, it is strange that an organisation with these objectives can lay claim to any degree of influence within the Administration. Yet Dr. Bourne is not the only IPS associate who achieved a significant post under President Carter.

Founded in 1963, IPS now occupies a small, five-story building at 1901 'Q' Street in Washington. It is not short of funds, which mostly come from private foundations.

Between 1970 and 1976 alone, five foundations provided a total of about $8 million for IPS and its offshoots. The largest contributor was the Samuel Rubin Foundation, set up by the retired chairman of the Faberge Corporation, whose son-in-law, Peter Weiss, is chairman of the Board of IPS.

The Rubin foundation contributed heavily to the Transnational Institute, IPS's Amsterdam-based subsidiary, which has provided research grants for people like Tariq Ali, and is deeply involved in the campaign against the multinational companies.

Through seminars, conferences and study groups, the IPS has succeeded over the years in building an impressive range of contacts among congressional staffers and the media. In 1976, IPS was requested by 47 Left-wing Democrat Congressmen to prepare a critical analysis of the federal budget.

It has since prepared "alternative budgets" and even an "alternative defence budget," focusing on ways to bring about unilateral American disarmament, that have influenced congressional debates.

A current IPS project is to encourage government employees, especially intelligence officers, to become "whistleblowers" and to leak official secrets.

IPS has even created a special "whistle-blowers hotline," answered by Institute staffers, for the convenience of government employees who want to pass on classified information.

With the advent of the Carter Administration, some of the friends that the IPS organisers had made in previous years moved into offices in the federal government. The radical influx was particularly obvious in government agencies like ACTION, which controls the Peace Corps and other voluntary programmes.

Mary E. King, Dr. Bourne's wife, is deputy director of ACTION. Her boss, Mr. Sam Brown, had been involved in an IPS project called the National Conference on Alternative State and Local Public Policies (NCASLPP), and attended its conference in Denver last year.

Literature put out by this body with a long-winded title declares that it exists to bring together those who "share a radical or populist outlook" and also to build contacts with local government officials in Cuba.

Both Mr. Brown and the head of ACTION'S adult education programme, Marge Tabankir, were leading anti-Vietnam war activists who have given public support to Hanoi.

IMPRESSIVE LIST

IPS assocates pop up in more surprising areas of the Carter Administration. Mr. Sidney Harman, the Under Secretary of Commerce, is a former IPS trustee. Mr. Robert Pastor, a Latin American specialist on the National Security Council, who is reported to have asked the CIA to draw up a plan for toppling the Pinchet regime in Chile, had long been associated with Latin American projects supported by IPS.

The lists of IPS fellows contain an impressive number of people with government posts.

Since leading figures in IPS have aggressively supported Vietnam, Cuba, the Palestine Liberation Organizations and the Rhodesian terrorists and have drawn Marxist groups into a widening network, the links of a government official with the Institute may be a cause of legitimate concern.

The Bourne episode, and the evidence of radical penetration of the lower echelons of the Carter Administration should focus attention on the recent testimony of Mr. Alan K. Campbell, the Chairman of the U.S. Civil Service Commission, to the Senate Committee of the Judiciary.

Mr. Campbell testified that mere membership of an extremist, violence-prone organization—including the Communist party, the Ku Klux Klan, and the Nazi party—is no longer a bar to federal employment in the United States.

The Civil Service Commission, responsible for vetting would-be government employees, is not even allowed to question them on their membership, past or present, of such organisations unless they are known to have committed an overt criminal act.

The Chairman of the Senate Committee concluded that "we do not have a federal employee security programme worthy of the name."

Will Mr. Carter now take heed? ●

## FIFTIETH ANNIVERSARY COMMENDATION TO COLMA BRANCH 19 OF THE ITALIAN CATHOLIC FEDERATION

### HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. RYAN. Mr. Speaker, on September 30, Colma Branch 19 of the Italian Catholic Federation will celebrate the 50th anniversary of its founding. This branch, located in the 11th Congressional District of California which I have the honor to represent, was founded in 1928 at Holy Angels Church in Colma, Calif.

I would like to take this opportunity not only to acquaint my colleagues with the Colma Branch but also to commend the branch for its 50 years of outstanding community service. This organization is devoted to the purpose of upholding and developing a religious spirit among its members and to spreading that spirit among the people of Italian descent outside the organization. The federation also strives through its many and varied charitable and apostolic activities to assist effectively in enriching the lives of all citizens of its community. By all indications, the Colma Branch and its members have fully lived up to the goals of the organization. They are actively involved in providing assistance to the elderly in the local convalescent hospitals and in contributing donations to needy persons and for community activities. In addition, they sponsor the annual baccalaureate mass and graduation breakfast for Jefferson High School, sponsor scholarship grants, and promote youth activities in the community.

The anniversary celebration itself will be a twofold event. The anniversary dinner will be held on Saturday, September 23, at the Villa Hotel in San Mateo. A concelebrated mass will be held at Holy Angels Church on Sunday, October 1. The mass will be concelebrated by the pastors of the churches in Daly City, present and past branch chaplains, and the pastors and chaplains from the churches in San Mateo County where the federation is located.

I extend my very best wishes to the Colma Branch of the Italian Catholic Federation on its 50th anniversary, while also thanking its members for the active interest they have displayed in their community. If more people were as devoted to their fellow beings as the members of this organization are, it would make the job of any elected official much easier. I look forward to working with the Colma Branch as it begins its sixth decade of service to its church and to its community.●

## NOISY AIRCRAFT BILL: THE AIRLINES' SCHEME TO RAID $3 BILLION FROM THE TREASURY

### HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. VANIK. Mr. Speaker, title III of the Airport and Aircraft Noise Reduction Act, the so-called Noisy Aircraft Revenue and Credit Act, provides a $3 billion gift to the airlines for the purchase of new aircraft and engines. In a column entitled "'Clever Scheme' To Pay for Quieter Planes," Hobart Rowen of the Washington Post, on August 17, attacked the noisy aircraft bill as an airline scheme to rip off the American taxpayer to pay for the airlines' cost of complying with environmental standards. The column follows:

CLEVER SCHEME TO PAY FOR QUIETER PLANES

(By Hobart Rowen)

If the airlines have their way, every time you buy a ticket for a flight in this country, 25 percent of the taxes you pay would go directly to them to buy $3.3 billion worth of new aircraft and equipment. And every time you go abroad, $10 would go from your pocket to the airlines' treasuries—it wouldn't even go first to Uncle Sam—to finance their new equipment.

This rip-off is part of a clever scheme concocted by the airlines to have the public pay for the less noisy planes they are supposed to acquire. It is a lovely make-work project for the aircraft manufacturers. And among the more interesting aspects is that airline fares could be reduced by the amount of this bonanza to the industry if administration officials and congressional leaders have the guts to oppose the scheme.

Wage-price watchdog Barry Bosworth wrote a private internal memorandum to the Office of Management and Budget on Sept. 18, 1977, exposing the plan. But he has not been allowed to go public with it. The details of the proposed "Treasury raid" were first publicized by Rep. Gene Snyder (R-Ky.).

Here's what has happened: The airlines now collect, to pay for air-safety measures, an 8 percent tax on domestic tickets, 5 percent on domestic air freight, and a fixed $3 fee on each foreign departure.

Those monies go into a trust fund financing airport safety measures, including the salaries of personnel and the detection equipment used in the pre-boarding routines. But the money collected is said to be more than needed, suggesting that the 8 percent tax ought to be lowered to about 6 percent and the other charges accordingly. Wouldn't a 25 percent reduction in airline taxes be a nice anti-inflationary gesture?

But no. The airlines, required by a 1976 Federal Aviation Administration regulation to use less noisy aircraft after 1984, saw an opportunity to make the public pick up the check. Instead of lowering the tax bill by about $3.3 billion, the airlines' lobby has had two measures (H.R. 8729 and H.R. 11986) introduced in Congress.

They would divert 2 points of the 8 percent passenger tax (25 percent) and 2 points of the 5 percent freight charge (that's 40 percent) into a kitty to finance new planes. The $3 departure tax would be upped to $10, with all of it going to the airlines. And a brand-new 5 percent surcharge would be placed on international cargo—all going to the carriers.

So far, these measures appear to be moving with little opposition through the House Public Works and Ways and Means committees.

In 1976, the FAA estimated that the airlines could modify their planes to conform to anti-noise requirements for a total cost of $950 million. "Retro-fitting" a Boeing 727 by installing sound-absorbent material costs only about $225,000. A new plane can run to $12 million.

But if the airlines can squeeze $3.3 billion out of an unsuspecting public, they will have acquired all new equipment, by putting up barely over half of the total cost, estimated at $7 billion. You and I will pay for the rest.

If the airlines get away with this bad precedent, then the public should expect to be the victim—through taxes—of the cost of meeting any environmental standard.

But the devious nature of this particular proposal is extraordinary. The tax is sneaky, because it is already on the books for another purpose. Without publicity, the "raid" would have taken place, and no one would be the wiser.

This gift to the airlines ought to be vigorously contested by the Carter administration.

Instead, it is keeping quiet, in the hopes that it will get some congressional votes as a trade-off for an airline regulation reform bill.

Privately, Carter aides hope to get the House bills weakened in the Senate. But if the White House really wants to control inflation, and be convincing in denials that it has muzzled Bosworth (whose jawboning has offended George Meany), it can do so easily. It can unleash Bosworth and others for an active role in whipping an inexcusable handout to the airline industry at the taxpayers' expense.

These persuasive arguments show that the closed rule for title III must be opposed when the bill reaches the floor early next week. This would permit the House to consider amendments which would reduce the airline passenger tax by 2 percent and deny the airline industry an investment tax credit on the tax gift.

We cannot let the airlines fly away with $3 billion from the Airport and Airway Trust Fund. I urge you to vote against the closed rule on this bill that will raid the U.S. Treasury.●

## MRS. "TERRI BLAKE" BLALACH AND NATIONAL GRANDPARENTS DAY

### HON CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. WHALEN. Mr. Speaker, on Sunday, September 10, 1978. America celebrates National Grandparents Day. Passed by this body on July 10 and later signed into law by President Carter on July 28, 1978, this resolution has been the special concern of one of my former constituents. Mrs. "Terri Blake" Blalach of Hollywood, Calif.

In 1955 at the corner of Hollywood and Vine Ms. Blake began collecting signatures on a 50-foot scroll for a National Grandmothers Day. Later the grandmothers designation grew to include all grandparents. During the ensuing years, Ms. Blake traveled throughout the country speaking before countless groups on behalf of an official observance of a National Grandparents Day.

Now a great-grandmother, whose 75th birthday coincidentally was also September 10, Terri Blake is living proof that one is never too old to realize one's dreams. At age 50 she embarked on a career in movies, followed by parts in such well-known television programs as "Dennis the Menace" and "Highway Patrol." In addition, her book "You Can Do It" has provided inspiration for people faced with impending retirement.

Recently, Mayor Tom Bradley of Los Angeles honored Mrs. Blalach by presenting her with the official Los Angeles proclamation of Grandparents Day. Mr. Speaker, I think it is only fitting that this body similarly recognize her tireless efforts and many years of service on behalf of America's grandparents.●

## PLAYING POLITICS WITH U.S. DEFENSE

### HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. RUDD. Mr. Speaker, I was appalled by refusal of the House today to override President Carter's veto of the defense budget authorization for next year.

Both the President and the Members of Congress who supported his veto are playing cheap power politics with the security and defense of our Nation, in an attempt to help the President's image and make him appear to be a tougher leader.

There was no reason to veto the entire defense program in the first place. If the President was sincerely concerned about the cost of the proposed new nuclear carrier, he could have used his authority to rescind funds for just that one budget item after Congress had appropriated the money—rather than delay and jeopardize our entire defense program, including vital support of NATO, just to help bolster his image.

I think it is a sad day for our country when the defense and security of our people become the victim and the hostage of politicians who are more interested in improving the President's low ratings in the polls.

In my book, this action should only serve to lower those ratings, because statesmanship has been discarded in favor of power politics.

Mr. Speaker, I was proud to vote today with the 191 Members of the House in support of the defense program, and to override the President's veto.

The Wall Street Journal's lead editorial this morning is an excellent factual commentary repudiating the President's position against the defense bill as originally passed by both Houses of Congress—including the new nuclear carrier—and this politically motivated vote to uphold the veto.

The editorial shows that plans, facilities, and construction crews are already primed to build a follow-on *Nimitz*-class nuclear carrier, as soon as the one now under construction is launched.

The design of a new oil-powered conventional carrier is not even complete. The molds and other expensive preconstruction work will have to be done all over again if we scrap the nuclear facilities. The total cost to build and operate a conventional ship will therefore eventually far exceed the cost of another nuclear vessel.

I would like to include this editorial showing the complete lack of basis for the action of the President, and the majority of the House in this matter today, at this point in the RECORD:

ADMIRAL RAFSHOON

"It's not just talk, Congress cut muscle for another layer of fat." So Gerald Rafshoon, Atlanta adman and student of the defense budget, instructs John Stennis, Melvin Price and other greenhorns who don't understand President Carter's veto of the defense procurement bill.

Admiral Rafshoon's military career has been the most meteoric since Gilbert and Sullivan's Ruler of the Queen's Navie, and he should be duly rewarded with the Order of the Cardigan and the title Lord Get Tough for helping to engineer a supposedly image-enhancing veto. But as Congress votes on the move to override, something is shaping up beyond cosmetic politics. If the veto is sustained, it will be largely through the votes of Congress's scrap-the-Pentagon bloc.

Critics of the veto in Congress include not only Armed Services Chairmen Stennis and Price, but Sen. Gary Hart, the chief apostle of a more-but-smaller-ships navy. Some who oppose nuclear carriers don't think the veto was procedurally wise, since it will reignite congressional debate on the bill's compromises and slow all military improvements. The President can count on the support of partisan loyalists like Speaker O'Neill, on votes for sale for dams or breeder reactors, and on the bloc that thinks slowing military improvements is a good thing. But among Congressmen sensitive to the merits of the issue, the administration has lost the debate.

This is scarcely surprising, considering the quality of the argument the administration has been advancing. We have already remarked on how in announcing the veto the President assailed Congress by confusing authorization bills and appropriations bills. He also remarked, "I have not had a single adviser who told me that we ought to go ahead with the nuclear aircraft carrier." We wonder if the President ever met his just-retired Chief of Naval Operations, James Holloway, who publicly testified in favor of another Nimitz-class boat last April.

Then there is the administration's persistent claim that the nuclear carrier would cost $1 billion more than the oil-powered version it wants. Some $268 million has already been spent buying the nuclear components for a new ship, and Congress figures it could finish the job for another $1,930 million. The oil-powered ship is estimated at $1,575 million. The nuclear ship comes with a 13-year fuel supply, worth $330 million in oil at current prices. Treating sunk costs as sunk, and adjusting for fuel included in one purchase price but not the other, the vastly more capable nuclear ship costs only $25 million more.

How this becomes $1 billion was explained in a letter last week from Thomas B. Ross, Assistant Secretary of Defense for Public Affairs (and, in a former incarnation, coauthor of "The Invisible Government," one of the first sensationalist assaults on the CIA): The nuclear components will be stored in case one of the present nuclear carriers breaks down, so add the sunk costs back into the nuclear purchase price. Forget fuel costs, because there are also other operating costs. Add in $200 million to put certain equipment contemplated for the conventional ship on the nuclear one as well. When you have done all this, $268 million plus $330 million plus $200 million plus the original $25 million, you get $823 million. Close enough for government work, call it $1 billion.

Now, there have been detailed life-cycle cost studies of the two carriers, most conveniently summarized in Admiral Rickover's April testimony. Including all operating costs and aircraft, the nuclear option costs 1.38 times as much as the conventional one over their respective lifetimes but the nuclear ship provides 1.45 times as many aircraft. Per plane, nuclear is 5% cheaper. And the nuclear ship is faster, freer of a logistical tail, more able to defend itself, and more able to sustain combat damage.

All of these calculations, further, are likely

to be dwarfed by a simple industrial fact. Plans, facilities and construction crews are primed to build a follow-on Nimitz-class boat as soon as the one now under construction is launched. The design of the oil-powered option is not even complete; in the end its estimated $1,575 million cost is altogether likely to work its way above the $1,930 million for the nuclear version.

The administration's contentions are simply unsustainable on the merits, which explains why it chose the essentially unprecedented route of vetoing the whole defense procurement bill. It could have asked for a simple recision without upsetting the rest of the bill, a course it took last year. But to get a recision it needs a majority in both houses, while it can sustain a veto with a third in either. And a third is an easy target because, despite much healing of the Vietnam trauma, there are still a significant number of Congressmen prepared to vote against anything military.

In pursuit of Mr. Rafshoon's "tough" image, the administration is striking an alliance with the antimilitary faction in Congress. Meanwhile, it charges that Sen. Stennis and the rest are soft on defense. By now it should be clear that the electorate wants not cosmetics but a stronger defense, and Congressmen who lend themselves to the administration's trick-mirror maneuver should be called to account in November.●

## FAMILIES: CORNERSTONE OF AMERICAN LIFE

### HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. HOLLENBECK. Mr. Speaker, at a time when many of our institutions are suspect, and are under attack from many directions, it is important that we recognize the importance of many of those institutions. One of the most important of those is the family. It is to recognize the importance of the family in our society that National Family Day is being celebrated on September 17, 1978.

In my own Ninth District of New Jersey, the celebration of National Family Day has been planned and carried out by parents, children, businessmen, workers, men, women, teachers, ministers. They come from all walks of life, from every age group, every religious faith and every political philosophy. They are united by their belief that the family is mortar in the foundation of our Nation.

Mr. Speaker, I share their belief. Although it has been fashionable in some circles to ridicule the idea of close family ties, and to mock the very idea of family love itself, the majority of Americans still know that families are important. They are a safe harbor, a constant source of strength and help. They are where we learn about life, about love, and about ourselves.

By learning how to live in our own family, we can learn how to live in the larger families of which we all are a part—the family of our friends, our fellow Americans, and or fellow men throughout the world.

So, Mr. Speaker, I commend those in my district, as well as those throughout the country who have worked so hard to bring National Family Day the recognition it deserves, and I urge my colleagues to give this day their strong support.●

## ASIAN AMERICAN PARTICIPATION IN FHWA APPRENTICESHIP PROGRAMS MUST BE INCREASED

### HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. MINETA. Mr. Speaker, the recent Supreme Court decision in the Bakke case to uphold the principle of affirmative action stands as testimony to our country's basic commitment to equal opportunity for all Americans. The Court struck down the use of quotas as a method of affirmative action, but chose to preserve affirmative action itself as an effective means of overcoming past discrimination. Although not the sole standard for selection in special school admissions and employment programs, the factors of race and ethnic origin as important criteria for consideration have been sustained.

I believe that we as a nation have a commitment to insure equality of opportunity in all facets of American life, and that affirmative action programs are necessary to fulfill that commitment. Innovative, creative, and fair ways of integrating disadvantaged persons into American life must now be designed and implemented. The Supreme Court's ruling may bring reform of current recruitment and admissions policies, but such reform must render affirmative action programs more sensitive and responsive to the special skills, needs, and talents of all individuals.

I would like to bring to the attention of my colleagues one sector of the construction industry where the needs of a particular ethnic minority apparently are not being met. The Federal Highway Administration of the U.S. Department of Transportation ordered a study to be prepared by Equivest Associates of Pasadena to assess the degree of involvement of Asian Americans in FHWA-sponsored highway construction apprenticeship programs in California. Results of the study indicate that very few Asian Americans are participating in highway construction apprenticeships generally, and few participate in FHWA support services specifically.

Formal apprenticeship training programs in California, as regulated by the State Department of Industrial Relations, Division of Apprenticeship Standards, combine on-the-job training with supplemental classroom instruction over a 4-year period. An individual apprenticeship is arranged by an agreement between the apprentice, the employer, and a Joint Apprenticeship Committee representative.

Concern for the lack of minority participation in apprenticeships led the California Conference on Apprenticeships in 1960 to propose equal opportunity committees to encourage sponsors of apprenticeship programs to devise ways of involving more minority persons. Federal and State regulations followed these early voluntary efforts, and as a result the FHWA established supportive services programs in parts of the State to act as liaisons between apprenticeship programs, potential apprentices, potential contracting companies, labor unions, and consultants from the Division of Apprenticeship Standards. Supportive services programs disseminate information about trade opportunities to eligible young adults in communities. They also prepare applicants for interviews and math and English requirements on qualifying tests for particular trades.

Asian Americans over the past decade have comprised the fastest growing ethnic group in California and, contrary to favorable stereotypes attributed to Asian Americans, poverty, unemployment, and underemployment are substantial problems with Asian-American communities. There is a great need for job training and development in Asian-American communities, particularly for young adults.

Problems are particularly severe for the Indochinese who settled in the United States following the collapse of Indochina in 1975. Of the roughly 130,000 of these recent immigrants, 30,500 have settled in California, and many are still dependent on cash assistance programs.

Currently, there exist three highway supportive services programs in California which provide assistance to minority groups, including Asians, in apprenticeship programs. The study examined these programs to evaluate their effectiveness in reaching out to Asian Americans. Asian-American apprentices were contacted to obtain their input regarding the quality of supportive services programs and their suggestions for change and improvement of such programs. Some conclusions of the study were:

(1) According to the Quarterly Training Reports from the State Department of Transportation, a total of 6 Asian Americans participated in Federal-aid highway construction apprenticeship programs in California between December 1, 1976, and September 30, 1977. While estimated 1977 census data indicate that Asian Americans accounted for 5.4% of California's population, statistics from the State Department of Transportation show that Asian Americans represented only 0.7% of the total apprentices in highway construction training programs.

(2) The low participation of Asian Americans in highway construction work in California has been due to a lack of outreach to Asian communities by apprenticeship programs in general, and by highway supportive services in particular. For example, in Southern California, the Mexican American Opportunity Foundation (MAOF), available to Asian Americans, has provided highway supportive services for the past six years. Yet most Asian American organizations in Southern California are not even aware of the existence of MAOF. Of the 14 Asian American apprentices contacted by the research study, only one was recruited by a highway supportive services program.

(3) There appears to be racial discrimination against Asian Americans within the construction industry generally, including highway construction-related apprenticeship programs. To illustrate this point, it has been documented that out of 11 Asian Americans who passed a test for a specific highway construction trade, many of them with solid educational backgrounds and work experience, not a single Asian trainee was hired by contractors participating in the apprenticeship programs.

Mr. Speaker, I believe more pressure must be brought to bear by government, by individual citizens and groups, and by the manager of recruitment and counseling services to change this state of affairs. The report which I have referred to today makes some specific recommendations for improvement:

(1) Greater communication between administrators of the apprenticeship programs and Asian American community and social service organizations should take place. Potential applicants must get the information they need to participate in FHWA-sponsored programs and supportive services.

(2) Programs to date have been geared toward blacks and Mexican Americans. Existing supportive services groups should be made to increase their sensitivity to the special needs of Asian Americans. Recruiting and counseling staffs should include members who are culturally sensitive to Asian Americans, preferably bilingual individuals who can help non-English speaking immigrants develop a working knowledge of English for qualifying tests of each trade.

(3) Existing State and federal regulations requiring affirmative action plans, goals, and timetables should be actively enforced by the FHWA in the highway construction industry to combat existing discrimination. The needs and characteristics of Asian Americans should be made clear to the industry.

The FHWA should specifically identify which ethnic groups constitute Asian Americans to both the industry and supportive services, in order to help eliminate this misconception that Asians consist only of such well-established groups as Japanese and Chinese. Stereotypes concerning the wealth and self-sufficiency of Asian Americans should be eliminated; there is definitely a large pool of highway construction trade apprentices within the various Asian American communities in both northern and southern California.

Mr. Speaker, the U.S. Department of Transportation recently gave final approval for construction of an 11 mile stretch of freeway in San Jose, Calif., within the 13th Congressional District, which I represent. I hope that this $53 million project will provide the FHWA with an opportunity to make more progress in helping Asian Americans acquire and use skills associated with highway construction.

Americans of Asian descent have made impressive contributions to the social, scientific, economic, cultural, and political development of the United States. Asian American participation in the growth of the farming, mining, and railroad industries of this country has been well documented. I urge the FHWA to adjust its apprenticeship programs to bring more Asian Americans into the highway construction industry. To do any less would be to undermine our basic commitment to equal opportunity for all Americans.●

## BALANCE(S) OF POWER SERIES BOOK II (G)—NATIONAL CHARACTER

---

## HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, in our consideration of the many factors which bear on the strategic balance between the United States and the Soviet Union, we turn next to an article written about the Soviet national character and making some comparisons with opposing American characteristics.

Different patterns of upbringing, education, national history, and other conditioning lead to behavioral responses and perceptions by a member of a nationality which would be completely unpredictable or misunderstood by a member of the other, if we did not take the time to study these differences.

The author of this selection in the strategic balance is a longtime student of the Soviet Union and Russian ways, Richard E. Pipes. By focusing on the historical experience which has produced today's Soviet elite, Professor Pipes shows why we must expect the Soviet Union to pursue a strategic role of aggression and opportunism. His article, entitled "Why the Russians Act Like Russians," first appeared in Air Force magazine in June 1970.

The article follows:

### WHY THE RUSSIANS ACT LIKE RUSSIANS

(By Prof. Richard E. Pipes)

The desire to seek explanation of a country's conduct in its history is a natural and justifiable one, since clearly every nation's outlook and behavior are in some measure influenced by its past experience. But the procedure is always fraught with danger. It is all too easy to fashion an image of another people's national character, to assume that it is eternal and immutable, and from this assumption to draw completely false deductions.

In reality, "national character" is an elusive and transient thing. In the seventeenth and eighteenth centuries, for example, the French were generally regarded as the most aggressive nation on the European continent, whereas the Germans were viewed as impractical dreamers, sovereigns of the "realm of clouds," as Voltaire called them. Then, in the second half of the nineteenth century the roles were neatly reversed, and the Germans, descending from their clouds, turned into a nation of Huns.

The Japanese, who were once thought to have inherited from their samurai ancestors an unquenchable thirst for blood, have recently become a nation of frenetic businessmen, at the same time that the Jews, whose unfitness for warfare had been proverbial, created in Israel a military machine of unsurpassed efficiency. Such examples could be multiplied many times over.

As every historian knows, that which is loosely called "national character" represents the spirit not of an entire nation, but only of that social group which at a given time happens to control the instruments of power and the organs of opinion, and manifests itself only as long as that group enjoys this control. The problem, therefore, is one of identifying the elite and ascertaining its particular experiences, interests, and expectations. Such knowledge is particularly useful in dealing with countries that have authoritative forms of government because there the ruling elite is relatively immune to public pressures.

In considering the elite that rules today's Russia and its possessions, four facts relevant to its conduct of foreign policy demand emphasis—its cultural background, the nature of its claim to authority, its class interests, and its colonial experience. Only when all four of these factors have been taken into account is it possible to understand something of that peculiar mixture of aggressiveness and caution that has distinguished Soviet foreign policy since 1917.

#### CULTURAL BACKGROUND

The Soviet elite is not the same one that had ruled Russia in the Imperial period—that is, from the accession of Peter the Great in 1689 to the Revolution. The Imperial elite, composed largely of landed and service gentry, was thoroughly Westernized; it considered itself part of Europe and in its majority emulated European models. This class was overthrown in 1917, and replaced by a new elite formed of elements that had never been much exposed to Westernization: the lower bureaucracy, small tradesmen, provincial intelligentsia, clergy, skilled labor, and peasantry. The cultural roots of these groups lay not in the Westernized Russia of Peter and his successors, but in the prePetrine culture of old Moscow, and even beyond it, in Byzantium and the Turkic tribes of the steppe.

In Imperial Russia, the ancestors of the Soviet elite had been kept out of the chambers of power. They always viewed the Western culture of the St. Petersburg court and of its gentry with distaste and suspicion. Though not averse to borrowing Western technology, especially of a military nature, they rejected the spiritual foundations on which this technology had grown. Their whole attitude toward the external world was decisively influenced by the teachings of the Orthodox Church, which more than any other Christian establishment resisted innovation and persecuted heresy. The xenophobia this Orthodox Church inculcated in its flock impressed itself very deeply on the mind of the Russian lower classes; and so did the belief that the Orthodox alone are pure and fit for salvation. This faith, in a secularized form, has remained very much part of the outlook of the Soviet elite; for although this elite professes militant atheism, it has no other culture to fall back on than the xenophobic, anti-Western culture of old Moscow.

The practical consequences of this fact are considerable. The group ruling the Soviet Union is not predisposed by its cultural background to regard itself as part of a broader international community; nor does it tend to think in terms of a stable world order that accords every nation a rightful place. Such an outlook is widespread in communities with a Protestant and a commercial culture, but it is rather rare elsewhere. The Soviet elite tends to think in terms of a perpetual conflict pitting right against wrong, from which only one side can emerge victorious. Needless to elaborate, Communist ideology with its stress on class warfare culminating in a vast revolutionary cataclysm neatly reinforces this inherited religiously inspired outlook.

THE QUESTION OF LEGITIMACY

The elite that rules Soviet Russia lacks a legitimate claim to authority, and this fact has critical bearing on its conduct of both domestic and foreign policy. Lenin, Trotsky, and their associates seized power by force, overthrowing an ineffective but democratic government. The government they founded, in other words, derives from a violent act carried out by a tiny minority. Furthermore, this power seizure was carried out under false pretenses. The coup d'etat of October 1917 was accomplished not on behalf of the Bolshevik party but on behalf of the soviets—a fact that survives today mainly in the name "Soviet Union." The soviets were representative bodies of soldiers, workers, and peasants, which, for all their structural looseness and lack of regular procedure, did in a fashion express the will of the people.

But although the Bolsheviks claimed to overthrow the Provisional Government in order to transfer power to these soviets, in reality they used them from the beginning as a facade behind which to consolidate their own authority, and the transfer was never accomplished. And, finally, the Soviet government has never dared to seek a mandate from its population. The one and only post-1917 election in which the Bolsheviks ran in competition with other parties—the election for the Constituent Assembly held in the winter of 1917–1918—gave them a quarter of the national vote, whereupon they ordered it dissolved. No elections giving the voter a choice even from among Communist candidates have been held since that disagreeable experience.

Now it is sometimes said by friends of the Soviet Union abroad that one must not apply to its government standards of democracy derived from the West. And, indeed, it is perfectly possible to exercise authority without recourse to the Western idea of popular sovereignty or by twisting it out of all semblance as Hitler had done when he claimed that the will of 80,000,000 Germans fused and became one with his own. But as a matter of record, the Soviet government makes no such claim on its own behalf: Its constitution and legal system claim to rest on democratic principles indistinguishable from our own, and hence it cannot escape being judged by them. A government that came to power by force in the name of slogans it did not honor and had no intention of honoring, and which has never dared to seek popular sanction, such a government cannot be said to be democratic no matter how broadly the term is defined. And herein lies its tragedy and insoluble inner contradiction. The yawning gap between constitutional promise and political reality stares in the eye of all but the most obtuse or cynical of Soviet citizens.

Legitimacy of some kind is essential to every political authority to justify the right of some men to order others about. The Soviet government is no exception. Unable to obtain a popular mandate, it seeks to obtain it in a variety of other ways, of which nationalism is the handiest. By appearing as the protector of Russian national interests from internal and external enemies, the regime can identify itself with the people. But to be able to do so, it must have enemies; and it conjures them up as the need arises. The atmosphere of a crisis is essential to the Soviet elite and can be counted on to remain an instrument of Soviet policy as long as the present elite remains in power.

In the 1930s and 1940s it was often said that Soviet behavior was motivated by fear. This is correct as far as it goes—only the fear is not of other peoples but of its own, and for that reason it is incapable of being allayed by concessions. Fear breeds insecurity, which in turn expresses itself, in nations as in individuals, in aggressive behavior. (It may be noted parenthetically, that the one time the Soviet Union confronted a genuine menace rather than one of its own making, namely Nazi Germany, it reacted by appeasing; its most determined reactions have always been reserved for imaginary enemies.)

CLASS INTERESTS

All elites have vested interests, or they would not be elites. But as a rule, the disparity between the interests of the elite and of the rest of the citizenry is wider in poor countries than in rich ones, and the dread of losing status is proportionately more acute. And Russia is still a desperately poor country, with a standard of living below that of some countries in the pre-industrial state of development. The bulk of the wealth created by Soviet industry since the inauguration of the first Five Year Plan in 1928 has gone into armaments and those branches of the economy of greatest direct benefit to the military. Agriculture has been ruined to pay for this most up-to-date military machine; and the consumer industry has been forced to operate on a shoestring.

This situation has not significantly changed since the death of Stalin, periodic promises of a vast outpouring of consumer goods notwithstanding (*e.g.*, Khrushchev's confident boast that by 1970 the Soviet Union would exceed the United States in the production of meat and milk). The Soviet citizen today is poor not only in comparison with his counterpart in other European countries, but also in comparison with his own grandfather. In terms of essentials—food, clothing, and housing—the Soviet population as a whole is worse off than it was before the Revolution and in the 1920s. If one considers such intangibles as access to information and the right to travel as elements of the standard of living (as they should be), then the Soviet citizenry is positively destitute.

This cannot be said of the Soviet elite, which enjoys a fairly decent standard of life. The closer a member of this group stands to the inner sancta of the bureaucratic-military-police establishment, the readier his access to the country's very limited store of goods and services, to the sources of objective information, to a passport authorizing travel abroad. No wonder, therefore, that the Soviet elite vigorously protects its privileged position and the political system which makes it possible; that it dreads democracy which would inevitably sweep away its status and force it to share the indescribably drab life of the ordinary Soviet citizenry; that it supports the regime in its nationalism and crisis-mongering.

THE COLONIAL EXPERIENCE

The Moscow state emerged on the fringe of Asia. In order to create a national state, its founders had not only to impose their authority on rival Russian principalities, but also to repel, subdue, and integrate the Turco-Mongol and Finnic populations by which they were surrounded. As a consequence, in Russia the process of nation-building took place concurrently with that of empire-building, rather than before. The two processes, so distinct in the history of Western states, in the case of Russia cannot be readily separated either chronologically or geographically. In the second half of the sixteenth century Moscow already administered a sizable colonial population of Tatars and Finns. To these were added in the seventeenth century the natives of Siberia and the Cossacks; in the eighteenth the nomads of Central Asia, the Crimean Tatars, the Ukrainians, Belorussians, Poles, Jews, and Baltic peoples; and in the nineteenth, the Caucasians and Muslims of Turkestan.

As a result of these acquisitions, the Moscow government acquired early a great deal of expertise in handling foreigners; but this expertise it gained from administering subject peoples, Western and Oriental, not from dealing on equal terms with other sovereign states. The Office of Ambassadors in Moscow knew less, comparatively speaking, about foreigners than did the various administrative offices charged with responsibility for administering immense territories inhabited by peoples of different races and religions. In some measure this also held true of the Imperial government and of the Soviet government; for techniques of government tend to survive changes of elites.

The implications are not far to seek. A country whose governing apparatus has learned how to deal with foreign peoples from what are essentially colonial practices is not predisposed to think in terms of a stable international community or of a balance of power. Its natural instincts are to exert the maximum use of force, and to regard absorption as the only dependable way of settling relations with other states, especially those located along its own borders. There is little need here for theory, because the options are narrow, and concern tactics rather than objectives or strategy.

To any one acquainted with the rich literature on the international relations of the Western powers, it must come as a surprise to learn that there is no definitive or even comprehensive history of Russian foreign relations. The literature on the theory of Russian foreign policy is so meager that it may be said not to exist. That Russians have felt no need to compile the record of their external relations or to investigate its principles is in itself a significant fact, illustrative of their general attitude toward the outside world.

THE CHARACTER OF THE RUSSIANS

These four factors impel the elite which rules Soviet Russia to conduct a dynamic and inherently aggressive foreign policy, very different from that pursued by such predominantly commercial countries as the United States, whose main aim is international stability. If the Soviet elite were not inhibited by other factors, which it is helpless to change, the Soviet Union very likely would conduct a policy of reckless external expansion such as Germany and Japan pursued in the 1930s. But fortunately, such inhibiting factors do exist, and these must be taken into account to provide a rounded picture of Soviet foreign policy.

The most important of these is the spirit and mood of the ordinary people: not only the people of Great Russian stock but also those belonging to the numerous ethnic minorities inhabiting the Soviet Union.

The Russian people have no tradition of glorifying war, perhaps because they never had a feudal culture in the proper sense of the word. Its great medieval epic celebrates not the victory of Russian arms but their defeat. Neither in the folklore nor in the proverbs of Russia is there much trace of militarism. The common people have always viewed war as a desperate act to defend one's home; and Russian troops, so effective on their home soil, have never shown much skill in foreign campaigns. This general attitude deserves comment even in the case of a country that allows its citizenry no say in governmental affairs, because in the long run the quality of the human material has considerable bearing on a government's freedom of action.

Even more significant, however, is the fact that the people of the Soviet Union are utterly exhausted. The country had been mobilized in 1914 and except for brief respites has not been allowed since then to return to normal life. Having dropped out of the international war in 1917, Russia suffered for the next three years an even more devastating civil war, followed by two years of famine. It barely recovered from these disasters during the New Economic Policy era, when in

1928 it was reharnessed into state service to carry out the most ambitious program of industralization ever attempted by a nation. To make this program economically feasible, a whole counterrevolution was inaugurated in the countryside, in the course of which the government confiscated, in the face of the peasantry's desperate resistance, its land, livestock, and implements. This tragedy was not even over when the regime launched a political massacre of nightmarish dimensions of actual, potential, or imaginary opponents.

And then came World War II. The losses in human lives which the population of the Soviet Union has suffered between 1914–1945 exceed those of any people in modern times including the Jews. They can be estimated at 2,000,000 casualties in World War I, 14,000,000 during the civil war and the famine, 10,000,000 during collectivization, 10,000,000 during the purges, and 20,000,000 during World War II, for a total of 56,000,000. The demographic pyramid of the Soviet population bears a visible scar from these stupendous losses showing a deep indentation in the age group between thirty-five and seventy, especially males.

After such exertions and bloodletting the inhabitants of the Soviet Union are simply incapable of being mobilized once again for any sustained national effort. Their fatigue is so profound that neither exhortations nor alarms can shake them from it. They require three things of which they have been deprived for the past half a century: peace, privacy, and prosperity, probably in this order. With a population in this state it is just not possible to launch ambitious drives of external expansion.

Consideration must also be given to the fact that approximately one-half of the population of the Soviet Union consists of peoples who are not of Russian nationality. This colonial population brought under Russian sovereignty by Imperial and Soviet conquest, not only shares the exhaustion of the Russians proper, but experiences a sense of national frustration as well. Neither blandishments nor prosecution have had much effect on the patriotic spirit among the ethnic minorities. They constitute a volatile and unreliable element.

Thus, a kind of dilemma arises before the Soviet elite: One of the principal factors inducing it to maintain an aggressive posture, namely lack of confidence in its popular support, also forces it to act cautiously. The Soviet government cannot risk a protracted war because such a war always makes the government dependent on its population. All the important concessions which the Imperial government had made were the consequence of long wars: the Crimean War, which compelled it to free the serfs and institute local self-government; the Japanese war, which forced it to grant a constitution; and World War I, which caused it to abdicate. These historic lessons have not lost on the Soviet Union and in large measure account for the prudence which its rulers have always shown in the face of firm resistance by other powers.

The same factor explains the haste with which the Soviet elite exploits any opportunity abroad where serious opposition seems unlikely. Guided more by the prospect of success than by any consideration of "national interest," Russian expansion follows no discernible pattern. The whole concept of "national interest," in the sense in which the term is used in the West, is altogether alien to the Russian mind. Most writings on the subject from the pens of foreigners who seek to locate behind Russian foreign policy patterns of a kind they are familiar with in their own countries. In Russian literature, prerevolutionary and Soviet, hardly anything is said on the matter. As for Communist theory, it too provides no guidelines for the conduct of a rational foreign policy insofar as the whole assumption of communism is that the forces of "progress" and of "reaction" are split along class lines, not national ones.

By and large, Russian expansion tends to focus on targets of opportunity. Historians have long noted what may be called the "pendulum" effect in nineteenth-century Russian expansion, meaning rapid shifts from one area to another in response to encountered resistance. Thus, frustrated by its defeat in the Crimean War from subjugating the Ottoman Empire, the Imperial government promptly sent its forces into Central Asia, which it conquered in a series of rapid expeditions. But as soon as the British, alarmed for the security of India, threatened to stop Russian advances in that region, St. Petersburg shifted its attention to the Far East. Defeated in Korea and Manchuria by Japan, it returned to the Balkans.

Such pendular swings can also be detected in Soviet foreign policy: for instance, the shift in 1948 from expansion in Europe—where it was halted by determined U.S. resistance—to East Asia. This evidence suggests that Russian expansion is motivated less by needs than by opportunities, less by what its elite wants than by what it can get. For this reason it is impossible to determine control over which areas would satisfy the Soviet government and induce it to assume a corporate international stance. Russia has all the territory and all the resources it needs; its external security is assured by its military power and by vast buffer zones separating it from potential enemies. If it nevertheless keeps on expanding it is precisely because its expansion is in large measure determined by internal rather than external factors, above all, by the tragic relationship of the government to its people.

DEVELOPMENTS SINCE WORLD WAR II

Developments which have occurred in military technology since the end of World War II, and particularly the emergence of a strategy based on rocketry and nuclear weapons, significantly affected the situation.

In some respects, the changes in warfare have had a positive effect on world peace. Scientific and technological warfare requires a large scientific and technical intelligentsia, whose outlook is bound to be very different from that of the traditional class of field or staff officers. That which has been learned of this intelligentsia through personal contacts during the past fifteen years suggests that it differs indeed from the rest of the Soviet elite of which it is a member by virtue of its privileged status. Soviet scientists and technicians think of themselves not only as Russians but also as citizens of the world, for they are better aware than administrators of common human problems. They are more objective and less emotional. Their whole temper is more liberal than that of the rest of the Soviet elite Their emergence is undoubtedly a healthy phenomenon, good for Russia and the rest of the world.

In other respects, the development of highly technical warfare has had a very deleterious effect on the prospects of peace. If it is true, as argued above, that the principal deterrent to a recklessly aggressive Soviet foreign policy is the unreliability of the Soviet population, then clearly any development which frees the regime from dependence on its population reduces the effectiveness of the deterrent.

The more mechanized warfare becomes the briefer and more devastating war tends to become, the less the Soviet elite needs to make allowance for the spirit of its population, the less it is afraid of war. The scientific-technical intelligentsia, of course, gains in status under these conditions; but its actual influence on government policy in Russia, as elsewhere, is questionable. It is a curious fact that the most liberal among American scientists, who have been so frustrated in their attempt to influence their own government on such issues as ABM are most sanguine about the power of their Soviet counterparts. But if they tried and failed to exert political power in a country where it is possible to appeal over the head of the administration to the mass of citizens, how can the Soviet scientific elite succeed in a country where no such opportunity exists?

On balance, the development of modern military technology will probably intensify the expansionist tendencies of the Soviet elite. It is likely to increase its self-confidence and encourage it to pursue targets of opportunity wherever they present themselves with greater boldness than before.

(NOTE. Richard E. Pipes (Ph.D. Harvard, 1950) is Professor of History and Director of the Russian Research Center at Harvard University, where he has been a member of the faculty since 1950. A former member of the Joint Committee on Slavic and East European Studies of the American Council of Learned Societies and the Social Science Research Council, he has also served as visiting professor at the University of California at Berkeley. His publications which bear directly on Russian history include: Formation of the Soviet Union: Communism and Nationalism, 1917–1923 (rev. ed., 1964); Karamzin's Memoir on Ancient and Modern Russia (1959); The Russian Intelligentsia (editor and contributor, 1961); Social Democracy and St. Petersburg Labor Movement (editor, 1963); Of the Russe Commonwealth by Giles Fletcher (1591) (co-editor with John Fine, 1966); Revolutionary Russia (editor and contributor, 1968); and Europe since 1816 (1970)).●

## AFFIRMATIVE ACTION

### HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. WALKER. Mr. Speaker, because so much controversy has surrounded the real intent to the Walker equal opportunity amendment to the Labor-HEW appropriation bill, I would like to bring to my colleagues' attention an exchange of correspondence I had with a Pennsylvania resident during the August recess.

The letter I received included the following:

I wish to express my thanks to you for the anti-affirmative action amendment introduced by you to the Labor-HEW bill. I wish you would continue to fight the affirmative action program that has gone beyond the intent of the program. . . . and may you continue to fight to restore the incentive of the individuals that are qualified.

My reply follows:

Thank you for your letter regarding affirmative action.

You should be aware, however, that while I am a strong opponent of federally enforced quotas, I am also a supporter of affirmative action. I am deeply committed to the civil rights cause and believe strongly in equal opportunity for all.

Quotas are discriminatory by definition and their enforcement by the federal government destroys the concept of merit. Men and women must be judged on their abilities not

on the color of their skin. The federal government has used quotas as a convenience rather than seeking new, more imaginative ways to bring about increased opportunities for minorities and women.

Certain institutions have had success with affirmative action, outreach programs that do not rely on quotas. Temple University is one such institution. Minority enrollment in Temple's law school has increased under their affirmative action programs which retain the merit concept as an integral part of the admission process.

Cordially,

ROBERT S. WALKER.●

## TOP 15 DISSIDENTS

### HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. COLLINS of Texas. Mr. Speaker, the other day I had an interesting discussion regarding who would be the first dissidents to be eliminated. Here are the 15 groups listed in the order of priority:

(1) Preachers, (2) Military Leaders, (3) College Professors, (4) Writers, (5) Newspaper Staffs, (6) Politicians, (7) Jewish Communities, (8) Business Leaders, (9) Bankers, (10) Land Owners, (11) Sick and Infirmed, (12) Black Communities, (13) School Administrators, (14) Policemen and Firemen, (15) Lawyers.

The way the subject came up was the present trend toward nationalization and the way this Government is building more and more toward an all-powerful dictatorial Federal Government. If the Government continues this trend, which is gaining in momentum, it is believed that we might reach a complete nationalized state within 10 years.

We can look to the history of nationalized states to see how dictators establish their authority. Some are nationalized according to the Communist system and others have used the Fascist system. Anytime you have an all-powerful Federal state, the first thing the ruling dictator will do is murder all dissident groups. Obviously, the first group to be murdered would be the preachers, rabbis and priests. There is no God in a Fascist or Communist society because the state is God.

The next groups to be murdered would be all the leaders of the military. This would include not only the officers but also the sergeants, who are the backbone of the service. A dictatorship must have absolute control of the military.

Then on highest priority would be the independent-thinking college professors, writers, and responsible news staffs. In a dictatorship there is no tolerance for independent thinking. The government position is the only position. The writer with the fiery pen is buried the first day.

Politicians would be the next group. They would probably get about 90 percent of the politicians, as there are probably 10 percent that are fast enough on their feet and lack political conviction to where they could assimilate into the new movement.

If we refer to history, we would see the next group to suffer would be the Jewish community. In order to make a public appeal, the dictatorship would take one group and blame them for everything. Because the Jewish people are smart, hard working, and prosperous, it is also a group that is widely envied. Hitler with Fascism showed how quickly a dictator moved against the Jewish people. The same thing occurs with the Communists, so either type of dictatorship sees the entire Jewish family threatened with annihilation.

To gain popular support brings on redistribution of the wealth and giving the masses something for nothing. That means all the business leaders, bankers and any landowners that have more than 200 acres must be shot.

During the transition to a dictatorial state, the productivity standards drop, providing less in the way of material goods. So then they kill all of the sick and infirmed. These people are not able to produce and are only consuming, so the cold-hearted but effective solution is to eliminate them.

Italy used the black community as a target. The blacks have been oppressed in history. Dictatorships always concentrate on minorities.

Then we round out the group of the top 15 with the school administrators, policemen, firemen, and lawyers. School administrators would probably be eliminated within the first 2 weeks, as dictators must control the minds of the young generation in order to build a Fascist or Communist state. Policemen and firemen represent law and order and the dictatorship will choose their own. Lawyers would round out the group. Lawyers would be killed because they simply talk too much, and are contentious by the nature of their business. In a completely nationalized state, there is no need for lawyers because the government is the law.

The interesting part about preparing this list was the fact that so many of the groups, who will be the first to be killed, are the strongest advocates of building up a complete federalized, all-powerful, nationalized state.

Compassion and lack of common sense motivates many of our great leaders of public opinion. Constantly from the pulpit and from the press do you hear the suggestion and pressure for the Government to extend its bureaucracy to provide more regulations, collect more taxes, and extend more Government controls. As the Government now gets 42 cents out of every dollar of the gross national product, the Government greedily seems nearing the point where it wants to take it all.

All of the leaders of free enterprise would be the first to be killed. Because to operate an all-powerful, nationalized government, there is no room for a dissident voice. In China, they have been very successful in having the men and women march out together to the field for 10 hours of good work. Six days a week they work and they like it. The ones who voiced objection were buried soon thereafter. Today, all the citizens hear, read, or see are the Government's views.

The irony of the situation is that many individuals who encourage the people of this country to move toward an all-powerful Federal welfare state will be the first ones that the all-powerful Federal Government will eliminate. As we know, when these governments took over in Germany, Russia, and China there were between 10 and 40 million people killed. Will you be one of the first in the blood bath?

Why does not the United States move again toward freedom of the individual? Why do we continue to centralize all the power in Washington? Why does the Government spend so much and tax so heavy? Let us pray that America's leaders from coast to coast reestablish the United States of America as a land of freedom and opportunity for all?●

## THE TRAP

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. LONG of Maryland. Mr. Speaker, the preservation and protection of wildlife and the environment have always been of major concern to me. I have sponsored several measures in Congress to insure the humane treatment of animals, such as the Endangered Species Act and the Marine Mammal Protection Act, which are both public laws now.

I was therefore particularly pleased to note that my bill to curb use of the steel jaw leg-hold trap, H.R. 3516, was commended by the winner of this year's essay contest sponsored by Friends of Animals, Inc. and the Committee for Human Legislation, Inc.—organizations which do outstanding work to combat the mistreatment of animals. The admirable goal of this nationwide contest for college students is to foster a new environmental ethic that extends consideration to all forms of life.

I am pleased to share with my colleagues excerpts of the prize-winning essay by Anne E. Reiner—University of Texas, Dallas—entitled "The Trap."

The excerpts follow:

THE TRAP

The notion of man's uniqueness in his ability to reason, along with the Biblical concept of "dominion," combine to produce the conviction that man owns the earth and all the nonhuman creatures that inhabit it, to use as he pleases. This attitude is the trap which holds all animalkind in its jaws, helpless and doomed, just as surely as the mechanical device which is but one of its manifestations.

While the immediate purpose of this essay is to support legislation banning a particularly inhumane device, the leg-hold trap, its ultimate aim is much more profound. There is an urgent need to bring into public awareness the attitudes governing our actions toward the other species with whom we share this planet. These attitudes must be consciously examined, evaluated in terms of present-day knowledge, and either reaffirmed

or repudiated. Considering the immediate plight of animalkind, it is imperative that we weigh the consequences of each course of action open to us and follow our convictions as to which choice best demonstrates our "humanity."

There is cause for optimism in the fact that many of our policies toward nonhuman animals are increasingly becoming the subject of public debate. Awareness of specific injustice can initiate the process whereby we begin to make valuative judgments regarding the rationale behind our policies. When an informed public begins to recognize this rationale as a hollow shell of habit, prejudice and greed, a more realistic view of man's place in the hierarchy of life may be adopted. Nothing less than a major change in man's attitudes will suffice to free animalkind from its hopeless situation. Only when man ceases to look upon animals as useful objects and truly regards them as fellow living creatures, perhaps our only companions in the universe, will "the trap" be destroyed.

Arrogant man finds it demeaning to accept Darwin's reaffirmation of the unity of life, of our kinship with the beasts. Instead, Darwin's concept of individual and species competition, "the survival of the fittest," has been used as justification for man's domination of all other life forms. Two centuries earlier, Thomas Hobbes had described the state of nature as a "war of all against all." The attitude generated from a synthesis of these two concepts seems to be that man, the fittest species, must subdue all others in this war in order to survive.

We tend to forget that each species of animal (including man) and plant existing today is already a winner in the eons-long competition with others fighting for the same ecological niche. This "forgetfulness" is symptomatic of our picking and choosing among available information, incorporating into our attitudes only those facts that do not disrupt our comfortable habit patterns.

If we were truly rational beings, we would employ our "reason" to integrate new knowledge, as it becomes available, into our existing value system, and base our actions thereon. Instead, however, we have exercised our rationality by "rationalizing" our culturally determined attitudes and behavior. Instead of allowing habit to determine our behavior, we should exercise our supposed free will: *decide* which attitudes are based in reality and *choose* to act in accordance with them.

Until rationalization gives way to rationality, animalkind will remain caught in the trap from which the only release will be extinction.

In the process of rationalizing our prejudices against nonhuman animals, many characteristics are asserted to be uniquely human. Recent animal behavior and ethological studies, however, indicate that animals may possess some of these characteristics in varying degrees.

Some traits that seem obviously shared by both humans and nonhumans are the ability to feel pain and fear, to grieve, play, dream, and even to act altruistically. These are evident to anyone who has ever shared his home with a cat or a dog.

Less obvious in animals are the abilities to use language and to engage in abstract reasoning. Many people consider the latter to be dependent on the former; but even language is no longer considered strictly a human acquisition, especially since the successful experiments in teaching American Sign Language to chimpanzees.

The fact that animals share these abilities in varying degrees with humans, together with the fact that many humans lack them, in the same measure, destroys their validity as absolute distinctions by which to define "man."

The search for additional characteristics that purportedly distinguish man from other animals becomes more frantic and more absurd. It also creates its own pitfalls:

"(A)cademic writers tend to forget that the high-flown disparities they sometimes mention as of the essence of man are of enormously little concern to most non-academic men. If animals, on these criteria, are less than human, so are men."

Unless new, more accurate distinctions are invented soon, we shall be forced to consider the possibility that nonhumans might be heir to the same natural rights claimed for humans. Since the subject of animal rights has been so exhaustively explored by many writers, only the salient points need be mentioned here:

(1) If, indeed, humans do have rights, the only irrefutable criterion for granting those rights to all humans and only humans is, as Peter Singer has so thoroughly demonstrated, outright speciesism.

(2) It is claimed that humane laws already in existence were not passed for the purpose of protecting animals' rights, that their sole purpose is to benefit humans on the ground that cruelty to animals corrupts morals. If, however (and as seems more likely), these laws were adopted and are obeyed for the benefit of animals: if we believe

". . . that such treatment is something we *owe* animals as their *due*, something that can be *claimed* for them, something the withholding of which would be an *injustice* and a *wrong*, and not merely a cause of damage, then it follows that we do ascribe rights to animals."

Whatever the semantics involved, whether or not animals have rights in the legal sense, it would seem that a more responsible interpretation of the term "dominion" implies that man does have obligations toward those who are incapable of looking after their own interests, whether human or nonhuman. In a sense, we have "dominion" over children and the mentally incompetent; but this does not grant us the license to inflict harm on them. As Clark points out, "Let it be that animals have no *rights*—they can still be wronged."

The leg-hold trap, one incarnation of the trap which has been the subject of this essay, need hardly be described in detail. It is a device used to harvest the pelts of wild animals. Traps are preferred over guns because much less damage is inflicted on the pelts; this ensures a higher market value. Except when traplines are laid near human habitation, very few children and pets suffer injury or death because of them. Since animals cannot read, there is no way to warn nontarget wildlife that all who are not beavers, or foxes, should avoid certain areas. Should a nontarget animal be caught, the trapper faces the inconvenience of disposing of its carcass and rebaiting the trap. If he has killed an eagle, or a member of some other endangered species, after all, this was not his intent.

One could go on, but the message is already clear. As long as trafficking in furs remains profitable, trappers will continue to use the most efficient device available.

The Williams-Long bills (S. 818 and H.R. 3516) seek to negate this profitability by forbidding interstate and foreign commerce in fur and leather from any state or country in which the leg-hold trap is not banned. Both bills further seek to prevent the use of such painful devices by discouraging their manufacture, sale and use in the United States.

True progress consists of many small steps taken in the direction of a goal. Supporting these bills is one small step we can take toward our goal: respect for the worthiness of all creatures to share life on this earth.●

## AFL–CIO PRESIDENT GEORGE MEANY'S POSITION ON DEFENSE AND FOREIGN POLICY

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. DERWINSKI. Mr. Speaker, one of the most respected American voices on foreign affairs is that of AFL–CIO President George Meany. He has devoted much of his career to fighting for free trade unionism and against efforts of Communism to take over labor organizations throughout the world.

Therefore, I am especially pleased to call the Member's attention to Mr. Meany's remarks on defense and foreign policy. President Victor Bussie of the Louisiana AFL–CIO delivered Mr. Meany's speech to the 60th annual convention of the American Legion in New Orleans on August 22. The speech follows:

It gives me great pleasure on behalf of the AFL–CIO, to extend greetings and best wishes to the delegates and guests attending the American Legion's 60th Annual Convention.

I wish it were possible for me to present these greetings in person. Unfortunately, my schedule requires me to forego the delights of New Orleans, and I have therefore asked my good friend, Victor Bussie, to present these words for me.

One of the reasons I had hoped to be able to appear before you is that I know that among your ranks are many members of the AFL–CIO. This should come as no surprise. After all, when the peace breaks down, it is the working people of this country who are called upon to fight.

So whatever differences we may have on other policy matters, we share a common interest in maintaining peace. And, like the American Legion, the AFL–CIO believes that the surest force for peace in this world is a strong America, second to none.

I would like to take this opportunity to tell you something about some of the basic principles, some of the philosophy, that underlie the AFL–CIO's outlook on world affairs.

First of all, we start out with a vested self-interest, if you want to call it that, which we are not afraid to declare: We have an interest in the development of free trade unions throughout the world—not only on the moral grounds that all workers should have some of the good things in life that we have won in America, but also on the economic grounds that we don't want unfair competition from workers earning 50 cents or 75 cents an hour. We can't compete with those wages and support the American standard of living.

Now, in order to have unions, you have to have a climate in which human rights are respected. Without the freedom to assemble, to associate, to speak, and to strike, workers cannot establish or sustain effective trade union organizations. Human rights are the life blood of trade unionism.

So, long before President Carter launched his human-rights campaign, the AFL–CIO urged that the promotion of human rights throughout the world be undertaken, not simply as a moral crusade, but as an essential, integral part of our nation's foreign policy.

In the final analysis, what should be the goal of our foreign policy, if not the reversal of the totalitarian tide and the expansion of the democratic world community? Take this

away, and what have we left as a worthy object of foreign policy? The protection of private business investment abroad? Is that a goal that can justifiably claim the lives of workers and their sons?

So, as far as the American labor movement is concerned, the advancement of human rights and material well-being are not only the proper business of American foreign policy but should be its centerpiece. It is our trump-card.

We were, therefore, delighted and encouraged when candidate Jimmy Carter made human rights a theme of his Presidential campaign and then, after his election, made a number of dramatic pronouncements that focused world attention on human rights as an international issue and helped to restore meaning to American foreign policy.

For those actions we have repeatedly applauded the President. We have defended him against those in both parties who have criticized him for speaking out too loudly against Soviet violations of human rights, and we have noted that some of those critics would not apply the same "quiet diplomacy" to those of our allies whose human-rights records are wanting.

Of course, we believe the President's words and his deeds should match. Otherwise the language of human rights, which has inspired millions, would turn sour and a great opportunity to shift the moral balance of power toward the West would have been lost.

Some would prefer the President to scale down the rhetoric. We prefer to raise our deeds to the level of our democratic commitment—in other words, to do what we say.

In recent months, the Soviet Union has cracked down mercilessly on those of its citizens—like Orlov, Shcharansky, and Ginzburg—who have demanded that their nation live up to the human-rights provisions of the agreement it signed in Helsinki. It is clear that one of Mr. Brezhnev's objectives in this crackdown is to get rid of the dissident movement, at least in Moscow, before the 1980 Olympics.

But it is also clear that the jailings of Orlov, Scharansky and Ginzburg—as well as the incarceration of Vladimir Klebanov in a mental institution for trying to form a free workers movement—these acts not only violate the rights of the individuals involved: they violate a solemn international agreement which the Soviet Union signed with the United States and 33 other countries in Helsinki.

What has been the response of our government to these repeated violations of Helsinki?

Have we yet said that, if the Soviet Union continues to violate the human-rights provisions of Helsinki, we will not feel bound to respect the other provisions? No. In effect we have declared ourselves to be unilaterally bound by the Helsinki accords.

Have we yet said that, in view of the Soviet government's refusal to live up to the Helsinki agreement, we shall reconsider the advisability of entering into another agreement with them—on SALT? No. So far, we have said in effect that we are determined to sign a SALT agreement no matter what—and without regard to the issue of trust, of credibility.

Have we yet said that, we will use all our technological and economic leverage to press for Soviet compliance with Helsinki? No. After first considering cancelling the sale of oil drilling technology, the President decided to go ahead with the sale—thereby giving the Soviets the indispensable tools to develop their Siberian oil resources at the very time they are moving in on the Middle East oil that Europe and Japan desperately need.

So far, our only response to the barbaric trials of Soviet freedom fighters, aside from cancelling some official visits to Moscow, has been to stop the sale of the Sperry-Univac computer to TASS.

Now, I am not against signing agreements with the Soviet Union. I am not against negotiating with the Soviet Union. But I can tell you, as a trade unionist of more than half a century's experience, that if our labor leaders negotiated with employers the way our government has negotiated with the Soviets during the last 10 years, the rank and file would throw us out.

When we sit down at the bargaining table, we go tit-for-tat. We concede, the boss concedes. We give, he gives.

But that's not the way the U.S. has dealt with the Soviet Union. There has been no reciprocity. We give, they take.

Everything in my experience tells me that erosion of the principle of reciprocity, steady accommodation to totalitarian power, if not checked will lead to war. Twice before in our century appeasement led to war. If it happens again, it will be the last time. Thereafter the planet earth will repose in the peace of the graveyard.

I believe we should tell the Soviet Union, for starters, that we will not be complicit in their effort to create a dissident-free environment for the 1980 Olympics. The AFL–CIO has called for moving the 1980 Olympics from Moscow to a country which respects the human rights of athletes and all other persons. I hope the American Legion will join us in this effort.

I also believe that President Carter should inform the Soviets that, owing to their repeated and blatant violations of the human-rights provisions of the Helsinki Final Act, we no longer feel bound to abide by the other provisions—especially those economic, scientific, and trade provisions which are so disproportionately beneficial to the Soviet Union.

I believe the President should also make it clear to the Soviets that no SALT agreement can be signed, whatever its terms, until we have good reason to trust the Soviet Union to live up to such an agreement—and no such good reason can exist in the face of continuing Soviet violations of Helsinki.

I guess this goes by the name of "linkage"—and I'm for it. Linkage means that we apply our strengths—technological, economic, and moral—to Soviet weaknesses. The alternative to linkage is steady retreat before probing, advancing Soviet power.

"Linkage" is, I think, Henry Kissinger's term. Brezhnev talks about the "correlation of forces"—by which he means the balance of power in political, diplomatic, economic, *and* military terms. He sees the "correlation of forces" shifting to the advantage of the Soviet bloc. I fear he may be right.

If such a shift is taking place, it is based on one area of Soviet strength: its indisputably growing military strength.

When Dr. Kissinger was Secretary of State, he was asked whether we had lost our military superiority, and he said: What can you do with military superiority? Well, we may not know what to do with it, but the Soviets surely do. They know that military superiority not only makes possible military adventures of the kind the Cubans are carrying out for them in Africa, it also makes possible political and diplomatic pressures which weaker countries cannot withstand. And who can deny that for many small and weak countries, lacking the capacity for independent action, the choice between East and West will rest on their perception of our relative military strength and our will to use it?

Therefore, when it comes to national defense programs, the AFL–CIO has only one standard, one criterion. What do we need to do to maintain a favorable balance of power?

We reject the notion that bombers, submarines, and tanks should be built because that would create jobs. That has never been the position of the labor movement and, if it were, that position should be rejected by the rest of society. To create weapons of mass destruction in order to reduce unemployment would be immoral—and a confession of bankruptcy by our society.

We also reject the notion that we should *not* build bombers, submarines, and tanks in order to create jobs—or to make more funds available for domestic social needs. What good does it do to clear our slums and eliminate poverty if we then succumb to totalitarian military power—or are incinerated in a war brought on by a destruction of the balance of power?

We are therefore opposed to simplistic approaches to defense spending. We are opposed to just lopping off a certain percentage of the defense budget and transferring it into the social sector without regard to the real dangers on the international scene.

So, as far as we are concerned, the only legitimate questions to be asked about a particular weapon or weapons system is: do we need it? If we give it up, what will the other side do?

Now, I am not a military expert, but I do know something about collective bargaining, and I wonder: Could we not get iron-clad guarantees from the Soviets about the security of Western Europe in exchange for not constructing the neutron bomb?

I could cite other examples but they all can be quickly summed up: Is the conduct of foreign and defense policies by "good example" a sound policy?

If we show a sincere interest in disarmament by disarming unilaterally, will the Soviets do likewise? If we show restraint in Africa, will they do likewise? If we change our visa policies to allow Soviet agents disguised as trade unionists to tour our country, will they let Andrei Sakharov come and go as he pleases?

I doubt it. I doubt it will moderate Soviet behavior, reassure our allies, or protect our interests.

I propose our foreign and defense policies not be based on "good example" but rather on reciprocity.

I am convinced that the American people are tired of those in both political parties who have rationalized defeat and retreat by the language of detente. I think they are tired of those in both parties—and they are in both parties—who talk about human rights while accommodating militarily, diplomatically, and politically to the system that tramples human rights.

Following World War II, Americans came together behind a bipartisan foreign policy consensus which helped to maintain the peace, to rebuild war-torn Europe, to contain Communism, and to facilitate the independence movements of colonial peoples.

We cannot go back to the past. But we can put behind us the divisions, the self-doubt, and the illusions of the post-Vietnam era, and commit ourselves to a bipartisan policy whose goals would be unchallengeable military strength, and a completely reciprocal relationship with the totalitarian world.

Only on such a foundation can we hope to champion the course of human rights throughout the world.●

## TRADE READJUSTMENT ASSISTANCE PROGRAMS

### HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. SARASIN. Mr. Speaker, tomorrow the House of Representatives is

scheduled to consider H.R. 11711, a bill which attempts to improve the trade readjustment assistance programs. Although the measure had been scheduled to come before us on two previous occasions, time constraints prohibited our consideration until after the August district work period. Now, unfortunately, I find that I will be unable to participate in tomorrow's proceedings.

However, I do have very strong feelings about this legislation and the amendments which will be considered, and I would like to share my thoughts with my colleagues.

I strongly support the provisions of H.R. 11711, for the extensions and revisions to the TRA program are absolutely necessary. There are several areas of concern to me, though, concerns that focus on the extent of coverage provided under this measure. In particular, I am referring to section 112, dates of effective enactment. While the committee will seek to amend this section, the intent will remain the same. The sections dealing with individual trade readjustment allowances will still apply only to those people who have been separated from employment 60 days after date of enactment.

This will not allow us to protect those workers who, at the date of enactment, are in an approved training program and receiving benefits. Under these circumstances, an individual's benefits could easily expire prior to the completion of their training program, and in many cases, these workers will be forced to terminate their training programs prematurely. This is not the intent of the TRA program, and we should not take action which will harm those workers affected by trade or jeopardize their opportunities for future employment.

Fortunately, we will have the opportunity to correct this oversight during tomorrow's consideration. Congressman JIM JEFFORDS and I have drafted an amendment, which he will offer, to insure the inclusion of these people under the new TRA provisions. We did so because this is an issue of equity for the worker now in the program. While we cannot help those people whose benefits have already expired and who have already terminated their training programs, we cannot disregard the plight of those workers currently in programs—workers who sincerely believe that this measure will help them.

I strongly urge my colleagues to accept the Jeffords amendment tomorrow.

There is another amendment which I wish to call to the attention of my colleagues. Mr. CLEVELAND will introduce an amendment that would reinstate Federal reimbursement to the State for unemployment compensation benefits paid to workers who are eligible for adjustment assistance under provisions of the Trade Act. A good part of the responsibility for lost jobs lies with Federal trade policies, and the Federal Government should assume the financial burden of their impact. My own State of Connecticut is a good example of this serious problem. We have paid nearly $400,000 in unemployment benefits under the Trade Act, and this amendment would ease a burden that few States can afford.

In conclusion, I urge my colleagues to support final passage of H.R. 11711 and to support the two correcting amendments.●

## EMBARGOES ARE OF QUESTIONABLE VALUE

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. FINDLEY. Mr. Speaker, the disturbing tendency of using embargoes of U.S. exports to achieve political goals has persisted in American history, cropping up intensely from time to time. Recent years have seen such a time, with both the executive and legislative branches too willing to restrict the export of American products in futile attempts to influence the policies of foreign states. All such policies accomplish is a reduction of our exports and damage to our domestic industries and balance of payments. An analysis by Robert L. McNeill shows with special clarity the fallacy of such trade restriction policies. My colleagues would do well to pay careful notice to the article which follows:

AMERICA NEEDS MORE INTERNATIONAL BUSINESS

(By Robert L. McNeill, Executive Vice Chairman, Emergency Committee for American Trade)

During the Napoleonic Wars, Americans were outraged at the excesses of the combatants, England and France. In order to influence their behavior, we imposed an embargo on foreign commerce. The result was a disaster. New England almost broke away from the young Federal Union; President Jefferson wisely gave up the attempt to use the pressure of withholding American exports as a lever to influence the behavior of other nations.

I believe it is time that we re-examined some of the assumptions behind present-day policies that may be well motivated but are threatening to strangle American exports and overseas earnings.

Why? Because these policies are not working. Just as they did in Jefferson's time, they are hurting our exports and they are hurting Americans. But they are not doing anything to change the habits of other nations. They are, in fact, nothing but a windfall to our competitors. The result is that the American dollar is in a nosedive. It is only because of the absence of better alternatives that foreign nationals still hold on to their American dollars and accept new ones.

In the first 25 years after World War II, the United States earned billions of dollars in foreign trade surpluses. Our post-war cumulative trade surplus—excluding foreign aid shipments—was over $100 billion. We used that money wisely to build up investments overseas that poured profits into the United States.

In 1976, sales from American-owned companies located abroad amounted to $515 billion. If it weren't for the profits on those sales, the dollar would be in even deeper trouble.

Today, the shoe is on the other foot. In 1977, the United States had a trade deficit of $27 billion and other countries are investing that surplus here in the United States. This is not unwelcome. It helps maintain an equilibrium in international accounts. Still, it has caused the American dollar to plummet in value and it serves to make the world think that American strength is waning.

In my opinion, there is no reason that the dollar should be deprecated or depreciated. A rise in American exports would restore confidence in our currency and such a rise is well within our reach.

Thanks to our continental economy, the United States is capable of applying more resources to efficient production than any nation or group of nations in the world. It is for that reason that we are able to export 41 percent of the construction and surface mining machinery that we make, and 25 percent of our aircraft, and 22 percent of our agricultural chemicals.

In few fields have we shown the world more how our economy makes us efficient than in agriculture. We export 25 percent of our corn, 45 percent of our wheat, 57 percent of our milled rice and 60 percent of our soybeans.

These exports—$121 billion worth in 1977—provide millions of Americans with jobs, generally good jobs at higher pay than in industries where there is little export activity. But we need more exports. Other industrialized and agricultural nations are fiercely competing in world markets. They want the existing business and the new business. Nowhere is this competition more intense than in the new markets of the so-called developing nations, particularly those in the Middle East.

Many trade experts think that these markets are going to be critical to the future of advanced industrialized countries like the United States. The New York Times reported on July 30 that:

"Some observers, including Lehman Brothers chairman, Peter G. Peterson, a former Secretary of Commerce, see the engine for growth of United States exports as the Third World countries, markets that remain virtually untapped. Increased trade with developing nations would also relieve some of the tensions that would arise if American goods began flooding industrialized countries' marketplaces."

However, other experts like John W. Sewell of the Overseas Development Corporation caution that "An increasingly competitive world economy will require the United States to improve its export performance, overcome investment bottlenecks in export sectors, and put more resources into research and technological innovation."

That sounds reasonable, but are we doing it? I regret to say we seem to be doing just the opposite. In the case of the Middle East, we are limiting the ability of our exporters to obtain orders by technical requirements in legislation such as the anti-boycott provisions in the Export Administration Act.

The head of Deere & Company has informed the Congress that one such technical requirement has prevented the company from bidding to supply a substantial number of tractors from its Dubuque, Iowa factory. A successful bid could have resulted in U.S. business worth $18 million and 20,000 man days of work for Deere & Company's United States employees.

That is just one self-inflicted set-back. We also have legislation that makes it difficult to engage legitimate agents in developing countries. The result is our competitors are taking away business. The purpose is well-intentioned—to prevent questionable payments. Still, if American companies are so worried about a wrong interpretation of paying an agent that they avoid the use—the traditional way of doing business in many countries—the business will go to companies in Europe and Japan.

Much of our export business is also being held up by the restrictions on financing of shipments to countries that do not meet American standards on human rights or concern for the environment.

Again, the result is not to change the ways of these countries, but to take away needed American jobs. According to the July 19,

1978 Wall Street Journal, "The State Department is blocking an Export-Import Bank loan to Argentina for 20 large turbines and other equipment for a major hydroelectric power project." The company who would supply this equipment, Allis Chalmers, has said that unless the Ex-Im Bank relents, "We shall have no alternative but to inform the Minister of Economy (in Argentina) that Allis Chalmers will undertake to furnish the equipment from facilities in other countries where financing will be available." Good-bye to $268 million in exports.

All of this makes no sense. Americans need such business. We can restore the dollar to prominence if we help our exporters, not hurt them. It wouldn't take that much help. Our economy could easily pump out the additional goods that other countries need—even more than enough to cover our deficit in petroleum exports. That would balance the books on the high side—where the United States ought to be. The results would be beneficial to everyone. For every billion dollars of exports produces tens of thousands of American jobs. C. Fred Bergsten, Assistant Secretary of the Treasury for International Affairs, recently said that "One out of every five jobs in this country now produces for exports to other countries. One out of three dollars of corporate profit in this country derives from international activities of American firms."

We could increase these percentages. I say we have to increase them. But to do so we must be more practical and more realistic about international trade. Let us review some of the practices that restrict our exports and get rid of them and then let us look for new methods of delivering the goods to the rest of the world.●

## NATIONAL GRANDPARENTS' DAY

### HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. SARASIN. Mr. Speaker, as ranking member of the Human Services Subcommittee of the Select Committee on Aging, I have heard many witnesses testify to the neglect, indeed, abuse, of our country's senior citizens. America has not always been kind to its elderly, and we cannot pretend, by setting aside 1 day or 1 month, that we are adequately recognizing our elderly—our grandparents. I think it is fitting, nevertheless, that we have established a Senior Citizens' Month and a National Grandparents' Day to pay some small tribute to our elderly population.

Nearly a third of Americans are now choosing to remain single and some suggest that even the family itself is well on its way to becoming a thing of the past. With the decline of the family as an important element of our society, we are beginning to see our parents, grandparents, and children grow farther and farther apart. Alex Comfort, in his book "A Good Age," touches on the decline of intergenerational exchange, but is, finally, supportive of maintaining the essential contact between grandparents and grandchildren. I have included the section on "Relatives" from Mr. Comfort's most important work:

RELATIVES

One consequence of contraception, of changing family habits and a falling child death rate has been a shortage of kin, compared with the large traditional human family. The "extended family" on the Jewish, Chinese or Italian model has been overpraised—as well as mutual support, it generated pressures we now are unwilling to accept. Apart from the fact that one of numerous nonlib daughters could be drafted, often to her lifelong hurt, to "look after" older relatives, the great advantage of the extended family in later life was less its size than the cohabitation and intermixture of generations. With urban housing this was bound to decline anyway. The surrogates for generations sharing a house are the car and the telephone, but these don't provide constant interaction for the old with grandchildren, who become only occasional visitors. The older dynamics of the three-generation family have effectively disappeared.

Relatives, especially children, are people on whom you are perfectly entitled to rely for support of many kinds, but the folklore of independence has much that is valid in it, and children when adult aren't necessarily the people you most want to talk to. The real need of older people is for friends rather than the relatives of earlier peasant-type societies. Dr. Jacob Boronowski, the author of The Ascent of Man, remarked that Americans tend to be friendly, but friendless. In fact, all ages seem to be in a social transition from relationship-based to friendship-based social bonding.

The ideal outcome of this, envisaged by Tolstov, Thoreau, the early Christians and the hippies, is the "all people are brothers and sisters" formulation. This, however, remains hot air unless some quite powerful charismatic interaction takes place. At present we lack the use of straightforward concern, which gets neutralized by "independence" as an ideal in America and by "privacy" as an ideal in Britain, and do not universally draw bonding from religion—the nearest approach is through parareligious behaviors like humanistic psychology and the encounter group. At the same time, the void left by kin is widely sensed, and probably accounts for the appeal of "growth" movements among middle adults, and even the quite extensive reappearance of the Eskimo expedient of wife exchange, the aim of which is in fact to create surrogate kin, by one of the strongest types of primate bonding.

We cannot now predict how the children of this transition period will age. They will certainly be more peer-dependent and less kin-dependent, they may still go to encounter groups rather than to churches; ideally, if society is by then age-blind, the active extrusion of each generation by the next will have gone. In the meantime, grandparenthood is and will remain as basic a human learning experience as is parenthood, both for child and for grandparent. In all cultures good grandparenting tends to limit parent-child overexposure, which is particularly onerous in our isolated small-family households. Being an active grandparent is one continuing responsibility of seniors which they should hang on to, difficult as the institution of serial polygamy may make this. Children in general like the company of grandparents. They also like to hear about the past, and telling them about the past has a function, so don't confuse this with doting reminiscence. This is how tradition is passed on. Every wise young parent will involve grandparents to the full. Even if you fear that your own parents will be overindulgent or oversevere to your children, remember that exposure to a different set of child-rearing ways is highly beneficial to children as a learning experience in the diversity of people. Since few children who don't live with them get overexposed to grandparents, comprehension between grand-generations is often high.

Victor Hugo: "When you are old, you feel like a grandfather to all small children." ●

## JULIA REED PALMER AND THE AMERICAN READING COUNCIL

### HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. REUSS. Mr. Speaker, the July 17, 1978, issue of Publisher's Weekly contained an informative article about the work being done by Julia Reed Palmer, chairman of the American Reading Council in New York. The council, under Mrs. Palmer's dedicated leadership, has been working on innovative and successful methods of improving literacy and reading skills, particularly for young people in our inner cities. These methods can and should be expanded to all of our cities, and I want to share the article, by Frank G. Jennings, with my colleagues.

The article follows:

ARC: WORKING TO WIN YOUNG READERS

(By Frank G. Jennings)

Since Julia Palmer founded the nonprofit American Reading Council three years ago, the membership has been energetically promoting two sets of programs. The first makes good books available, at cost, to parents and children. The ARC's elementary-school, paperback bookstores are open to parents and run by the students themselves, as a form of career education. The children's involvement in the project gives them a strong motivation to improve in reading and mathematics. And the stores make inexpensive books accessible in an ongoing program. Where these stores exist, reading scores go up; school library use and family reading sessions increase dramatically. Experience has proved boys and girls who browse and buy books—with their own money—make a commitment that goes beyond that of a child who is given or loaned a book by an adult.

The Council's second program makes the same, good, inexpensive softcovers available for sale to parents through book racks in day-care centers and nursery schools. Even parents in low-income areas seize the opportunity to create a home library for themselves and their children.

Palmer's interest in creating the Council stems from her long career as a teacher—largely in poverty areas—and as chairman of the successful Brooklyn Bookmobile, "Buttercup." She says that the idea of the ARC, however, was suggested by Dr. John Niemeyer, retired president of Bank Street College; Dr. Nancy Larrick, reading specialist and author; John Franz, formerly head of the National Book Committee, and Lucille Thomas, head of the New York Library Association. ARC also has the support of two former U.S. Commissioners of Education—Francis Keppel and Dr. Sidney Marland, as well as of the present commissioner, Dr. Ernest Boyer.

The ARC manages a special program for inner cities, a bookmobile to be combined with a Community Library Program, which will make the underutilized resources of libraries in these locations available to bookmobile graduates.

The bookmobile operation has been most gratifying, attracting previous nonreaders who now read as many as 16 books in 16 weeks. In addition, the program hired and trained semi-literate teenagers, giving them

basic education and job skills. Familiarity with the bookmobile also gave parents education and material for them to help their children to read more and appreciate books.

Plans for the Community Library Program will encompass the same features and add parent-education classes, after-school book and game clubs and other activities on matters of local interest. Both programs will run year-round and be extremely cost effective. (The bookmobile circulated books at approximately one-third the cost of the average public library.)

In Newark, N.J., the Public Library Board of Trustees has voted to implement the Community Library Program at its Central Ward branch, if ARC can get funding.

It is Palmer's belief that books should be made as available and attractive as drugs. To start her program required money, and money required an organization with purpose, legal status, a management and policy body (trustees and advisors) and tax-exempt status.

"We obtained a small grant from a charitable foundation and started business," Palmer says. The Council has prepared manuals on how to start and run a bookmobile to serve poverty areas and how to set up and operate school bookstores, set up book racks in day-care centers and nursery schools, and established a routine for encouraging similar activities throughout the country. Moreover, the ARC has sent proposals for funding future inner-city operations to a number of foundations and requested congressional legislation to fund the Council's programs. They report some progress, with the encouragement of HEW and the White House.

The biggest disappointment to date, says Palmer "is that the publishing industry has yet to offer any tangible support, although some of the leaders and many of their assistants have expressed interest in some or all of the aspects of the Council's work. In fact, one of the principal problems that arose in obtaining legislative support was the constant question from Congress: 'If the Council is helping with reading, where are the publishers?' "

Palmer notes that the British Bookshop Association's success with schoolchildren may serve the U.S. as a model. She reports a visit with Mrs. Clodagh Albrough, whose British enterprise is called "Books for Your Children." Last year Mrs. Albrough sold 1,600,000 children's paperbacks. "Imagine," says Mrs. Palmer, "these books are sold only through school bookstores or through what she calls community booksellers. If her figures are correct—and John Donovan of our Children's Book Council says she has the highest credentials—her average school bookstore is selling nearly 5000 books a year." Palmer believes that a comparable program in this country would have a potential for as many as 40,000 such school bookstores.●

## FORMER VETERANS' AFFAIRS COMMITTEE CHAIRMAN BRYAN DORN SUPPORTS HANLEY AMENDMENT

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. TEAGUE. Mr. Speaker, the former chairman of the Committee on Veterans' Affairs, the Honorable William Jennings Bryan Dorn of South Carolina, has made a strong statement in support of continuing veterans preference in Federal employment. He has outlined his views in a statement in which he supports the proposed Hanley amendment which will preserve veterans preference.

So that all Members will have the benefit of Mr. Dorn's views on this issue, there follows a copy of his statement of August 3:

VETERANS PREFERENCE

William Jennings Bryan Dorn, former Chairman of the House Committee on Veterans Affairs, said today he contacted members of the South Carolina Congressional Delegation and others in Washington and urged them to push for passage of the Hanley Amendment to preserve veterans preference.

The proposed bill (H.R. 11280), scheduled for House action next week, Dorn said, would erode veterans preference laws which have been fought for and established over a 200 year period. Any weakening of these laws now could be the entering wedge to abolish all veterans preference including VA hospital, insurance, housing and GI education programs and even benefits for widows, orphans and dependants of veterans.

The high unemployment rate for Vietnam veterans, Dorn said, is already of grave national concern. This bill would discriminate against Vietnam veterans at a time they need special help. This bill could adversely affect 6 million Vietnam veterans and terminate benefits for 20 million World War II and Korean veterans. Unless the Hanley amendment is approved, Dorn continued, 6 million Vietnam veterans, some 2.4 million of whom served overseas in Vietnam, will lose their veterans preference by 1987.

This is no time, Dorn said, to abandon the principal of equal benefits for equal service. Veterans who fought for their country in time of national emergency believe this bill is a calculated step to destroy veterans benefits. This is the first time, the former Congressman said, such legislation has been seriously proposed. The public sympathizes with the Vietnam veteran who fought so gallantly in a filthy, undeclared war 10,000 miles from home.

Too many people, Dorn said, forget too soon.●

## SEVENTH-DAY ADVENTIST CHURCH IN SYRIA

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. DERWINSKI. Mr. Speaker, recently, I received a letter from Baron Frary von Blomberg, President of the International Religions Council, calling my attention to the problems of human rights in Syria, and more specifically the complications encountered by the Seventh-Day Adventist Church in Syria.

Because of the savage slaughter of Christians in Lebanon by Syrian forces, I offered an amendment to the foreign assistance appropriations bill which denied Syria of $90 million in economic assistance. My amendment was adopted by a large margin in the House, much support has grown for its Senate counterpart.

I wish to direct Members' attention to a brief outline of the history of the Seventh-Day Adventist Church in Syria:

HISTORY OF THE SEVENTH-DAY ADVENTIST CHURCH IN SYRIA

In 1947 the government gave the Seventh-day Adventists permission to worship and to open schools. The permit was issued from the Prime Minister's office.

In 1951 a church was built in Bazak which today is called Rauda, near Tartous. After one year, a revolution occurred in Syria and the church in Rauda was closed.

Pastor Chafic Srour was told that he was not free to worship or preach. He was asked to sign a paper stating that he accepted the declaration given in 1947 as being invalid.

Although the church in Rauda was closed in 1951, the Seventh-day Adventists continued meeting in the homes of the members. Three pastors led out in the worship services.

Around 1955, some of the workers were put into prison, but after being taken to court, they were found not guilty. After 15 days they were released. During these years, different permits to sell books, operate a correspondence school, etc. were issued by the government.

In 1965 the Center in Damascus was opened. In connection with the Center there was a small church. Nobody stopped or even questioned the members about worshiping . . . they had freedom to assemble. However, in 1970 six people were taken to prison and the building in Damascus was left vacant.

The six people: Pastor Gabriel Katrib, Pastor Zaki Hennawi, Faris Dow, Adel Tayyar, Fahmi Lewis, and Michael Tannous were held for 92 days and investigated and questioned thoroughly so that everything was known about them. They were found not guilty. After being freed they were told not to preach as before until the government studied their case and gave permission.

Pastor Gabriel Katrib was moved to Lebanon, but Pastor Zaki Hennawi stayed in Syria. We knew that the building was frozen and we were not allowed to sell it. After a short time it was occupied.

Since then the Seventh-day Adventists tried to ask permission for our members to worship, but have so far been unsuccessful.●

## SOCIALIST WORKERS PARTY PROGRAM: INFILTRATE TRADE UNIONS, SUPPORT TERRORISM

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. McDONALD. Mr. Speaker, the Socialist Workers Party (SWP), the U.S. section of the Trotskyite Fourth International (FI), reconfirmed its program of support for revolutionary terrorist groups and of infiltrating the trade unions at its "Active Workers and Socialist Educational Conference," held August 5–12, 1978, at Oberlin College. The SWP conference was attended by 1,550 people, 400 more than the organizers had expected.

A new development at this SWP conference, held in nonconvention years, was the presence of members of the Puerto Rican section of the Fourth International, the International Workers League, who reported that they were recruiting from and working within the Committee to Free the Five Puerto Rican Nationalists. The Committee to Free the Five, as it is known, is a support group for terrorists from the Puerto Rican National-

ist Party who are serving Federal prison terms for the attempted assassination of President Truman in 1950 and for shooting several Members of Congress in 1954. The Committee to Free the Five groups in Chicago and New York have been closely linked with the terrorist Fuerzas Armadas de Liberacion Nacional (FALN).

The Puerto Rican Trotskyites said they have been able to stop the Puerto Rican Committee to Free the Five from making public statements in support of terrorism and to restrict discussions of terrorist "armed struggle" to private debates within the organization.

THE SWP AND TERRORISM

The Socialist Workers Party pretends in public that it disapproves of "terrorism." In fact like its sister Trotskyite Communist Parties in the Fourth International, the SWP supports "revolutionary armed struggle" including terrorism so long as the actions are carried out under the direction of their party which they claim is the real representative of the masses. The Trotskyites, like other Marxists-Leninists, term as terrorists those who commit violent acts outside the control of the party.

From 1969 until 1977, the SWP led a minority faction in the Fourth International which opposed the FI majority decision to make terrorist "armed struggle" a strategy for attracting new recruits and building a mass revolutionary movement. The debate was summed up by SWP Political Committee member, Mary Alice Waters, an SWP delegate to the FI's International Executive Committee, as follows:

> The majority held that they too were for building parties but that revolutionary parties could only be constructed today in Latin America if the Trotskyists proved themselves the best guerrilla fighters, arms in hand. Such was the only path to either the vanguard or the masses.
>
> The minority felt that such a strategy could only lead to the political miseducation of the entire world movement and the decimation of the small Trotskyist parties and cadres in Latin America. Logically it would have to be extended beyond Latin America to other parts of the world.
>
> * * * * *
>
> Other supporters of the Latin American majority document have tried to shift the discussion onto the axis of "for or against armed struggle." We reject any implication that that is what the discussion is really about. If supporters of the minority view were against armed struggle, they would be Social Democrats or Stalinists, not Trotskyists. What we reject is the strategy of "pick up the gun" as the road to power. As a strategy it stands in the way of the construction of mass revolutionary parties * * * and that is what the debate is about.

Since the 1969 decision of the Ninth World Congress, terrorist activities have been conducted by sections of the Fourth International in Argentina, Bolivia, Peru, Spain, France, England, Ireland, and the Middle East. In areas where the Fourth International sections have been too weak to themselves launch terrorist activities, they have provided logistical support for existing terrorist movements such as the Marxist terrorist movements in Southern Africa and the Palestine Liberation Organization (PLO).

It cannot be too strongly emphasized that the question in the Fourth International debate over terrorist "armed struggles" has always been when to use such tactics, not whether to do it. As SWP National Committee Member Peter Camejo wrote in 1973:

> Guerilla warfare is only one form of the utilization of arms. It cannot be correctly counterposed to terrorism.
>
> The word "terrorism" is commonly used to mean the politics of those who believe that violent actions against individual bourgeois figures can bring about social change, precipitate a revolutionary situation, or electrify or help mobilize the masses even if undertaken by isolated individuals or groups. Terrorism in that sense is rejected by the Marxist movement. But under conditions of civil war, terrorist acts can have a totally different political import. Their isolated nature fades. In the process of an insurrection, terrorist acts may be advantageous to the workers movement. They may also be damaging. But terrorist acts that are not part of a generalized mass armed struggle remain isolated and are detrimental to the workers movement.

The Canadian section of the Fourth International which works closely with the SWP, wrote the following in 1972:

> Lenin, of course, did not reject terrorism "in principle" * * *. Marxists do not reject any method of struggle "in principle." We judge each method according to one criterion: "will this method, used at this time and in these circumstances, advance the cause of proletarian revolution?" If the answer is yes, then we use the method if we are able. If the answer is no, then we don't. We are concerned only with effectiveness, and anyone who reads the works of Marxism on terrorism * * * will see that effectiveness is the only criterion used.

As it has turned out, the arguments of the SWP-led minority faction in the Fourth International have proved correct. The Argentinian Trotskyite terrorists have been virtually wiped out; and there have been serious reverses in the other areas in which the FI sections have directly engaged in terrorism. In a series of mergers, rival FI factions in Mexico, Canada, and other countries have healed their splits. Additional mergers are being planned in Ireland and several other countries.

The Fourth International recognizes now that their involvement with terrorism did not result in the recruitment of many new cadres and that it resulted in intense investigation by the police and security agencies of many Western nations. In order to expand their political base for future terrorist "armed struggle" operations, the Fourth International sections are attempting to penetrate the trade union movements of many countries, to take advantage of the anti-nuclear and disarmament movements, and to infiltrate various social democratic and some Communist Parties. But this does not mean that the Fourth International sections are ending their involvement in terrorism. Logistical support is being provided to terrorist "national liberation movements" in the Middle East, Southern Africa, Iran, West Germany, Spain, Ireland, and Corsica; and wherever feasible, the FI sections are expected to fulfill their "armed struggle" mandate themselves.

WORLD POLITICAL SITUATION

This double Fourth International drive of "party building" by involvement in the trade unions, antinuclear movement, and other organizations while providing support for many terrorist groups was made plain in the address by SWP National Secretary Jack Barnes to the conference audience. Barnes announced that a special convention of the SWP would be held in 1979 to select delegates for the upcoming 11th World Congress of the Fourth International. He said that the SWP's draft resolution on the world political situation would call for all FI sections to follow the SWP lead in penetrating the trade unions to make them the basis of a revolutionary movement.

With the healing of the FI factional disputes, the FI majority obviously agrees on most points with Barnes and company. The FI's confidential, members-only International Internal Discussion Bulletin (IIDB), vol. XV, No. 5, July 1978, gives its entire 28-page issue to the text of the FI majority's draft resolution on "The World Political Situation and the Tasks of the Fourth International."

The draft resolution has a number of interesting points which would require analysis too lengthy for this report. However, the Trotskyite discussion on "Eurocommunism," the latest intellectual fad among American liberals, is of interest. According to the Fourth International majority:

> * * * What is new in so-called Eurocommunism is the emphasis these bureaucrats place on their "independence" from the Kremlin. Formerly they rode high on the popularity of the Soviet Union, particularly after its victory over German imperialism. Today they seek to rid themselves of the political cost of publicly associating so intimately with the Kremlin. In the past, sharp turns in the international situation, to which Moscow responded with total reversals in foreign policy, would cause these mass Communist parties to make abrupt shifts in line. Under current conditions, such overnight reversals run the risk of causing disastrous losses of trade-union influence and voters.
>
> * * * * *
>
> Nevertheless, the Eurocommunist CPs have not cut their links with the Soviet Union, the "socialist camp," and the "world Communist movement." In fact they do their utmost not to let their more critical stance toward the Kremlin injure these links.

The Fourth International majority's draft resolution goes on to set forth as the priority tasks a number of projects involving providing support to terrorist movements, and "party building" by infiltration of other organizations. These included:

"Backing oppressed nations and national minorities in their struggle for liberation." Among the targeted groups specified are the Irish in Great Britain, the Corsicans in France, the Basques in Spain—all of which have active terrorist groups in operation among them; black revolutionary movements in Southern Africa; "and the blacks, chicanos, and Puerto Ricans in the United States."

"Participating in the struggles of poor peasants and working farmers." The

targeted countries included Peru, where Fourth International Leader Hugo Blanco, convicted of killing three police officers in a terrorist raid in the early 1960's, has returned following his election to the new Constituent Assembly at the head of a peasant-based coalition; Egypt, where the Trotskyites hope to use discontent that led to rioting in 1977 against the government of President Sadat; Mexico, the site of serious "land invasions" by unemployed peasants; and Spain.

"Defense of the revolutionary struggles of oppressed peoples that have been singled out by reactionary forces as special military targets." This includes "defense of the Palestinian people against the U.S.-backed military onslaught of the Israeli Government;" the "defense of the peoples of Southern Africa against the predatory attacks mounted by the racist regime of South Africa;" the "defense of the Cuban revolution against the belligerent threats, bullying tactics, and systematic economic and diplomatic pressure amounted by U.S. imperialism;" "defense of Vietnam;" and support for the Irish Republican Army—Provisional Wing demand to remove the British Army from Northern Ireland where it has successfully battled the IRA Provo terroists.

With regard to the Palestine Liberation Organization, the FI document urges the "Palestinian resistance" to "mobilize support among the millions of workers and poor peasants from Morocco to Iraq" not only to gain support in current political maneuvers, but in order to form a mass Arab revolutionary party to overthrow the governments of "Arab reaction," which is, of course, the PLO's long-term goal. Target countries include Tunisia, Morocco, Jordan, and Egypt. Also targeted is the "peace movement" inside Israel, and the draft resolution notes, "This antiwar sentiment can expand swiftly into political opposition, and shake the stability of the Israeli Government."

Providing "full assistance" to the Bertrand Russell Peace Foundation and to Amnesty International "in their defense work" for revolutionary "political prisoners" in Northern Ireland, Iran, Argentina, Brazil, Chile, and other countries is also an urgent task for FI sections. The Trotskyites view the "human rights" campaigns as ways to aid the revolutionary movements in those countries and as ploys to increase their contacts and credibility among revolutionary groups.

Supporting the antinuclear protest movement. The recent swift expansion of the antinuclear movement is of great significance. Its international character facilitates coordination of protest actions in a number of countries. The Trotskyists everywhere have met with a friendly reception in the antinuclear movement, demonstrating the opportunities open to the Fourth International in this arena.

Encouraging the formation of Trotskyite youth groups; and supporting the expansion of the women's liberation movement.

Ending Fourth International factional disputes.

Increasing electoral activities by Fourth International sections. "In many ongoing struggles, well-chosen initiatives can lead to substantial gains for the party. Fruitful work can be accomplished in the electoral field. The point is to organize campaigns that bring to the fore the favorable response of the Trotskyists to new advances by this or that sector of the working class and its allies. * * * Systematic campaign initiatives of this kind around key questions of the class struggle and political life can decisively consolidate party-building gains and help project the party's program as a general solution to the problems affecting all sectors of the working class and its allies. Under the present conditions of unemployment, well-planned campaigns for a shorter workweek without reductions in pay, closely linked to growing favorable sentiment inside the unions on this question, are an important example."

Penetration of and "fraction work inside mass Social Democratic and Stalinist parties, their youth groups, and mass organizations dominated by them." It should be noted that the SWP uses the term "faction" to denote an organized, formally declared grouping within the party, while a "fraction" is a generally secret grouping made up almost entirely of party members working within an outside organization such as a trade union, women's organization, or community group.

Among those named as targets are the Jusos (Young Socialists) in West Germany; the Finnish Socialist Youth; and in France, the CERES—Centre d'Etudes, de Recherches et d'Education Socialistes. Also subject to FI "colonization" are "Eurocommunist" parties such as the Communist Party of Spain and related parties such as the Japanese and Australian Communist Parties and the Venezuela Movimiento al Socialismo (MAS), a 1971 split from the Venezuelan Communist Party which has gained increasing strength.

"Defending sections and members of the Fourth International subjected to repressive measures." The draft resolution complains that "under the guise of 'battling terrorism' " by the offshoots of the Red Army Fraction/Baader-Meinhof gang and the "Carlos network" of international terrorists, the West German Government is conducting "a witch-hunt reminiscent of the McCarthyite period;" and attacks the governments of many countries in which the Trotskyites have been involved in terrorism such as Argentina, Chile, Spain, and Japan, where local Trotskyites have been involved in the violent riots against the new international airport, for cracking down on the activities of revolutionaries. The document continues:

As justification for hitting Trotskyists with special vindictiveness, a sustained effort has been made by reactionary forces to paint the Fourth International as a "terrorist" organization. Two of the most vicious agencies have been the CIA and FBI. * * * The American Socialist Workers Party and the Young Socialist Alliance have taken the lead in countering this witch-hunt. Through a $40 million suit against the government, they were able to uncover a great deal of evidence * * * and set in motion similar suits by others * * *.

The campaign of the SWP has greatly aided the efforts of the world Trotskyist movement to counter the propaganda smearing it as a "terrorist" movement. The Canadian section has taken a similar initiative against the Royal Canadian Mounted Police. Increased attention should be paid in the coming period to possibilities of this kind in other countries.

During the conference, a representative of the Swiss section of the Fourth International described how a campaign against the federal security agency was being conducted. The West German and Scandanavian FI sections have been looking into similar projects.

SWP LAWSUIT AGAINST THE FBI

SWP National Committee member, Larry Siegle, gave the main presentation on the SWP lawsuit against the FBI. He boasted of the Justice Department's lack of understanding of the SWP's motive in bringing the lawsuit and how the Justice Department's lawyers complained of their "unreasonableness" in refusing to make deals and concessions.

Speaking at a mass rally to support the lawsuit, Siegle said he had some news that the audience had not yet heard. He proceeded to give his version of a meeting called by the Justice Department earlier this year in which the U.S. attorneys offered to settle out of court and pay the SWP several hundred thousand dollars if the SWP would agree to give up its demands for the remaining FBI files, including the files on the FBI informants in the SWP. Said Siegle:

We authorized our negotiating team to make a simple and very reasonable proposal: give us millions of dollars and all files.

He said that the Justice Department response was to merely offer still more money in settlement and propose that the FBI files on the SWP be sent to the National Archives where no one could view them without the permission of the U.S. Attorney General. The SWP rejected this out of hand in favor of continuing Federal court litigation where the SWP, thanks to unbelievable Justice Department misfeasance, ignorance, and incompetence, has gained access to almost every document and file it has demanded.

Siegle said that the Justice Department does not understand the SWP's motives in filing the suit and went on to elaborate:

By the rulers' standards, we are unreasonable because we're not interested in helping them find a way out. We're interested only in exposing their system. * * * That's why we're not going to let Bell or Carter and the FBI off the hook. We're going to take full advantage of the openings presented by this case to mobilize all victims and potential victims of the FBI to strike a blow against the political police and the class they defend.

Siegle said:

We've one goal and one goal only, and that is to educate and organize and mobilize the working people of this country to use their power to defend their own interests, to take control of this country in their own hands, and to bring to power a workers government.

Siegle did not give his rally audience

any details of the "State Terror" instituted under the direction of Lenin by the SWP's hero, Leon Trotsky, after the "workers government" took power in Russia in 1917.

TURN TO THE TRADE UNIONS

First on the list of Fourth International priorities in the draft resolution of the Fourth International majority is "continuing the proletarian orientation." Recognizing that the majority of Trotskyites are recruited from among student, intellectual and professional classes, the document orders that "these cadres * * * be led to make a turn in this direction without further delay." And why must the members of Trotskyite parties give up their present jobs and take jobs in heavy industry so that they can join industrial unions? Why? Says the FI majority:

Their participation in trade-union fraction work from the base of jobs in industry can perceptibly increase the rate of successes of the party's political campaigns * * * by showing the workers how to think socially and act politically. * * *

On the internal level, it will facilitate training leaders and solving organizational problems in all aspects of our work. * * * The goal is parties of experienced worker-Bolsheviks who view themselves as political leaders of their class and its allies.

During the SWP's "Active Workers and Socialist Educational Conference," SWP National Committee member, Andrew Pulley, a member of United Steelworkers Local 1066 at the U.S. Steel Gary Works, encouraged the members of the SWP's steelworkers fraction to keep in mind that the "socialist order" would come about "only when a revolutionary party has been built that leads the masses of workers in action." Said Pulley, the role of the SWP was to gain the confidence of rank-and-file union members for a struggle to "transform the unions into revolutionary, fighting instruments."

In his opening presentation, Jack Barnes commenced by warning the Trotskyite cadres colonizing the industrial unions not to fall into the "trap" of "bread and butter unionism" by merely demanding higher wages and better working conditions. He said:

Simply sending the majority of our present cadres into industry and into the industrial unions is not in and of itself the solution to building a mass revolutionary party of workers. The key to doing this is winning thousands of workers to the party. Our goal is building a mass party of workers, a party that * * * represents the working class, by organizing its most advanced militant fighters in its own ranks.

What Barnes was saying is that the Trotskyite party will organize only the "vanguard party" numbering thousands of U.S. working people, and that party will then claim to speak for the "masses" by ruling them in the usual Leninist top-down structure. The millions of American workers will be "represented" by a centralized party composed of their alleged "leaders." Even Jack Barnes admitted that "Getting a big majority of our members into industry and into industrial unions now is a tactic to facilitate building such a party, nothing more."

It was reported that the SWP had increased its membership in the USWA to 130 members of which 30 were people recruited from the steelworkers by SWP colonizers. These SWP members have been assigned to work to be appointed delegates of the USWA to conventions of various union groups. It should be noted that not every member of a fraction need be a SWP member, but all fraction members operate as a disciplined unit under tight SWP control.

Rival Communist Parties were of considerable concern to the SWP during the convention. The activities of the Revolutionary Communist Party (RCP) and the breakaway Revolutionary Workers Jarvis were of considerable concern for the competition they provide in recruiting the trade union members. SWP union activists were particularly concerned with RWH leadership of the Good Contract Committee which led the wildcat strike of postal workers at the Jersey City Bulk Mail Center which handles much of the mail for the New York metropolitan region. According to the SWP, the RWH's Good Contract Committee has some 150 members and was willing to dampen sectarian differences and accept support from the SWP and other revolutionary groups.

The SWP members were told not to seek union offices, and that only in unusual situations, with approval from the SWP, to accept them. The Communist Party, U.S.A. (CPUSA) was strongly criticized for having its members and allies run for top union and local posts as "Stalinist bureaucrats." However, in several fraction meetings, SWP members discussed the value of running for "grassroots" union posts on grievance committees and as shop stewards. The examples of the RCP and RWH in these areas was noted. Participants in several fraction meetings told how their relatively open SWP membership and sale of the militant was advantageous in attracting individual militants to their cause.

During the conference, trade union fraction meetings were held that were closed to all but fraction members and top SWP organizers for auto workers, building trades, rail workers, shipbuilders, transit workers, public employees, teamsters, teachers, National Organization for Women (NOW), machinists, molders, postal workers, electrical workers, hospital workers, and printers.

During the conference Tony Austin, of USWA Local 12243 in New Jersey announced that the SWP would open two new branches in Gary, Ind., and Birmingham, Ala., both steel centers.

The national priorities for the SWP were outlined during the conference by Betsey Stone, of the National Committee. She stated that in addition to the present SWP trade union concentrations on steel, auto, rail, and coal, the party is planning to expand into the electrical and machinists unions, the Oil, Chemical, and Atomic Workers (OCAW), and help form a national fraction in the Teamsters.

SWP NATIONAL PROGRAMS

Other SWP national campaigns for 1978–79 include:

Support for the Equal Rights Amendment and full involvement in the national conference of the National Organization for Women (NOW) to open October 6, 1978, in Washington, D.C.

Support and involvement of the YSA in the regional conference of the North East Coalition for the Liberation of Southern Africa (NECLSA) to be held at New York University, November 17–19, 1978. An NECLSA Steering Committee meeting will be held September 30, 1978, at Yale University to make final plans for the conference. Operating from the offices of the American Committee on Africa (ACOA), 305 East 46th Street, New York, N.Y. 10017 (212/838–5030), the NECLSA's Divestiture Working Group will sponsor a Midwest Conference on University Investment in South Africa to be held at Northwestern University, October 20–22, 1978. The SWP and YSA will join some 50 other U.S. organizations invited to participate.

The SWP is also supporting the upcoming October U.S. tour by Drake Koka, founder and general secretary of the Black Allied Workers Union (BAWU) of South Africa in 1972, and a cofounder and first general secretary of the Black People's Convention (BPC), outlawed last year. According to the SWP, Koka fled to Botswana to avoid arrest for his participation in the Soweto rioting in 1976.

Increased efforts to colonize the anti-nuclear and disarmament coalitions, the Clamshell Alliance, the Mobilization for Survival (MFS) and related groups. This included SWP participation in the Louisville, Ky. No Nukes Strategy Conference held August 16–20, 1978, at which proposals for national and regional mass demonstrations were discussed; and will include strong SWP and YSA involvement in the upcoming second national MFS conference in Des Moines, Iowa, September 15–17, 1978.

Joining with the CPUSA's National Alliance Against Racist and Political Repression (NAARPR) in a campaign to free the Wilmington 10, particularly aiding in organizing a large demonstration this fall.

Using the Hector Marroquen case for recruiting in the Mexican-American community.

Attempting to greatly increase sales and circulation of "The Militant, Perspectiva Mundial," and launching a new theoretical journal to replace International Socialist Review which ceased publication in 1975, despite obvious financial strains which caused the closing of the regional offices of "The Militant."

INTERNATIONAL EVENTS

As at previous SWP conferences and conventions, "corevolutionists and friends" from Trotskyite parties in foreign countries were present and participating in the work of the meetings. Among the countries represented were Belgium, France, West Germany, and Switzerland; Iran and Israel; Australia and New Zealand; Canada, Mexico, the Dominican Republic, and Columbia.

Fourth International activities in a number of foreign countries were the subject of formal and informal meetings during the week-long conference. Gus

Horowitz, a member of the SWP National Committee who uses the alias "Galois" on the FI's International Executive Committee, spoke on his trip to Peru to witness the return of Hugo Blanco. Horowitz had been accompanied by Fred Murphy who presented a series of slides he had taken in Peru. Blanco ran on the ticket of an electoral front, the Front of Workers, Peasants, Students and the People (FOCEP), that received 12 percent of the vote in the Peruvian Constituent Assembly vote on June 18.

Blanco is a leader of the Peruvian Fourth International section, the Partido Socialista de los Trabajadores (PST). His goal is to unify the PST with the five other Trotskyite parties in Peru and bring them all into the Fourth International. Unification meetings were said to be planned for to start at the end of August and Peter "Pedro" Camejo had been designated the SWP's representative.

A representative of the Ligue Marxiste Revolutionnaire (LMR) (Revolutionary Marxist League), the Swiss section of the Fourth International, reported on the LMR Fourth Congress held in Lausanne in July. The LMR was formed by a core of some 100 French-speaking Swiss who split from the Swiss Communist Party (PdA) (Labor Party) in May 1978 in a protest against the French Communist Party decision not to back the student militants. The LMR claims more than 500 members and 1,000 sympathizers.

The LMR stated it had been working in the Swiss and Western European antinuclear movement and in a campaign against the Swiss federal security agency. Its representative said that in line with the "unified" FI line, the LMR is abstaining from direct involvement in violence and terrorism while attempting to expand its political base for future revolutionary activity.

The LMR claimed to have strength in the Swiss teachers and government employees unions, leading a strike of teachers in Geneva in 1977. It has been involved in electoral politics since 1973, and claims about 3 percent of the vote in Geneva and a number of rural farming villages where LMR cadre who are school teachers have developed followings of students and young adults. The LMR emphasized the importance of work among students by Trotskyist "revolutionary socialists."

Reportedly the LMR congress decided to enter candidates in many 1979 cantonal campaigns and will attempt to work with certain other leftist groups in presenting joint electoral slates, but rejected electoral cooperation with the Swiss Labor Party (the pro-Moscow Communist Party) or with the New Left Swiss Progressive Organization (POCH). The LMR also was said to have some 17 trade union militants on its new Central Committee. Like the other FI sections involved in a "turn" to the trade unions, the LMR hopes to make the unions instruments of class struggle with the openly declared aim of overturning existing power relationships, labor peace, and eventually the social, economic, and political order.

Chile is another area of increased Trotskyist activity. Chilean Anibal Vargas and the SWP's Rich Finkel led workshops on the history of the Chilean Marxist movement and on developments since the 1973 military coup. The Moscow-dominated section of the Chilean Socialist Party (PSCh) now called the External Secretariat and headquartered in East Berlin has been in a factional dispute with the secondary PSCh leadership that remained in Chile and has an external base in Mexico City that is called the National Coordination of Regional Committees (CNR). The SWP shares many of the CNR's criticisms of the Moscow-controlled External Secretariat, and the FI is clearly cultivating a relationship with the CNR.

The SWP noted that the terrorist MIR (Movimiento de la Izquierda Revolucionaria—Movement of the Revolutionary Left) had had Trotskyists among its initiators and the services it had provided to Salvador Allende's Unidad Popular coalition government. It was reported that a number of Latin American Trotskyist exiles in Sweden, where FI Peruvian leader, Hugo Blanco, had spent several years until his return to Lima in July, have begun publication of Combate, and that a new U.S. publication, Convergencia Revolucionaria, was available from Conrev Publications, DLD 63, 310 Franklin Street, Boston, Mass. 02120.

The Chile solidarity presentations concluded with the statement that the Socialist Workers Party "can contribute to the building of a revolutionary party in Chile by maintaining a relationship with exiled Chileans now living in the United States."

It is noted that the report on the MIR made little comment on the fact that its overseas headquarters are in Havana, or that the MIR has become increasingly active in Chile during a time of political stress for the ruling military government, with MIR's July activities including planting bombs in a Santiago bank and subway station and the armed robbery of passengers on a bus.

SWP RALLY

On August 11, those participating in the SWP's conference attended a rally to celebrate the successes of the SWP lawsuit against the FBI. Greetings were read from what the SWP terms "Stalinists" meaning veterans of the Communist Party, U.S.A. such as Anne Braden; from veterans of the pro-Hanoi anti-Vietnam movements such as David Dellinger, Dave McReynolds of the War Resisters League, Distributive Workers District 65 President David Livingston, and Dr. Benjamin Spock; and from Kate Millett, Attorney Leonard Boudin, Dick Gregory, and Walter Johnson, president of Local 1100 of the Department Store Employees Union.

In addition of Larry Siegle, rally speakers included:

Vernon Bellecourt, International Indian Treaty Council (IITC) and member of the national council of the militant American Indian Movement (AIM), who announced that AIM had assembled a team of lawyers, legal workers, and researchers to work on the 80,000 pages of FBI files recently released under the Freedom of Information Act.

Mary Zins, an SWP member in the United Mineworkers of America Local 284 who was active in organizing support for the July march in Washington, D.C., in support of the equal rights amendment by the National Organization for Women.

Sra. Rosario Ibarra de Piedra, a founder of the Mexican National Committee to Defend Political Prisoners.

Anne Sheppard Turner, a member of the Wilmington 10 convicted of arson conspiracy.

George Novack, a veteran SWP leader.

Robert Meeropol, of the National Committee to Reopen the Rosenberg Case and a son of the executed Soviet atom spies who represented the Fund for Open Information and Accountability (FOIA) and called for "unity" of all political parties and tendencies "against today's repression" in the struggle "forward toward justice, toward peace, and toward socialism."

Hector Marroquen, now a member of the SWP and its youth group, the Young Socialist Alliance (YSA), wanted by Mexican authorities on charges of having committed terrorist acts as a member of the 23d of September Communist League. Marroquen described his recent meeting in Washington, D.C., with Immigration and Naturalization Service Director Leonel Castillo who said Marroquen would be granted political asylum if he could prove he would be "persecuted if I return to Mexico."

Patricia Wright, SWP candidate for Governor of Ohio.

Maceo Dixon, SWP National Committee.

Olga Rodriguez, SWP Southwest Field Coordinator and National Committee member.

LEADING SWP ACTIVISTS

The following members of the Socialist Workers Party or its youth arm, the Young Socialist Alliance (YSA) took leading roles in the 1978 "Active Workers and Socialist Educational Conference as speakers, and as leaders of classes and workshops:

Rashaad Ali.

Eugenia Aranda, Partido Revolucionario de los Trabajadores, Mexico.

It is noted that the PRT spokeswoman was identified merely as "Christina" to her audience which may be her "party name" or alias, or may indicate a substitute speaker.

Tony Austin, USWA Local 12243, New Jersey.

Nan Bailey, SWP National Committee.

Reza Baraheni, member of the Sattar League, the Iranian section of the Fourth International.

Jack Barnes, SWP National Secretary.
Michael Bauman, managing editor, Intercontinental Press/Inprecor.
Susan Berman, YSA.
Nelson Blackstock, SWP National Committee.
Bob Bresnahan.
Jon Britton (Delivered SW Political Committe report to National Committee meeting held just prior to opening of conference).
Peggy Brundy, Alternate member SWP National Committee.
Peter Buch.
Jim Burfriend, SWP Louisville (formerly of Austin, TX).
Peter "Pedro" Camejo, SWP National Committee.
Steve Clark.
Nancy Cole.
Steve Craine.
Sharon Crawford.
Maceo Dixon, SWP National Committee.
Ted Edwards.
Dean Elder, UAW member at Bingham Stamping Plant, Toledo.
Leslie Evans, Alternate member SWP National Committee.
Betsy Farley, YSA National Organizational Secretary.
Diane Feeley.
Fred Feldman.
Rich Finkel, Alternate member, SWP National Committee; IRA liaison.
Gerry Foley, Alternate member, SWP National Committee; IRA liaison.
David Frankel, Palestine Human Rights Campaign workshop.
Marcia Gallo.
Catarino "Dick" Garza, SWP National Committee.
Ilona Gersh.
Raul Gonzales.
Bill Gottlieb.
Peter Green.
Patricia Grogan.
Don Gurewitz.
Lillian Haddock, International Workers League of Puerto Rico [FI section].
Fred Halstead, SWP National Committee.
Joseph Hansen, veteran SWP leader.
James Harris, Alternate member, SWP National Committee; national coordinator, National Student Coalition Against Racism (NSCAR).
Jamileh Harris, YSA.
Ernest Harsch, Intercontinental Press/Inprecor.
Osborne Hart.
Ed Heisler, Alternate member, SWP National Committee; member, United Transportation Union.
John Hillson.
Gus Horowitz, SWP National Committee, just returned from Peru.
Jerry Hunnicutt, YSA, Washington, D.C.
Doug Jenness, SWP National Committee.
Linda Jenness, SWP National Committee.
Sara Johnston, USWA member and SWP candidate for Governor of Texas.
Susan LaMont, Alternate member SWP National Committee.
Tom Leonard.
Bruce Levine.
Frank Lovell, SWP National Committee.
Caroline Lund, SWP National Committe.
Wendy Lyons, SWP National Committee.
Robin Mace.
Michael Maggi.
Malik Miah, SWP National Committee.
Ken Miliner, SWP New York City.
Mary Lou Montauk.
Paul Montauk.
Andrea Morrell, SWP National Committee.
Laura Moorhead.
Fred Murphy, accompanied Horowitz on Peru trip.
Omari Musa, Alternate member SWP National Committee.
Barbara Mutnick.
August Nimtz.
George Novack.
Thabo Ntweng.
Reiko Obata, YSA, New York City.
Kara Obradovic, YSA National Committee.
Miguel Pendas.
Jose Perez.
David Prince, SWP Finance Director.
Andrew Puley, SWP National Ccmmittee; USWA Local 1066 [U.S. Steel, Gary Works].
Socorro Ramirez, Partido Socialista de los Trabajadores [FI section in Colombia].
Evelyn Reed.
Willie Mae Reid, Alternate member SWP National Committee.
Dick Roberts, Alternate member SWP National Committee.
Olga Rodriguez, SWP National Committee.
Jane Roland.
Andy Rose.
Nancy Rosenstock.
Roger Rudenstein, workshop on recruiting lawyers, law students and legal workers.
Norton Sandler.
John Sarge, USWA Houston [Hughes Tool].
Bob Schwarz [provided an analysis of the Democratic Socialist Organizing Committee (DSOC)].
Glova Scott, YSA National Committee and SWP candidate for District of Columbia Mayor.
Cathy Sedwick, YSA National Chair.
Peter Seidman, Alternate member SWP National Committee; [PLO support and liaison].
Ken Shilman, Alternate member SWP National Committee.
Michael Smith, workshop on recruiting lawyers, law students and legal workers.
Katherine Sojourner, SWP National Committee.
John Staggs.
Syd Stapleton, SWP National Committee.
Betsey Stone, SWP National Committee.
Claudio Tavarez. Perspectiva Mundial.
Anne Teesdale.
Gaudencio Thiago de Mello, Brazilian guitarist.
Tony Thomas, SWP National Committee.
Anibal Vargas, Chilean.
Marilyn Vogt.
Alan Wald.
Susan Wald.
Diane Wang.
Mary-Alice Waters, SWP National Committee.
Scott Ware, Brooklyn Navy Yard shipfitter.
Arnold Weissberg.
Reba Williams.
Patricia Wright, Alternate member SWP National Committee.
Miguel Zarate.
Mathilde Zimmerman.
Mark Zola, SWP candidate for Governor of Pennsylvania.●

## ISAAC ZLOTVER TO REAPPLY IN JANUARY

## HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. STEERS. Mr. Speaker, I have learned of recent developments in the case of Isaac Zlotver that I would like to share with my colleagues.

For over a year now, I have been involved in an effort to secure emigration permission from the Soviet Union for an elderly engineer, Isaac Zlotver, who has terminal cancer, so that he may be reunited with his family and see for the first time his grandchild. I would like to say that I am most proud of this Congress for the support it has shown this man. Over 70 Members have joined me in various efforts in behalf of Mr. Zlotver, the latest one being the introduction of a House resolution urging the President to communicate to the Government of the Soviet Union the concern of the United States that Isaac Zlotver be granted permission, in accordance with the Helsinki Accords, to emigrate from the Soviet Union to be reunited with his family. Today I am reintroducing this legislation with additional cosponsors.

Mr. Zlotver's health has improved slightly and he is now working a few hours a day. He has been informed by local Soviet officials that his most recent application to emigrate received the highest attention in Moscow. While this information was probably designed to discourage Mr. Zlotver from reapplying this most determined gentlemen has taken it as a positive sign and he is going to reapply this January once again. The Members of this House who have worked on this case in the past should be commended for their work thus far, because without their support, Isaac Zlotver's application would most probably never have left Sverdlovsk.

Mr. Zlotver feels that he has been refused as an example for other Jews in Sverdlovsk who might wish to apply to emigrate, but have not. He is willing to continue his courageous efforts to emigrate, and I urge all my colleagues to become involved in this effort and write Soviet officials and Mr. Zlotver himself, as a show of support and concern for his next application this January. I am inserting into the RECORD at this point a letter I sent Mr. Zlotver yesterday:

SEPTEMBER 5, 1978.

Mr. ISAAC ZLOTVER,
*U.S.S.R.,*
*RSFSR Sverdlovsk K–62,*
*Pr Lenina 93/2.*

DEAR MR. ZLOTVER: I am certainly heartened to learn that your health has improved slightly, and that your physical condition has become stronger.

I want to assure you that the people I represent and many other Members of Congress have not forgotten your efforts to see for the first time your grandchild and be reunited with your children. I am enclosing copies of a resolution recently introduced in the House of Representatives in your behalf. This resolution has gained the support of over 60 Members of Congress who are willing to continue to work in your behalf.

I wish you continued improvement in your health and strength in your ordeal.

Yours sincerely,

NEWTON I. STEERS, Jr.●

# HOUSE OF REPRESENTATIVES—*Friday, September 8, 1978*

The House met at 10 a.m.

Rev. Morris Murray, Jr., Kansas Baptist Church, Kansas, Ala., offered the following prayer:

From among those of us who are assembled here this day, we who are Your children corporately extend to You our adoration and praise. We worship You not only as the Creator but also as the Emancipator who alone has delivered us from the cancerous disease of sin, and has made us acceptable to Yourself in Jesus Christ.

We thank You, our Father, that we have this privilege to enter Your presence. We confess our need of Your mercy and grace. We acknowledge that You alone are capable and worthy of directing our lives both individually and nationally.

We therefore renew our commitment to Your lordship. May the decisions made this day reflect that commitment.

We offer this prayer for Your glory. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to a bill of the Senate of the following title:

S. 2928, An act to amend the International Investment Survey Act of 1976, and for other purposes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 12112. An act designating Gathright Lake on the Jackson River, Va., as Lake Moomaw.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 2358. An act to declare that the United States holds in trust for the Pueblo of Zia certain public domain lands;

S. 2588. An act to declare that the United States holds in trust for the Pueblo of Santa Ana certain public domain lands; and

S.J. Res. 131. Joint resolution to change the name of Copan Dam and Lake in the States of Oklahoma and Kansas to Copan Dam and the Lake of the Delawares.

## REV. MORRIS MURRAY, JR.

(Mr. BEVILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEVILL. Mr. Speaker, I was honored today to have Rev. Morris Murray, Jr., of Kansas, Ala., give the opening prayer in the House of Representatives.

Reverend Murray is pastor of the Kansas Baptist Church. The community of Kansas is located in the Fourth Congressional District of Alabama I am privileged to represent here in the Congress.

Reverend Murray is a graduate of Walker High School, Samford University, and the New Orleans Baptist Theological Seminary. He has been an active minister for 10 years now.

He is active in civic affairs and his work is known and appreciated throughout his community and the surrounding area.

He was accompanied to Washington by his lovely wife, Brenda, who is also with us today.

Reverend Murray and his work form one of the basic principles upon which our country was founded and it was my distinct honor and pleasure to have him as my guest on the House floor today.

## TRIBUTE TO THE LATE JOHN E. BOATWRIGHT

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HUBBARD. Mr. Speaker, it is with both sadness and pride that I speak today in the House of Representatives regarding Kentucky's beloved J. W. (Johnny) Boatwright, Jr., of McCracken County, Ky.

Johnny Boatwright, State Representative for McCracken and Livingston Counties, died of cancer at the age of 30 on August 23, 1978. His recent untimely death has created a void in the lives of all who knew him. He served our country in the U.S. Air Force in Vietnam, was an active member of the Concord United Methodist Church in Paducah, and served in various civic endeavors.

In 1975, Boatwright, then 27 years of age, was elected to serve in the Kentucky House of Representatives, unseating a veteran incumbent. Then, running unopposed, he was returned to that office by the people of the fourth district in 1977. He served as vice chairman of the House State government committee and was a member of the joint interim committee. One of the youngest members of the Kentucky General Assembly, Johnny was also one of the most dedicated and hardworking. The members of the legislature all deeply respected him and any advice he offered. When he rose to speak on the floor of the House, silence reigned. He was dedicated, conscientious, and honest.

Boatwright proudly stood up for what he believed was right for his constituents and for all Kentuckians. Through his calm words of wisdom he enlightened many of his colleagues and was always happy to provide us with his confident, well-reasoned, rural point of view.

As a personal friend of Johnny Boatwright's, I would like to express my sympathy to his lovely wife Linda, his son Roger, his daughter Lynnette, his parents Anne and Johnson Boatwright and all other members of the family.

## REPORT ON SPECIAL COMMITTEE ON SOUTHEAST ASIA

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, in this morning's mail each Member of the House has received a copy of the report submitted to you on the findings and recommendations of the Special Committee on Southeast Asia. The report is brief and to the point and I urge my colleagues to take the 20 or 25 minutes required to read it.

The eight Members of our delegation feel our recent journey to Vietnam and Laos was beneficial and has made it possible to provide you with the most current information on the situation in Southeast Asia. The findings of our delegation will prove, we believe, to be helpful to our colleagues and our Government in determining America's future policy toward the nations of Southeast Asia.

## TRAGIC DESTRUCTION OF RHODESIAN AIRLINER BY RHODESIAN PATRIOTIC FRONT GUERRILLAS

(Mr. ROBERT W. DANIEL, JR., asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROBERT W. DANIEL, JR. Mr. Speaker, recent news accounts have related how a Rhodesian airliner was destroyed by a surface-to-air missile and how passengers, including women and children, who survived the crash were shot and bayoneted to death. Responsibility for the destruction of the aircraft has been claimed by Joshua Nkomo, coleader of the Rhodesian Patriotic Front guerrillas.

Need I remind this House that these are the very people whom the administration and many of our colleagues insist must be included in a future Rhodesian Government.

It would seem to me that those who continue to adhere to this position can only be committed to the triumph of savagery over civilization.

## APPOINTMENT OF CONFEREES ON H.R. 13125, AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS, 1979

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 13125)

making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Mississippi? The Chair hears none, and without objection, appoints the following conferees: Messrs. WHITTEN, EVANS of Colorado, BURLISON of Missouri, BAUCUS, TRAXLER, ALEXANDER, MCHUGH, SIKES, NATCHER, MAHON, ANDREWS of North Dakota, ROBINSON, JOHN T. MYERS, and CEDERBERG.

There was no objection.

## APPOINTMENT OF CONFEREES ON H.R. 12934, STATE, JUSTICE, AND COMMERCE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION ACT, 1979

Mr. SLACK. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12934) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia? The Chair hears none, and without objection, appoints the following conferees: Messrs. SLACK, SMITH of Iowa, FLYNT, and ALEXANDER, Mrs. BURKE of California, and Messrs. EARLY, MAHON, CEDERBERG, ANDREWS of North Dakota, and MILLER of Ohio.

There was no objection.

## PROVIDING FOR CONSIDERATION OF SENATE JOINT RESOLUTION 4, HAWAIIAN NATIVE CLAIMS STUDY COMMISSION

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1265 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1265

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (S.J. Res. 4) establishing the Aboriginal Hawaiian Claims Settlement Study Commission, and for other purposes. After general debate, which shall be confined to the joint resolution and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the joint resolution shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, this rule came out of the Committee on Rules by a voice vote. While the matter it brings up has some controversy in it, as witness the vote on the suspension, so far as I know, there is no controversy whatsoever on the rule. It is a very straightforward, open rule providing for 1 hour of debate.

Mr. Speaker, I therefore reserve the balance of my time.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule provides 1 hour of general debate for the consideration of Senate Joint Resolution 4 to establish an Aboriginal Hawaiian Claims Settlement Study Commission. The rule contains no limitations on amendments and it contains no waivers of points of order. Rules such as this are becoming increasingly rare.

While the rule is simple and straightforward, Mr. Speaker, the joint resolution made in order by the rule is more controversial.

Senate Joint Resolution 4 was considered under suspension of the rules procedure on May 23, 1978. It failed to receive the two-thirds vote necessary for passage. The vote was 210 yeas to 194 nays.

The joint resolution appears to find that there is evidence indicating that the United States committed a wrong against the natives of Hawaii when it annexed the Hawaiian Islands to the United States and that the United States may have some obligation to compensate the natives for the alleged wrong.

The joint resolution provides for the establishment of a study commission to be appointed by the President. The 15-member commission must contain at least 7 members of Hawaiian native blood. If the commission finds that the United States has an obligation to compensate the natives, it is directed to recommend the nature of such settlement and how it should be implemented and administered.

The Congressional Budget Office estimates the cost of this joint resolution to be as follows:

| Fiscal year: | *Thousands* |
|---|---|
| 1978 | $190 |
| 1979 | 571 |
| 1980 | 96 |
| 1981 | ---- |
| 1982 | ---- |

Mr. Speaker, I voted against this joint resolution when it was considered under suspension of the rules procedure, and I still oppose it in its present form. However, there is nothing objectionable about the rule, so I will not oppose it.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## PROVIDING FOR CONSIDERATION OF H.R. 11711, ADJUSTMENT ASSISTANCE FOR WORKERS AND FIRMS

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1288 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1288

*Resolved*, That upon the adoption of this resolution it shall be in order to move, sections 401(a), 401(b)(1) and 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11711) to improve the operation of the adjustment assistance programs for workers and firms under the Trade Act of 1974, and all points of order against said bill for failure to comply with the provisions of clause 5, rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. It shall be in order to consider the amendments recommended by the Committee on Ways and Means now printed in the bill on page 11, lines 2 through 19, and beginning on page 11, line 24 through page 12, line 26, and all points of order against said amendments for failure to comply with the provisions of section 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344) and clause 5, rule XXI are hereby waived. No amendments to the bill or to the committee amendments shall be in order except pro forma amendments for the purpose of debate and germane amendments relating only to chapters 2, 3 and 5 of title II of the Trade Act of 1974 (Public Law 93-618), the trade adjustment assistance provisions of said Act. Any point of order to the contrary notwithstanding, it shall be in order to consider an amendment printed in the Congressional Record of July 25, by Representative Cleveland of New Hampshire, if offered. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore (Mr. NATCHER). The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA); pending that, I yield myself such time as I may consume.

Mr. Speaker, this resolution seems to be very complicated on the surface, but actually when you examine the various waivers and so on, it is not really all that difficult. The proof of that is that there was virtually no controversy in the Committee on Rules on the resolution that is before us. There is a limited controversy on the bill that it would bring up, but plenty of opportunity is offered to the opponents of one or two sections to deal with the problems where they do not agree with the committee.

Mr. Speaker, I do not know of any controversy on the rule and I reserve the balance of my time.

Mr. LATTA. Mr. Speaker, this is a rather complex rule and provides 1 hour of general debate for the consideration of H.R. 11711, adjustment assistance for workers and firms. There are a total of seven different waivers of points of order included in this rule. In addition, there are restrictions on offering amendments to certain parts of the bill.

Let me begin with the waivers.

First, in order to allow consideration of the bill, points of order are waived for failure to comply with section 401(a) of the Budget Act. Section 401(a) bars the consideration of any bill which provides new contract authority unless that contract authority is subject to the appropriation process. In this case, sections 108 and 203 of the bill provide authority to enter into contracts that is not expressly limited to amounts provided in appropriation acts, and therefore the bill would be subject to points of order. According to a letter from the chairman of the Budget Committee, amendments are to be offered to cure this Budget Act violation.

The second waiver of points of order is necessary because certain provisions in the bill violate section 401(b)(1) of the Budget Act. This section bars the consideration of any bill which provides new entitlement authority which is to become effective before the first day of the fiscal year which begins during the calendar year in which the bill is reported. Since title I of the bill provides new entitlement authority that could become effective prior to October 1, 1978, the year in which the bill was reported, the bill would be subject to points of order under section 401(b)(1) of the Budget Act. Again, the chairman of the Budget Committee has written a letter stating that amendments are to be offered to cure this Budget Act violation.

The third waiver of points of order in this rule is necessary because parts of the bill violate section 402(a) of the Budget Act. Section 402(a) provides that authorizations must be reported before May 15 preceding the beginning of the fiscal year when they take effect. Titles II and III of the bill provide authorizations which could take effect during the current fiscal year. In order to comply with the Budget Act requirement, it would have been necessary for the bill to be reported prior to May 15, 1977. Once again, the chairman of the Budget Committee has indicated that amendments will be offered on the floor to cure this Budget Act violation.

The fourth waiver of points of order is necessary because this bill technically violates clause 5 of rule XXI, which prohibits appropriations on a legislative matter. The problem arises because the bill expands eligibility for benefits. Funds previously appropriated for a narrower program may now be used for the expanded program. Technically, these funds are being appropriated to a new purpose, and this constitutes appropriation on a legislative bill.

The fifth waiver of points of order applies to the committee amendments printed in the bill. Points of order are waived against the committee amendments for failure to comply with the provisions of section 401(b)(1) of the Congressional Budget Act. This same point of order was waived against the bill. The problem with the committee amendment is the same as the problem in the bill, that is, there are entitlements which take effect before the Budget Act permits. Once again, the chairman of the Budget Committee has indicated his understanding that the Budget Act violation will be cured by amendment on the floor.

The sixth waiver of points of order also applies to the committee amendments printed in the bill. Points of order are waived against the committee amendments for failure to comply with clause 5, rule XXI, which prohibits appropriations on legislation. This same point of order was waived against the bill. The problem with the committee amendment once again is the same as the problem with the bill, that is, previously appropriated funds are technically being transferred to a new purpose.

The seventh and last waiver applies to the Cleveland amendment which is made in order by the rule. All points of order are waived against the Cleveland amendment. This was done to insure that the Cleveland amendment could not be knocked out on grounds of germaneness or for any other reason.

Mr. Speaker, in addition to the above waivers, the rule provides that no amendments to the bill or to the committee amendments will be in order except pro forma amendments for the purpose of debate and germane amendments relating only to chapters 2, 3, and 5 of title II of the Trde Act of 1974, the trade adjustment assistance provisions of the act. This restriction on amendments is in compliance with the request of the Committee on Ways and Means.

The rule provides that the bill will be read for amendment by titles instead of by sections.

Finally, the rule specifically makes in order an amendment by the gentleman from New Hampshire (Mr. Cleveland) providing for Federal reimbursement to States for unemplovment insurance benefits paid to workers under this program.

Mr. Speaker, I have no further requests for time.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous ouestion was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 333, nays 2, answered "present" 3, not voting 94, as follows:

Mr. Metcalfe with Mr. Symms.
Miss Jordan with Mr. Gibbons.
Mr. Nolan with Mr. Quillen.
Mr. Bonker with Mr. Mahon.
Mr. Maguire with Mr. Brinkley.

Mr. BEARD of Rhode Island changed his vote from "nay" to "yea."

Mr. BLANCHARD changed his vote from "present" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## HAWAIIAN NATIVE CLAIMS STUDY COMMISSION

Mr. RONCALIO. Mr. Speaker, I call up the Senate joint resolution (S.J. Res. 4) establishing the Aboriginal Hawaiian Claims Settlement Study Commission, and for other purposes, and ask unanimous consent that the Senate joint resolution be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore (Mr. NATCHER). Is there objection to the request of the gentleman from Wyoming?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 4

Whereas in the year 1893 the United States Minister accredited to the sovereign and independent Kingdom of Hawaii, acting wholly without the authority or knowledge of the Congress or the President, unlawfully conspired with a small group of non-Hawaiian residents of that kingdom, including citizens of the United States, to overthrow the indigenous and lawful government of Hawaii; and

Whereas in pursuance of such conspiracy the United States Minister and the naval representative of the United States, also acting without authority, caused Armed Forces of the United States to be put ashore and deployed in support of the overthrow of that indigenous and lawful government; and the United States Minister thereupon extended diplomatic recognition to a provisional government formed by the conspirators without the consent of the people or of the lawful government of Hawaii, which provisional government was sustained solely by the Armed Forces of the United States; and

Whereas, on December 18, 1893, in a message to the Congress, President Grover Cleveland did report fully and accurately on these illegal actions, which statement acknowledged that "by an act of war, committed with the participation of a diplomatic representative of the United States and without the authority of Congress, the government of a feeble but friendly and confiding people has been overthrown", that "a substantial wrong has thus been done which a due regard for our national character as well as the rights of the injured people requires that we endeavor to repair", and that "the United States cannot fail to vindicate its honor and its sense of justice by an earnest effort to make all possible reparation"; and

Whereas a claim for repair of these wrongs to the Hawaiian people was presented to the Government of the United States of America by Queen Liliuokalani, the lawful monarch of Hawaii, and on July 15, 1893, a petition for redress was also presented by the Hawaiian Patriotic League, representing Aboriginal Hawaiians; and

Whereas, in 1898, Hawaii was annexed to the United States, and by such annexation, among other things, the United States acquired ownership of vast landholdings that had been common property of the Aboriginal Hawaiians prior to the overthrow of their indigenous government; and

Whereas some eighty-four years have now passed without the wrongs done Aboriginal Hawaiians having been repaired: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Congress hereby declares that a wrong has been committed against the Aboriginal Hawaiians which the United States is obligated to endeavor to remedy; that no wrong such as this committed eighty-four years ago in far different circumstances to a specific people few of whom survive today can be fully rectified in this or future Congresses; that the Congress, however, is desirous of determining whether a suitable remedy for such wrong can be fashioned; and that the Congress wishes to establish a commission of Aboriginal Hawaiians and other citizens to advise it on all matters pertaining to the best manner in which to provide such remedy.

(b)(1) The Commission shall be composed of fifteen members appointed by the President, of whom eight shall be from a list of not less than eighteen persons submitted to the President by the Governor of Hawaii. No less than nine of the members shall be of the blood of Aboriginal Hawaiians who inhabited the Hawaiian Islands prior to 1778 (hereinafter "Aboriginal blood"), three of whom shall be of one-half degree or more of Aboriginal blood, three of whom shall be of one-quarter or more degree of Aboriginal blood, and three of whom shall be of any degree of Aboriginal blood. Each of the islands of Hawaii, Kauai, Lanai, Maui, Molokai, and Oahu shall be represented on the Commission by at least one member of Aboriginal blood who is an inhabitant thereof, and all persons of any degree of Aboriginal blood who are not residents of the State of Hawaii shall be represented by a member of any degree of Aboriginal blood who is not a resident of the State of Hawaii. The President, prior to appointing the members of the Commission, and the Governor, prior to submitting recommendations for members, shall consult Aboriginal Hawaiian organizations and the Aboriginal Hawaiian community in each of the islands named in this paragraph (1).

(2) The Commission shall elect a Chairman and Vice Chairman from among its members.

(3) Eight members of the Commission shall constitute a quorum, but a smaller number, as determined by the Commission, may conduct hearings.

(4) Vacancies in the membership of the Commission shall not affect the powers of the remaining members to execute the functions of the Commission and shall be filled in the same manner as in the case of the original appointments.

(5) Each member of the Commission shall receive $100 for each day such member is engaged in the actual performance of duties vested in the Commission. Each member shall be reimbursed for travel expenses, including per diem in lieu of subsistence, as shall be provided from time to time by regulations adopted by the Committee on House Administration of the United States House of Representatives.

(c) The first meeting of the Commission shall be called by the President within the sixty-calendar-day period following the date of approval of this resolution.

(d) Subject to such rules and regulations as may be adopted by the Commission, the Chairman shall have the power to—

(1) appoint and fix the compensation of an executive director, a general counsel, and such additional staff personnel as he deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum

rate for GS-18 of the General Schedule under section 5332 of such title; and

(2) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $100 a day for individuals.

(e) Each Federal department, agency, and instrumentality is authorized to furnish to the Commission such data, reports, information, and other resources as the Chairman of the Commission may request.

DUTIES OF THE COMMISSION

SEC. 3. The Commission shall—

(1) conduct a study of the culture, needs, and concerns of the Aboriginal Hawaiians; the nature of the wrong committed against, and the extent of the injuries to, the Aboriginal Hawaiians by reason of the actions set forth in the preamble of this resolution; and various means to remedy such wrong;

(2) hold such public hearings with public notice as it deems necessary to further such study, but not less than one hearing in each of the islands of Hawaii, Kauai, Lanai, Maui, Molokai, and Oahu in the State of Hawaii and at another site elsewhere in the United States where a substantial number of persons of Aboriginal blood resides;

(3) provide public information concerning the actions set forth in the preamble wherever possible in advance of public hearings and such other methods employed by the Commission to obtain public participation in the study;

(4) publish, within one year of enactment of this resolution, a draft report of the findings of the study and make said report available to appropriate Federal and State agencies, Aboriginal Hawaiian organizations, and the public;

(5) solicit written comments from such agencies and organizations and the public;

(6) consider such comments in preparing the final report of the findings of the study; and

(7) submit to the President and the Committee on Energy and Natural Resources of the Senate and Committee on Interior and Insular Affairs of the House of Representativs, within six months of the publication of the draft report, the final report of the findings of such study, such report to include all written comments on the draft report submitted to the Commission.

COMMISSION RECOMMENDATIONS

SEC. 4. (a) The report required by section 3 shall provide recommendations for a remedy. Such recommendations shall include—

(1) the distribution, expenditure, investment, or other use of funds as a component of any such remedy, including, where appropriate, innovative uses of the funds which will permit such moneys to be employed successively for the benefit of Aboriginal Hawaiians, such funds to be appropriated in equal increments over a period of years;

(2) the provision of land as a component of any such remedy through any method, including the surplusing of Federal land and amendments to the Hawaiian Homes Commission Act of 1920 (42 Stat. 109): *Provided*, That, should the surplusing of Federal lands be recommended as a component of any such remedy, the Commission shall propose a method or methods for resolving, whenever a tract of such land is offered, whether such tract shall be conveyed to the State under applicable law or the Aboriginal Hawaiians under a subsequent Act to provide for such remedy;

(3) such other recommendations concerning the components set forth in clauses (1) and (2) of this subsection as the Commission deems appropriate;

(4) the preservation and enhancement of Aboriginal Hawaiian culture and lifestyles and the education of Aboriginal Hawaiians as principal purposes of any such remedy;

(5) the blood quantum or other requirements for eligibility to receive the benefits of any remedy, and, if the Commission deems appropriate, to receive specific benefits or shares of benefits;

(6) the form or forms of organization best suited to receive, distribute, or administer the benefits of any remedy; and

(7) other matters concerning any such remedy, including, but not limited to, alienability and tax status of the benefits of any such remedy, provision of technical assistance to Aboriginal Hawaiians on the use of such benefits, and the reporting to the Federal Government and the Aboriginal Hawaiians of the disposition of such benefits.

(b) Any such recommendation shall, to the extent possible, be designed to assure that any such remedy—

(1) will be a final settlement of all claims of Aboriginal Hawaiians against the United States arising from the actions set forth in the preamble of this resolution;

(2) will be capable of prompt implementation with a minimum of litigation;

(3) will be in conformity with the real economic and social needs of the Aboriginal Hawaiians;

(4) is fashioned and will be implemented with the maximum participation of Aboriginal Hawaiians;

(5) will not create a wardship or trusteeship;

(6) will not diminish any right, privilege, or obligation of the Aboriginal Hawaiians as citizens of the United States or the State of Hawaii; and

(7) will not relieve, or diminish any obligation of the United States or the State of Hawaii to protect and promote the rights and welfare of Aboriginal Hawaiians as citizens of the United States or the State of Hawaii.

TERMINATION OF THE COMMISSION

SEC. 5. Except as provided in subsection (b) of section 7, upon the expiration of the sixty-day period following the submission of the report required by section 3, the Commission shall cease to exist.

SAVINGS CLAUSES

SEC. 6. No provision of this joint resolution shall be construed as—

(1) constituting a jurisdictional act, conferring jurisdiction to sue, or granting implied consent to Aboriginal Hawaiians to sue the United States or any of its officers with respect to claims arising from the actions set forth in the preamble of this resolution; or

(2) constituting a precedent for reopening, renegotiating, or legislating upon any past settlement involving land claims or other matters with any Native organization or any tribe, band, or identifiable group of American Indians.

AUTHORIZATION

SEC. 7. (a) There are hereby authorized to be appropriated for fiscal years 1979 and 1980 such sums as are necessary to carry out the provisions of this resolution. Until October 1, 1978, salaries and expenses of the Commission shall be paid from the contingent fund of the Senate upon vouchers approved by the Chairman. To the extent that any payments are made from the contingent fund of the Senate prior to the time appropriation is made, such payments shall be chargeable against the authorization provided herein.

(b) The Secretary of the Treasury shall reserve a reasonable portion of the funds appropriated pursuant to subsection (a) of this section for the purpose of providing payment for the transportation, subsistence, and reasonable expenses of the members of the Commission in testifying before the Congress with respect to their duties and activities while serving on the Commission or to such matters as may involve the findings of the study of the Commission after the expiration of the Commission pursuant to section 5.

Mr. RONCALIO (during the reading). Mr. Speaker, I ask unanimous consent that the Senate joint resolution be considered as read, printed in the RECORD, and open to amendment at any point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

Mr. RONCALIO. Mr. Speaker, I move to strike the last word.

Mr. Speaker and my dear colleagues, this is the second time around for this legislation which passed by a handsome majority but not by the necessary two-thirds vote when it was considered under suspension of the rules a few months ago.

Mr. Speaker, I cannot think of a better explanation of this legislation, historically and factually, than is set forth in the "Dear Colleague" letter that was sent out by the gentleman from Hawaii, Mr. CECIL HEFTEL, that all of the Members received about 2 months ago. I am going to quote from that letter of July 21, 1978.

He says that this resolution seeks to establish a commission and a study.

And I want to emphasize the word "study".

And I particularly want to state to my good friend and colleague, the gentleman from Maryland (Mr. BAUMAN), whom I consider to be the watchdog of the minority of this body, and his colleagues, that this does nothing by way of a cause of action, it does not make any admissions of any type of irresponsibility or wrongdoing. It carries some allegations of historical facts.

What should be stated, of course, is the fact of the 1893 overthrow of the government in the Island of Hawaii.

I realize that 85 years is a long time for most Americans. Memories grow short after that length of time and most events seem to be relegated to the history books, but this event has riveted the attention of some Americans ceaselessly—and it certainly has on the west coast and in the counties of Hawaii. Its details are as familiar to some children as are the stories of Paul Revere's ride and the signing of the Declaration of Independence.

This was an important incident, and it lies still in the hearts, as I say, of millions of Americans on our west coast and in Hawaii.

It is something that has to be faced, my colleagues, because it is a fact that the Armed Forces of the United States, without authority of Congress or direction of the President, supported a group of non-Hawaiian aliens in an unlawful seizure of power in the overthrow of the Government of Queen Liliuokalani on January 16, 1893.

I might add that I have been reading a book about the area of the Choptank River, where my friend, the gentleman from Maryland (Mr. BAUMAN), comes from, written by Mr. Michener, and I am recommending that the gentleman read the book that he also wrote about Hawaii, and he describes there with the same sort of accuracy regarding the incident of the overthrow of the Hawaiian government, just as he has described the development of eastern Maryland.

Mr. Speaker, I believe the Hawaiian people, and particularly the Hawaiian

natives, have been very patient and understanding of this incident, and they need some fair compensation and support, and better treatment. I believe that some attention should be paid to that act that took place, at least a study of the possibility of remuneration, compensation, and adjustment. We all have some "face" whether we are orientals or whether we are occidentals in this world, and I am sure in the case of a wrongdoing by our people, which of course, ought not turn into a handout type of thing—but where a nation has character, a nation with a character ought not wish to have history perpetrate its wrongs.

We certainly have treated all of our minorities with imminent justice over the years and there is no reason we should exclude the Hawaiian natives from that consideration.

We believe the people of Hawaii have waited long enough for their study. They have shown their patience. We believe it is now time for the U.S. Government to show its wisdom by creating a commission to study what loss, if any, the Hawaiian people suffered, and what compensation is possible.

When we get into a discussion of this matter I am sure we will get all of the details that are necessary, and let us do it calmly. I know that there are hot tempered types among the people there, just as there have been in other areas, who would like to use this effort to cause dissent, and to cause economic turmoil, and we have seen that happen.

We have seen that happen; but if that happens, it will not be the fault of the hotheads of Hawaii. It will be the fault of some of the persons in this House of Representatives who refuse to permit even a study or consideration of what should be an equitable, proper act on the part of the lawmakers of this Nation.

Therefore, Mr. Speaker, if each Member can, without great delay this morning, consider the amendments we have offered, then I hope we can have a good and full discussion of the matter and see to the passage of this joint resolution.

Mr. WHITE. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I am happy to yield to the gentleman from Texas.

Mr. WHITE. Mr. Speaker, so that I can get a better understanding of this bill, could the gentleman elaborate on the type of wrongs to which the Hawaiian natives have been subjected? At the time of annexation was some of their property taken without compensation?

Mr. RONCALIO. I would be delighted to answer the gentleman.

The SPEAKER. The time of the gentleman from Wyoming (Mr. RONCALIO) has expired.

(By unanimous consent Mr. RONCALIO was allowed to proceed for 3 additional minutes.)

Mr. RONCALIO. To answer the gentleman, Mr. Speaker, land reform had taken place, ordered by the Queen, prior to that. A few years prior to this incident, such lands had been passed to the people of Hawaii, certain lands at certain places in each of the counties of Hawaii. Maps were prepared showing this particular land.

The claims made now are not to those lands by the descendants of these Hawaiians. That would be an impossible thing to achieve. The idea now is to have a study of the wrongs which took place and to give some type of consideration to those who are the descendants of those who were wronged.

The study commission could recommend, if it wishes, where there might be entitlements that can be added in a sort of Hawaiian homes commission type of function, or lands that can be used. For example, let us take the lands in Molokai. There could be homesteads there, and some people might be able to make a home out of the land there.

This matter involves those in the lower echelon economically, and the highest number of those in Hawaii, unfortunately, are the Hawaiian Natives. This situation puts a burden on our conscience, and we have a duty to do something to help these people to reach a higher economic level. If this device can be used to do that, it will serve a noble purpose.

Mr. WHITE. If the gentleman will yield further, in the first place, are there not existent programs which would address those in the lower income levels? The Hawaiians, after all, are members of a State of the United States.

Mr. RONCALIO. There are programs, but they are woefully, frightfully inadequate.

Mr. WHITE. How was the land taken in a wrongful manner? I am just trying to answer that question in my own mind.

Mr. RONCALIO. I can only refer the gentleman to a half-dozen history books to give him the details on that subject. It was President Cleveland who said that this was not done with the constitutional authority of the United States of America.

The very character of this Nation requires that some corrective action be taken to help the people of Hawaii. Mr. Michener's book comes to the same conclusion on Hawaii, and so does anybody else who ever studied the facts.

Frankly, we do not apologize for what this country did; but we recognize that some of the acts may have been less than circumspect. If it is appropriate to discuss them and to compensate them in some form, I think that should be done.

Mr. WHITE. Under our statutes, under the due process clauses of the Constitution, have any of these cases been taken to court and adjudicated?

Mr. RONCALIO. No; and this does not commit a cause of action to be taken. I am not conducting a revolution. I am just managing a little bill on the floor. I am not conducting a revolution, and I am not creating a cause of action in a court of law. I am a little old to be doing those things.

Frankly, all I want to do is to pass a bill to create a commission to study some of the wrongs done to the people of one of our States.

Mr. BUTLER. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Speaker, I think it has been the practice in the House, in the brief time that I have been here, for claims against the United States to be considered by the Committee on the Judiciary.

Has the Committee on the Judiciary had an opportunity to consider the claims that we have before us, or has it had the time to consider any of these native claims?

Mr. RONCALIO. Actually, in response, I think the gentleman is correct. That may be the more proper and more appropriate committee having jurisdiction. It may be that this commission may find that in this case that should be done. This commission's work will start, and after a year or two they may recommend that this matter should be referred to the appropriate subcommittee of the Committee on the Judiciary.

If it so says, that is what the Study Commission will come up with. All this bill does is create a Commission to do it and give us a report and its opinion and that should be the procedure to take. I have no doubt that responsible officials of the Judiciary will want to appear before this committee and make that case, particularly if there is to be any consideration or action or litigation ensued; but I hope that will not be the result.

Mr. BUTLER. Mr. Speaker, if the gentleman will yield further, it is a fair statement that the Judiciary Committee has not had an opportunity to consider this problem up to this point.

Mr. RONCALIO. Oh, it has had 89 years of opportunity to consider the problem, but has not done it.

Mr. BUTLER. Mr. Speaker, if the gentleman will yield further, is it a fair statement to say that the Committee on the Judiciary, given the opportunity, has declined to consider this problem?

Mr. RONCALIO. No; I do not believe that to be a fair statement. I am not aware they have declined to consider it.

It has had massive opportunity to do so, but it has gone neglected by the Committee on Interior and Insular Affairs and by the Committee on Government Operations and by all the other committees of this House. They have had the opportunity. The Committee on the Judiciary is one that could have taken action, but did not take it.

Mr. BUTLER. Mr. Speaker, I thank the gentleman.

COMMITTEE AMENDMENTS

The SPEAKER pro tempore. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 3, after the enacting clause, strike out all of Section 1 and insert in lieu thereof the following:

That the Congress finds and declares—

(1) that there is substantial evidence that a wrong was committed against the Aboriginal Hawaiians, involving the complicity and unauthorized support of civil and military officials of the United States;

(2) that this wrong, committed eighty-four years ago in far different circumstances to a specific people, few of whom survive today, cannot be fully rectified by Congress;

(3) that the Congress, however, is desirous of determining whether a suitable remedy for such wrong can be fashioned; and

(4) that the Congress should establish a commission of Aboriginal Hawaiians and

other citizens to advise it on all matters pertaining to the best manner, if any, in which to provide such remedy.

Mr. RONCALIO (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

Mr. JOHNSON of Colorado. Mr. Speaker, reserving the right to object, yesterday under the rule we had 30 minutes. Are we in the amending process?

The SPEAKER pro tempore. The Chair would like to advise the gentleman, as the gentleman knows, this is being considered in the House as in the Committee of the Whole.

Mr. JOHNSON of Colorado. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

Mr. RONCALIO. Mr. Speaker, I rise in support of the amendment, but I would be pleased to yield 5 minutes of my time to the eminent minority member of my subcommittee, the gentleman from Colorado (Mr. JOHNSON). That is probably my fault. I failed to apprise the gentleman that we were proceeding in the House as in the Committee of the Whole.

The SPEAKER pro tempore. Does the gentleman from Colorado desire to be heard?

Mr. JOHNSON of Colorado. No, Mr. Speaker.

Mr. RONCALIO. Mr. Speaker, this amendment affects section 2(b)(1), the subsection providing for appointment of members to the Commission appointed by the President. It establishes criteria for their selection and provides for 15 members, no less than 9 being of the blood of Aboriginal Hawaiians. The committee felt this would impugn the objectivity of the findings; however, the committee did not feel it would be appropriate for prior representation on the Commission; however, the committee did feel there should be appropriate Hawaiian representation on the Commission.

The amendment reduces from nine to seven the representation. It makes corresponding adjustments in the blood criteria.

I would add that I do not like these kinds of amendments, but this is a necessary fact of life and I urge its adoption.

The SPEAKER pro tempore. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. RONCALIO. Mr. Speaker, I ask unanimous consent that the remaining committee amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

The remaining committee amendments are as follows:

Committee amendments: Page 4, beginning on line 15 through page 5, line 11, strike out all of paragraph 1 of section 2(b) and insert in lieu thereof the following:

(b)(1) The Commission shall be composed of fifteen members appointed by the President, of whom eight shall be from a list of not less than eighteen persons submitted to the President by the Governor of Hawaii. No less than seven of the members shall be of the blood of Aboriginal Hawaiians who inhabited the Hawaiian Islands prior to 1778 (hereinafter "Aboriginal blood"), two of whom shall be of one-half degree or more of Aboriginal blood, two of whom shall be of one-quarter or more degree of Aboriginal blood, and three of whom shall be of any degree of Aboriginal blood. Each of the four counties of the State of Hawaii shall be represented on the Commission by at least one member of Aboriginal blood who is an inhabitant thereof, and all persons of any degree of Aboriginal blood who are not residents of the State of Hawaii shall be represented by a member of any degree of Aboriginal blood who is not a resident of the State of Hawaii. The President, prior to appointing the members of the Commission, and the Governor, prior to submitting recommendations for members, shall consult with Aboriginal Hawaiian organizations and with the Aboriginal Hawaiian community in each of the islands of Hawaii, Kauai, Lanai, Maui, Molokai, and Oahu in the State of Hawaii.

Page 8, line 5, strike out "wrong" and insert in lieu thereof "wrong, if any,".

Page 9, strike out all of lines 13 through 15 and insert in lieu thereof:

SEC. 4. (a) Any recommendations for a remedy contained in the report required by section 3 may include, but shall not be necessarily limited to—.

Mr. RONCALIO. Mr. Speaker, these committee amendments have the effect of insuring that the resolution, itself, does not predetermine the very issues which the proposed Commission is required to study and report upon. As passed by the other body, the resolution statutorily makes findings which the Commission is to determine.

The first five committee amendments merely insert the word "alleged" in the preamble to make clear that we are not congressionally determining the validity of the assertions made in the preamble.

The sixth amendment amends section 1, involving congressional findings, to again make clear that, while there is some evidence to show that a wrong was committed against the Hawaiian Natives by the United States, the validity of that evidence is a matter for the proposed study and should not be predetermined by Congress.

Amendment 8 amends section 3 in like fashion to make clear that whether or not a wrong was committed must be left to the study.

Amendment nine amends section 4. As passed by the other body, section 4 requires that the Commission submit a report recommending a remedy and predetermining what such recommendations should contain. The committee amendment makes it clear that the Commission may or may not recommend a remedy and, if so, suggests areas and factors which should be considered in any such proposed remedy.

Mr. Speaker, I urge adoption of these committee amendments.

The SPEAKER pro tempore. The question is on the committee amendments.

The committee amendments were agreed to.

Mr. BAUMAN. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I regret that the gentleman from Wyoming (Mr. RONCALIO) has not given us a better explanation of the need for this legislation. I understand the gentleman's concern about this alleged wrong that was supposedly committed more than 80 years ago.

This bill was originally brought up on suspension, as has become the custom in this Congress. The leadership throws almost anything into the suspension procedure, including billion-dollar bills and bills with potentials of spending billions of dollars.

This matter was debated here at length before and the question can legitimately be asked of us: Why should we bother with fighting over a bill like this—$857,000 for a 3-year commission? That, some would say, is "peanuts" as money for commissions flies around this place. We create million-dollar select committees to do nothing for 3 years only to come up with no conclusion. So why get so excited?

I think the reason we ought to be concerned is the reason we are here in this House as Members representing our people. It is no disrespect to the people of Hawaii or to the aboriginal Hawaiians that this bill should be opposed by me or by others. We oppose it because the bill is a horrendous precedent for us to set, even though it is portrayed as only $857,000 for a commission.

Let me quote to the Members from an article that appeared in the New Yorker magazine written by Elizabeth Drew, who is a responsible journalist. She investigated bills that were considered by the House under suspension, and one that caught her eye was this bill. She went to the Office of Management and Budget and asked them about it. Here is her quote:

An official of the Office of Management and Budget has told me that the Hawaiian claims could end up costing the government thirty-five billion dollars.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield at that point?

Mr. BAUMAN. I will yield in a moment.

Here is a responsible journalist that says that she was informed this could wind up costing the taxpayers $35 billion. She may be wrong; it may not cost more than $857,000 for this Commission. We all know it will cost something.

But the point of the matter is that the potential cost to the taxpayers for this Commission has not been explained to this House. It is not in the report. This is sold to us on the basis that it is just another little study, that it means a few per diems for the Commission members, and then they will come back and perhaps say there is really no problem at all, that it can all be met through existing laws.

But that is not what will happen and we all know it.

The basic concept of this legislation is plain. There is going to be compensation to unknown numbers of people that will cost unknown numbers of dollars to the taxpayers. Worse than that, it sets a precedent. We have taken one course with Indian claims, we set another precedent with Alaskan Native claims, and now we are setting a still broader precedent with aboriginal Hawaiian claims. There will be no end to claims based on supposed past wrongs if Congress continues to permit this sort of thing.

How many people are alive today whose lands have actually been taken without compensation? I have wondered if I looked back at my own family tree—and I always shudder when I think about that because of what I might find—whether I might have a claim against the U.S. Government for some long-forgotten wrong against a great uncle or a great great grandmother or someone remote in the past.

It is the precedent that is important. How long do you have to go on looking for things on which to spend money? You spend too much as it is, and that is the issue here.

So why should Congress create a commission that should perhaps more properly be set up by the Hawaiian legislature with a few leftover dollars in its budget? Why should we pass a resolution that admits national guilt for some past alleged wrong?

Why should we start on a process that will inevitably lead toward the expenditure of more money to be paid to present living persons who are already eligible for help in the form of numerous existing Federal programs today?

We should not, I believe.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Speaker, I thank the gentleman for yielding.

I am surprised that the gentleman raised the specter of a $35 billion program when he knows that that article from which he is quoting is a piece of irresponsible journalism.

Mr. BAUMAN. I do not know that at all.

Mr. JOHNSON of Colorado. We do not go to the OMB to get a figure of that sort and then quote it here on the floor of the House as being an authoritative report.

Mr. BAUMAN. I do not know its truth or untruth. I said that. Ms. Drew's responsibility is not at issue. The amount of money is the issue.

Mr. JOHNSON of Colorado. The gentleman asked a question, and I would like to respond.

Mr. BAUMAN. The issue is: What is the cost? The gentleman said $857,000 for a commission. The gentleman has to admit they are going to award at least $1 compensatory damages and more likely millions more.

Mr. JOHNSON of Colorado. They cannot award anything, and the gentleman knows it. The Commission will make a recommendation to the Congress and the Congress will then decide.

The SPEAKER pro tempore. The time of the gentleman from Maryland (Mr. BAUMAN) has expired.

(By unanimous consent, Mr. BAUMAN was allowed to proceed for 3 additional minutes.)

Mr. BAUMAN. Mr. Speaker, the gentleman from Colorado (Mr. JOHNSON) has one of the most able minds on the Interior Committee and in the House. I have served with him for 5 years on that committee, and I know the gentleman's ability. But I also know the central issue that I am raising, and one of the gentlemen ought to be addressing, is what the entire cost of this will be if the Commission leads to the logical conclusion this legislation suggests. And the report is silent on that cost. So it is just as logical for me to quote Elizabeth Drew. I do not have the figure.

Mr. JOHNSON of Colorado. I do not think there is a figure. I think it is irresponsible for anybody to quote any kind of figure, because, as the gentleman knows, the language of the resolution says—and this is at my insistence—"that this wrong committed 84 years ago in far different circumstances to a specific people, few of whom survive today, cannot be fully rectified by Congress."

We tried to acknowledge this, that although we acquired the land by conquest, nevertheless the possibility of rectification is one that seems very remote.

And we add "that the Congress, however, is desirous of determining whether a suitable remedy for such wrong can be fashioned * * *"

Mr. BAUMAN. Has the gentleman ever looked at the number of staff members on the Interior Committee? With all due respect to those staff members of the committee who are sitting on the floor, since its former chairman left the staff has grown by leaps and bounds. Perhaps they all are needed. Could not the staff write legislation rather than another commission?

My colleague, the gentleman from Virginia (Mr. BUTLER), just indicated his committee handles claims all the time, so we have a House procedure for that.

No, this is yet another costly commission. I am told everybody should try to get what they can out of the Congress, if they think it is a good cause, but the rest of us have to ask some serious questions. This bill has to be the bell ringer of all time, when people from Hawaii all the way back to Maryland are screaming about the cost of government and demanding less spending and lower taxes.

Mr. JOHNSON of Colorado. I guess we are just going to wrangle about this particular subject here until the time expires.

Mr. BAUMAN. My time is about up anyway.

Mr. JOHNSON of Colorado. I will get the gentleman more time.

This is not the kind of program which I ordinarily would endorse, to reimburse the Hawaiians for $1 billion, but I think the United States must recognize that when it acquired territory by conquest it was not done by any kind of legitimate authority. The President at the time was embarrassed and ashamed of it.

Mr. BAUMAN. Grover Cleveland, one of the greatest Democratic Presidents. I think we should have more Democrats like him.

Mr. JOHNSON of Colorado. If we had more like him, maybe we would have had a longer recession than we did under his Presidency.

Nevertheless, he was very candid in stating that the United States acquired this property by nefarious means. I do not think there is anything wrong in having a commission inquire into whether there is a possibility of a remedy of this wrong.

It is true, as the gentleman from Wyoming pointed out, that those natives are the people who are living at the lower end of the economic scale in Hawaii. It is a shameful incidence, a shameful experience that those people are living in.

The SPEAKER pro tempore. The time of the gentleman from Maryland (Mr. BAUMAN) has again expired.

(On request of Mr. JOHNSON of Colorado and by unanimous consent, Mr. BAUMAN was allowed to proceed for 1 additional minute.)

Mr. JOHNSON of Colorado. If the gentleman will yield further, it is a shameful experience, it seems to me, that we acquired by conquest a beautiful area of the world, Hawaii, and then the people we take it away from are those who are the poorest, the sickest, the most uneducated and the most downtrodden in that particular area of the world. That is a circumstance I know the gentleman would not endorse.

Mr. BAUMAN. The gentleman is correct. This is an unfortunate present circumstance the gentleman aptly describes. But he may as well describe the plight of the Indians in the United States as a result of similar conquests.

Mr. JOHNSON of Colorado. That is correct.

Mr. BAUMAN. And we have turned the American Indian nations into enormous welfare operations over the years, to their detriment, to the destruction of their pride and their nationhood. We have reduced them to a lesser people than they were before the conquest, and I have the same fear for the original Hawaiians if we put them on Federal dole.

But in the meantime they get social security, they are eligible for welfare. So are other hundreds of thousands of people regardless of race or color, but they get it because of their economic standing. They get no special treatment as this bill suggests.

Mr. HEFTEL. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, the gentleman has alluded to a $35 billion cost, and he has quoted from a journalist who obviously knows more than this body. During the course of the last 5 years, this body and the then Members from Hawaii, SPARK MATSUNAGA and Pasty Mink, introduced legislation, and in 1974 H.R. 15666 was proposed, the Hawaiian Native Claims Settlement Act. The bill sought to establish the Hawaiian Native Corporation in which every person with any Hawaiian blood would share equally. The Corporation would administer a $1 billion repa-

ration payment from the U.S. Government to be paid at the rate of $50 million per year for 20 years, which would be about 3/5 of a billion of actual cost.

Now, I would like to point out that at no time, even when the Members from Hawaii were proposing a sum certain, did they propose a sum that even equals $1 billion. One billion dollars at the rate of $50 million a year would be in the nature of $600 million of present value. There is no basis for using these extraordinary and untrue allegations of cost.

Assuming that a responsible commission is appointed, a responsible conclusion will be reached by that commission and recommended to this body. If this body concludes that the commission's findings are not reasonable, this body will reject them. But in no case should we ever hesitate to react to the qualities of conscience, of human decency, and a sense of responsibility.

I would like to remind the gentleman that because of a sense of responsibility and conscience, regardless of the consequences and the outcome, it does remain true that perhaps $500 billions were spent trying to defend peoples' freedom in Vietnam; trying to stop people from being overtaken in the same way that the Hawaiian people and their lands were overtaken in 1893 without an act of Congress, without the knowledge of the President.

Now, the gentleman is well aware that this commission is a responsive and responsible way to determine what, if any, reparations are due the Native Hawaiian people. We should not be afraid to study, to analyze, to think. We should not be afraid of the truth. We should not be afraid of our consciences, and I would hope that this body would at least see fit to establish the commission to determine what, if any, reparations are due Native Hawaiian people.

Mr. BAUMAN. Mr. Speaker, will the gentleman from Hawaii yield for a question?

Mr. HEFTEL. I yield to the gentleman from Maryland.

Mr. BAUMAN. The gentleman has given us more information than we have heard in two debates on this matter—did I understand the gentleman to say his estimate of the potential cost, if the claims are equitably settled, would be at least $1 billion?

Mr. HEFTEL. No, I did not.

Mr. BAUMAN. Could the gentleman give us his projected figure, if all the claims are equitably settled, as to what the total cost will be?

Mr. HEFTEL. I can only tell the gentleman that in 1974, when this body and the then Representatives from Hawaii, SPARK MATSUNAGA and Patsy Mink, endeavored to use a sum certain and did not propose a commission to be appointed to determine reparations, but rather determine what they thought reparations should be, determined that it should be $1 billion paid at the rate of $50 million a year, which would have a present value of 60 percent, or approximately $600 million.

That is the only time any sum certain has been mentioned in the 5 years that this dialog has continued about reparations for native Hawaiians. Assuming that the Congress decided and then rejected, Representatives MATSUNAGA and Mink decided it would be better to establish a commission, since that commission might come in at a lower or higher figure, or might want to utilize funds for native Hawaiians in a different way than merely establishing a corporation for meeting specific needs.

The SPEAKER pro tempore. The time of the gentleman from Hawaii (Mr. HEFTEL) has expired.

(On request of Mr. BAUMAN, and by unanimous consent, Mr. HEFTEL was allowed to proceed for 3 additional minutes.)

Mr. BAUMAN. Mr. Speaker, if the gentleman will yield further, is the intention in giving compensation to the descendants of those wronged, if some are still living, to compensate them for the value of the lands taken valued at the time they were taken or the value of the lands at the present time?

Mr. HEFTEL. It is not based on the value of the lands at the time they were taken or at the present time. The determination of the amount would be determined by what is considered to be fair in light of all the facts some 80 years later.

Mr. BAUMAN. I thank the gentleman.

Mr. WHITE. Mr. Speaker, will the gentleman yield?

Mr. HEFTEL. I yield to the gentleman from Texas.

Mr. WHITE. Mr. Speaker, I wonder if the gentleman would clarify these points for me. Is the wrongdoing and the compensation therefor to be for the taking over of government or the actual taking of land and titles for individuals?

Mr. HEFTEL. It is the Commission's responsibility to determine what should be the nature of the compensation and upon what wrong it should be based.

Mr. WHITE. But I am asking, Was land title taken from individuals or was there merely a change of government?

Mr. HEFTEL. Land titles changed hands. Individuals who owned lands no longer owned them afterward.

Mr. WHITE. Without compensation?

Mr. HEFTEL. Without compensation.

Mr. PHILLIP BURTON. Mr. Speaker, will the gentleman yield?

Mr. HEFTEL. I yield to the gentleman from California.

Mr. PHILLIP BURTON. Mr. Speaker, I rise in support of this legislation.

I think much of the debate would be more relevant after we had the benefit of the recommendations of the Commission. I for one cannot anticipate what those recommendations will contain. I do not think anyone in the House can, but I do think it valid to construct this mechanism to bring to the Congress an informed point of view on what variety, if there be a variety, of approaches, if any, we should take to deal with this problem.

People living in the island areas, that by definition have a very small and limited amount of land, are confronted with a different measurement of continuum, if you will, of the kinds of problems that those of us living on the land mass of the continent do not have and have not been confronted with.

I can distinguish clearly this mechanism from a great deal of other matters, some of which are remotely similar and some of which are not similar at all, to the great variety of native American claims we hear bruited about from one end of the country to the other.

The SPEAKER pro tempore. The time of the gentleman from Hawaii (Mr. HEFTEL) has again expired.

(On request of Mr. PHILLIP BURTON, and by unanimous consent, Mr. HEFTEL was allowed to proceed for 1 additional minute.)

Mr. PHILLIP BURTON. Mr. Speaker, if the gentleman will yield further, finally we have an irony in the fact that if Hawaii were still a territory—and as our colleagues know, I happen to chair this committee as it relates to the insular areas—Hawaii's claims, to whatever extent they would have been valid, probably would have been dealt with. We do not need to have in any of the areas, that is, in the Virgin Islands or in Puerto Rico or in Micronesia or in Samoa or in Guam or in the Northern Marianas, any added mechanism for unfinished business in any of these matters. Hawaii fortunately became a State, but as a result of that they have been left out of the mechanisms set up for any other of the island areas where there was a demonstrated need to deal with these matters. So I would urge my colleagues to focus in on the short-term effort to set up this Commission.

The SPEAKER pro tempore. The time of the gentleman from Hawaii (Mr. HEFTEL) has again expired.

(By unanimous consent, Mr. HEFTEL was allowed to proceed for 2 additional minutes.)

Mr. PHILLIP BURTON. Mr. Speaker, if the gentleman will yield further, the effort today is to set up a short-term Commission, without prejudging how we will react to any or all or whatever recommendations may be brought to our attention.

Mr. MARRIOTT. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I would like to have a colloquy with the gentlemen from Hawaii (Mr. AKAKA and Mr. HEFTEL).

Mr. HEFTEL. It will be my pleasure.

Mr. MARRIOTT. First, Mr. Speaker, I would like to mention that probably few people, other than yourselves, in this body have spent more time in Hawaii than I have. I have lived there for a couple of years and have a lot of love for that area, but I do want to ask a couple of questions that bother me a little bit.

No. 1, why are we resurrecting this problem at this point? Why have 80 years elapsed and we are now just discovering that possibly there might be a claim against the United States, and therefore we are now entertaining this possibility?

Mr. HEFTEL. Mr. Speaker, if the gentleman will yield, the Hawaiian people are not as versed in the rights of citizens or in the law either as a territory or now as one of the States of the United

States. They were a trusting people. They never tried to exercise their rights. Ultimately through the educational process and the awareness of the way individuals express and exert their rights as Americans, the native Hawaiians concluded that they alone, among the native Americans, have been wronged and have never acted to have anything done to right that wrong.

So, ultimately, when they found themselves to be the overwhelming highest percentage of people on welfare, in prisons, and not well adjusted to the society in which they lived, they commenced finding out what their rights were, as did other native American groups.

If you will check, you will find that the Indians and the native Alaskans all exerted their rights while the native Hawaiians sat back and, among other things, waited for America to do that which was right.

It is to the credit of this body and this Nation that we did ultimately address those wrongs and have for the last 5 years been discussing what, if anything, should be done to right those wrongs.

The Commission would theoretically be the first official body to be established within our Government to make a report to this body as to what, if anything, should be done with respect to the wrongs against the native Hawaiians.

Mr. MARRIOTT. Why did not the Governor of the State or the legislature of the State or the local officials of Hawaii do something? Was there not a court system used back in those early years to get at this problem? Why are we doing this now in the Congress? It would seem to me to be perhaps an inappropriate place in which to do this.

Mr. HEFTEL. I suppose there is a reason. The people, when they established this Government of the United States, determined that there shall be a Congress, a Congress which represents the people, a body which is the conscience, perhaps, of the people. We are here to perform those functions which we will know we should perform when we determine what is right and what should be done. I am not afraid to find out that we have obligations which we should assume. That is why we are here. That is why this legislation has been proposed in this body. This is where it belongs.

The gentleman will note that most native Americans, most dissident groups in America, go to courts of law because they find that they want to sue. They want to use legal remedies. They sometimes want to attack.

The gentleman may recall what happened in the burning of Watts. He may recall other riots that we have had in the United States.

The native Hawaiians were willing to patiently wait for this body to act in good conscience and with some concern, and that is why we are here today.

I think we should meet this responsibility that has naturally been given to us.

Mr. MARRIOTT. I have just one other question.

Not to belabor the point, does the gentleman have a list of potential grants to those to whom the gentleman thinks a wrong has been done? Do we have some kind of preliminary list of those people, where they are located, and how much land is involved?

The SPEAKER pro tempore. The time of the gentleman from Utah (Mr. MARRIOTT) has expired.

(On request of Mr. HEFTEL and by unanimous consent, Mr. MARRIOTT was allowed to proceed for 2 additional minutes.)

Mr. HEFTEL. If the gentleman will yield further, Mr. Speaker, so that I may answer his question, we are not going back to the land as the basis for the establishment of the Commission or for the determination of what will be found by that Commission. What we are going back to is an illegal taking of land and now a determination of what, based on present day fact, should be the reparation.

The number of people, if we included all Hawaiians of any degree of Hawaiian blood, would be approximately 150,000 native Hawaiians. If we use something greater than .01 percent of native Hawaiian blood, then the number of people would be reduced from 150,000. They are all available for targeting, for identification, for participation; and at no time has the Commission that has been proposed or prior legislation that has been proposed conceived of direct payments to native Hawaiians. That may be the finding of the Commission; but up until this point, it has been a question of what kind of mechanism should be established to perform what kind of function for the native Hawaiian so as to right the wrong that was committed, if the Commission finds that wrong has been committed, and that some form of reparation should take place.

Mr. MARRIOTT. Most of this land, I take it, would be on the island of Oahu rather than the outer islands?

Mr. HEFTEL. No, no. If we want to address the question of where the land is, it would not necessarily be Oahu versus the neighboring islands. However, we are not trying to address the land, per se.

Mr. MARRIOTT. The purpose of this legislation, then, will be to study the 150,000 potential claimants and determine whether or not they, in fact, have a legitimate claim; is that what we are doing?

Mr. HEFTEL. The Commission would be established to do that and to make a recommendation of what, if any, remedy is due.

Mr. AKAKA. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, the background of Senate Joint Resolution 4 has been discussed many times over—in the Interior and Insular Affairs Committee, on the floor of the House, in the Rules Committee and in numerous dear colleague letters.

The Hawaiian Monarchy, an independent, foreign nation, was unilaterally overthrown by the U.S. Minister and a group of non-Hawaiians. The action was investigated by the Federal Government and decried by President Grover Cleveland. President Cleveland said that—

> if a feeble but friendly state is in danger of being robbed of its independence and its sovereignty by a misuse of the name and power of the United States, the United States cannot fail to vindicate its honor and its senso of justice . . .

All Senate Joint Resolution 4 does is indicate that we in the Congress are willing to at least look into a situation that has been ignored for 85 years.

When this measure was brought up under suspension, certain objections were raised which I would like to place in proper perspective.

First. This is not a reparations bill. It merely establishes a study commission to look into the overthrow of the Hawaiian monarchy in 1893. The commission will determine if a wrong was committed and what obligation, if any, the United States may have in affording a remedy. It does not prejudge the issue. It does not mandate any compensation. There is no need for such alarmist statements as "the taxpayers of the United States ought to be protected against a wholesale raid on the Treasury under the guise of retroactive reparations." Anything, and I repeat, anything recommended by the commission will have to be approved by the Congress.

Second. Except in the case of Hawaii, the United States has never directly acquired territory by conquest. I believe that the examples used to illustrate our recognition of the right of conquest were Texas and the Louisiana Territory. Texas first declared its sovereignty from Mexico, then joined the Union. France acquired the Louisiana Territory from Spain by conquest, but we purchased it from France. Furthermore, the overthrow of the Hawaiian Government was carried out solely by the U.S. Minister to Hawaii and troops at his immediate command, without the knowledge or consent of the President or the Congress.

Finally, we are not, as some people have stated, setting any kind of dangerous precedent by addressing ourselves to claims that are 85 years old. The Alaska Native Claims Settlement Act was approved by Congress 104 years after the signing of the Treaty of Cessions, through which the United States purchased Alaska from Russia.

My friends, Native Hawaiians constitute 19 percent of the population of my State. This 19 percent accounts for 46 percent of all juvenile offenders and 35 percent of all adult offenders. In 1977, they had an unemployment rate of 13.6 percent, nearly twice the State average. According to the 1970 census, 58.8 percent of all Hawaiian families had incomes below $10,000.

The Hawaiians have made every attempt to help themselves, but the events of history and factors beyond their control have exacerbated their efforts.

Some people may try to relate Senate Joint Resolution 4 to disruptive land claims litigation. Some may try to relate it to dark visions of multi-million-

dollar reparations. Some may not be able to relate at all to an issue dealing with people 5,000 miles away. I can only say to you: This matter is as foremost in the minds of 150,000 of the people I represent as any issue of national or international note. It is as real and as close to them as are the personal concerns of any other citizens of any other part of the United States. It was passed by voice vote in the Senate. It was passed by the House Committee on Interior and Insular Affairs. I now ask that the full House pass Senate Joint Resolution 4, as presently worded, and fulfill our responsibilities as the representatives of all Americans.

Mr. RUDD. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I feel great sympathy for my distinguished colleagues from Hawaii, and I know that they feel great compassion for the people there.

I do, too. But I fail to see the differences that have been outlined here—differences such as the acquisition of New Amsterdam from the Indians by the Dutch, of what later turned out to be New York, part of the United States of America.

I do not quite see the difference between this approach, which could turn into great reparations for the Native Hawaiians, from that of the people who say that the Treaty of Guadalupe Hidalgo in 1847 was a travesty on the descendants, or the owners, or at least the occupiers of the land that encompassed a good portion of the Western part of our country today.

There is a movement afoot in the Southwest today to try to nail that one down.

What we are really talking about are territories acquired by one nation from another nation, where the territories are acquired by the country as a whole at a time when sometimes the people who have occupied the land probably did not have title to the land in the sense that we think about title.

We think of title as being the title they would have had under the government in this instance when the land was transferred to our Government.

But as we reach back into history to try to remedy these wrongs, thereby establishing a precedent like this, I think we will set up a means by which the descendants of the people who occupied the Southwest, the Louisiana purchase, and even Manhattan Island, would have a claim against our Government in this day and age—a claim against the people who pay taxes today.

This is something that should have been handled and remedied at the time of the acquisition. We cannot rightfully impose the potential high cost of the remedy being proposed here upon the taxpayers of the United States, today and tomorrow.

Mr. Speaker, I am opposed to this piece of legislation.

Mr. VANIK. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I may support this legislation. I think it has merit, but I would like to be sure that it is not going to result in any unjust enrichment.

I can understand why there might be a very proper claim for compensation for lands acquired by the Federal Government at Hickam Field and such installations that are involved in the State of Hawaii, but I would be terribly shocked if the Federal taxpayers were to be called on to make compensation payments from the people all over the United States to contribute to help recover the rights of people while others have been unjustly enriched.

If some of this land is now in the hands of private people or private corporations, I would hope that the commission would have the authority to determine this and determine whether some part of the cost of the compensation should not be paid by those who are unjustly enriched.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I yield to the gentleman from Wyoming.

Mr. RONCALIO. Mr. Speaker, I appreciate the gentleman's position.

I think the Commission will have a duty to look first into what lands on all the islands are not beneficially used in agriculture anymore because of the sinking of the water tables and the difficulty of irrigation and what lands lend themselves to residential purposes. If so, some of these lands can very readily be acquired at something less than high figures or at a very moderate price and can be put to a good purpose. I am looking forward to this sort of report from the commission.

Second, it is almost impossible to go to other Hawaiians and nonnatives and disturb peaceful possession of their homes. These are people who may have been there 50 or 75 years, and we do not want to disturb that. This is all privately owned land, and this is what we want to avoid. I am sure the Commission will realize this.

The problem is how to bring about a just use of surplus lands by the General Services Administration, and this addresses itself to the fundamental question. What value do we put on Hickam Field. Can the Congress value that at $10 billion? If we wish to put a value on it, the figure must be a fictitious one.

I am sure the clerk at OMB said to Elizabeth Drew what she reported, but that may not have been what OMB said.

Mr. Speaker, the Commission will have a job to do, and I am glad the gentleman brought this matter up.

Mr. VANIK. Mr. Speaker, let me ask, will the Commission have an authority and a mandate to see that there is no unjust enrichment, and that we do not simply use the Federal Treasury to pay off the native claims, which are very proper, and then let someone else enjoy the use of those lands today without having properly paid for them or obtained title to them?

Mr. HEFTEL. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I yield to the gentleman from Hawaii.

Mr. HEFTEL. Mr. Speaker, perhaps it would be helpful simply to read from the Senate joint resolution itself. The appropriate language is as follows:

Any recommendations for a remedy contained in the report required by section 3 may include, but shall not be necessarily limited to—

(1) the distribution, expenditure, investment, or other use of funds as a component of any such remedy, including, where appropriate, innovative uses of the funds which will permit such moneys to be employed successively for the benefit of Aboriginal Hawaiians, such funds to be appropriated in equal increments over a period of years;

(2) the provision of land as a component of any such remedy through any method, including the surplusing of Federal land and amendments to the Hawaiian Homes Commission Act of 1920 (42 Stat. 109): *Provided*, That, should the surplusing of Federal lands be recommended as a component of any such remedy, the Commission shall propose a method or methods for resolving, whenever a tract of such land is offered, whether such tract shall be conveyed to the State under applicable law or the Aboriginal Hawaiians under a subsequent Act to provide for such remedy;

Mr. Speaker, there has never been any intention that any individual will obtain improper enrichment or even enrichment per se. What we are talking about is a commission that can determine whether there are surplus lands or moneys which should be used in a responsive, responsible, and innovative way for the native Hawaiians. There is nothing involved in here that contradicts that.

Mr. VANIK. The section the gentleman has read does not answer my question.

Mr. HEFTEL. Would the gentleman like to offer an amendment?

Mr. VANIK. No. I am dealing with the issue of the original taking of the land.

Now, the Government of the United States, in all of its history, has never denied the right of the titleholders of property. We have always recognized established titles of those.

The SPEAKER pro tempore. The time of the gentleman from Ohio (Mr. VANIK) has expired.

(By unanimous consent, Mr. VANIK was allowed to proceed for 2 additional minutes.)

Mr. VANIK. I want to be sure that the land which was taken does not now somehow find itself in the hands of private people, private corporations, and then have the Federal taxpayers of all of the United States, paying our tax money for the benefit of the private enrichment of those who now hold the land. I am not talking about a claimant's right. I am talking about the person who now has the title, who somehow got title to the land and is now in possession of it. I want to be sure that person is not unjustly enriched at the expense of the U.S. taxpayers.

Mr. HEFTEL. If my colleague will yield to me, there is no way that can happen unless the commission reports findings that it wants to do that and this body votes to do it. It has never been the intention to do that. I can never believe the commission was established to do it. Therefore, it cannot happen.

Mr. VANIK. My one question is: Will the commission determine in its study that the lands were appropriated or taken by the United States of America and are now in private hands? Are you

going to identify those lands? Are you going to identify those lands and raise the question as to the legality of the title?

Mr. HEFTEL. There was no attempt in the establishment of this commission to concern itself with given parcels of land entitled to it. That was not the commission's objective.

Mr. VANIK. The gentleman is avoiding my question.

Mr. HEFTEL. I am not evading the gentleman's question.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. I thank the gentleman for yielding.

Mr. Speaker, I would say that the answer to the gentleman's question is an unequivocal no. The commission does not have that kind of authority, the commission does not have that kind of mandate, and it should not. And when the gentleman from Maryland was talking about the kind of precedent that this would set, he obviously did not even have this notion in mind.

The SPEAKER pro tempore. The time of the gentleman from Ohio (Mr. VANIK) has again expired.

(On request of Mr. JOHNSON of Colorado and by unanimous consent, Mr. VANIK was allowed to proceed for 2 additional minutes.)

Mr. JOHNSON of Colorado. If the gentleman will yield further, if the gentleman's notion were taken seriously that this commission or Congress should go back and consider the doctrine of unjust enrichment and perhaps restore land, all the way from Maine to California the native claims would be filed with the same kind of justification, and I would assume that would include the same kind of Indian claims in Ohio. And that is the kind of bag of worms that the gentleman certainly does not want to open up. I do not think the gentleman is serious when he talks about unjust enrichment and taking the land away from the people who have had the land for the past 85 years. The means by which their ancestors got it is not the fault of the people who have it now.

Mr. VANIK. I am seriously interested in the question of unjust enrichment. I am going to consider it carefully. If this report does not dwell on it, then I may react to the report. But I would, frankly, feel that I would be deeply interested in how the people got title between the time the United States got involved and the present time. And I think we should be sure we are compensating for someone who has picked up the title wrongfully. We should not ask the American taxpayers all over the United States to pay to reimburse natives who ought to be reimbursed on their rights of the land which has now been conveniently transferred, the title for which remains in the name of a private corporation or a private individual. Action should be taken against those who wrongfully hold land appropriated or taken from the native Hawaiians. I just want to be sure there is no unjust enrichment.

Mr. JOHNSON of Colorado. I think that the legislative record should reflect that that is the gentleman's own personal view. It certainly is not the point of view of the Committee on Interior and Insular Affairs or the Subcommittee on Interior which considered it.

Mr. VANIK. We will deal with the report when it is made.

Mr. RONCALIO. Mr. Speaker, I move to strike the requisite number of words.

I believe we have spent an hour and 10 minutes on debate, and if there is no further debate, I should like to move the previous question. However, I do not wish to cut anybody off.

Mr. POAGE. Mr. Speaker, I move to strike the last three words.

Mr. Speaker, I take this time to try to clarify this thing in my own mind; not to try to give the Members information, but to try to get some.

Of course, there is one thing I think we have all overlooked that I think I do know. No commission on earth can settle this nor can the Congress. Only the courts can settle it. We cannot adjudicate land titles. We can pass legislation here, but we cannot adjudicate land titles, and neither can any commission.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman.

Mr. RONCALIO. It is not our intention to adjudicate land titles, and not the intention of the commission to adjudicate land titles. It is not the intent of this bill and not the intention of this Congress in years to come. We hope to create a commission to study wrongdoing and recommend compensation or adjustment or atonement. That is all.

Mr. POAGE. In other words, the gentleman from Wyoming is saying that presumably the commission will make some recommendations to the Congress as to the possibility of making payments, rather than passing upon the titles. Here I think we get into terribly dangerous ground, or at least it seems that way to me. Maybe I am wrong. Am I right?

I am afraid that I voted for this bill when it was brought up the first time because I wanted to give these people every chance to recover anything that they owned, but now do I understand correctly that in about 1893 there was a revolution in Hawaii against the queen, and that our minister or ambassador there sent some American marines to take part in it on the side of the revolutionary group? Is that correct?

Mr. RONCALIO. That is alleged.

Mr. POAGE. What is that?

Mr. RONCALIO. That has been alleged. This report alleges that is the case.

Mr. POAGE. What are the facts? That is what I am trying to find. What are the facts?

Mr. RONCALIO. May I answer this, if I may? I think a little bit of reading on the part of all of us might enhance our knowledge on what the facts are, and I would recommend that we do that reading when the commission is meeting over the next few years.

Mr. POAGE. Well, I want to know some facts right now. I understand—at least, I have heard—that there was a revolution in Hawaii, and that the United States involved itself through our ambassador. The President later repudiated it, as I understand it. At least we took sides and at least we had some marines there. I do not know whether they did any fighting or did anything, but they were there.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. I think it is an exaggeration to call it a revolution, because it was a "Committee of Safety" made up of approximately a dozen businessmen who contacted the American minister, who sent in a couple hundred marines and overthrew the government. So, it was not a revolution in the traditional sense.

Mr. POAGE. Did the marines do anything? Did they shoot any guns, kill anybody?

Mr. JOHNSON of Colorado. No, they did not have to. It was such a peaceful event that it did not qualify as a revolution. They just took over the operation of the islands.

Mr. POAGE. Anyway, is it not fair to say that there was a new government established? A so-called interim or provisional government. This new government was established and operated over 4 or 5 years, as I recall. Is that about right? Is it not correct to say that that provisional government claimed the title of all the lands that the queen had owned, what had been royal or public lands?

Mr. RONCALIO. Not only royal lands, but it was a distribution of land in species to the various natives that had taken place, and we have seen the maps, which lands are involved, and we rejected the appeal of those among the natives who said that land in species should be returned because that land constitutes about 60 percent of the entire islands.

I personally said to them, "It will be a cold day in hell when you ever get back 60 percent of those islands."

Mr. POAGE. We have got a court system. We have had one in the 1890's. Did we, the United States or the U.S. Congress, take any lands or did the provisional government of Hawaii take the action? Is it not fair to say that there was a domestic government in Hawaii. that they had a local government?

We have a government in the United States sitting right here now that came here as a result of a revolution against King George. We threw him out and we set up a government here that the British looked upon as revolutionary and we adjudicated land titles.

We are only talking, are we not, about the public lands of Hawaii? The U.S. Government has never taken lands.

The SPEAKER pro tempore. The time of the gentleman from Texas has expired.

(By unanimous consent, Mr. POAGE was allowed to proceed for 3 additional minutes.)

Mr. POAGE. Mr. Speaker, as I understand it, we are talking about the public lands of Hawaii, call them crown lands, call them queen's lands, call them whatever we want to, but the land that

belonged to the government. The government changed. Whether that change was properly constitutional or not does not seem to be the question here. But the government did change, and the government which was the government for 4 or 5 years did adjudicate these lands as belonging to the government of Hawaii, and it passed title to people who possibly should not have received title, but the government of Hawaii passed the title. Now that is right, is it not? Is that not what happened?

Mr. RONCALIO. If the gentleman will yield, I believe that is an accurate accounting of what took place.

Mr. POAGE. All right.

Then we come in 1899 or somewhere along about then and the United States annexed Hawaii. We had a request from the government of Hawaii, just as we had earlier had a request from the Republic of Texas. The Republic of Texas asked and the U.S. Congress annexed, and they did the same thing in the case of Hawaii. And the public lands of Hawaii became public lands of the United States.

But the private lands, the lands that had passed under title arrangements of the previous governments, remained just where they were. When we annexed Hawaii, the United States of America did not take title to a single acre of privately owned land, did it, of privately owned land?

Mr. RONCALIO. I believe that is correct.

Mr. POAGE. All right. Then we are talking about the public lands, and the public lands passed. I am not trying to pass judgment on the justice of annexation because I do not know, but the public lands did pass from the queen to the provisional government and from the provisional government to the United States. But the private lands remained in the titles where they were and passed under the laws of the government that was in existence at the time of the transfer. And since 1898 any private transfer has been in accordance with the laws of the United States. And I do not suppose that we are now challenging any of those titles. If there is a challenge to those titles, the courts are open and any challenge to the transfer of lands.

Mr. RONCALIO. There is no challenge to those titles. I am sure of that.

Mr. POAGUE. That is what I am trying to get at.

Mr. HEFTEL. There is no challenge to any land title nor is the Commission intended to determine whether or not any land titles should change hands.

Mr. POAGE. I think that goes to the heart of the question that the gentleman from Ohio (Mr. VANIK) raised.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. POAGE) has again expired.

(By unanimous consent, Mr. POAGE was allowed to proceed for 2 additional minutes.)

Mr. POAGE. Mr. Speaker, I think that goes to the question the gentleman from Ohio (Mr. VANIK) raised. He pointed out that we are not doing full justice by making payments if in fact we have taken their lands simply by paying the 1893 value of that land. Evidently, if land has been wrongly taken and is now in private hands someone must have been enriched. But what government is responsible? Is it contended that the United States should pay for what some previous government did by reason of having a different system from our own?

I agree that it seems to me very probable that some of those governments, whether it was the queen or whether it was the provisional government I know not, but somebody in Hawaii transferred a vast amount of land to five families. Is that not right?

Mr. RONCALIO. That is correct.

Mr. POAGE. Someone got a lot of the land into the hands of five families and it may or may not have been right, but it was not the U.S. Government, it was one of the previous governments of Hawaii, not the U.S. Government. And for the U.S. Government to now make payments in cash for the injustices perpetrated by a previous government, seems to me to be entirely out of line.

Mr. RONCALIO. Mr. Speaker, would the gentleman yield?

Mr. POAGE. Certainly.

Mr. RONCALIO. The point is well taken. I again wish to state to the excellent gentleman in the well, and to those who have applauded his remarks, that the maps that those Native Hawaiians have, who pursue this legislation, make a distinction between the land claims which you mention, and who are talking about compensation for the 62 or 63 percent of the surface of the islands, not the land you referred to. They want compensation for the land taken from them not for the land conveyed by the prior Hawaiian administrations.

Mr. POAGE. That is the point I am making, it was land taken by another government, not the United States. I do not believe the United States is responsible for what the kings and the queens of Hawaii did, nor what the provisional government of Hawaii did. I think the United States is responsible for its own acts and I will vote to pay the debts we have contracted, but I am not assuming responsibility for the acts done by some foreign government, because the government of Hawaii was a foreign government as far as we were concerned, up until 1898.

Mr. HEFTEL. Mr. Speaker, if the gentleman will yield, the Native Hawaiians are talking about, if nothing else, if you want to only talk about land, that land which the United States of America owns and lays title to as a result of that illegal takeover. The U.S. Government itself has its own multiple thousands of acres of ownership.

If you want to deal in land, you can restrict the dialog to the land owned by the United States of America as a result of the illegal actions which were committed in 1893. But we are not, in this case, trying to delve into that part of the issue. We are not talking about that land.

The SPEAKER pro tempore. The time of the gentleman has again expired.

(By unanimous consent, Mr. POAGE was allowed to proceed for 2 additional minutes.)

Mr. POAGE. Let us get the facts straight. Then we are coming down to the proposition that we are actually asking the United States to make payment for the inequitable acts of a previous government.

Now, it is alleged that the United States had a part in establishing that provisional government. I think the testimony is that all that happened was that the United States had some Marines over there, and they were there and supposedly exercised some moral influence, but no direct force.

Mr. JOHN L. BURTON. Mr. Speaker, would the gentleman yield?

Mr. POAGE. I would, but I am not going to ask for additional time so I would like to go ahead and conclude my statement.

So we are not talking, then, about restoring land that the United States has taken from anybody, but we are paying for something that somebody else did.

I live in a country where the King of Spain once owned all of the land and the King of Spain did not distribute it like I would like to see it done. Later the Mexican Government owned all of the land and did not grant it like I would like to see it granted. Are we now going to go back and pay for all the claims on the Mexican Government or on the King of Spain?

I will pay for every wrong that the United States has done, and if the United States took anybody else's land I want to pay for it, but when we did not take it, then I do not see why we should make such a payment.

Mr. HEFTEL. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I would be glad to yield to the gentleman from Hawaii.

Mr. HEFTEL. Mr. Speaker, will the gentleman yield?

Mr. POAGE. Yes, I yield to the gentleman from Hawaii.

Mr. HEFTEL. Mr. Speaker, I would like to point out that armed Marines of the U.S. Government do not exert moral persuasion on a people who are not armed.

Mr. RONCALIO. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I want to thank the majority leader, the gentleman from Texas (Mr. WRIGHT), for the timely and appropriate message he has just concluded.

Mr. Speaker, I ask unanimous consent that all debate on this resolution and all amendments thereto end by 12:30 or in 30 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, there are a number of Members seeking time and they have not spoken before.

I wonder whether we can just conclude this bill without cutting off debate on it.

Mr. RONCALIO. I am sorry, Mr. Speaker, I did not hear the gentleman's statement.

Mr. BAUMAN. I just wonder whether the gentleman could not withdraw his request at this time.

Mr. RONCALIO. I would be happy to extend the request, if that would be agreeable, to 12:45 or 1:15 p.m.

Mr. WHITE. If the gentleman will yield, Mr. Speaker, I do not think it will take that long.

Mr. RONCALIO. Mr. Speaker, I withdraw my unanimous-consent request.

The SPEAKER pro tempore. The gentleman from Wyoming withdraws his request.

Mr. JOHN L. BURTON. Mr. Speaker, I move to strike the requisite number of words.

I am not going to take 5 minutes, but before we read great thoughts, why not just read the bill? All the bill does is establish a study commission to investigate the claims that obviously need some investigating, because everybody in the House seems to be confused about what is at stake, and then to make a report to Congress with recommendations. The cost of the whole project will be something less than $900,000 for 3 years. That is all we are voting on. We are not voting on the five families; we are not voting on reparations; we are not voting on billions of dollars. We are voting to establish a commission to study the real problem, to report to us for final action, and according to the committee recommendation.

Mr. VANIK. Mr. Speaker, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from Ohio.

Mr. VANIK. I thank the gentleman for yielding.

What concerns me is the provision on page 3 beginning with line 15 in which Congress by its action today declares, that we, the American people, atone for a wrong committeed by the American people.

Mr. JOHN L. BURTON. What is wrong with that?

Mr. VANIK. I am not sure. I have not been convinced that a wrong was committed by the American people for which we must atone. That is what is wrong with this language. I do not mind the study. I do not mind the commission. I am not prepared to admit a confession of wrongdoing by the American people through this Government.

Mr. JOHN L. BURTON. A confession is good. I will take back my time. I yield no further.

Confession is good for the soul. There is substantial evidence; that is what we are saying. I think this study might even find that it is better to have plumbers working the plantations of Hawaii than have the plantations worked as plantations. I just think we ought to deal with what is before us. It sets up a commission. Less than $900,000 will be spent over 3 years to report to us what the problem is and what the recommendation is. We will probably end up spending more than $900,000 worth of our time wasting it discussing something that is very simple, very straight forward, and that everybody sees a lot of problems with. I just think we ought to get on with it.

Mr. MARRIOTT. Mr. Speaker, will the gentleman yield?

Mr. JOHN L. BURTON I yield to the gentleman from Utah.

Mr. MARRIOTT. I thank the gentleman for yielding.

I think just to get down to the bottom line, it seems to me that however we study this issue, the fact is that there were wrongs committed, and the issue today is whether or not we ought to have a commission to study it or whether some other method that we have in Congress can do it without an $800,000 or a million-dollar commission. Could the gentleman or somebody comment on whether or not we have really thought out in terms of whether the commission method is the only way to solve this?

Mr. JOHN L. BURTON. Yes. I mean we could just bow our heads for a minute and maybe divine guidance would strike us. A commission at a cost of less than $300,000, which is certainly a substantial amount of money, per year for 3 fiscal years is really the best way to solve this. The commission idea came about because Congress rejected a congressional solution to the problem in an authorization of $12 million. I think this is the sensible way to go about it. There may be other ways, but we could be debating them for 6 months. I think this is a simple, straightforward approach to find out what the problem is and to do something.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. JOHN L. BURTON. I would be happy to yield to the gentleman from Wyoming.

Mr. RONCALIO. I thank the gentleman for yielding.

May I say to the gentleman from Utah (Mr. MARRIOTT) that the last Congress rejected a bill to provide a specific sum, so we are trying to find a common ground again for what seems to be the best approach.

Mr. CHARLES H. WILSON of California. I thank the gentleman for yielding.

Mr. JOHN L. BURTON. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. I thank the gentleman for yielding.

Will the gentleman be able to tell me what the makeup of the commission is? I think there was an amendment earlier today that changed the makeup of the commission.

Mr. JOHN L. BURTON. I do not know what the amendment was. I will be happy to yield to my friend, the gentleman from Hawaii (Mr. HEFTEL).

Mr. HEFTEL. I thank the gentleman for yielding.

The commission has been amended to comprise less than a majority of Native Hawaiians and less than a majority coming from a list submitted by the Governor to be appointed by the President.

Mr. CHARLES H. WILSON of California. The way I heard it was there were 15 people, no less than 9 of whom would be Native Hawaiians.

Mr. JOHN L. BURTON. No; that was changed.

Mr. CHARLES H. WILSON of California. That has been changed.

Mr. HEFTEL. It has been amended to no more than seven Native Hawaiians.

Mr. JOHN L. BURTON. It eliminates potential conflict.

Mr. KINDNESS. Mr. Speaker, I move to strike the requisite number of words.

It will be my intent to take much less than 5 minutes, but I think this debate has amply demonstrated that people of sincerity and good will may share a concern about a problem and yet differ greatly as to the means with which to attack and attempt to solve that problem. It seems quite clear to me from the debate that the problem is identified broadly in terms of the condition in which people find themselves living at the present time, which results in part from a disruption of a way of life that occurred some time ago.

Whatever involvement the U.S. Government has, appropriate or inappropriate, legal or illegal, constitutional or unconstitutional, it really matters very little. What we should be focusing upon is the problems confronted in living by the people in the grouping to which this whole matter is directed, this whole attempt to treat that problem is directed.

In other States of the United States perhaps you could find similarly situated people. The confusion seems to arise today from looking back. If we only looked forward, as I believe both the gentleman from Hawaii have been attempting to cause us to do. Let us look forward. The idea, or at least one of the principal ideas surrounding this Commission concept is that there should be planning for how to deal with the adjustment in a way of living or a change in the way of living that continues after these 80 some years. Those adjustment needs still are there today. We can see adjustment needs like these that still exist and have existed among people of different background circumstances for even longer periods of time.

I believe personally that the approach suggested in this resolution is a wrong approach. We ought to be considering, not the history and the background and "Who struck John", so to speak, but rather looking ahead to solving these problems.

In many programs enacted by this Congress attempts have been made to arrive at solutions to such problems. The whole concept of the Economic Opportunity Act and related legislation is to allow in specific areas and communities throughout this land the development of programs to meet problems of adjustment of people to the changes in our society.

Therefore, I would have to reach the conclusion that this is not the correct approach so long as it is directed to only one grouping or State.

I, for example, am descended from people who came to the United States since the time this matter occurred in Hawaii. It is a little difficult for me to look back in history and identify myself as a part of a nation 80 years ago that supposedly perpetrated this wrong.

Many other Americans who would pay the taxes to meet these needs through whatever programs might be recommended by the Commission and approved by the Congress have not been citizens and taxpayers of this country during all these 80 years. I think it is wrong for us to be backward looking. Instead, we should be forward looking.

Let us identify these problems, along with the problems of many other Americans and help to solve them as best we can, but not raise the hopes, as this bill will, perhaps false hopes, that there will be special attention given on some special basis to one group of people. Someone has suggested that maybe the people of Georgia at the time of the Civil War could suggest they ought to be entitled to some recompense from the United States for Sherman's drive through Georgia and the wrongs perpetrated there.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Wyoming.

Mr. RONCALIO. Mr. Speaker, the analogy is totally inappropriate. That was an act of war. The Nation was at war and Congress had a hand in that. The Congress did not have a hand in the taking of Hawaii.

Mr. KINDNESS. Well, there are all kinds of ridiculous proposals that could be made. There are shades of differences. Looking back might have caused this country to be great; but we can be greater by looking forward.

Mr. WHITE. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I think that everyone is very sympathetic to the plight of Hawaii, and everybody is very proud of Hawaii.

I think the reason we are exercised is, No. 1, because of the precedent this bill would set, particularly in the Western States of this country, and, No. 2, in fairness to the taxpayer. I think the gentleman from Texas (Mr. POAGE) is correct when he points out that the title was lost to the provisional government. There is no showing to support the idea that title was lost to the United States or that the United States took title of any land or took land away from any individuals. Yet the bill does not address whether it is land of individuals or public land that would be compensated.

Mr. JOHNSON of Colorado. Mr. Speaker. will the gentleman yield?

Mr. WHITE. Let me finish what I have to say, and I will get back to the gentleman.

Mr. Speaker, the provisional government declared a Republic which existed for 4 years prior to the annexation by the United States. Those facts are clear. The question is apparently over an intrusion of some 160 marines, but there is no showing that there was any firing. In fact, it is acknowledged there was no firing of weapons.

The monarchy, at a minimum had some 500 armed troops readily available, and apparently the natives themselves did not feel the government was worth supporting. There is nothing to show that they supported the monarchy. There is nothing in the report to show whether some of the Hawaiians of native birth were supportive of this overthrow or of the new government. There is nothing to show they were not in support of the provisional government itself.

I think what we need to address is not only the assistance of Hawaiians, but I am also quite willing, as I am sure other Members are, to remove any statute of limitations which would prevent the local citizens of Polynesian blood from going forward with claims against the State of Hawaii or the U.S. Government for any act which is compensable, but I do not feel that the taxpayers should be called on at this time to pay present values or inflated values as a result of the pure act of troops going in, unauthorized by the U.S. Government. Any claim would be by the unauthorized act on the part of our minister at that time, but there is no showing that the troops themselves caused any aggression or performed an aggressive act, and there is no showing whatever of any title being taken by the United States.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Speaker, addressing myself to that point about the United States taking over the acreage, I think there is a great misunderstanding on the gentleman's part.

The government land at the time, in 1893, including the land on which the people lived, amounted to 1.5 million acres. The crown land amounted to 984,000 acres, land belonging to members of the Queen's family.

That was the land that was taken over by the Committee on Public Safety when the American Marines provided the force that took over. The gentleman can say that he absolves himself and the United States from any responsibility, but as a matter of fact, it was our troops under the jurisdiction of our Marines that took it over.

Mr. WHITE. Did the American troops themselves have an act in taking over the land, had they removed themselves by that time, or was there any action on their part?

Mr. JOHNSON of Colorado. No, the marines were there at the time the new government was established. The Queen withdrew and threw herself on the mercy of the United States.

Mr. WHITE. When was the land taken?

Mr. JOHNSON of Colorado. In 1893.

Mr. WHITE. Was it taken over under the auspices of the marines?

Mr. JOHNSON of Colorado. Yes, that is what I am telling the gentleman. It was taken as a result of that action.

Mr. WHITE. There is nothing in the report that says the United States caused the loss of that title.

Mr. JOHNSON of Colorado. The Queen was deposed by U.S. Marines at the instance of American businessmen.

Mr. WHITE. No. The Queen probably surrendered her government because of the presence of the marines, but she had superior forces at the time and obviously did not have the support of her own people.

Mr. JOHNSON of Colorado. No.

Mr. WHITE. There is nothing to show the marines were ready to fire a shot.

Mr. JOHNSON of Colorado. Mr. Speaker, the gentleman is drawing a conclusion that I think perhaps should be reported on by the Commission. But the land itself was the 2.5 million acres. That is what I wanted to inform the gentleman. There were 1.5 million acres which belonged to the government. That was the land on which the people lived, and the crown lands amounted to 984,000 acres. Those lands were administered by the Committee on Public Safety. That was the land that was subsequently distributed and taken away from the people of Hawaii.

Mr. WHITE. But were the marines there at that time?

Mr. JOHNSON of Colorado. Yes.

Mr. WHITE. No, I do not think that history will show that the marines were there during the course of all those actions throughout the history of the Republic.

The point is that I think that is a fallacy in the gentleman's argument. This could be handled through the court system, as the gentleman from Texas (Mr. POAGE) said, and if there is a statute of limitations as an impediment, we should remove that. Let us remove any legal obstacle whatever so they can carry their claims forward as to that land.

Mr. FOLEY. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I think I may be among those Members who are deeply troubled by the necessity of casting a vote, either affirmatively or negatively, on this bill at some time today.

As indicated in the debate here today, there appears to be some evidence that the misconduct of some elements of the U.S. Forces, operating in Hawaii under the direction of our then-minister, may have contributed in some way to the improper taking of lands. That, at least, is the allegation made by the sponsors of this legislation.

My primary concerns are that the Study Commission it would authorize is not really given the task of analyzing the validity of these allegations and reporting back its findings, nor are we in effect authorizing something resembling the British Royal Commission to look into these questions of possible moral or legal obligation on the part of the people of the United States with respect to oher groups of citizens or the descendants of an earlier group.

We are, in fact, told by the committee that the purpose of this bill is to create a study commission. Given this fact, the subsequent findings are interesting to me. In the two or three paragraphs that precede the actual legislative language, the bill states that there is substantial evidence that a wrong was done to aboriginal Hawaiians. Then, the next paragraph goes on to assert that while this wrong—not this alleged wrong or evidence of wrong, but this wrong, which in one paragraph has been transformed from substantial evidence to a positive fact—cannot be fully compensated for, we must nevertheless attempt to do so. To this end, the legislation establishes a commission, whose main function, as I

understand it, is simply to decide ways and means of determining the compensation and the manner of its distribution.

Apparently, as it turns out, somehow we have already decided that compensation is owed, that a wrong has been committed, and that an obligation, at least in the moral sense, exists.

This, I think, is what troubles not only me but others here. A number of us who would like to establish a way to explore these assertions of wrongdoing and moral responsibility further but are not ready in the absence of such an investigation, to vote a finding of moral and financial responsibility on the part of the American people on the basis of alleged wrongdoing. Another cause of concern to me is the fact that the Commission itself is to be so constituted that 8 of its 15 members are to be appointed by the Governor of Hawaii. Yet, the State of Hawaii, perhaps indirectly and its citizens, directly, are to be beneficiaries of the Commission's work. In other words, the majority of those on the Commission are to come from the State that is to be benefited through some form of material compensation.

Pursuing this further, seven members of the Commission—it does not say seven of the eight—are to be Native Hawaiians. So most of the Commission's members will obviously be of a blood quantum which would be financially benefited by any compensation paid. This raises a bit of a problem, I would suggest, with respect to a conflict of interest, in that the very Commission members who are going to assess the probability of need for a certain amount of compensation are people who are of the community to be benefited. They are in effect the recipients themselves. How is it possible that this is not going to be a disturbing element when we come down to the question of compensation? I hope that my personal inability to vote favorably on the measure before us today will not be construed as an unwillingness on my part to look into this question further, for I think it ought to be examined.

Yet, in my view the very precipitous transition which takes in this bill from evidence of wrongdoing, to a finding of wrongdoing, to a determination that compensation is due a group, the majority of whose members are from the State involved, coupled with the notion that a number of those to be benefited should be involved in decisions regarding the amount of compensation, raises very real questions as to whether this is an appropriate forum and mechanism for deciding a question which, I believe, all Americans would like to see addressed appropriately and objectively.

Mr. FRENZEL. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I was stuck in the House waiting for another bill to come up, and I have listened to this entire debate. I must say that I have come to the same conclusions that have been articulated by the gentleman from Washington.

We are admitting a wrong about which there seems to be some doubt. We are creating a commission, which is indeed a stacked commission, which can only come back with some verdict of some large amount of money or some other resource.

But perhaps even worse than that is the fact that since those people who are supporting this claim have never been able to get a claim through this Congress, they are asking us to establish a whole new level of bureaucracy to do the job which the Congress itself should do.

My constituents have not been asking me to create new study commissions at a cost of $900,000. I doubt that other Members have received such requests. My constituents have been asking me, indeed, why a $1 billion Congress cannot do the kinds of things that these study commissions are supposed to do.

In my judgment, we would make a terrible error if we were to accept this bill or to create a commission for something we ought to do ourselves, a commission which is stacked, a commission which is already charged or told that a certain wrong has been committed that it must recompense.

Mr. Speaker, I think it is a bad bill. It ought to be returned to committee, and that committee ought to work on it in the future.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I would like to associate myself with the remarks of my colleague from Minnesota, and with the remarks of my colleague from the State of Washington.

Mr. RONCALIO. Mr. Speaker, I move the previous question on the Senate joint resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, and was read the third time.

AMENDMENTS TO THE PREAMBLE

The SPEAKER pro tempore. The Clerk will report the amendments to the preamble.

The Clerk read as follows:

Committee amendments to the preamble: Page 1, after the "Whereas" in paragraphs 1 and 2, insert the words "it is alleged that".

Page 2, line 8, after "these" insert "alleged".

Page 2, line 19, after "these" insert "alleged".

Page 2, line 26, insert at the beginning of the line and before "by such annexation," the words "it is alleged that".

Page 3, line 1 of the Whereas clause, after "without the" insert "alleged".

Mr. RONCALIO (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendments to the preamble be considered en bloc, and that they be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

The amendments to the preamble were agreed to.

The SPEAKER pro tempore. The question is on the passage of the Senate joint resolution.

MOTION TO RECOMMIT OFFERED BY MR. BAUMAN

Mr. BAUMAN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman from Maryland opposed to the Senate joint resolution?

Mr. BAUMAN. The gentleman is.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. BAUMAN moves to recommit the Senate joint resolution (S.J. Res. 4) to the Committee on Interior and Insular Affairs.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore being in doubt, the House divided, and there were—yeas, 29; nays 10.

Mr. RONCALIO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 190, nays 148, not voting 94, as follows:

[Roll No. 741]

The Clerk announced the following pairs:

Mr. Jones of Oklahoma with Mr. Frey.
Mr. Zeferetti with Mr. Guyer.
Mr. Rodino with Mr. Rhodes.
Mr. Rostenkowski with Mr. Wampler.
Mr. Ireland with Mr. Snyder.
Mr. Waggonner with Mr. Sarasin.
Mr. Fuqua with Mr. Kasten.
Mr. Dodd with Mr. Abdnor.
Mr. Mathis with Mr. Hansen.
Mr. Breaux with Mr. Hagedorn.
Mr. Ammerman with Mrs. Pettis.
Mr. Cotter with Mr. Wiggins.
Mr. Dent with Mr. Cohen.
Mr. Flynt with Mr. Burke of Florida.
Mr. Murphy of Illinois with Mr. Lujan.
Mr. English with Mr. Badham.
Mr. Mikva with Mr. Caputo.
Mr. Teague with Mr. Del Clawson.
Mr. St Germain with Mr. Winn.
Mr. Shipley with Mr. Fish.
Mr. Rangel with Mr. Quie.
Mrs. Burke of California with Mr. Pressler.
Mr. Byron with Mr. Cochran of Mississippi.
Mr. Fary with Mr. Hillis.
Mr. Krueger with Mr. McKinney.
Mr. Lehman with Mr. Milford.
Mr. Hawkins with Mr. Young of Alaska.
Mr. Waxman with Mr. Thornton.
Mr. Tsongas with Mr. Sisk.
Mr. Bellenson with Mr. Armstrong.
Mr. Howard with Mr. Horton.
Mr. Bonker with Mr. Symms.
Mr. Harrington with Mr. Quillen.
Mrs. Collins of Illinois with Mr. Fraser.
Mr. Scheuer with Mr. Moffett.
Miss Jordan with Mr. Gibbons.
Mr. AuCoin with Mr. Ashbrook.
Ms. Keys with Mr. Rinaldo.
Mr. Jacobs with Mr. Collins of Texas.
Mr. Corman with Mr. Gary A. Myers.
Mr. Brooks with Mrs. Heckler.
Mr. Boland with Mr. Duncan of Oregon.
Mr. Maguire with Mr. Nix.
Ms. Oakar with Mr. Hammerschmidt.
Mr. Brinkley with Mr. Derrick.
Mr. Miller of California with Mr. Huckaby.

Mr. PRITCHARD, Mr. MATTOX, Mrs. MEYNER, Mr. HOLLENBECK, and Mr. LONG of Maryland changed their votes from "nay" to "yea."

Mr. RAHALL changed his vote from "yea" to "nay."

So the motion to recommit was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. RONCALIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Joint Resolution 4.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

## AMENDING BANKRUPTCY ACT TO PROVIDE FOR UNIFORM SUPERVISION AND CONTROL OF EMPLOYEES OF REFEREES

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 3107) to amend the Bankruptcy Act to provide for uniform supervision and control of employees of referees in bankruptcy, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill as follows:

S. 3107

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That paragraphs (2) and (3) of subdivision a of section 62 of the Bankruptcy Act (11 U.S.C. 102(a) (2) and (3)) are amended to read as follows:

"(2) The actual and necessary office and other expenses of referees shall be authorized and approved by the Director, including compensation of clerical, stenographic, and other assistants of referees at rates fixed by the Director, at rates not less than the rates for comparable services prevailing in the respective offices of the clerks of the several district courts, and the costs of establishing and maintaining their offices with equipment and supplies, adequate for their efficient and economical operation, including mechanical equipment and devices and law libraries. Such expenses may be allowed when authorized by a judge of the judicial district or districts in which a referee serves in cases of emergency where it is not feasible to secure prior authorization of the Director.

"(3) When, in the opinion of the Director, the public interest requires it, he may, on the recommendation of a referee, which recommendation shall state facts showing the necessity for the same, allow the referee to employ necessary clerical, stenographic, and other assistants. All employees of the referee shall be utilized under the direct supervision of the referee exclusively in the processing of bankruptcy cases. The referee may at his pleasure remove any assistant in his employ. The authority of the referee to employ, direct, and remove assistants may not be exercised by anyone other than the referee. The Director may utilize funds collected or appropriated for the referred salary fund and the referees' expense fund pursuant to section 40c of this Act, to pay the salaries of only such clerical, stenographic, or other assistants as are employed under the direct supervision of the referee in the office of the referee: *Provided, however,* That salaries of the employees of the Bankruptcy Division of the Administrative Office of the United States Courts may also be paid out of such funds. If the office of the referee shall become vacant, the employment of his assistants shall not thereupon be terminated: *Provided, however,* That during such vacancy the Director may terminate the employment of any assistant, if, in his opinion, the services of such assistant are no longer needed.".

● Mr. EDWARDS of California. Mr. Speaker, S. 3107 is entitled "A bill to amend the Bankruptcy Act to provide for uniform supervision and control of employees of referees in bankruptcy." It amends two adjacent paragraphs of the Bankruptcy Act, found in section 62a. These two paragraphs currently provide for supervision of bankruptcy clerks by referees in bankruptcy, now called bankruptcy judges. Nevertheless, some question has arisen in recent years over the interpretation of these paragraphs. This bill simply adds language to make clear what Congress intent was in 1946 when this section of the Bankruptcy Act was last amended, and that is that the bankruptcy judges must have direct control over the work of their court clerks in

order for the bankruptcy court to function efficiently. The bill requires no expenditure of funds, and merely clarifies existing law. I urge its immediate adoption.●

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on S. 3107.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

## ADJUSTMENT ASSISTANCE FOR WORKERS AND FIRMS

Mr. VANIK. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11711) to improve the operation of the adjustment assistance programs for workers and firms under the Trade Act of 1974.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. VANIK).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 11711, with Mr. MCHUGH in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Ohio (Mr. VANIK) will be recognized for 30 minutes, and the gentleman from Wisconsin (Mr. STEIGER) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 11711, as amended by the Committee on Ways and Means, a bill to improve the operation and effectiveness of the trade adjustment assistance programs for workers and firms under chapters 2, 3, and 5 of the Trade Act of 1974.

Congress first established a trade adjustment assistance program under the Trade Expansion Act of 1962 for workers and firms dislocated by Federal policies to encourage increased foreign trade. The Trade Act of 1974 made substantial changes in these programs to ease the eligibility criteria, to streamline the petition and certification process, and to provide more adequate benefits and reemployment services.

Despite the far greater utilization of the new programs, the Subcommittee on Trade became aware of many legislative and administrative inadequacies and proposals for improvement brought to its attention by labor unions, industry associations, individual workers and firms, and Members of Congress during and subsequent to its oversight hearing held in the spring of 1977.

H.R. 11711, as amended, addresses the most common of these complaints. It broadens the coverage and removes certain inequities in the eligibility of workers and firms for adjustment assistance benefits, liberalizes certain of these benefits to workers and firms to promote their adjustment to import competition, contains provisions to accelerate the certification process and delivery of benefits, and introduces technical assistance on an industry-wide basis into the program for the first time.

H.R. 11711, as amended, extends adjustment assistance coverage to certain workers and firms which supply component parts or other articles or services essential to the production, transport, or storage of import-impacted articles, to workers laid off from import-impacted firms in situations involving exercise of labor union seniority rights, and to workers employed a minimum of 40 of the 104 weeks immediately preceding their layoff with one or more import-impacted firms. Benefits would become available retroactively to workers laid off prior to November, 1977 who were unaware of the 1-year time limit under the new program for filing petitions following layoff.

The bill extends benefit periods an additional 26 weeks, up to a maximum of 104 weeks, to enable workers to complete training and until older workers age 60 or over reach social security age. Job search and relocation allowances for workers are increased and the application period for these benefits extended. Demonstration projects would be established in trade-impacted areas to test vouchers as an alternative method to encourage worker retraining as an economic adjustment measure.

H.R. 11711 expands substantially technical and financial assistance benefits to import-impacted firms. It provides precertification technical assistance to help firms prepare their petitions, requires provision of technical assistance to firms unable to prepare their economic adjustment plans without outside help, and raises the ceiling on the Government share of the cost of technical assistance from 75 to 90 percent. On financial assistance, the bill lowers the interest rate on direct loans, raises the present ceiling on direct loans from $1 to $3 million and the limit on loan guarantees from $3 to $5 million, and authorizes interest rate subsidies to reduce interest paid by borrowers on guaranteed loans to rates comparable with direct loans.

To accelerate the certification process and benefit delivery, H.R. 11711 authorizes worker and firm certification on the basis of threatened as well as actual declines in sales and/or production of the firm, requires exchange of investigatory material between the Departments of Labor and Commerce, authorizes the Secretaries of Labor and Commerce to initiate petitions on behalf of workers or firms, and establishes the Commerce-Labor Adjustment Action Committee as a statutory body to coordinate operation of the program.

The subcommittee thoroughly discussed these and other issues during its drafting of the bill. The administration participated in the markup sessions and most of the proposals it submitted at that time were included in the bill. The subcommittee favorably reported H.R. 11711 by a rollcall vote of 10 to 3 to the full committee on March 22. On April 12 the Committee on Ways and Means ordered H.R. 11711 favorably reported by voice vote with two amendments.

The bill reflects the committee's concern that the adjustment assistance programs provide an effective response to the economic dislocations that increased imports can bring to certain segments of our society and a more viable alternative to increased import restrictions. This purpose is all the more important as the United States continues its historical leadership role in the current Multilateral Trade Negotiations of seeking the overall economic benefits from further liberalization of international trade. The bill strikes a balance of addressing some of the most serious criticisms of the program, while recognizing that the more basic problems of adjustment could not be solved within our budgetary constraints.

Mr. Chairman, I urge the Members of the House to join me in support of this important piece of legislation.

Mr. STEIGER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the gentleman from Ohio, the distinguished chairman of the Subcommittee on Trade, has done an excellent job in discussing this bill in some detail.

I must say, Mr. Chairman, that this bill has been slow in coming to the floor, and I regret that. I hope the bill can pass not only this body today but the other body in the not too distant future. It is a piece of legislation which is very badly needed, in my judgment, both from the standpoint of workers and management, and it makes some very necessary and very important changes in the Trade Adjustment Assistance Program. It represents, from the standpoint of the Subcommittee on Trade, nearly 2 years of very careful study and evaluations of how best to remedy the inadequacies of the present system and thereby to achieve more successfully the program's objectives.

The bill is extensive. It addresses a wide range of problems, and yet it adheres to rather stringent budgetary requirements.

Mr. Chairman, if the gentleman from California (Mr. JOHN L. BURTON) wishes me to yield, I will be glad to yield to him.

Mr. JOHN L. BURTON. Mr. Chairman, I am going to try to get time from the gentleman from Ohio (Mr. VANIK).

Mr. STEIGER. Would the gentleman rather wait for him?

Mr. JOHN L. BURTON. Mr. Chairman, I have been waiting for him for a long time. I thank the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. The gentleman is quite welcome. Any time.

Let me, if I may, Mr. Chairman, simply outline for the Members a couple of things about which I have some questions.

There are two committee amendments that we will consider shortly about which I have very serious reservations. I urge my colleagues who are either here on the floor—all eight of us—or who are perhaps potentially watching in their comfortable offices to look at the minority views that accompany this bill in an effort to become more familiar with those two issues that we will face in a few minutes.

The first of the committee amendments is that one which expands coverage for certified workers over 60 in order to bridge them into Social Security. However compassionate the intentions, it is not appropriate to use this legislation as a vehicle for piecemeal implementation of social or other goals unrelated to trade. We should not forget that one of the very serious issues we faced in this Congress—mandatory retirement—was created partly as a result of tying various legislative proposals to the age at which a person may collect social security.

In addition, the equity of this particular committee amendment has not been adequately studied or discussed. There are many other situations where an individual between the ages of 60 and 62 would find himself or herself unemployed but would not have the protection afforded to trade-impacted workers by this amendment.

The second of the committee amendments is one to which I have equally strong objections, perhaps to a little further extent. It adds $16 million to the estimated cost of the bill. This amendment allows individuals to qualify for trade adjustment benefits on the basis of 40 weeks of work out of the preceding 2 years. This would be an alternative to the 26 weeks out of the preceding 52 weeks required under existing law. Not only is this amendment costly, but no forethought was given to the effect of such an amendment on the unemployment compensation program.

Although trade adjustment assistance is a program distinct from unemployment compensation, it operates in conjunction with it. The subcommittee has had no opportunity to consider a change such as the one added in committee, and nowhere has there been any consideration of the ripple effect it undoubtedly would cause in the unemployment compensation program.

Therefore, Mr. Chairman, I urge my colleagues to reject the two committee amendments, but to support the bill as originally approved by the subcommittee. The necessary improvement in the adjustment assistance programs, therefore, will be preserved, yet the cost of the bill will be kept near the level of expenditure approved in the second concurrent resolution on the budget.

A final word, Mr. Chairman, is that I should congratulate the gentleman from Minnesota (Mr. FRENZEL), a distinguished member of the Trade Subcommittee, and the subcommittee chairman, the gentleman from Ohio (Mr. VANIK), for their work on the bill.

The gentleman from Minnesota (Mr. FRENZEL) has given thoughtful and persistent attention to the problem of adjustment assistance—it says in my speech—since the middle of the 94th Congress, and it also says in my speech that the gentleman from Ohio (Mr. VANIK) has also labored tenaciously on this bill—can you imagine that, "tenaciously"?—against frustrating administration indifference for 18 months.

It ought to be said that the gentleman from Ohio has had to overcome the obstacle of the indifference of the administration and the downright frustrating attempts of the administration not to do anything to improve the adjustment assistance program. So all of us owe a debt of gratitude to those who have done such a superb job and I congratulate them both for their excellent work, and their contributions should be recognized.

I should also pay tribute to the gentleman from Indiana. I forgot to have his name on my list. The gentleman from Indiana (Mr. SHARP) has also been very instrumental in giving us his input and his attention, along with some of his friends on the outside, to this problem. And we have adopted the Sharp bill as a part of this bill.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. STEIGER. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Chairman, I would like to thank the gentleman from Wisconsin in a serious vein, not in a light one. Does this bill in any way, can the gentleman tell me, actually right the wrongs of the displacement of a lot of cattle people in this country, when a large amount of beef imports, foreign beef imports have come into the country and the price has sunk so low that most of them have lost their herds and have gone bankrupt? Does this bill take anything into consideration for these people who have lost so much of their livelihood?

Mr. STEIGER. I would say to my friend, the gentleman from Oklahoma, that the answer is no, this bill does not do that. I think it is very clear that the Trade Subcommittee is mindful of the problems the American ranchers and producers have had. That is why we went yesterday to the Rules Committee to seek a rule on the Meat Import Act. I would, however, draw the gentleman's attention to chapter 3 of the Trade Act of 1974, particularly section 261. In this part of the Trade Act if cattle people can satisfy the definition of a "firm" under section 261 they can enjoy the benefits of trade adjustment assistance.

Besides, I must tell the gentleman, I think it would be fair to say that, given the limits of the import program, it would be exceedingly difficult for us to make a very good case that the gentleman's problem is one caused by imports as much as it is by a series of other factors over some of which we have no control.

Mr. WATKINS. If the gentleman will yield further, I know there is a great debate on this, but foreign beef imports did replace a lot of our cattle people through low prices, and so forth, and I just wanted to bring out that I hope the record would show that many of us do have a concern. We are thankful that prices have moved into the area today that maybe some of our cattle people are paid off in notes and are able to make a living now and get back on their feet. But it was a long 4-year period, and it was very hard to explain to the American cattle people and farmers who have given most of their lives putting something together and who had to give it all up, having seen thousands of tons of foreign beef hit the shores. I wanted to point this out, hoping that the committee would take this into consideration and help us solve it. Many of us are deeply concerned about the continued existence of these people.

Mr. STEIGER. I appreciate very much my colleague from Oklahoma raising that with us. Yes, we are aware of that problem. I am sure, as a matter of fact, that if we got the gentleman from Texas (Mr. POAGE) to make the same kind of speech he did on the Hawaiian claims bill, we could take it by acclamation if there was something we wanted to put in here.

Mr. PICKLE. Mr. Chairman, will the gentleman yield?

Mr. STEIGER. I yield to my friend from Texas.

Mr. PICKLE. I thank the gentleman for yielding to me. While this particular bill does not address the problem the gentleman from Oklahoma has submitted to the gentleman from Wisconsin, I would point out to him that there is a bill pending, the Meat Import Act, that might be considered next week.

During the course of our committee hearings as amendment was offered by me which attempted to treat live cattle the same as we did frozen meats or frozen carcasses. That amendment may be submitted when this other bill is brought to the House. I mention this so that the gentleman knows that there is a possibility of some relief if the House would be willing to accept it.

Mr. STEIGER. I thank the gentleman.

Mr. CORCORAN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. STEIGER. I yield to the gentleman from Illinois.

Mr. CORCORAN of Illinois. Mr. Chairman, my question concerns the fact that in the Trade Expansion Act of 1962 relative to the threatened dislocation as well as the actual decline in sales which is contained in title I and title II of the act according to the report, I can understand how we can make determination about actual decline in sales, but would the gentleman explain to me how we make a determination regarding threatened decline in sales?

Mr. STEIGER. What we are dealing with in this situation—and I am trying to find the language in the committee report which deals with that issue of threat, because I think the committee report does a very good job of outlining how we handle that problem—if the gentleman will look at page 7 of the committee report, he will find that what we are dealing with in the use of the

word "threat" is those who are eligible to apply for adjustment assistance not to receive benefits. Obviously, what we have is a situation as follows, and I quote:

In determining whether a "threat" or sales and/or production decline exists, the committee intends that the Secretary examine all economic factors relevant to the particular case, including but not limited to, indicators such as the overall financial status of the firm (including depletion of working capital), profit levels, the status of orders and inventory, and utilization of productive facilities. Alternatively, a "threat" might be based on an announced closing of the firm or plans to purchase a facility and transfer production overseas.

In addition to that, the gentleman will see that in section 103 we amend the act to provide that eligibility criteria for worker certification on the basis of a threat or an absolute decrease in the sales and/or production of a firm or subdivision. So, what we have is a situation in which a worker, in applying for assistance, or a firm—workers in this case—makes an application, but the application to be eligible to be approved by the Secretary, has to go beyond just somebody alleging that there is a threat. There are, in fact, objective criteria that must be met in order to receive certification.

Mr. CORCORAN of Illinois. I thank the gentleman.

Mr. VANIK. Mr. Chairman, I yield such time as he may consume to our distinguished colleague, the gentleman from Indiana, (Mr. SHARP).

Mr. SHARP. Mr. Chairman, I urge the House to pass the bill H.R. 11711, the bill to improve the operation of the trade adjustment assistance program established under the Trade Act of 1974.

I want to express my gratitude to the subcommittee chairman, the gentleman from Ohio (Mr. VANIK), the gentleman from Minnesota (Mr. FRENZEL), the gentleman from Wisconsin (Mr. STEIGER), the gentleman from Virginia (Mr. FISHER), and the other members of the subcommittee for their willingness to attend to a serious injustice that developed out of the operation of the 1974 act.

Mr. Chairman, the bill makes several changes in the program, and they have been explained and discussed by others. My main interest in the bill, and my original reason for seeking a provision which is incorporated in the bill, is a simple case of injustice involving thousands of workers.

The Trade Act of 1974 provided for various forms of adjustment assistance to workers who lost their jobs as a result of increased import competition. The reason for this assistance was to ensure that relatively few workers did not, through the loss of their jobs, pay the entire cost of a liberalized import policy that was supposed to bring greater benefits to the economy as a whole.

In order to ensure that the assistance was provided promptly, the 1974 act provided that workers must petition the Department of Labor for certification of eligibility within one year of their layoff. This 1 year limit is what has caused the inequity affecting thousands of workers in Indiana and elsewhere.

When the trade adjustment assistance program was new, many workers who would have been eligible to particiate missed the 1 year deadline for filing a petition because they lacked information about the program and the petition requirement.

As I testified in the Trade Subcommittee, there are three cases in my own district which illustrate the problem.

At the Warner Gear plant in Muncie, workers who lost their jobs in late 1974 and early 1975 due to increased auto imports actually asked the local employment office about applying for adjustment assistance. Because the officials who should have been able to inform them about the petition requirement were unaware of it, they missed the 1-year deadline.

Another factor made these workers acutely aware of the inequity. A petition was finally filed in February 1976, and some workers laid off after February 1975 were certified and received benefits. This meant that people who had worked side by side at the same jobs and who were laid off for the same reason were treated differently under the law.

Another example of the inequity of the implementation of the 1974 Trade Act occurred at the Jay Garment factory in Portland, Ind. The petition for these workers was approved by the Department of Labor, but the earliest eligibility date under the 1-year limit fell on a Sunday, March 9, 1975. Most of the workers had been laid off on the previous Friday, March 7, and there was insufficient flexibility in the law to allow these workers to receive their benefits.

A third example in my district involved workers in the Allegheny-Ludlum specialty steel plant in New Castle, Ind. A relatively small number of workers here were laid off, but the specialty steel industry was massively affected by imports. Confusion about whether a petition could or should be filed when the International Trade Commission had already undertaken an investigation of an industry may have led to missing the 1-year petition deadline in this case.

With the operation of the adjustment assistance program for a few years, the problem of people not knowing about it has become less important. The problem remains, however, of how to deal fairly with the individuals who were denied benefits due to the lack of information about the program in its early months.

The substance of a bill I introduced with 38 cosponsors has been incorporated, with amendments by the subcommittee, in H.R. 11711. It provides eligibility for workers who were unintentionally excluded from the program prior to November 1, 1977. It will correct the inequity which occurred by allowing the affected workers to receive their benefits retroactively.

Some of these workers are still unemployed, and their adjustment assistance benefits, however late, are still urgently needed. Others have been called back to work or have found other jobs, but they have not recovered financially from the harm they suffered due to their import-related layoffs. Receipt of benefits now will help them to pay off some of the debts they incurred during their period of unemployment.

Equally important, correction of the unfair application of the Trade Adjustment Assistance program will help alleviate a sense of injustice felt by these workers. They have paid the price for economic benefits shared by all of us. They have seen others receive benefits for similar suffering while they were excluded. And they have become convinced that international trade is something that the United States should avoid.

I believe fair trade with adequate consideration for workers and firms who bear the burden is in the best interest of our country. Equal treatment under the law should be an obvious goal of national policy. Passage of H.R. 11711 will help achieve both of these goals, and I urge my colleagues to support it.

Mr. VANIK. Mr. Chairman, I yield such time as he may consume to our distinguished colleague, the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, I rise in support of H.R. 11711, a bill to improve the operation of the adjustment assistance program for workers and firms under the Trade Act of 1974.

I would like to commend the Committee on Ways and Means for its recognition of the need to revise certain provisions of the Trade Act and for its fine efforts to address these shortcomings in a direct and responsible manner as evidenced in the language of this bill. The committee has drafted a sound and much-needed piece of legislation which deserves prompt enactment into law.

I first became aware of the need to improve delivery of adjustment assistance under the Trade Act through the events subsequent to the closing of a large electronics plant in my district. In late September of 1977, the Zenith Corp. announced a nationwide production cutback which was precipitated by the importation of electronic products from Japan at less than fair market value. The decision resulted in the displacement of 5,600 Zenith employees across the country. In Sioux City, Iowa, 800 jobs were eliminated, 500 of which were held by individuals who were the sole supporters of their families.

Unfortunately, announcement of the production curtailment and widespread layoffs was to be only the first in a series of disillusioning setbacks for these distressed workers. Having lost their jobs to unfair foreign competition, aided in part by the failure of past administrations to effectively enforce existing fair trade laws, the Zenith employees turned to the Federal Government for assistance under the Trade Act of 1974. However, these workers soon found their hopes for timely and direct aid dashed by the poor dissemination of information, lack of coordination among program officials, and general problems with implementation which became characteristic of the existing trade adjustment program.

Due in part to the complexity of the program, the suddenness of the layoff announcement, and the number of workers affected, information pertaining to the scope of benefits and procedural

steps provided under the Trade Act was not found to be readily available. To remedy this deficiency, the Director of the Trade Adjustment Assistance Office within the Department of Labor came to Sioux City, at my urging, to personally brief the former Zenith employees on the details of the program. Though then aware of available assistance, many workers encountered additional problems in obtaining a correct computation of their individual benefits and specific information relating to their own opportunities for retaining or relocation. This situation was further aggravated by an acute lack of coordination between Federal, State, and local officials in implementing the program and designating local administrating authorities.

In view of the shortcomings of the trade adjustment assistance program which I have observed firsthand, it is with a great deal of enthusiasm that I support the legislation presented before the House today. Notable among the changes in this bill are provisions streamlining eligibility certification procedures, making more equitable the formula used in determining individual worker eligibility, and extending to firms producing key components or providing essential services for trade-impacted firms coverage under the Trade Act. Also, I am pleased to note that the legislation calls for improved dissemination of program information to workers and firms adversely impacted by foreign competition. It is my hope that this improved information flow will further serve to foster improved program coordination among Federal and local officials.

Mr. Chairman, I think that enactment of this legislation will go a long way toward providing much needed assistance to workers displaced by foreign competition, and I urge its approval here today. However, I feel that it is important to recognize that this legislation provides only cosmetic relief for a problem whose root cause in many cases lies in the ineffective enforcement of existing fair trade laws. Many American firms and their employees have been adversely and unfairly affected by the lack of proper enforcement of U.S. fair trade laws, and I urge that the Congress also address this more general problem in a timely and responsible manner.

Mr. STEIGER. Mr. Chairman, I yield 5 minutes to the distinguished, articulate, able and effective gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, for the record I would like to state I am not now and never have been the speech writer for the gentleman from Wisconsin.

Mr. Chairman, I support the bill H.R. 11711. I think it is a necessary bill which the House should pass promptly.

I would state further that the genesis of the bill is the responsibility of our colleague, the gentleman from Indiana (Mr. SHARP), who brought to our attention the fact that some workers, due to being unaware of the provisions of the Trade Adjustment Assistance Act, were not getting the benefits which Congress intended that they should get. His original bill became section 101 in the bill now before us, and we are grateful to him for having brought this matter to our attention in the first instance.

In addition, the bill does contain other good things which were described by our distinguished colleague, the subcommittee chairman, the gentleman from Ohio (Mr. VANIK) and by the distinguished ranking minority Member, the gentleman from Wisconsin (Mr. STEIGER). It does improve the benefits to individuals. It also improves the adjustment assistance that goes to firms.

In response to the query of the gentleman from Oklahoma, firms are defined in the act as individuals and partnerships as well as corporations, so the advantages in the sections numbered in the 200's will be available to those cattle producers who are not incorporated.

I would also second some of the comments that have already been made, Mr. Chairman. In the first instance we received no help at all from the administration on this matter. We waited a year and a half, asking frequently for recommendations from the administration. None were forthcoming, and so the committee had to move on its own. As a result we probably have a better bill than we would have had had we waited for recommendations.

There is another important point. Section 106 and section 107, which were not in the original bill and will be before this committee today as committee amendments are amendments that should be defeated by this committee. One of them changes the qualification for adjustment assistance from 26 weeks of work in the last 52 weeks to 40 weeks of work in the last 104 weeks, which in the opinion of the administration and in my opinion does not demonstrate enough attachment to the labor market to qualify for that high level of benefits.

The second additional section, section 107, attempts to do a job which is socially desirable, that is to take care of older workers until such time as they can receive social security. However it does that at the expense of the unemployment compensation system and is a needless expense on that system. If we choose to achieve this social goal we should do it in some other way rather than loading down this particular system with that cost. The total cost of those two systems is $17 million per year, which takes the bill beyond the original budget request of this original subcommittee.

I hope those two amendments will be defeated, but, whether they are or not, it is essential that this bill be passed expeditiously by this House.

Mr. STEIGER. Mr. Chairman, I yield 3 minutes to the gentleman from New Hampshire (Mr. CLEVELAND).

Mr. CLEVELAND. Mr. Chairman, when we come to the amending process on this bill I am going to offer an amendment and I thought I would take advantage of this brief period of time to explain what my amendment does.

Although there are very few Members here on the floor, I hope at least some of the TV sets are on in the offices. In addition, I have written several "Dear Colleague" letters on this issue. One of them was cosigned by my friend and colleague, the gentleman from Alabama, WALTERS FLOWERS. I also had a great deal of help on this amendment from my colleague from New Hampshire (Mr. D'AMOURS).

Basically my amendment is sort of a fair play amendment and a common sense amendment. It does not add a nickel to the costs of this bill. Those who speak against the amendment will say it is a terribly costly amendment. What they mean is it will cost our Federal Government more. That is because what my amendment will do is simply revert to the situation that we had from 1962 to 1974. During that period of time it was the law that if the trade policies of the United States could be shown to definitely put people out of work then the United States Government would pay for the compensations under the Trade Expansion Act of 1962.

And that is fair. It was the Federal policy that put the people out of work and if the Federal Government wants to pursue that policy, then they should pay for it.

Then in 1974 the Senate slipped in an amendment which said, well, the States will have to pay for some of it and the States are paying for some of it. It is not fair for the States to have to pay part of this Federal program. So my amendment will simply revert to the 1962–74 situation when the Federal Government would pay all of the compensation benefits, which were caused by the Federal trade policies.

As I say, it is sort of a commonsense-fairplay type of amendment.

I think a lot of people are aware of the fact that there is a good deal of unrest out there in the States. Proposition 13 has been talked to death, but that proposition 13 told us that a lot of the people out there are not happy about the way the State and Federal Government and the Congress are conducting the business of our country.

I would suggest to you that here is a classic example.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEIGER. Mr. Chairman, I yield 2 additional minutes to the gentleman from New Hampshire (Mr. CLEVELAND).

Mr. CLEVELAND. If the Congress wants to pass this bill—and I do not even argue whether it is a good bill or a bad bill, I never get to that point. I will take the word of the gentleman from Minnesota (Mr. FRENZEL) that the bill is needed and should be passed. As I say, it may be a good bill or it may not be a good bill, but I do not even get to that point. The fact of the matter is that here we are, sitting in the U.S. Capitol and we are passing legislation. It may be good legislation, perhaps, or maybe some people do not like it, but the point is we are passing legislation that adds a crushing

burden on some of the unemployment compensation funds of the States. Many of those funds, as you probably already know, or should know, if you do not, have already had trouble and States have had to come to the Federal Government to borrow money. It does not make sense for us to pass legislation and then tell the States that they have to pick up part of the tab.

I read in the report on the recent Governors' Conference where one of the Governors got up and said, "For goodness sake, Washington, will you stop passing all those good bills that, in the long run, we have to pay so much of."

In this particular case the States do not have to pay all of it, but they have to pay a substantial part of it.

So, Mr. Chairman, I hope that my amendment will receive serious consideration and, indeed, I hope it will be adopted.

Mr. VANIK. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana (Mr. BENJAMIN).

Mr. BENJAMIN. Mr. Chairman, as a cosponsor of H.R. 4460 with my colleague and friend, Mr. SHARP, I am happy to rise in support of H.R. 11711, a bill to improve the operation of the adjustment assistance program for workers under the Trade Act of 1974.

As originated in 1962, the trade adjustment assistance program provided, among other things, financial and technical assistance to workers who were adversely affected by import competition. Unfortunately, under the 1962 program, the only help available to firms and employees injured by import competition was "escape clause" relief and the experience proved unsatisfactory.

This and other inadequacies of the program led to changes incorporated in the Trade Act of 1974. Under Public Law 93-618, the criteria under which workers and firms could be certified was liberalized, the program benefits were enhanced and a community program was initiated. Other changes were made with the intention of facilitating qualification for eligible petitioners for benefits under the program.

Many have been helped, many more were not, particularly in the steel industry, a problem of substantial concern to me.

In the words of Jack Parton, president of United Steel Workers' Local 1014, the number of those affected is "substantial." Norman Purdue, president of United Steelworkers Local 1011, on a number of occasions, has confirmed Mr. Parton's statement and expressed the deep concerns of his union's membership regarding the inadequacies of the present law. It is regrettable that many of those not aided were employees who were unaware of the 1-year time limit under the program for filing petitions.

With this problem in mind, I joined with Representative SHARP and others to sponsor H.R. 4460 which would have extended the "impact date" from 1 to 2 years prior to date of the filing of the petition to insure that the legislation assists all those intended.

Following hearings on H.R. 11711, this proposal was modified from 2 years to 18 months and incorporated in section 101 (b) of H.R. 11711.

In spite of the improvements incorporated in the bill, and that proposed by the Oberstar amendment to restore the time expansion proposed by H.R. 4460 which I shall support, at least one major difficulty has not been resolved.

Section 231 of the act provides that payment of a trade readjustment allowance shall be provided an adversely affected worker if such worker's last total or partial separation before his application was on or after the impact date.

As pointed out to me by President Jack Parton of United Steelworkers 1014 in Gary, Ind., neither the present Trade Adjustment Act or these amendments properly compensate workers who are laid off prior to the impact date. He suggests, and I concur, that these workers should qualify for trade adjustment assistance from the impact date to their reassignment, although not necessarily from the time of layoff to the impact date.

My office contacted the Trade Subcommittee of the Ways and Means Committee and advised them of President Parton's proposal. We were advised that although this problem was analyzed, its resolution was not included in H.R. 11711 because trade adjustment assistance was not intended to be merely unemployment compensation, as this proposal would purportedly make it.

The reasoning behind the use of an impact date is to determine at what point imports caused serious economic and employment problems in our domestic industries. It was decided that a worker laid off subsequent to the impact date could qualify for assistance and those laid off prior thereto would not qualify because their job was not lost as a result of foreign trade competition. I do not accept this contention. Moreover, their reemployment may certainly and unfortunately, be dependent upon the situation of our foreign trade.

Unfortunately, the subcommittee was not receptive to my proposal to open up trade adjustment assistance to workers who were laid off prior to the impact date.

Since H.R. 11711 incorporates a large number of improvements which have been needed and are vital to our workers, I would not do anything to jeopardize its success. However, my position is and will continue to be that these workers, described by President Parton, should be qualified. I hope that the other body will consider President Parton's proposal and that a final version will include adequate provisions for these previously laid-off workers.

I enjoin my colleagues to support H.R. 11711. I laud Chairman VANIK for the tremendous task that he has undertaken and in which he has suceeded, except for needed improvement to section 231 of the act.

Mr. VANIK. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman for yielding.

I want to commend our chairman of the Subcommittee on Trade (Mr. VANIK) for bringing this legislation to the floor to correct the very obvious inequity in the existing very good, very well-intentioned Trade Adjustment Act. I feel that the legislation has responded to a definite need in the country among those workers and industries that have been impacted by our present policy to expand world trade and to continue the policy of a free world-trade market.

In this process, however, of expanding trade and opening markets, workers have been injured by being laid off, family income lost, wages gone, never to be recovered. Therefore, we owe it to those people to provide some benefit to help them through that period of difficulty.

Mr. Chairman, these amendments will make that legislation more equitable. They affect very extensively the people in my own district, both in iron ore mining and those in the garment industry who have been adversely affected by our trade policies.

Mr. Chairman, the United States is committed to a reduction of the barriers to free and unrestricted trade among nations. This policy, however, entails a responsibility on the part of our Government to provide relief to the millions of individual workers who have been adversely affected by that policy and the competition of foreign goods in the American market.

In passing the Trade Act of 1974, Congress recognized that responsibility. The legislation before us today, H.R. 11711, represents our continued commitment to improving that act and meeting our commitment to the American workers who bear the heaviest burden of trade policies.

The chairman of the subcommittee (Mr. VANIK) and the members of the committee are most sensitive to the needs of these Americans.

I support the committee amendment which will enable a worker to qualify for trade adjustment assistance on the basis of having worked 40 weeks out of the previous 104 weeks in one or more affected industries.

This is a sound provision which maintains an appropriate attachment to the labor force as the basis for eligibility.

It does, however, recognize that many workers in impacted industries are unable to meet the present requirement because they were out sick, on paid vacation, or, as quite commonly happens, on temporary lay-off in the year prior to the lay-off actually certified as trade related.

The committee provision is, however, only prospective. It will not provide relief to those workers laid off as the result of the surge of imports in the past 2 years.

Probably every Member of this House has constituents who, if this committee provision had been in effect during the past 2 years, would be eligible for trade adjustment assistance. When this bill is considered for amendment under the 5-minute rule, I shall offer an amendment which will correct some unfortunate inequities, not intended by the original Trade Adjustment Act.

My amendment would enable any worker laid off in the 2 years prior to enactment to use the alternative 40/104 week provision to apply for benefits.

The Department of Labor estimates that an additional 20,000 workers would be able to apply for benefits under this amendment. The one-time cost would be approximately $32 million: $29 million in benefits and $3 million in administrative costs.

The 2-year retroactivity figure represents a reasonable compromise between excluding all workers already laid off from the benefits of the provision and extending retroactivity back to such an extent that the costs of administration would be prohibitive.

Most importantly, it recognizes that applications for trade adjustment assistance have risen dramatically in the past 2 years. In 1976, the number of applications for TRA received by the Department of Labor was 11,900. In 1976, that monthly figure rose to 12,750. In the first 6 months of this year, the number has rocketed to 20,375.

My amendment would reach the workers who are suffering the effects of the surge in imports in the past 2 years. In the steel industry alone, foreign imports as a share of domestic consumption has risen from 13.5 percent in 1975 to 18.4 percent for the first 6 months of this year.

This is a fair amendment which can be administered by the Department of Labor.

I urge its adoption.

Mr. STEIGER. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise to support this legislation that will move toward achieving fairness under the readjustment provisions of the Trade Act.

I sponsored legislation which would have extended the eligibility for TRA benefits for 1 year. While the bill which was reported out of the House Ways and Means Committee provides for a 6-month extension, it has my support and is an effort toward remedying some of the unfairness of the present program.

I represent an area of the country which has been adversely affected by imported steel. As a member of the Executive Board of the Congressional Steel Caucus, I have become increasingly aware of the unfair conditions under which our domestic steel industry must compete. I believe progress is being made to insure fair competition within this industry and to save domestic jobs in the steel industry.

However, we must not forget those who through no fault of their own have suffered economic setbacks because of unfair competition. I particularly have received many complaints from older workers and these complaints indicate a trend of older workers being the first to be laid off and being excluded from eligibility for TRA benefits. Many of these older workers have strong ties to the community and extensive family responsibilities. Therefore, those who are in most need of assistance have in many cases been denied help. By extending the eligibility period we will lessen the economic impact on many communities, keeping many workers off of welfare and providing those affected with some help in preparing for new careers.

Mr. STEIGER. Mr. Chairman, I have one more request for time, I will say to my colleague, the gentleman from Ohio (Mr. VANIK). I yield 3 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I take this time just to alert the membership that I intend to offer an amendment to title II of the bill which will take care of what I believe is a serious inequity in the present bill. The present bill extends benefits—and I think rightfully so—for people who are under the act and who are in training programs that last a couple of years, which most training programs do, and this will allow benefits to be payable for up to 104 weeks. The problem is, though, that it only applies to those people who get into the program after 60 days after the effective date of the act. It does not give any consideration to those people who are involved in the programs at the time of the effective date of the act. What this means is that those people who are presently involved in a 2-year training program, but whose benefits are going to run out after 18 months, would not get the benefits of coverage under this bill. Yet somebody, just by virtue of the circumstances of the business, coming into the program 60 days after the effective date would get the full 2 years of benefits. I do not think that is equitable. I think we ought to take care of those people already in the pipeline, those people already in the program, those people who are already suffering. These people should be given fair advantage of this bill in the extension of their benefits. I am hopeful that the Members will support my amendment. I think it is an equitable and fair one.

Mr. STEIGER. Mr. Chairman, would the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Wisconsin.

Mr. STEIGER. I thank the gentleman for yielding.

Would the gentleman make sure to give us a copy of that amendment, and make sure that the chairman also has one?

Mr. JEFFORDS. Yes; I most assuredly will do that. The staff has been provided copies.

Mr. STEIGER. We do not have copies. Therefore, it is a little hard to judge it. Second, I want to make sure that before we get to the amendment stage, has the gentleman got an estimate from the Department of Labor for the cost of the Sarasin-Jeffords amendment?

Mr. JEFFORDS. Yes. First I want to point out I am offering this myself and with the gentleman from Connecticut, Mr. SARASIN, who is deeply involved in these problems. It is my understanding the uppermost cost, the maximum cost, would be as high as approximately $14 million. However, I feel the actual cost would be much less.

Mr. STEIGER. I thank the gentleman. Please make sure we get a copy.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEIGER. I yield 1 additional minute to the gentleman from Vermont.

Mr. JEFFORDS. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I thank the gentleman for yielding.

The gentleman's amendment sounds very much like an amendment I had developed prior to today's session, which I will offer later on, to make the benefits of this legislation retroactive 2 years to cover those very same inequities the gentleman has already described. We have a very similar situation in my own congressional district. It occurs elsewhere in the United States. Some 10,000 workers would be affected by the retroactivity provision. I think it is very equitable, and I look for the gentleman's support.

Mr. JEFFORDS. I thank the gentleman. I will be happy to consider his, if he will consider mine. I thank the gentleman.

● Mr. DENT. Mr. Chairman, I rise in support of H.R. 11711, the trade adjustment assistance programs improvements. Until the Trade Act of 1974 (and its liberalized trade adjustment assistance provisions) was passed, the record of assistance to workers who had lost their jobs becaues of imports was totally unacceptable. The process required by the Federal Government was arduous and full of obstacles clearly designed to minimize any real help to a displaced worker.

The Trade Act of 1974 changed the adjustment assistance procedure by easing the very stringent criteria and taking into account the real hardships visited upon workers who have lost their jobs because of circumstances beyond their control. Under the new procedure (beginning on April 3, 1975, through July 31, 1978) 4,019 petitions have been decided: 1,342 have been certified, affecting 365,478 workers; 1,700 have been denied, effecting 383,123 workers; and 772 are still pending. As one can see. even under liberalized conditions over half the workers who petition for assistance do not get it. Moreover, that is only part of the picture, since only the worker who was directly involved in the manufacture of the imported goods can qualify for assistance. Any other worker indirectly affected by a plant shutdown or drop in business activity because of imports

could not qualify for any assistance. This is hardly a satisfactory answer to unemployed workers and their families, and hopefully this bill will go a long way toward improving these problem areas.

However, I do want once again to call the House's attention to the fact that the provisions of the Trade Act of 1974 shift the financial responsibility for unemployment caused by international trade agreements from the Federal Treasury, where it legitimately belongs, to State unemployment compensation funds, resulting in a hidden cost to the States that will ultimately total hundreds of millions of dollars.

Let me explain. Under the Trade Act of 1962, States that paid workers determined to be unemployed as a consequence of increased imports were reimbursed by the Federal Government for the unemployment compensation benefits paid to these workers. Reimbursement was, and is, an appropriate approach inasmuch as these workers were unemployed as a consequence of national policy decisions in an international forum, and for no other reason. Such dislocation and unemployment was inherently recognized and expected in the Trade Act of 1962 and in other subsequent trade arrangements, such as the Canadian-American Automotive Agreement.

It surfaced as an even greater issue in deliberations on the Trade Act of 1974, primarily because of the growing number of industries affected by imports, and because of complaints that TRA qualifying guidelines were far too stingent. In dealing with this aspect of the law, the guidelines were liberalized, but the burden for supporting the cost of these TRA benefits was shifted to the States, who have absolutely nothing to say about our trade policy. I pursued this matter in my own State of Pennsylvania and found the following, staggering information:

Under the Trade Act of 1962, 1,040 Pennsylvania workers received a total of $1,066,600 of TRA benefits from the State of Pennsylvania, reimbursed totally by the Federal Treasury, from 1962 through April 3, 1975.

Since the passage of the Trade Act of 1974 through June 31, 1978, 55,394 Pennsylvania workers have qualified for TRA benefits and have received $143,014,215. Of that, $59,552,000 came from the Federal Treasury; the remainder, $83,462,215 came out of Pennsylvania's unemployment compensation fund. This is the case in virtually every State in the country.

This raises two very important issues:

First. The cost this Nation bears as a consequence of its trade policies is vastly understated, and, in fact, hidden. In addition to the revenues lost to communities and States as a consequence of unemployment due to imports, we also pay out enormous amounts of money for these trade policies at both State and Federal levels. Now, if you call the TRA office of the Department of Labor and ask them what the cost of the TRA program is, they will report that under the new act from April 1975 through June 30, 1978, 365,478 workers received benefits totaling $486,785 million. Of that amount, Pennsylvania received $59,552,000. They are right. That is the Federal cost. It is staggering in itself. What they do not tell you is that the real cost to the country is approximately three times that because the States pay these same workers unemployment compensation. In the case of Pennsylvania, the State paid unemployment compensation benefits of $83,462,215 for which it should not be responsible, and for which it will not be reimbursed. And that is only through June 30, 1978. Petitions to the Department of Labor are increasing on a daily basis, and believe me, we have yet to see what unrestricted imports cost this Nation. It is estimated that TRA benefits are increasing by approximately $10 million a month. I suggest that the total payments of TRA, by both State and Federal Treasury will easily approach hundreds of millions of dollars on a yearly basis.

Second. The upshot of this shifting of costs is that it lends itself to easy misrepresentation of a program to which many look as part and parcel of the rationale to continue our present trade policies. It is easy to say that the damage of imports is minimal because we have only paid out of the Federal Treasury a small amount of dollars, ignoring that the major burden of the cost is State borne, and also ignoring that more than half the claims for TRA are denied. Moreover, some of the highest unemployment rates are evidenced in those areas where the most workers have applied for and received TRA benefits.

Thus far the Department of Labor, as of July 31, 1978, has certified 1,342 petitions covering a total of 365,478 workers. Over one-half of these workers are in the States of Michigan, Missouri, New York, Pennsylvania, Wisconsin, Ohio, and California.

I am not for a moment suggesting the dissolution of the TRA program. For many workers, it represents the difference between bread on the table and nothing. I am suggesting that the TRA program was never meant to be a supplemental welfare system, or an excuse for categorically relinquishing more of this country's production jobs in the name of free trade. Moreover, it is grossly inequitable at a time when States are experiencing serious financial difficulties, to expect States to pay for national trade decisions. If the high cost of our trade policy is able to be seen for what it is, then perhaps, those who make the trade decisions will pay closer attention to what their decisions are costing this country, and those of us who are committed to fiscal responsibility will realize the direct impact that trade policies have on unemployment and its concurrent problems.●

● Mr. LAFALCE. Mr. Chairman, I rise in support of H.R. 11711, which provides adjustment assistance for workers and firms adversely affected by imported goods from abroad.

H.R. 11711 will help correct many of the inequities and deficiencies in the trade adjust assistance programs, as originally enacted in the Trade Act. A substantial number of firms and workers who were adversely affected by a flood of inexpensive imports were inadvertently not covered by the original provisions of the Trade Act of 1974. The Committee on Ways and Means and its Subcommittee on Trade are to be commended for their lengthy and careful examination of this situation and for H.R. 11711, which is a response to those unfortunate omissions.

Section 101 of title I is particularly commendable, because it retroactively extends the one-year rule to 18 months for eligibility petitions for assistance filed before November 1, 1977. This would allow the Secretary of Labor to promptly and expeditiously reconsider petitions for assistance which had been previously denied because of the mandated and somewhat arbitrary deadline date of impact or because of the failure of the petitioning group of workers to meet the 1-year rule for the filing date of the petition under section 223(b)(1). Many qualified workers missed these deadline dates in the early months of the program, usually because they were unaware of the existence of the program. In almost every State of the Union, including thousands in New York State, there are workers who will finally get that assistance which was so long, and inequitably, denied them.

Section 103 of title I addresses another drawback in the original Trade Act of 1974. That act did not cover those workers who were secondarily impacted or affected by imports, which has left many workers without assistance for which they should have been qualified. Unlike section 101, this is an ongoing problem which must be dealt with as soon as possible. These workers are employed by firms which supply articles and services to and are economically dependent upon one or more "import-impacted firms." In reality, the sole difference between their status and that of employees for primarily impacted companies resides in the name of their employer, and not in the nature of their economic circumstances. Since H.R. 11711 imposes reasonable and strict criteria for measuring secondary impact, it will extend eligbility for assistance benefits to adversely affected firms and workers, without endangering the integrity and fairness of the whole adjustment assistance program.

There are many other worthwhile features in this bill, including provisions for enhanced opportunities for innovative and experimental retraining programs and provisions to significantly accelerate the certification process and benefit delivery for qualified firms and employees. I urge my colleagues to support H.R. 11711 which will help U.S. industry compete in the highly competitive climate of international trade and will succor those workers who were innocent casualties of that fiercely competitive world.●

● Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 11711, a bill to improve the operation of the adjustment

assistance programs for workers and firms under the Trade Act of 1974.

H.R. 11711 proposes to liberalize the criteria for eligibility certification and the adjustment assistance benefits to workers and firms. Similarly, it would accelerate the processing of petitions for certification.

One of the most often heard complaints about the current trade adjustment assistance (TAA) programs is the lack of awareness by workers and firms of the existence and nature of the programs, and as a result, many otherwise eligible firms and workers have not filed petitions for certification. Section 225 of H.R. 11711 directs the Secretary of Labor to provide full information to workers about such things as benefit allowances, training and other employment services available under the TAA programs. This section also helps to emphasize the purpose of the assistance; that is, to aid the worker in readjusting to import competition, rather than simply providing him/her with unemployment compensation.

Another way in which the bill seeks to stress the true purpose of the TAA programs is demonstrated in section 108 of the bill which establishes a program of experimental or demonstration projects to improve techniques and demonstrate the effectiveness of specialized methods to meet the employment and training problems of workers displaced by foreign competition.

I am particularly pleased to see that section 101 of the bill provides for retroactive eligibility for TAA for workers who were previously denied benefits because they were either unaware of the program or because of the 1-year limitation for filing a petition. This provision acknowledges the early failings of the programs in becoming visible to eligible workers and firms.

I am in full agreement with section 103 and section 201 of H.R. 11711 insofar as they amend eligibility criteria to permit worker and firm certification on the basis of a "threat" of an absolute decrease in the sales and/or production of a firm or subdivision thereof. These amendments will enable certification of workers and firms in advance of actual reduction in firm output when it is clear that such reduction and resulting unemployment due to increased imports are imminent. In light of the fact that administrative delays in payment of benefits to workers occur in a majority of all cases under the current program, and in some cases workers are already reemployed by the time they begin to receive the benefits section 103 will help streamline the certification process and the payments of benefits.

H.R. 11711 proposes improvement in the TAA program for firms, primarily concerning requirements for the provision of precertification technical assistance, by raising the ceiling on the Government share of the cost of such technical assistance from 75 percent to 90 percent and raising the present ceiling on direct loans and guaranteed loans. It is important to note that the bill also authorizes interest rate subsidies to reduce interest paid by borrowers on guaranteed loans. This will help provide incentives where necessary for private job creating investments in areas of high unemployment in the form of low-interest loans.

Adjustment assistance is extremely important to my home district of Puerto Rico where the unemployment rate is around 18 percent and whose manufacturing sector is dominated by import sensitive industries such as textiles and related products, chemicals, petrochemicals, machinery, electrical equipment, and scientific instruments. These industries employed 85,638 workers and contributed $67,608,926 to the local treasury during 1977.

The important sensitivity of these industries in Puerto Rico is best illustrated by the case of textiles. In 1976 there were 453 plants in the apparel and textiles industry employing 41,331 persons. This is almost 100 firms and 7,000 jobs less than the numbers for 1973. Rising local wages and foreign competition in the U.S. market from low wage foreign areas caused 144 establishments to close down between 1968 and August 1977.

In spite of the adverse effects of foreign competition on the manufacturing sector of the Puerto Rican economy, only 19 worker adjustment assistance petitions were certified by the Department of Labor since the inception of the program under the Trade Act of 1974. Of the 19 petitions, 7 were granted and 2,165 workers have begun to receive benefits. On the other hand two firms on the island were certified by EDA and only one of these petitions, covering 682 workers, was granted.

H.R. 11711 proposes to improve the TAA programs in areas which have been in large part responsible for the programs' ineffectiveness.

I am pleased to support H.R. 11711 as a necessary measure to counteract the reality of import competition to those firms adversely affected as a result of it and workers who have become unemployed thereby, and I strongly urge my colleagues to vote for its passage.●

● Mr. AMMERMAN. Mr. Chairman, hospitalization as a result of a recent automobile accident precludes my recording my vote in favor of H.R. 11711, the Adjustment Assistance for Workers and Firms Act, a bill which will improve the operation and effectiveness of the trade adjustment assistance program. I do, however, wish to register my strong support for this legislation. Reforms such as these are long overdue.

Trade adjustment assistance should accomplish two major goals: It should provide temporary compensation to workers and firms adversely affected by imports; and it should provide job training programs and positive incentives for displaced workers who need to find new jobs.

A related ingredient in assisting firms and workers in all industries, and especially in those affected by import competition, is the provision of real incentives for the modernization of plant facilities and equipment. We have begun to address this need through investment and employment tax credits, as well as other important measures. The tax bill which was adopted by the House just last week will increase from the current 50 percent to 90 percent the investment tax credit that can be used to reduce tax liability.

The 23d Congressional District has had to bear more than its fair share of jobs lost due to imports. I have consistently fought to protect the jobs of workers in the industries within my district, including those producing textiles, steel and specialty steel, lightbulbs, and other products. Many cities and towns, including Bradford, St. Marys, Kane, Emporium, Houtzdale, Lock Haven, Johnsonburg, Oil City, and Franklin have suffered serious losses in employment directly because of imports. In some instances, workers and firms have qualified for trade adjustment assistance. But many have not. It is my hope that this bill will enable more workers to receive benefits and job search assistance than previously was the case.

The bill now before the House seeks to improve the operation of the adjustment assistance program by expanding many of the eligibility requirements. It provides retroactive eligibility for workers in certified units who were denied benefits between October 1974 and November 1977. It extends benefits to workers in firms which provide services or articles to import-impacted firms if such services or articles are essential to the production of the import-impacted good. The latter is a meaningful reform of the adjustment assistance program for all workers who produce component parts of import-impacted articles or services.

This bill expands the responsibility of the Department of Labor to provide full information to workers about allowances, training and employment services. It also broadens job search allowances by permitting partially separated workers as well as totally separated workers to apply, expands the date within which a worker may apply for these allowances, and increases the amount of the allowance.

In conclusion, this bill provides significant reforms within the trade adjustment assistance program which will expand the coverage and eligibility of many workers in industries adversely affected by imports. It is my deepest wish that many workers in Pennsylvania's 23d District will benefit from this legislation. They have paid the price for the expansionary and relatively free international trade policy of the United States.●

● Mr. MURPHY of Illinois. Mr. Chairman, I rise in support of this legislation. I believe this bill provides an effective response to economic dislocations of workers and firms due to increased imports. However, we would have no need for this bill if the Treasury Department and this administration stopped foot-dragging and started enforcing the antidumping laws that are on the books right now.

In 1971, the Treasury Department made a finding that Japanese TV receivers were being dumped in the United States at less than fair market value. Again, on March 9 of this year, the International Trade Commission ruled that Japanese imports were seriously damaging the domestic industry, costing thousands of American jobs. On March 31,

Treasury announced that the Customs Service had assessed dumping duties of $46 million on entries of television sets just through 1973. However, Treasury also announced that although the total amount of dumping duties reached approximately $400 million for that period, they were only acting to resolve unliquidated entries for this period, leaving unresolved 4 years of imports.

Why was this done, and more importantly, what kind of effect will this have on domestic companies wrestling with illegal dumping? Zenith has been forced to move its operation overseas, eliminating over 5,000 domestic jobs since it can no longer compete with TV imports. Treasury's consistent failure to enforce antidumping laws has seriously harmed this domestic company and the outlook for the industry is not good. I am tired of watching our industry get undercut as Treasury and this administration quietly sit back. I would hope that the Trade Subcommittee hearings scheduled for September will be able to look at this lack of Government enforcement and get some answers.●

● Mr. BOLAND. Mr. Chairman, I support this very important piece of legislation, H.R. 11711 is the latest in a series of bills designed to protect American workers and American firms. The Trade Expansion Act of 1962 first established these special programs. In 1974, this Congress revised the administration of trade adjustment assistance for workers and firms affected by Federal trade policies. Mr. Chairman, we now see that still a further need exists for improving the operation of these vital programs. We are attempting here to insure that this Nation's workers and firms have available to them effective and timely adjustments to the economic hardships which result from increased imports. H.R. 11711 does just that—insures that the congressional intent of trade adjustment assistance is made a reality.

All of us, Mr. Chairman, are aware of the balance-of-trade problems facing this Nation. We are continuing, of course, our efforts to restore some semblance of a balance of trade. A most important part of that effort is an effective program to protect American workers and American industry. The Adjustment Assistance Programs Improvements Act of 1978 broadens the coverage, corrects inequities and improves the entire benefit delivery procedure. In addition, Mr. Chairman, it provides for industrywide studies and technical assistance so that this Congress can continue to exercise our oversight function in this important area that affects all Americans.

I support this bill, Mr. Chairman. The alternative is to initiate import relief measures and I would rather not see that. For some time, Federal policies have encouraged increased foreign trade. In so doing, however, we must also continue to support trade adjustment assistance programs. American workers and American firms affected by these Federal policies should be protected and this bill is a further, necessary step in accomplishing that goal.●

Mr. VANIK. Mr. Chairman, I have no further requests for time, and I yield back the remainder of my time.

Mr. STEIGER. Mr. Chairman, I yield back the remainder of my time.

The CHAIRMAN. Pursuant to the rule, the Clerk will now read the bill by titles. No amendment shall be in order except pro forma amendments for the purpose of debate and germane amendments relating only to chapters 2, 3, and 5 of title II of the Trade Act of 1974 (Public Law 94–618), and it shall be in order to consider an amendment printed in the CONGRESSIONAL RECORD of July 25 by Representative CLEVELAND of New Hampshire, if offered.

The Clerk will now read.

The Clerk read as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

TITLE I—IMPROVEMENTS IN ADJUSTMENT ASSISTANCE FOR WORKERS

SEC. 101. SPECIAL TREATMENT OF CERTAIN CERTIFICATIONS AND PETITIONS.

(a)(1) This subsection applies—

(A) to any petition for a certification of eligibility to apply for adjustment assistance under chapter 2 of title II of the Trade Act of 1974—

(i) if such petition was filed with the Secretary of Labor (hereinafter in this section referred to as the "Secretary") before November 1, 1977; and

(ii) if the Secretary, on the basis of section 223(b)(1) of the Trade Act of 1974—

(I) denied issuance of such a certification,

(II) refused to accept the petition,

(III) caused the petition to be withdrawn, or

(IV) terminated an investigation undertaken with respect to the petition; and

(B) to any worker covered by a certification issued under section 223 of the Trade Act of 1974 on the basis of a petition filed before November 1, 1977, if such worker was not eligible for adjustment assistance under such chapter 2 by reason of subsection (b)(1) of such section.

(2) The Secretary shall promptly reconsider any petition referred to in paragraph (1)(A) and the eligibility for adjustment assistance of any worker referred to in paragraph (1)(B). In undertaking such reconsideration, the provisions of chapter 2 of title II of the Trade Act of 1974 shall apply, except that—

(A) for purposes of section 223(b)(1) of such Act, an 18-month period shall be applied rather than a one-year period; and

(B) for purposes of section 231(1)(B) of such Act, the date of the determination, if an affirmative determination is made incident to reconsideration, under section 223 shall be the 60th day after the date on which the petition concerned was initially filed with the Secretary, or, in the case of any petition to which pargraph (1)(A)(ii)(I) applies, the date of the initial determination by the Secretary denying certification.

(b)(1) Any group of workers separated from employment after October 3, 1974, and before November 1, 1977, may file, or have filed on their behalf (including a filing on their behalf by the Secretary), a petition for a certification of eligibility to apply for adjustment assistance under chapter 2 of title II of the Trade Act of 1974 if a petition for such a certification for such group was not filed with the Secretary after April 2, 1975, and before November 1, 1977. The Secretary may not consider any petition filed under this subsection unless the petition is filed before the close of the 6-month period beginning on the date of the enactment of this Act.

(2) The provisions of such chapter 2 shall apply with respect to any petition filed under this subsection; except that—

(A) for purposes of section 223(b)(1) of the Trade Act of 1974, an 18-month period shall be applied rather than a one-year period.

(B) the date of the petition shall be April 3, 1975, or such other date deemed appropriate by the Secretary on the basis of the information obtained during the investigation, and

(C) for purposes of section 231(1)(B) of such Act, the date of the determination, if an affirmative determination is made, under section 223 with respect to the petition shall be the 60th day after the date of the petition established under subparagraph (B).

(c) In carrying out subsections (a) and (b), the Secretary may not pay, or recompute the amount of, any program benefit under chapter 2 of title II of the Trade Act of 1974 for the same week of unemployment for which any worker received, or is eligible to receive, such a benefit pursuant to such chapter under other than the authority of this section.

(d) The Secretary shall provide full information to workers regarding the provisions of this section and shall provide whatever assistance is necessary to enable workers concerned to prepare petitions or applications for benefits.

SEC. 102. FILING OF WORKER PETITIONS BY SECRETARY OF LABOR.

Section 221(a) of the Trade Act of 1974 (19 U.S.C. 2271(a)) is amended to read as follows:

"(a) A petition for a certification of eligibility to apply for adjustment assistance under this chapter—

"(1) may be filed with the Secretary of Labor (hereinafter in this chapter referred to as the 'Secretary') by any group of workers or by their certified or recognized union or other duly authorized representative; or

"(2) may be filed by the Secretary on behalf of any group of workers.

Upon the filing of a petition under paragraph (1) or (2), the Secretary shall promptly publish notice in the Federal Register that the filing has been made and that the Secretary has initiated an investigation.".

SEC. 103. GROUP ELIGIBILITY REQUIREMENTS FOR ADJUSTMENT ASSISTANCE.

(a) Section 222 of the Trade Act of 1974 (19 U.S.C. 2272) is amended—

(1) by inserting "(a)" immediately before "The Secretary";

(2) by amending paragraph (2) to read as follows:

"(2) that sales or production, or both, of such firm or subdivision have decreased absolutely, or threaten to decrease absolutely,";

(3) by inserting ", or the threat thereof" immediately before the period at the end of paragraph (3);

(4) by striking out the last sentence thereof; and

(5) by adding at the end thereof the following new subsections:

"(b)(1) The Secretary shall certify a group of workers as eligible to apply for adjustment assistance under this chapter if the Secretary determines—

"(A) that not less than 25 percent of the total sales, or not less than 25 percent of the total production, of such workers' firm or subdivision is accounted for by the provision to import-impacted firms of—

"(i) any article (including, but not limited to, any component part) which is essential to the production of any import-impacted article,

"(ii) any service which is essential to the production, storage, or transportation of any import-impacted article, or

"(iii) any article and any service described in clauses (i) and (ii);

"(B) that a significant number or proportion of the workers in such workers'

firm or subdivision have become totally or partially separated, or are threatened to become totally or partially separated;

"(C) that the sales or production, or both, of such workers' firm or subdivision have decreased absolutely, or threaten to decrease absolutely; and

"(D) that the absolute decrease, or the threat thereof, in the sales or production, or both, by import-impacted firms of import-impacted articles, with respect to which such workers' firm or subdivision provides articles or services referred to in subparagraph (A), contributed importantly to the total or partial separation, or threat thereof, referred to in subparagraph (B) and to the decline in sales and production, or the threat thereof, referred to in subparagraph (C).

"(2) For purposes of this subsection—

"(A) The term 'import-impacted article' means any article produced by an import-impacted firm, if such article is one with respect to which a determination under subsection (a)(3) or section 251(c)(3) was made incident to the certification of the group of workers or firm concerned.

"(B) The term 'import-impacted firm' means—

"(i) any firm or appropriate subdivision thereof the workers of which have been certified pursuant to subsection (a), or

"(ii) any firm which has been certified pursuant to section 251(c).

"(c) For purposes of this section, the term 'contributed importantly' means a cause which is important but not necessarily more important than any other cause.".

(b) The amendments made by subsection (a) shall apply with respect to petitions filed under section 221(a) of the Trade Act of 1974 on or after the date of the enactment of this Act.

SEC. 104. DETERMINATIONS BY SECRETARY OF LABOR.

Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) is amended—

(1) by redesignating subsection (d) as subsection (f); and

(2) by adding immediately after subsection (c) the following new subsections;

"(d) In any case in which the Secretary of Commerce notifies the Secretary that a petition has been filed under section 251 by any firm, if a petition has been filed under section 221 regarding any group of workers of such firm, the Secretary, notwithstanding any other provision of law, shall promptly provide to the Secretary of Commerce any data and other information obtained by the Secretary in taking action on the petition which would be useful to the Secretary of Commerce in making a determination under section 251 with respect to the firm.

"(e) If any certification issued under subsection (a) is based upon a determination made pursuant to section 222(a)(2) or (b)(1)(C) that the production or sales, or both, of the firm or subdivision concerned threaten to decrease absolutely, no adjustment assistance under this chapter shall be provided to any worker covered by such certification until after the date on which the Secretary determines pursuant to such section that the production, or sales, or both, of such firm or subdivision have decreased absolutely.".

SEC. 105. PROVISION OF INFORMATION ON BENEFITS TO WORKERS.

(a) Section 224 of the Trade Act of 1974 (19 U.S.C. 2274) is amended—

(1) by striking out "; ACTION WHERE THERE IS AFFIRMATIVE FINDING" in the section heading thereto; and

(2) by striking out subsection (c) thereof:

(b) Subchapter A of chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2271–2274) is amended by adding at the end thereof the following new section:

"SEC. 225. BENEFIT INFORMATION TO WORKERS.

The Secretary shall provide full information to workers about the benefit allowances, training, and other employment services available under this chapter, and under other Federal programs, which may facilitate the adjustment of such workers to import competition. The Secretary shall provide whatever assistance is necessary to enable groups of workers to prepare petitions or applications for program benefits. The Secretary shall make every effort to insure that cooperating State agencies fully comply with the agreements entered into under section 239(a) and shall periodically review such compliance.".

(c) The table of contents of the Trade Act of 1974 is amended by striking out

"Sec. 224. Study by Secretary of Labor when International Trade Commission begins investigation; action where there is affirmative finding."

and inserting in lieu thereof the following:

"Sec. 224. Study by Secretary of Labor when International Trade Commission begins investigation.

"Sec. 225. Benefit information to workers.".

SEC. 106. WORKERS FOR MORE THAN ONE ADVERSELY AFFECTED EMPLOYER.

Section 231(2) of the Trade Act of 1974 (19 U.S.C. 2291(2)) is amended to read as follows:

"(2) Such worker had, in the 52 weeks immediately preceding such total or partial separation, at least 26 weeks of employment at wages of $30 or more a week in one or more firms or appropriate subdivisions thereof with respect to each of which a certification has been made under section 223 and which is in effect on the date of separation; or, if data with respect to weeks of employment with a firm are not available, equivalent amounts of employment computed under regulations prescribed by the Secretary.".

SEC. 107. TIME LIMITATIONS ON READJUSTMENT ALLOWANCES.

Section 233(a) of the Trade Act of 1974 (19 U.S.C. 2293(a)) is amended—

(1) by striking out "26 additional weeks" in paragraph (1) and inserting in lieu thereof "52 additional weeks"; and

(2) by amending the last sentence thereof to read as follows:

"In no case may any adversely affected worker be paid trade readjustment allowances for more than 78 weeks, or for more than 104 weeks in the case of workers to which paragraph (1) applies.".

SEC. 108.

(a) Part II of subchapter B of chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2295–2296) is amended by adding at the end thereof the following new section:

"SEC. 236A. EXPERIMENTAL TRAINING PROJECTS.

"(a) The Secretary shall establish a program of experimental, developmental, demonstration, or pilot projects, through grants to, or contracts with, public agencies or private nonprofit organizations, or through contracts with other private organizations, for the purpose of improving techniques, and demonstrating the effectiveness, of specialized methods in meeting the employment and training problems of workers displaced by import competition. One such specialized method shall be the provision of certificates or vouchers to workers entitling employers and institutions to payment for on-the-job training, institutional training, or services provided by them to workers.

"(b) The Secretary shall carry out program projects under this section only within political subdivisions of States with respect to which the Secretary finds that—

"(1) a significant number or proportion of the workers within the political subdivision have become totally or partially separated, or are threatened to become totally or partially separated; and

"(2) increases in imports or articles like or directly competitive with articles produced by firms and subdivisions thereof located within the political subdivision have contributed importantly to the total or partial separations, or threats thereof, referred to in paragraph (1).

For purposes of paragraph (2), the term 'contributed importantly' means a cause which is important but not necessarily more important than any other cause.

"(c) Participation by any worker in a program project established under subsection (a) shall be on a voluntary basis; except that a worker may not be selected by the Secretary for participation unless the worker is, at the time of his application for participation—

"(1) covered by a certification issued under section 223 relating to employment or former employment within the political subdivision in which the project will be undertaken; or

"(2) if not so covered, is—

"(A) included within a group of workers for which a petition has been filed under section 221 and on which a determination under section 223 is pending, and

"(B) totally or partially separated from employment within such political subdivision.

The Secretary shall select workers for participation in a program project on such basis as the Secretary deems appropriate to carry out the purposes of this section, but such selections shall be made in a manner so as to insure that each project undertaken includes workers who represent diverse skill levels and occupations within the political subdivision concerned.

"(d) Grants made, and contracts entered into, by the Secretary under this section shall be subject to such terms and conditions as the Secretary deems necessary and appropriate to protect the interests of the United States.

"(e) Section 239(c) shall apply in the case of any individual in training under a project undertaken pursuant to this section with respect to entitlement to unemployment insurance otherwise payable to such individual. The agreement under section 239 with any State shall be modified to effect the purposes of this section, if the State deems such a modification to be necessary.

"(f) Not later than March 1, 1981, the Secretary shall submit to Congress a report setting forth a description and evaluation of the effectiveness of the projects implemented under the program established under subsection (a), together with such recommendations as the Secretary may have for implementing on a permanent basis those methods used in the program which have proven most effective.

"(g) For purposes of carrying out this section, there are authorized to be appropriated to the Department of Labor not to exceed $1,500,000 for each of fiscal years 1979 and 1980.".

(b) The table of contents of the Trade Act of 1974 is amended by inserting after

"236. Training."

the following:

"236A. Experimental training projects.".

(c) Section 245(b)(1) of the Trade Act of 1974 (19 U.S.C. 2317) is amended by inserting "other than section 236A" immediately before the period.

SEC. 109. INCREASED JOB SEARCH ALLOWANCES.

Section 237 of the Trade Act of 1974 (19 U.S.C. 2297) is amended as follows:

(1) Subsection (a) thereof is amended—

(A) by striking out "who has been totally separated";

(B) by striking out "80 percent of the cost of his necessary" and inserting in lieu there-

of "100 percent of the cost of his reasonable and necessary"; and

(C) by striking out "$500" and inserting in lieu thereof "$600".

(2) Subsection (b) thereof is amended—

(A) by amending paragraph (1) to read as follows:

"(1) to assist an adversely affected worker who has been totally separated in securing a job within the United States;"; and

(B) by amending paragraph (3) to read as follows:

"(3) where the worker has filed an application for such allowance with the Secretary before—

"(A) the later of—

"(i) the 365th day after the date of the certification under which the worker is eligible, or

"(ii) the 365th day after the date of the worker's last total separation;

"(B) if such worker is age 60 or older on the date of his last total separation, the later of—

"(i) the 547th day after such date; or

"(ii) the 547th day after the date of the certification under which the worker is eligible; or

"(C) the 182d day after the concluding date of any training received by the worker, if the worker was referred to such training by the Secretary.".

SEC. 110. INCREASED RELOCATION ALLOWANCES.

Section 238 of the Trade Act of 1974 (19 U.S.C. 2298) is amended—

(1) by amending subsection (a)—

(A) by striking out "who has been totally separated";

(B) by striking out the period and insert in lieu thereof the following:

", if such worker was, or is, entitled to trade readjustment allowances under such certification and files such application before—

"(1) the later of—

"(A) the 425th day after the date of the certification, or

"(B) the 425th day after the date of the worker's last total separation;

"(2) if such worker is age 60 or older on the date of his last total separation, the later of—

"(A) the 547th day after such date or

"(B) the 547th day after the date of the certification; or

"(3) the 182d day after the concluding date of any training received by such worker, if the worker was referred to such training by the Secretary.";

(2) by amending subsection (c) to read as follows:

"(c) A relocation allowance shall not be granted to such worker unless his relocation occurs within 182 days before or after the filing of the application therefor or (in the case of worker who has been referred to training by the Secretary) within 182 days after the conclusion of such training."; and

(3) by amending subsection (d)—

(A) by striking out "80 percent" in paragraph (1) and inserting in lieu thereof "100 percent", and

(B) by striking out "$500" in paragraph (2) and inserting in lieu thereof "$600".

SEC. 111. DEFINITIONS.

Section 247 of the Trade Act of 1974 (19 U.S.C. 2319) is amended—

(1) by amending paragraph (2) to read as follows:

"(2) The term 'adversely affected worker' means an individual who—

"(A) because of lack of work in adversely affected employment, has been totally or partially separate from such employment;

"(B) has been totally separate from other employment with a firm, in which adversely affected employment exists, within 190 days after being transferred from work in adversely affected employment in the firm because of lack of work; or

"(C) has been totally separated from other employment in a firm in which adversely affected employment exists as the result of—

"(i) the transfer of an individual from such adversely affected employment because of lack of work, or

"(ii) the reemployment of an individual who was totally separated from such adversely affected employment, if the reemployment occurs within the 190-day period beginning on the date of such separation.";

(2) by redesignating paragraphs (3) through (5) as paragraphs (4) through (6), respectively, and by redesignating paragraphs (6) through (14) as paragraphs (8) through (16), respectively;

(3) by inserting immediately after paragraph (2) the following new paragraph:

"(3) The term 'appropriate subdivision' means—

"(A) any establishment or, where appropriate, any group of establishments operating as an integrated production unit or engaging in an integrated process, which is within any multiestablishment firm; or

"(B) any distinct part or section of any establishment which is within any firm, whether or not such firm is a multiestablishment firm."; and

(4) by inserting immediately after paragraph (6) (as redesignated by paragraph (1) of this section) the following new paragraph:

"(7)(A) The term 'firm' includes any of the following entities (regardless whether any such entity is under a trustee in bankruptcy or receivership under court decree):

"(i) Individual proprietorship.

"(ii) Partnership.

"(iii) Joint venture.

"(iv) Association.

"(v) Corporation (including any development corporation).

"(vi) Business trust.

"(vii) Cooperative.

"(B) Any firm, together with any—

"(i) predecessor in interest,

"(ii) successor in interest, or

"(iii) other affiliated firm (if both such firms are controlled or substantially beneficially owned by substantially the same persons),

may be considered to be a single firm for the purposes of this chapter.".

SEC. 112. EFFECTIVE DATES.

(a) Except as provided in subsection (b), this title shall take effect on the date of the enactment of this Act.

(b) The amendments made by sections 106, 107, 109, 110, and 111(1) shall take effect on the 60th day after such date of enactment and shall apply with respect to workers separated from employment on or after such 60th day.

Mr. VANIK (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 11, strike out lines 2 through 5, inclusive, and insert the following:

(2) Such worker had—

(A) in the 52 weeks immediately preceding such total or partial separation, at least 26 weeks of employment at wages of $30 or more a week; or

(B) in the 104 weeks immediately preceding such total or partial separation, at least 40 weeks of employment at wages of $30 or more;

in one or more firms or appropriate subdivisions thereof with respect * * *

Mr. VANIK. Mr. Chairman, I rise in support of the committee amendment.

This first amendment would allow workers to qualify for benefits if they have at least 40 weeks of employment in the 104 weeks immediately preceding their layoff as an alternative to the present 26 out of 52 weeks employment requirement. The committee adopted the amendment because of the many cases brought to its attention of workers unable to meet the 26 weeks of work requirement in the year preceding their layoff because their firm instituted shorter, intermittent work periods rather than immediate, permanent layoffs of all employees as it became impacted by imports. These workers have usually been in the labor force many years, the more junior employees with less seniority being laid off first rather than receiving shorter work schedules. The amendment provides greater equity in the coverage of eligible workers, at the same time preserves the intent of existing law that workers demonstrate a substantial attachment to the labor force to qualify for these supplemental benefits. A larger number of farmworkers should also be able to become eligible, particularly since the 40 weeks may be employment with more than one trade-impacted firm.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. VANIK. I am delighted to yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, the gentleman from Ohio said he would describe both committee amendments; but I think we are only voting on them one at a time.

Mr. VANIK. I was going to ask, if there is no objection, to vote on them en bloc.

Mr. FRENZEL. Mr. Chairman, I would object. I would hope the gentleman would not request that.

Mr. VANIK. All right; I will not make that request.

Mr. STEIGER. Mr. Chairman, I rise in opposition to the committee amendment.

Mr. Chairman, I will try and do this as briefly as we can, because I realize that time is limited and the hour is fast approaching in which we all turn into pumpkins.

Mr. Chairman, we note if we look at the bill that the committee amendment is one that strikes out language that was agreed to by the subcommittee. The language that is stricken is that which says that:

Such worker had in the 52 weeks immediately preceding such total or partial separation, at least 26 weeks of employment at wages of $30 or more, in one or more firms or appropriate subdivisions thereof with respect.

The amendment that was adopted in the full Committee on Ways and Means strikes that language and goes to new language, in which it is 52 weeks, 26 or in the 104 weeks preceding, at least 40 weeks of employment at wages of $30 or

more in one or more firms or appropriate subdivisions thereof.

It is that to which we are addressing ourselves in the committee amendment. The cost of this committee amendment is $16 million on an annual basis according to a letter from the Labor Department.

Mr. Chairman, my hope is that the Committee of the Whole House on the State of the Union will reject this subcommittee amendment and will go back to the original committee view. I would caution those Members who have further amendments, including our colleague, the gentleman from New Hampshire (Mr. CLEVELAND), our colleague, the gentleman from Minnesota (Mr. OBERSTAR), and our colleague, the gentleman from Vermont (Mr. JEFFORDS), that, as they know, we are under a budgetary ceiling for adjustment assistance, and the effect of the adoption of the committee amendment means we have even less of a chance of adopting even those amendments that might be beneficial, whether it is that of the gentleman from Minnesota, that of the gentleman from Vermont, or that of the gentleman from New Hampshire.

So there are some reasons why I think we ought not to accept this committee amendment.

The historic fact is, however, that this $16 million committee amendment will, in my judgment, mean a disruption of the relationship between unemployment compensation and trade adjustment assistance. While it is true that trade adjustment assistance is a different program, it nevertheless is directly tied and has historically always been parallel to unemployment compensation.

We have not thought carefully on the implications or the ripple effect of the adoption of this amendment, because we are setting here new criteria, criteria which is not eligible to others in the unemployment compensation system but which might in fact become repressive and set a pattern for the rest of the unemployment compensation system.

I, therefore, Mr. Chairman, think the committee amendment ought to be rejected, and I hope the members of the committee will vote no.

Mr. FRENZEL. Mr. Chairman, I move to strike the last word. and I rise in opposition to the committee amendment.

Mr. Chairman, in the scheduled debate I discussed my opposition to this amendment. I would now like to read portions of a letter from the Secretary of Labor, Mr. Ray Marshall, to the distinguished chairman of the Subcommittee on Trade, the gentleman from Ohio (Mr. VANIK), in which the administration raises its objections to this particular amendment. Mr. Marshall says this:

> The alternative qualifying requirement, in the amendment to section 106 of the bill, would permit workers to qualify for up to 78 weeks of the tax free benefits on the basis of 40 weeks of employment in the 104 weeks immediately preceding layoff with one or more firms. This would be an alternative in addition to the present qualifying test of 26 weeks of employment in the 52 weeks preceding layoff. The administration opposes this provision because the proposed alternative does not reflect a sufficient attachment to the labor force.

Mr. Chairman, that says it about as well as anyone can say it. For working only 40 weeks in a 2-year period, with earnings as low as $30 a week, a person otherwise qualified for adjustment assistance is going to be able to earn 78 weeks of benefits. That means for a week of work at $30 a week they will earn 2 weeks of unemployment compensation.

It may be true that some of these people have long labor market attachment, and if that is true, there are far better ways one could write this law to pick up those people who had such long labor market attachment. But this particular section does not require long labor market attachment. It requires only 40 weeks of work in 2 years.

The gentleman from Wisconsin (Mr. STEIGER) has indicated this amendment has a first-year cost of $32 million and an annual cost of $16 million thereafter.

It seems to me we did a good job of trying to put this committee report and this bill together to do an honest and fair job of improving our adjustment assistance program. By this particular amendment which was put on by the committee after the subcommittee had carefully considered it, I think we have produced a feature which is a disincentive for work, and this is exactly the point Mr. Marshall was raising in his letter to the chairman of the subcommittee.

If the unemployment benefits are too long and too generous, there simply is no incentive to go back to work, and this is what I fear by this particular section.

Mr. Chairman, I hope the committee amendment to section 106 will be defeated.

Mr. VANIK. Mr. Chairman, I rise in support of the committee amendment, and I wish to voice my opposition to the position just taken by my distinguished colleague, the gentleman from Minnesota (Mr. FRENZEL).

The CHAIRMAN. Without objection, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

There was no objection.

Mr. VANIK. Mr. Chairman, I would simply like to state that the whole theory of trade adjustment assistance is to provide relief for people who lose their work through some action of Federal policy and trade which has caused them to separate from their employment.

I, first of all, do not understand how my colleague, the gentleman from Minnesota (Mr. FRENZEL), can contend that this has a budgetary impact of $32 million in the first year and $16 million thereafter. The figures that I have indicated it would have a budgetary impact of $16 million for the first year, and we are within the budget allocation on this issue.

The whole question is what happens when an industry and its worker is impacted by imports from foreign countries. The very natural thing happens. There are short-term layoffs; there are fewer workdays. There may be weeks in which work is suspended, and it all results from the impact of foreign products that have distorted the normal productive facilities of the industry.

These people are hurt, and evidence of the hurt or damage is traceable to that situation, and I think they should indeed be given this kind of protection that is afforded under this bill.

I think if the Trade Adjustment Assistance Act is going to be meaningful, it must correct the injustice that was the result of trade policy.

For those who feel that opposing the first committee amendment would create more revenue for their amendments, I want to tell them that I think that if they analyze the impact of the rejection of the first committee amendment they would find that it would hurt them in their constituencies even more than if they fail to get what they seek in their amendment.

I simply want to say that the language of the first amendment offered by the committee was carefully considered in committee. There was a division in the vote in the committee. It passed by a vote of 18 to 13. But we gave this matter very careful consideration. It was not a partisan deliberation. It was the way the membership of the Committee on Ways and Means broke down and divided on the issue.

I certainly hope the Members of this committee will support the determinations that were made by the Committee on Ways and Means in adopting the first committee amendment.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. VANIK. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, I am quoting again from that same letter to the gentleman:

> The Department of Labor estimates that the cost of these provisions would total $48 million, of which $32 million is a short-time cost and $16 million is the annual cost.

Mr. VANIK. The language assumes it was made retroactive. And we have not done that. The figures you quote rely on an assumption that it will be made retroactive.

Mr. FRENZEL. I will look over the letter again. I was not under that impression. If so, I would be glad to admit another one of my frequent mistakes.

Mr. VANIK. As I understand it, that estimate was based on the idea that the amendment would be retroactive.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have a number of questions that I would like to ask the committee.

As I understand it, this bill refers to those who have lost employment through the action of the Federal Government, namely, the Trade Act of 1974. Is that correct?

Mr. STEIGER. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, the way the gentlewoman stated the question, the answer is that that would not be a correct analysis. What the trade adjustment assistance program is designed to do is to provide transitional help to employees and firms who have been im-

pacted by a rapid increase or a large percentage increase in imports.

Mrs. FENWICK. That is what I am talking about. That is what I meant. I did not put is quite as fully as I obviously should have. But there are two questions that I would like to ask of the chairman and the ranking minority Member.

Suppose that the men left employment in the 2 years preceding the effective date here, not because of the act, but because of some other reason. I notice here the mention of 104 weeks. In the 104 weeks immediately preceding, somebody might have left employment of this particular company, having been employed there for 40 weeks, but long before the effects of the Trade Act came into effect.

Would he be covered? That is my first question. Second, how is this going to be administered? Is it going to be governed by clear and specific provisions?

Mr. VANIK. I might just say in response to the first question that it applies to the workers laid off prospectively to the enactment of the bill.

Mrs. FENWICK. Yes, prospectively.

Mr. VANIK. Once they have been laid off.

Mrs. FENWICK. In other words, they would have to tie the laying off of the employee to some act of the Federal Government in relation to the Trade Act, is that correct?

Mr. VANIK. No. It has to be after a determination by the Secretary of Labor that there has been an impact.

Mrs. FENWICK. That there has been an impact on this particular company, and therefore on the employees. That is what I am talking about.

Mr. VANIK. That is correct.

Mrs. FENWICK. Very well. If we have the kind of interpretation that we have had on unemployment compensation generally, we are going to find that the interpretation gets broader and broader. I do not know what is happening in the gentleman's State, but I know what is happening in mine. When an employee leaves employer A because he has found a better job with employer B, and does not stay there long enough to qualify, he receives unemployment compensation at the expense of employer A. Is that what is contemplated by this Congress?

Mr. VANIK. The worker must have 40 weeks of employment with trade impacted firms. The gentlewoman does realize that trade must have an adverse effect on employment. So, it is the action of the Federal Government in trade policy which creates the trade impact on the unemployed.

Mrs. FENWICK. Is there anything in this bill which ties these clauses that go into effect closely to the condition that the gentleman has just described?

Mr. VANIK. Yes, all through the bill. The whole impact of the bill is directed very specifically to this narrow group of people.

Mrs. FENWICK. Unemployment compensation is not narrowly construed, as my example shows, in general. I think the problems really are on the other side.

Mr. STEIGER. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield.

Mr. STEIGER. It is a very different problem.

The CHAIRMAN. The time of the gentlewoman from New Jersey has expired.

(At the request of Mr. STEIGER and by unanimous consent, Mrs. FENWICK was allowed to proceed for 2 additional minutes.)

Mr. STEIGER. The gentlewoman does have to separate out the way that the unemployment compensation system operates, designed and written by the State Legislature of New Jersey, as compared to the adjustment assistance program. The gentlewoman is right, under most unemployment compensation programs in most States the circumstances the gentlewoman describes where an employee leaves employer A and then leaves employer B—employer A will have to pay unemployment compensation.

Mrs. FENWICK. Is that fair?

Mr. STEIGER. From my standpoint, no. The answer is, it is not, but that is not a matter covered by the Federal Government adjustment assistance. That is what we are dealing with. We have tried to be reasonably precise in terms of talking about how one achieves eligibility.

Mrs. FENWICK. All right.

Mr. STEIGER. One receives unemployment assistance as a result of a trade problem. It is not then a matter of leaving one employer and going to the other. It is a matter of having to be certified by the Secretary of Labor, of the fact that there is a trade impact, that imports have caused a decline. Therefore, the worker is eligible as a result of that import problem and the firm can receive assistance as a result of that. It is not the same as unemployment compensation, and I hope maybe in terms of the two questions the gentlewoman has asked that might help her better understand, and help all of us better understand, how this would operate. It is a good program.

Mrs. FENWICK. I thank the gentleman.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I ask unanimous consent to speak again.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. FRENZEL. Mr. Chairman, I simply want to apologize to the distinguished gentleman from Ohio. He was correct and I was wrong in the figures. The cost of the amendment is $16 million, as he indicated. The $32 million one-time cost, as I understand it, would be the cost of funding the Oberstar amendment. I apologize for the error.

The CHAIRMAN. The question is on the first committee amendment.

The question was taken; and on a division (demanded by Mr. VANIK) there were—ayes 21, noes 14.

RECORDED VOTE

Mr. STEIGER. Mr. Chairman, given the closeness of that vote, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 206, noes 110, not voting 116, as follows:

[Roll No. 742]

Messrs. RISENHOOVER, BEVILL, WALKER, and FOLEY changed their vote from "no" to "aye."

Mr. BROYHILL and Mr. LIVINGSTON changed their vote from "aye" to "no."

So the committee amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will report the second committee amendment.

The Clerk read as follows:

Committee amendment: Page 11, strike out line 24 through line 6 on page 12 and insert:

SEC. 108. EXPERIMENTAL TRAINING PROJECTS.

(1) by striking out "26 additional weeks" in paragraph (1) and inserting in lieu thereof "52 additional weeks";

(2) by amending paragraph (2) to read as follows:

"(2) such payments shall be made for not more than 26 additional weeks to an adversely affected worker who is not receiving payments under paragraph (1) and has attained age 60 on or before the date of total or partial separation, except that if payment is made for the 26th additional week and such worker has not attained age 62 before the close of such week, such payments shall be made for not more than the number of weeks occurring during the period beginning with the week after such 26th additional week and ending with, but including, the week in which the worker attains age 62." and

"(3) by amending the last sentence thereof by striking out "78 weeks" and inserting in lieu thereof "104 weeks".

Mr. VANIK. Mr. Chairman, I rise in support of the committee amendment.

The second amendment extends the benefit period for older workers age 60 or over at their time of layoff by up to an additional 26 weeks to a maximum of 104 weeks until the worker reaches age 62. Under present law older workers receive an additional 26 weeks beyond the basic 52-week benefit period to a maximum of 78 weeks. The committee believes that older workers are likely to experience the greatest difficulty among trade-impacted workers of finding alternative employment opportunities or in being retrained. The amendment provides a "bridge" whereby such workers can receive trade readjustment allowances during the 6 months beyond the 78 weeks before they reach social security age. Benefits would cease at age 62 or, as with any other worker, upon reemployment.

Mr. Chairman, I hope the committee will adopt the amendment.

Mr. STEIGER. Mr. Chairman, I rise to oppose the amendment.

Mr. Chairman, during the general debate I took some time to explain why I thought it was not appropriate for us to adopt this second committee amendment. Given the vote on the first amendment, I must say to my colleagues that I do not intend to push for a vote in opposition to it. I outlined why I thought it was bad public policy.

Mr. Chairman, I urge a "no" vote and yield back the balance of my time.

Mr. FRENZEL. Mr. Chairman, I move to strike the last word, and I rise in opposition to the committee amendment.

Mr. Chairman, I also described my opposition to this committee amendment earlier in the day's debate. I would, however, read a section from the same letter to which I referred before from the Secretary of Labor to the chairman of our Subcommittee on Trade, which reads as follows:

Under the amendment to section 107 of the bill, the extended duration of benefits for workers aged 60 or older would allow the payment of trade readjustment allowances (TRA) to workers up to the time that reduced social security benefits become payable. The Administration believes that providing additional tax-free TRA would serve as a disincentive to work and would result in the de facto establishment of an income maintenance program for such workers until they qualify for social security insurance benefits. The Department of Labor estimates that this provision would cost an additional $984,000 on an annual basis.

Mr. Chairman, what the committee and what the gentleman from Ohio (Mr. VANIK) are trying to do is a good thing. It, however, should not be done through the unemployment compensation insurance program. I hope the committee amendment is defeated.

Mr. LEDERER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the committee amendment.

Mr. Chairman, I wish to lend my support to the chairman of the Subcommittee on Trade, the gentleman from Ohio (Mr. VANIK), and urge adoption of the committee amendment. This is my amendment.

I think what we do by this amendment is to continue giving the working man dignity after, through no fault of his own, he becomes unemployed.

Mr. Chairman, I ask for the adoption of this committee amendment.

The CHAIRMAN. The question is on the second committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the third committee amendment.

The Clerk read as follows:

Committee amendment: Page 13, before line 1, after "SEC. 108." insert "EXPERIMENTAL TRAINING PROJECTS."

The committee amendment was agreed to.

AMENDMENTS OFFERED BY MR. VANIK

Mr. VANIK. Mr. Chairman, I offer technical and conforming amendments in all three titles of the bill to remove violations of the Budget Act and to insert a section heading.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. VANIK: Page 3, lines 23 and 24, strike out "date of the enactment" and insert "effective date".

Page 8, line 14, strike out "date of enactment" and insert "effective date".

Page 15, line 11, after "States." insert the following: "The authority of the Secretary to enter into contracts under this section shall be effective for any fiscal year only to such extent, and in such amounts, as are provided in appropriation Acts.".

Page 22, strike out lines 5 through 12, inclusive.

Page 26, line 6, strike out "date of the enactment" and insert "effective date".

Page 27, line 25, strike out "section.'." and insert the following: "section. The authority of the Secretary to enter into contracts under this section shall be effective for any fiscal year only to such extent, and in such amounts, as are provided in appropriation Acts.'."

Page 28, line 3, strike out "date of the enactment" and insert "effective date".

Page 28, lines 23 and 24, strike out "date of the enactment" and insert "effective date".

Page 29, line 2, strike out "date of enactment" and insert "effective date".

Page 30 line 7, after "SEC. 301." insert "ADJUSTMENT ASSISTANCE COORDINATION."

Page 34, after the matter appearing after line 6, insert the following:

SEC. 303. EFFECTIVE DATES.

(a) Except as provided in subsection (b), this Act shall take effect on October 1, 1978, or on the date of the enactment of this Act if the date of the enactment is after October 1, 1978.

(b) The amendments made by sections 106, 107, 109, 110, and 111(1) shall take effect on the 60th day after the effective date of this Act and shall apply with respect to workers separated from employment on or after such 60th day.

Mr. VANIK (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is the gentleman from Ohio (Mr. VANIK) also asking unanimous consent that the amendments be considered en bloc?

Mr. VANIK. Yes, Mr. Chairman, I also

ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. VANIK. Mr. Chairman, the purpose of these amendments is to correct certain technical violations of the Congressional Budget Act in H.R. 11711, as amended. The Budget Committee supported, and the Rules Committee approved in House Resolution 1288 waivers of all points of order against the bill for failure to comply with sections 401(a), 401(b)(1), and 402(a) of the act, based on the understanding that the Committee on Ways and Means would offer floor amendments to remove the Budget Act violations.

The amendments on pages 15 and 27 of the bill expressly limit the authority under sections 108 and 203(d) to enter into contracts to the extent or amounts provided in appropriation acts, as required by clause 5, rule XXI of the House. The amendment on page 34 stipulates that the bill will not take effect until the beginning of the next fiscal year on October 1, 1978, or on the date of enactment, whichever is later, in compliance with sections 401(b)(1) and 402(a) of the Budget Act. The other amendments make conforming changes on the effective date in titles I and II. The amendment on page 30 inserts a heading for section 301, missing in the bill as reported.

AMENDMENTS OFFERED BY MR. OBERSTAR TO THE AMENDMENTS OFFERED BY MR. VANIK

Mr. OBERSTAR. Mr. Chairman, I offer amendments to the amendments.

The Clerk read as follows:

Amendments offered by Mr. OBERSTAR to the amendments offered by Mr. VANIK: On page 2 of the amendments, in the matter proposed to be inserted as subsection (a) of section 303, strike out "subsection (b)" and insert in lieu thereof "subsections (b) and (c)".

On page 2 of the amendments, in the matter proposed to be inserted as subsection (b) of section 303, strike out "106,".

On page 2 of the amendments, in the matter proposed to be inserted as section 303, insert at the end thereof the following:

(c)(1) The amendment made by section 106 shall apply with respect to—

(A) workers separated from employment after the effective date of this Act, and

(B) workers separated from employment during the period beginning two years before the effective date of this Act and ending on the effective date of this Act, in the manner provided in paragraph (2).

(2) Any worker may apply, in a manner prescribed by the Secretary, for a trade re the Trade Act of 1974 for any week of unadjustment allowance under section 231 of employment during the period described in paragraph (1)(B) for which the worker was not qualified for such an allowance at the time of his separation. Payment of such an allowance shall be made to such a worker if the Secretary determines that the worker would have been entitled to the allowance if the amendment made by section 106 had been in effect at the time of the worker's separation.

Mr. OBERSTAR (during the reading). Mr. Chairman, I ask unanimous consent that the amendments to the amendments be considered as read, printed in the RECORD, and considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. OBERSTAR. Mr. Chairman, very simply stated, the purpose of this amendment is to make the provisions of the previously adopted committee amendment retroactive for a period of 2 years. It would affect some 10,000 employees at an annual cost of about $16 million or a 2-year cost of $32 million.

While I was home recently I met with the steelworkers who mine the iron ore that provides the basic raw material for the steel industry of this country. These workers have been affected by the imports of steel into this country just as much as employees in basic steel, because when the steel industry is not working, the iron ore mines of my area are not working and the miners of my district are laid off.

There were some 2,300 employees of one iron ore processing, or taconite, plant who were laid off because of imports. Most of them were eligible for trade adjustment benefits. In fact, 2,200 out of 2,300 were eligible for the benefits. But one elderly couple came to me with a very sad and, I think, very touching and very descriptive circumstance. The husband, who had worked in this mine for 25 years, was unfortunately injured, laid up in a hospital for a period of months. While he was hospitalized, the union went on strike. The day after the strike was settled, the company, instead of calling back the employees, laid them all off because of imports. This man was not eligible for trade adjustment benefits. He had used up whatever unemployment compensation to which he had been entitled. He was now in the worst of all worlds. He had a big hospital cost. He was not working, with little prospect of going back to work, and not eligible for trade adjustment benefits, because the misfortune happened to him prior to the date provided in the law.

All I am saying is that if we are going to liberalize this law, let us cover all of those equitable cases, all of those deserving cases, all of those people like this family in my district who need help, who have been injured by a conscious trade policy of the United States to open our doors to imports, which then results in domestic unemployment.

When the European Common Market opened their doors, they broke down the trade barriers. They made it possible for free exchange of goods. They strengthened their economy by doing it, but they also took care of the poor, the unfortunate, the working people who were laid off.

I know about the Common Market situation because I studied in Europe. I studied the problems of the unification of Western Europe. I saw what those economies did, what those governments did for their most unfortunate and poor people and those employees of the weakest industries in those countries—and they were taken care of. They were taken care of in the way that I am proposing to do in this amendment. If the European governments can care for their employees, then this most favored of all nations can do this little bit to rectify the wrong that has been wreaked upon some of our people. All this amendment does is roll back the effects, the very beneficial effects, of the Vanik amendment 2 additional years, to that point in history when the impact of the imports was being felt in this country with most serious effect—in the steel industry, in the clothing industry, and many other industries, in the smaller communities as well as the larger metropolitan areas throughout this country where people want to work for a living but because of unfair competition from abroad they cannot.

Mr. Chairman, I ask support of this amendment.

Mr. VANIK. Mr. Chairman, with great reluctance I must rise in opposition to this amendment.

I think the gentleman from Minnesota (Mr. OBERSTAR) has very well articulated the problem of his community. I feel a deep sensitivity to it. However, I must say that the amendment would involve a nonbudgeted item here, an additional $32 million over the funds that have already been approved in this second budget resolution. While I can understand the very difficult problems in his community, it is very difficult and there is very little logical reason to single out this particular provision for a retroactive application and not every other amendment in the bill.

Mr. Chairman, not only would this add a tremendous budgetary and administrative cost, but it would also be contrary to the basic purpose of the program, which is adjustment to reemployment rather than income maintenance or compensation for past unemployment.

Mr. Chairman, because of these factors, I hope that my colleagues in the committee will reject the amendment.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. VANIK. I yield to the gentleman from Wisconsin.

Mr. STEIGER. I very much appreciate the gentleman's yielding to me and I want to join with him, with the same reluctance as the gentleman expressed, in opposing the amendment offered by the gentleman from Minnesota (Mr. OBERSTAR).

Mr. Chairman, it simply would not be a very good idea at this point, given the budgetary restraints and given, yes, the precedence that is established in making this apply on a selective kind of retroactive basis.

We all understand the very real problems faced in the northern part of Minnesota and various other places throughout the country. But I must say in all honesty, it would be the wrong place and wrong time to rectify through this vehicle at this point, and I would hope that the amendment would be rejected.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Minnesota (Mr. OBERSTAR) to the amendments offered by the gentleman from Ohio (Mr. VANIK).

The question was taken, and on a division (demanded by Mr. OBERSTAR) there were—ayes 7; noes 38.

So the amendments to the amendments were rejected.

AMENDMENT OFFERED BY MR. JEFFORDS TO THE AMENDMENTS OFFERED BY MR. VANIK

Mr. JEFFORDS. Mr. Chairman, I offer an amendment to the amendments.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS to the amendments offered by Mr. VANIK: On page 2, line 16 of the Vanik amendment strike out "107," and insert in lieu there of "107(2)" and in Subsection 303(b) insert at the end thereof the following:

(c) The amendments made by section 107 (1) and (3) shall take effect on the effective date of this act and shall apply:

(1) with respect to workers separated from employment on or after such effective date, and,

(2) with respect to workers receiving trade readjustment allowances on the effective date to assist them in completing an approved training program as provided by section 233(a)(1) of the Trade Act of 1974.

Mr. JEFFORDS. Mr. Chairman, I am offering this amendment on behalf of myself and also on behalf of the gentleman from Connecticut (Mr. SARASIN). I believe the amendment is self-explanatory, and I would be happy to yield to the gentleman from Wisconsin (Mr. STEIGER).

Let me further explain the amendment in more details. In particular, I feel that the language in section 112 creates a serious inequity because of the limitations imposed. While the committee will seek to amend this section, the intent will be the same. Those sections dealing with individual trade readjustment allowances will still apply only to those people who have been separated from employment 60 days after date of enactment.

This, unfortunately does not protect those workers who, at the date of enactment, are participating in an approved training program and receiving benefits. Under these circumstances, an individual's benefits could easily expire prior to the completion of their training program, and in many cases, these workers will be forced to terminate their training programs prematurely. I do not believe this is the intent of the TRA program, and I think my colleagues would agree with me on that point. To exclude these workers from the provisions of this legislation is to blind ourselves to a very real problem—one that we can solve before it confronts us.

We now have the opportunity to correct this oversight, and amend the bill to include these people. With that in mind, Congressman RON SARASIN and I have drafted this amendment to insure that inclusion. RON and I both felt that this was clearly an issue of equity for the worker currently on the program. This is not a retroactive measure. We are not going back into the books of the Department of Labor to search out individuals who have encountered this situation in the past. We are merely saying that this dilemma is going to face many workers in the future, even after the enactment of this legislation, and by applying foresight, we can avoid such a problem. I have here with me a number of individual cases of workers who have contacted our offices seeking support for this legislation because their benefits are going to expire prior to the conclusion of their training programs. Unfortunately, these people have been misled. H.R. 11711 in its present form will not help these people. I have been informed that this is a nationwide problem and that thousands of workers have experienced this problem in the past. Today, I ask your support for my amendment to insure the presence of equity in this bill.

While some Members may argue that our amendment adds too much of the cost of the TRA program it must be remembered that whatever the cost is, it would be a one-time expense and the maximum amount it could add to a worker's benefits is $1,400 (DOL) for 26 weeks—I sincerely believe that in order to pass a bill today that will express our real concern for workers affected by imports, with an emphasis on their retraining, we must make this one-time expense and cover these people currently participating in the program.

Mr. STEIGER. Mr. Chairman, to clarify again the question I asked the gentleman earlier, what is the cost of this amendment?

Mr. JEFFORDS. I know the maximum cost. I do not know the actual cost, but I do know the maximum cost. The outer limits are $14 million, but that would anticipate that everyone who is available and eligible would apply.

Mr. STEIGER. If it gets to be that much, and I think we will have to clarify this over in the other body, we have a problem with the budget limitation. But, I think the amendment is essentially a fair and equitable one. I would be willing on the part of our side to accept the amendment with the understanding of the gentleman in the well and of Mr. SARASIN that we will have to further clarify exactly what, in fact, the cost would be.

Mr. JEFFORDS. I am confused, as the gentleman is, on the cost, because the figures given to me and to my colleague from Minnesota (Mr. OBERSTAR) are identical. I do not believe ours would be anywhere near as expensive as those in the previous amendment just rejected. That is why I said as a very outer limit it would be $14 million. I think it would be substantially lower.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I think the gentleman's amendment is a very sound and responsible one. It does not reach as far as my previously offered amendment would, and represents a scaled down, bargain-basement model of my own proposal. I would certainly hope that the committee could accept it.

Mr. JEFFORDS. I thank the gentleman.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Ohio.

Mr. VANIK. Mr. Chairman, the basic purpose of adjustment assistance is to provide adjustment for reemployment, with emphasis on training. I think, as I understand the gentleman's amendment, it deals with those already in training, and allows them to complete that training. Otherwise, the basic training would be a total loss.

I, with the same reservations that were made by my distinguished colleague from Wisconsin, the ranking minority member of the committee (Mr. STEIGER) have a concern on that cost which I hope to have clarified. With that understanding, I will accept the amendment.

Mr. JEFFORDS. I thank the gentleman. All this does is to make sure that those already in training do not get terminated prematurely if there is a 2-year program and benefits run out. They are extended like anybody else if they are eligible.

Mr. VANIK. I might say that I am also influenced by the fact that it will provide some relief for the cases that are so clear-cut in the explanation made by our colleague from Minnesota.

Mr. JEFFORDS. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont (Mr. JEFFORDS) to the amendments offered by the gentleman from Ohio (Mr. VANIK).

The amendment to the amendments was agreed to.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Ohio (Mr. VANIK), as amended.

The amendments, as amended, were agreed to.

AMENDMENT OFFERED BY MR. CLEVELAND

Mr. CLEVELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLEVELAND: Page 11, after line 19, insert the following:

SEC. 107. REIMBURSEMENT OF STATES FOR UNEMPLOYMENT INSURANCE PAYMENTS.

(a) Section 232 of the Trade Act of 1974 (19 U.S.C. 2292) is amended by adding at the end thereof the following new subsection:

"(g)(1) If unemployment insurance is paid under a State law to an adversely affected worker for a week for which—

"(A) he receives a trade adjustment allowance, or

"(B) he makes application for a trade readjustment allowance and would be entitled (determined without regard to subsection (c) or (e)) to receive such allowance,

the State agency making such payment shall, unless it has been reimbursed for such payment under Federal law, be reimbursed from funds appropriated pursuant to section 245(b)(1), to the extent such payment does not exceed the amount of the trade readjustment allowance which such worker would have received, or would have been entitled to receive, as the case may be, if he had not received the State payment. The amount of such reimbursement shall be determined by the Secretary on the basis of reports furnished to him by the State agency.

"(2) In any case in which a State agency

is reimbursed under paragraph (1) for payments of unemployment insurance made to an adversely affected worker, such payments, and the period of unemployment of such worker for which such payments were made, may be disregarded under the State law (and for purposes of applying section 3303 of the Internal Revenue Code of 1954) in determining whether or not an employer is entitled to a reduced rate of contributions permitted by the State law.".

(b) Section 241(a) of the Trade Act of 1974 (19 U.S.C. 2313(a)) is amended by adding at the end thereof the following new sentence: "Sums reimbursable to a State pursuant to section 232(g) shall be credited to the account of such State in the Unemployment Trust Fund and shall be used only for the payment of cash benefits to individuals with respect to their unemployment, exclusive of expenses of administration.".

(c) Paragraph (3) of section 3302(c) of the Internal Revenue Code of 1954 (relating to credits against Federal unemployment tax) is repealed.

Redesignate sections 107 through 112 as sections 108 through 113, respectively.

Mr. CLEVELAND (during the reading). Mr. Chairman, this amendment has been printed in the RECORD previously and has been described in several "dear colleague" letters, so I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Hampshire?

There was no objection.

Mr. CLEVELAND. Mr. Chairman, this amendment is a simple one. It reinstates Federal reimbursement to the States for unemployment compensation benefits paid to workers who receive adjustment assistance under the Trade Act.

The purpose is equally simple. It is my belief that the Federal Government has the responsibility to assume the costs of the impact of the Federal trade policies. At the present time, since the passage of the Trade Act of 1974, the States have had to pay unemployment compensation benefits to workers whose jobs were eliminated mainly because of the increased imports. I submit that this is unfair and constitutes a considerable burden for States, including the depletion of their unemployment trust funds for reasons totally beyond their control.

Under provisions of the Trade Expansion Act of 1962 and until the passage of the Trade Act of 1974—and let me repeat this—under provisions of the Trade Expansion Act of 1962 until the passage of the Trade Act of 1974, the Federal Government did assume the entire cost of unemployment benefits to workers receiving trade adjustment assistance allowances. They did it, for 12 years, and if they did it for 12 years there must have been some reason and logic behind it. It is the same reason and logic behind my amendment. It was changed in 1974 by means of a Senate amendment and was never debated in the House, but adopted in a conference report.

Its impact caught many of us by surprise, and I appreciate very much the Rules Committee granting a rule which provides the House an opportunity to now debate this issue.

The present system is a two-tier program whereby the States must pay unemployment compensation benefits to trade adjustment workers and the Federal Government provides a supplemental benefit.

May I remind the Members that this is done by the decision of the Federal Government and is a decision over which the States have no control whatsoever.

An added problem in some States, particularly my own State, is that the differernce between the State program and the Federal supplement can be very large and it reduces a worker's incentive to obtain new employment. That also increases the burden on the States. Let us just take my own State, for example. By the way, I have the figures available at the desk for every State in the Union.

If you have any doubts about this and as to how it impacts your State, those figures are available. They were sent to your office.

Just to give you an example, in New Hampshire our maximum benefit is $102, but under the trade adjustment assistance program workers are eligible to receive as much as $227 per week. And that is tax free.

One can readily conclude that this discrepancy might, indeed, prolong the duration of unemployment for trade adjustment workers and I have figures from a number of States listing the average duration of unemployment for Trade Act workers which in some cases is as high as 48 weeks.

Also in New Hampshire—and I do not have these figures available for the other States—and perhaps some of the people who represent other States do not care, but if they do, they should listen to the figures from New Hampshire.

In New Hampshire 80 percent of Trade Act workers exhausted their benefits which meant they stayed on for as long as they could under the greatly enriched benefits.

The national average and the State average is somewhere around 20 to 30 percent for exhausting benefits.

That gives you some conception of what I am trying to tell the Members, and I regret there are not more Members present on the floor.

Earlier I circulated a letter to my colleagues containing figures which the Department of Labor supplied indicating the actual expenditures by States in fiscal year 1977 for unemployment compensation to Trade Act workers. Members from the 24 States who have been forced to borrow from the Federal Government in order to keep their unemployment compensation trust funds solvent would do well to bear in mind the added pressure of Trade Act expenditures on those trust funds.

In conclusion, I want to stress that my amendment does not in any way increase the actual costs of the program but merely shifts the burden from the States to the Federal Government since that is where the trade policies are set. I expect that the subcommittee chairman, the gentleman from Ohio, will make a point of the estimated costs of this amendment and, again, I would point out that the costs will be the same whether or not my amendment passes. However, in fairness, I think the Federal Government, not the States, should have to pay for Federal programs.

Mr. FLOWERS. Mr. Chairman, will the gentleman yield?

Mr. CLEVELAND. I yield to the gentleman from Alabama.

Mr. FLOWERS. Mr. Chairman, I thank the gentleman from New Hampshire (Mr. CLEVELAND) for yielding me this time.

Mr. Chairman, I want to say to my colleagues in the House that I fully support the gentleman in the offering of his amendment. In fact, I joined with the gentleman in a "Dear Colleague" letter, myself, to do that.

I will not say that this is a States rights amendment, although it is bordering on that, but it is an answer to the Federal Government's intrustion into the States' activities. Since we are going to tell the States what they have to do, then I think we have got to be able to back them up by paying them for the costs.

When the gentleman talks about his State of New Hampshire, the same thing is true of my own State of Alabama, and of all of the States where the States are required to make an enormous expenditure as a result of Federal policies. This particular action is the result of the Federal Fair Trade policies.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. FLOWERS, and by unanimous consent, Mr. CLEVELAND was allowed to proceed for 2 additional minutes.)

Mr. FLOWERS. Mr. Chairman, if the gentleman will yield further, let me say that I think it is of paramount importance, and only fair, that we do this now and compensate the States for what they have to pay out as a result of the act of the Federal Government.

I thank the gentleman for yielding.

Mr. CLEVELAND. Mr. Chairman, I thank the gentleman from Alabama (Mr. FLOWERS) for his remarks.

The gentleman is quite right that, although it is not essentially a States rights amendment, it is very much in that nature.

The fact of the matter is that there is increasing comment out there in the rest of the country that the States and local governments are getting sick and tired of the Federal Government passing well-intentioned bills with good purpose and good reason and then saying: all right, this is a good idea, therefore, we want Illinois to do it, we want California to do it, we want Missouri to do it, we want all of the States to do it and, in fact, you have to do it.

But, then who pays the bill? We foist part of the charge over on to them.

As I say, the people are getting sick and tired of that kind of procedure.

That is what my amendment is all about.

I hope the House will adopt the amendment, and it should, because if this legislation is as good as its proponents say it is, it ought to be good enough for the people who pass the act to pay for the act.

Mr. TREEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to take just a minute to ask the author of the amendment a few questions.

The gentleman from New Hampshire (Mr. CLEVELAND) has said that this amendment is a desirable amendment and I would ask the gentleman whether this amendment has any retroactive effect to reimburse States for previously incurred costs?

Mr. CLEVELAND. I do not think it does. I do not want to be too definite, but I think it would become effective on the date of its enactment.

Mr. TREEN. If any Member can enlighten me on that point I would be interested in hearing the response.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. TREEN. Yes, I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, the answer is yes. The response of the gentleman from New Hampshire (Mr. CLEVELAND) is correct.

Mr. TREEN. It has no retroactive effect?

Mr. STEIGER. It does not.

Mr. TREEN. The other question I have is this: After the basic period of unemployment benefits, there is a 13-week additional under the extended benefits program, and half of that is paid now out of the Federal share of unemployment tax and 50 percent by the States.

What effect does the gentleman's amendment have with respect to unemployment benefits paid 50-50 by the Federal Government and the State government?

Mr. CLEVELAND. If the gentleman will yield further, I do not think it would have an effect on that. This would only affect payments that are made by virtue of the Trade Assistance Act.

Mr. TREEN. I understand that, but the States are going to be reimbursed only for the portion paid by the States; we are not going to reimburse the States for benefits that they have administratively paid, but which were contributed to by the Federal tax; is that correct?

Mr. CLEVELAND. I do not think my amendment does that.

Mr. TREEN. The intention of the gentleman's amendment is merely to reimburse, on a dollar-for-dollar basis, that which the State paid out of the State's collections, that is, the collections that are credited to the State's account; is that the intention of the gentleman's amendment?

Mr. CLEVELAND. The purpose of my amendment is to have the Federal Government pay all of what a worker receives in the way of compensation, because the trade policies of the United States have been declared to have caused his unemployment. The Federal Government will pay all of the compensation that the worker receives exactly as they did from 1962 when the Trade Expansion Act was passed to 1974, before the Senate sneaked in this amendment which made the States pay part of it.

Mr. TREEN. I appreciate the gentleman's amendment. I think it is consistent with the entire principle of unemployment compensation.

Moreover, I think the fact that the States have to take the burden of this is inconsistent with the Trade Assistance Act.

Mr. Chairman, I urge that the Members support the amendment.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the gentleman from New Hampshire (Mr. CLEVELAND) has described his amendment excellently. The problem is that things are never quite the same from one year to the next.

In 1962 under the act that was then in force until 1974, it was required that in order to receive adjustment assistance, one must be unemployed wholly by reason of imports. In 1974 we changed the definition so that imports only had to be one of the factors concerned with unemployment.

For that reason, the Federal share of the cost of such assistance was reduced to a point where it is around 45 percent.

To say that we are requiring the States to do something they would not have to do is not wholly accurate. Fires, famines, droughts, and plagues, which also cause unemployment, are beyond the ability of the States to cope with. Yet, the States must pay unemployment.

If we question the entire Unemployment Compensation Act, we have to go back to the 1930's; and I do not think we want to do that.

What we have said in this bill is that trade has to be only an important factor, not the most important factor, in unemployment. Were there no Trade Act, those States would have to pay a little lower rate of unemployment compensation; but if we take what the Federal Government pays to them now, the States would be paying even more, absent the act that is before us.

Mr. Chairman, as to total costs, the cost of the amendment of the gentleman from New Hampshire is around $270 million.

Mr. CLEVELAND. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New Hampshire.

Mr. CLEVELAND. Let us be honest about that matter. The gentleman has misstated that. There is a total cost of $200 million. That would be a cost which the Federal Government would pay, but which the States are now paying; is that not true?

Mr. FRENZEL. Yes. That is what I said.

Mr. CLEVELAND. All right.

Mr. FRENZEL. I am telling the Members that the cost to the Federal Government of the amendment of the gentleman from New Hampshire, (Mr. CLEVELAND) is about $274 million as we have it from the Department of Labor. The bill before us, depending on whether one believes the committee or the CBO, has a cost of between $130 and 149 million. So if we accept the amendment of the gentleman from New Hampshire, we are not going to double the cost of the bill; we are going to triple it; and that is, of course, way out of whack with the second budget resolution. It only means that something else is going to have to give somewhere. So in my judgment, Mr. Chairman, the bill before us is fair. There is no reason to accept the amendment of the gentleman from New Hampshire. It is inordinately expensive, and it should be defeated.

Mr. STEIGER. Mr. Chairman, will my colleague yield?

Mr. FRENZEL. I yield to the gentleman from Wisconsin.

Mr. STEIGER. I thank the gentleman for yielding.

I want to join. Mr. Chairman. my colleague, the gentleman from Minnesota (Mr. FRENZEL) in opposing this amendment. Let us understand the two fundamental points that are involved: One, under the present law what we did in the Trade Act of 1974 by expanding in effect the effect of the old trade law in making trade impact only a part of the reason for unemployment and the receipt of unemployment compensation is we said that the Federal Government ought to pick up that share over and above what the State would otherwise be paying for unemployment compensation. What the Cleveland amendment does—and this is the second point—is to say that regardless of what happens, we are assuming that the State is being unfairly burdened, and that is simply not the case at all, so the record ought to be eminently clear that the Trade Act of 1974 concept of picking up the cost above the State unemployment compensation program was the right way to do it. We could go back, if we wanted to, and revise the other old concept of tightening and making it solely trade impact. Then we would have the argument that the Federal Government ought to come in and pick up the whole ball of wax, but that is not what this amendment does. So the amendment ought not to be passed. I urge its rejection.

Mr. FRENZEL. I thank the gentleman for his contribution. I think this is true. This is not a States' rights amendment; it is giving a little gift to the States and burdening the Federal taxpayer.

Mr. FISHER. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Virginia.

Mr. FISHER. I thank the gentleman for yielding.

I would like to join my colleague, the gentleman from Minnesota (Mr. FRENZEL), and others who have spoken in opposition to this amendment and for the same reasons that they give. There are really two reasons why this amendment is not a good idea.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. FRENZEL was allowed to proceed for 1 additional minute.)

Mr. FRENZEL. I yield to the gentleman from Virginia.

Mr. FISHER. The first reason is its cost would carry us way over the budget,

and we would be in serious trouble on that count. The other is a little more abstruse perhaps, but if we say that everything caused by national policy or national situations ought to be paid for by the Federal Government, there is no telling where we would end up. A great deal of unemployment is caused by national conditions or national tax, or fiscal or monetary or employment policy, and also by trade policy. There is no way we can disengage that and say that in the case of national trade policy all the unemployment costs shall be borne as a cost to the Federal Government, none to the States, because all these other things we do at the Federal level may also contribute to unemployment or to employment, and we just do not get anywhere along that track.

I would say we ought to stick with the conventional time-tested way of doing this, of financing the bulk of this program through the State level.

The CHAIRMAN. The time of the gentleman has expired.

Mr. D'AMOURS. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the amendment offered by my colleague from New Hampshire to the Trade Adjustment Assistance Act.

I firmly believe that it is time for the Federal Government to once again take full responsibility for its trade policies, rather than shifting part of this burden onto the States and their unemployment compensation systems.

Until 1974 the Federal Government did assume full responsibility for the compensation of workers who were laid off as a result of U.S. trade policies and unfair foreign trade competition. But during consideration of the Trade Act of 1974 the other body adopted an amendment to the House passed bill which provided that each State would have to pick up the tab for the portion of trade adjustment assistance benefits that workers would receive if they were unemployed for other reasons.

Unfortunately, the House receded to the Senate position in conference and a longstanding Federal policy was reversed.

This amendment would reinstate the provisions of the Trade Act prior to the adoption of the 1974 amendments and would once again have the Federal Government assume its full responsibility to these workers by paying the full cost of their unemployment and trade adjustment assistance benefits.

We are all well aware that the past few years have been years of relatively high unemployment. This has placed a great strain on the unemployment compensation funds of many States. I think it is highly unfortunate that the Federal Government chose a time of high unemployment, when there was already a large demand on unemployment compensation funds, to shirk its full responsibility. It is particularly ironic that this change took place in a time period when the dollar has been declining and the pressures of unfair foreign competition have been increasing.

So I ask my colleagues, do you have shoe or textile firms in your district which have been adversely affected by Federal trade policy and cheap foreign labor?

Do you have steelworkers or autoworkers who have been laid off as a result of foreign dumping?

Do you have TV or electronic workers who have been affected by the recently disclosed anticompetitive actions from Asia?

Do you have agricultural workers who have been laid off because their employers cannot keep up with foreign cartels and unfair foreign subsidization?

If so, I urge you to support this amendment which will save your State the cost of unemployment benefits to workers who have been certified by the U.S. Government as unemployed due to foreign trade actions of the U.S. Government.

Mr. Chairman, this is another classic example of a situation where the Federal Government's actions create unemployment, the Federal Government mandates that States pay unemployment compensation, and yet the Federal Government refuses to accept the full financial responsibility for its actions.

I urge my colleagues to adopt this amendment and place the responsibility for trade policy right where it belongs, on the shoulders of the Federal Government which sets that policy, not on the shoulders of the States which have no influence over trade policies.

Let us make sure that Ambassador Strauss knows when he is negotiating trade policy with other nations that his actions may result in higher unemployment benefit payments, and that these payments will be fully borne by the U.S. Treasury.

This is the best incentive Congress can give the administration to make sure that U.S. trade policy adequately protects U.S. workers.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. D'AMOURS. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, I rise in wholehearted support for the amendment.

I hear some saying, "Vote," but we will stay until 4 o'clock anyway, so they might as well shut up.

The Federal Government mandates the programs on to the State level and then with Federal policy creates unemployment and then expects the States to gargle the cost of the program. If it is a Federal policy, the Federal Government ought to pay the bill, and if the Federal Government does not want to pay the bill, we ought to change our trade policies.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Hampshire (Mr. CLEVELAND).

The question was taken; and on a division (demanded by Mr. CLEVELAND) there were—ayes 20, noes 31.

Mr. CLEVELAND. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

Mr. CARNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of H.R. 11711, trade adjustment assistance for workers and firms.

As Representative from the 19th Ohio District, which includes Youngstown, Ohio, I have witnessed firsthand the importance of a strong, national program for workers who have lost their jobs because of imports.

Trade readjustment assistance benefits must be part of Government policy if we intend to foster international trade with a minimum of barriers.

Large numbers of workers should not be expected to pay the economic consequences of our inability to promote a more stable international trade climate.

Provisions for trade readjustment assistance under the "Trade Act of 1974" have greatly helped American workers who have lost their jobs due to imports.

However, many workers who lost their jobs due to increased imports have not been eligible for such assistance.

H.R. 11711 provides improvements in benefits, especially by protecting workers who are indirectly affected, that is, those who supply industries which are directly hurt by foreign imports.

It provides retroactive eligibility to those workers laid off up to 18 months prior to filing petitions before November 1977.

It extends benefit periods by 26 weeks up to 104 weeks for workers 60 and older and workers who have decided to seek training in another field.

In addition, the bill increases job search and relocation allowances to 100 percent of expenses up to $600.

Mr. Chairman, on behalf of the more than 7,000 workers in my district who receive trade adjustment assistance, I urge my colleagues to vote in favor of this legislation.

A responsible course on trade policy demands that proper consideration be given to those who are directly affected by our trade policy.

The CHAIRMAN. Are there any further amendments to title I?

If not, the Clerk will read.

The Clerk read as follows:

TITLE II—IMPROVEMENTS IN ADJUSTMENT ASSISTANCE TO FIRMS

SEC. 201. ELIGIBILITY REQUIREMENTS OF FIRMS FOR ADJUSTMENT ASSISTANCE.

(a) Section 251 of the Trade Act of 1974 (19 U.S.C. 2341) is amended—

(1) by amending subsection (c)—

(A) by amending paragraph (2) to read as follows:

"(2) that sales or production, or both, of such firm have decreased absolutely, or threaten to decrease absolutely,",

(B) by inserting ", or the threat thereof" immediately before the period at the end of paragraph (3), and

(C) by striking out the last sentence thereof; and

(2) by striking out subsection (d) and inserting in lieu thereof the following:

"(d)(1) The Secretary shall certify a firm as eligible to apply for adjustment assistance under this chapter if the Secretary determines—

"(A) that not less than 25 percent of the total sales of such firm is accounted for by the provision to import-impacted firms of—

"(i) any article (including, but not limited to, any component part) which is essen-

tial to the production of any import-impacted article,

"(ii) any service which is essential to the production, storage, or transportation of any import-impacted article, or

"(iii) any article and any service described in clauses (i) and (ii);

"(B) that a significant number or proportion of the workers in such firm have become totally or partially separated, or are threatened to become totally or partially separated;

"(C) that the sale or production, or both, of such firm have decreased absolutely, or threaten to decrease absolutely; and

"(D) that the absolute decrease, or the threat thereof, in the sales or production, or both, by import-impacted firms of import-impacted articles, with respect to which such firm provides articles or services referred to in subparagraph (A), contributed importantly to the total or partial separation, or threat thereof, referred to in subparagraph (B) and to the decline in sales and production, or the threat thereof, referred to in subparagraph (C).

"(2) For purposes of this subsection—

"(A) The term 'import-impacted article' means any article produced by an import-impacted firm, if such article is one with respect to which a determination under section 222(a)(3) or subsection (c)(3) was made incident to the certification of the group of workers or firm concerned.

"(B) The term 'import-impacted firm' means—

"(i) any firm or appropriate subdivision thereof the workers of which have been certified pursuant to section 222(a), or

"(ii) any firm which has been certified pursuant to subsection (c).

"(e) For purposes of subsections (c) and (d) the term 'contributed importantly' means a cause which is important but not necessarily more important than any other cause.

"(f) A determination shall be made by the Secretary as soon as possible after the date on which any petition is filed under this section, but in any event not later than 60 days after that date.

"(g) In any case in which the Secretary of Labor notifies the Secretary that a petition has been filed under section 221 by any group of workers, if a petition has been filed under subsection (a) regarding any firm in which such group of workers is, or was, employed, the Secretary, notwithstanding any other provision of law, shall promptly provide to the Secretary of Labor any data and other information obtained by the Secretary in taking action on the petition which would be useful to the Secretary of Labor in making a determination under section 223 with respect to the workers.

"(h) If any certification issued under this section is based upon a determination made pursuant to subsection (c)(2) or (d)(1)(C) that the production or sales, or both, of the firm concerned threaten to decrease absolutely, no technical assistance (other than assistance provided for in section 253(a)(1)) or financial assistance under this chapter shall be provided to the firm covered by such certification until after the date on which the Secretary determines pursuant to such subsection that the production, or sales, or both, of such firm have decreased absolutely.".

(b) The amendments made by subsection (a) shall apply with respect to petitions filed under section 251(a) of the Trade Act of 1974 on or after the date of the enactment of this Act.

SEC. 202. TECHNICAL ASSISTANCE

(a) Section 252 of the Trade Act of 1974 (19 U.S.C. 2342(c)) is amended—

(1) by striking out subsection (c); and

(2) by redesignating subsection (d) as subsection (c).

(b) Section 253 of such Act (49 U.S.C. 2343) is amended—

(1) by amending subsection (b)—

(A) by striking out "(b) The" and inserting in lieu thereof "(b)(1) Except as provided in paragraph (2), the"; and

(B) by adding at the end thereof the following new paragraph:

"(2) The Secretary shall provide technical assistance, on such terms and conditions as the Secretary determines to be appropriate, to any firm certified under section 251 for the purpose of assisting such firm in preparing a proposal for its economic adjustment, unless the Secretary determines, after consultation with the firm, that it is able to prepare such a proposal without such assistance. If technical assistance provided to a firm under this paragraph is furnished, pursuant to subsection (c), through any private individual, firm, or institution, the Secretary shall bear, subject to the 90 percent limitation in such subsection (c), that portion of the cost of such assistance which, in the judgment of the Secretary, the firm is unable to pay.".

(2) by striking out "75 percent" in subsection (c) and inserting in lieu thereof "90 percent".

SEC. 203. FINANCIAL ASSISTANCE

(a) Section 254 of the Trade Act of 1974 (19 U.S.C. 2344) is amended by adding at the end thereof the following new subsection:

"(d) With respect to any loan guaranteed under this section, the Secretary may, without regard to section 3679(a) of the Revised Statutes of the United States (31 U.S.C. 665(a)), contract to pay annually, for not more than 10 years, to or on behalf of the borrower an amount sufficient to reduce by up to 4 percentage points the interest paid by such borrower on such guaranteed loan. No payment under this subsection shall result in the interest rate paid by a borrower on any guaranteed loan being less than the rate of interest for a direct loan made under this section.".

(b) The amendment made by subsection (a) shall apply with respect to loans guaranteed under section 254 of the Trade Act of 1974 on or after the date of the enactment of this Act.

SEC. 204. CONDITIONS FOR FINANCIAL ASSISTANCE.

(a) Section 255 of the Trade Act of 1974 (19 U.S.C. 2345) is amended—

(1) by amending subsection (b) by striking out "(1)", and by striking out ", plus" and all that follows thereafter and inserting in lieu thereof a period; and

(2) by amending subsection (h)—

(A) by amending paragraph (1) to read as follows:

"(h)(1) The outstanding aggregate liability of the Government at any time with respect to loans guaranteed under this chapter on behalf of any one firm shall not exceed $5,000,000."; and

(B) by striking out "$1,000,000" in paragraph (2) and inserting in lieu thereof "$3,000,000".

(b)(1) The amendments made by subsection (a)(1) shall apply with respect to direct loans made under section 255 of the Trade Act of 1974 on or after the date of the enactment of this Act.

(2) With respect to any direct loan made under such section 255 before such date of enactment, at the request of the borrower the Secretary of Commerce shall take such action as may be appropriate to adjust the rate of interest on such loan consistent with the amendment made by subsection (a)(1) effective with respect to the outstanding balance of the loan existing on October 31, 1977.

SEC. 205. PROVISIONS OF INFORMATION ON BENEFITS TO FIRMS.

(a) Section 264 of the Trade Act of 1974 (19 U.S.C. 2354) is amended—

(1) by striking out "; ACTION WHERE THERE IS AFFIRMATIVE FINDING" in the section heading thereto; and

(2) by striking out subsection (c) thereof.

(b) Chapter 3 of title II of the Trade Act of 1974 (19 U.S.C. 2341–2354) is amended by adding at the end thereof the following new section:

"SEC. 265. BENEFIT INFORMATION TO FIRMS.

"The Secretary shall provide full information to firms about the technical and financial assistance available under this chapter, and under other Federal programs, which may facilitate the adjustment of such firms to import competition. The Secretary shall provide whatever assistance is necessary to enable firms to prepare petitions for certifications of eligibility.".

(c) The table of contents of the Trade Act of 1974 is amended by striking out

"Sec. 264. Study by Secretary of Commerce when International Trade Commission begins investigation; action where there is affirmative finding."

and inserting in lieu thereof the following:

"Sec. 264 Study by Secretary of Commerce when International Trade Commission begins investigation.

"Sec. 265. Benefit information to firms."

Mr. VANIK (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. Are there amendments to title II?

If not, the Clerk will read.

The Clerk read as follows:

TITLE III—GENERAL PROVISIONS

SEC. 301.

Section 281 of the Trade Act of 1974 (19 U.S.C. 2392) is amended to read as follows:

"SEC. 281. ADJUSTMENT ASSISTANCE COORDINATION.

"(a) There is established an Adjustment Assistance Coordinating Committee to consist of a Deputy Special Trade Representative as Chairman and the officials charged with adjustment assistance responsibilities of the Department of Labor, the Department of Commerce, and the Small Business Administration. It shall be the function of the Adjustment Assistance Coordinating Committee to coordinate the development and review of all policies, studies, and programs of the various agencies involved pertaining to the adjustment assistance of workers, firms, and communities to import competition for the purpose of insuring prompt, efficient, and effective delivery of adjustment assistance available under this title.

"(b) There is established the Commerce-Labor Adjustment Action Committee (hereinafter referred to in this subsection as the 'Committee') the members of which shall be officials charged with economic adjustment responsibilities in the Department of Commerce, the Department of Labor, and any other appropriate Federal agency. The chairmanship of the Committee shall rotate among members representing the Department of Commerce and the Department of Labor. In addition to any other function deemed appropriate by the Secretary of Commerce and the Secretary of Labor, the Committee shall facilitate the coordination between such departments in providing to trade-impacted workers, firms, and communities timely and effective assistance under this title (including, but not limited to, the implementation of sections 225 and 265) and under other appropriate programs admin-

istered by such departments. The Committee shall report quarterly on its activities to the Adjustment Assistance Coordinating Committee.".

SEC. 302. GRANT PROGRAMS AND STUDIES

(a) Chapter 5 of Title II of the Trade Act of 1974 (19 U.S.C. 2391–2271) is amended—

(1) by redesignating section 284 as section 287; and

(2) by inserting immediately after section 283 the following new sections:

"SEC. 284. GRANTS TO LABOR ORGANIZATIONS.

"(a) The Secretary of Labor may make grants to unions, employee associations, or other appropriate organizations for the purpose of enabling such organizations to carry out research on, and the development and evaluation of, issues relating to the design of an effective program of trade adjustment assistance for workers in industries in which significant numbers of the workers have been, or will likely be, certified as eligible for adjustment assistance. Such issues shall include, but not be limited to, the impact of new technologies on workers, the design of new workplace procedures to improve efficiency, the creation of new jobs to replace those eliminated by foreign imports, and worker training and skill development. Any grant made under this section shall be subject to such terms and conditions as the Secretary deems necessary and appropriate. The Secretary of Labor may not expend more than $2,000,000 in any one year for grants under this section.

"(b) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

"SEC. 285. GRANTS TO INDUSTRY ORGANIZATIONS.

"(a) The Secretary of Commerce may make grants, on such terms and conditions as the Secretary of Commerce deems appropriate, for the establishment of industrywide programs for research on, and the development and application of, technology and organizational techniques designed to improve economic efficiency. Eligible recipients may be associations or representative bodies of industries in which a substantial number of firms have been certified as eligible to apply for adjustment assistance under section 251. The Secretary of Commerce may not expend more than $2,000,000 in any one year for grants under this section.

"(b) There are authorized to be appropriated such sums as may be necessary and appropriate to carry out the purposes of this section.

"SEC. 286. INDUSTRY STUDIES BY SECRETARY OF COMMERCE.

"The Secretary of Commerce may conduct studies of those industries actually or potentially threatened by import competition. The purpose of such studies shall include—

"(1) the identification of basic industrywide characteristics contributing to the competitive weakness of domestic firms;

"(2) the analysis of all other considerations affecting the international competitiveness of industries; and

"(3) the formulation of options for assisting trade-impacted industries and member firms, including industrywide initiatives.".

(b) The table of contents of the Trade Act of 1974 is amended—

(1) by striking out

"Sec. 281. Coordination."

and inserting in lieu thereof

"Sec. 281. Adjustment assistance coordination."; and

(2) by striking out

"SEC. 284. Effective date.

and inserting in lieu thereof

"Sec. 284. Grants to labor organizations.

"Sec. 285. Technical assistance grants.

"Sec. 286. Industry studies by Secretary of Commerce.

"Sec. 287. Effective date.".

Mr. VANIK (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. Are there amendments to title III?

If not, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. NATCHER) having assumed the chair, Mr. MCHUGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 11711) to improve the operation of the adjustment assistance programs for workers and firms under the Trade Act of 1974, pursuant to House Resolution 1288, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 261, nays 24, not voting 147, as follows:

[Roll No. 743]

Mr. Beilenson with Mr. Quillen.
Mr. Bonker with Mr. Fraser.
Mr. Harrington with Mr. Ashbrook.
Mrs. Collins of Illinois with Mr. Rinaldo.
Mr. Nolan with Mr. Collins of Texas.
Miss Jordan with Mr. Gary A. Myers.
Mr. Boland with Mr. Duncan of Oregon.
Mr. Minish with Mr. Huckaby.

Mr. GARCIA changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. PIKE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## PERMISSION TO FILE CONFERENCE REPORT ON H.R. 3816, FEDERAL TRADE COMMISSION AMENDMENTS OF 1977

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 3816) to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

CONFERENCE REPORT (H. REPT. No. 95–1557)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3816) to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Trade Commission Amendments of 1978".

PERSONNEL

SEC. 2. (a)(1) The first section of the Federal Trade Commission Act (15 U.S.C. 41) is amended—

(A) in the first sentence thereof, by inserting "(a)(1)" after "That";

(B) by inserting "(b)" before the second paragraph;

(C) in subsection (a)(1) thereof, as so designated in subparagraph (A)—

(i) by inserting after the first sentence thereof the following new sentences: "The President shall nominate persons for the Commission who by reason of training, education, or experience are qualified to carry out the functions of the Commission under this Act. In nominating persons for the Commission, the President shall insure that Commission membership is well balanced, with a broad representation of various talents, backgrounds, occupations, and experience appropriate to the functions of the Commission.";

(ii) by striking out "The Commission shall choose" and all that follows through "membership." and inserting in lieu thereof the following new sentences: "The President shall appoint one of the Commissioners as the Chairman of the Commission. The Chairman shall serve as Chairman at the pleasure of the President.";

(iii) by inserting "profession," after "vocation,"; and

(iv) by inserting after "or malfeasance in office." the following new sentence: "Once appointed, a Commissioner may serve until the conclusion of his term of office without regard to the provisions of section 8335 of title 5, United States Code."; and

(D) in subsection (a) thereof, as so designated in subparagraph (A), by adding at the end thereof the following new paragraph:

"(2) No person who is appointed to a term as a Commissioner after the date of enactment of the Federal Trade Commission Amendments of 1978, no employee of the Commission classified as a GS–16 or higher, and no employee appointed to any position by the Commission under section 2(c) shall, for a period of one year beginning on the last day of service as such Commissioner or employee—

"(A) make any appearance before; or

"(B) make any written or oral communication to;

the Commission, or any Commissioner or employee, on behalf of any person (other than the United States) on any particular matter which is before the Commission, except that the restriction established in this paragraph shall not apply to any matter of an exclusively personal and, individual nature.".

(2) The amendment made in paragraph (1)(D) shall apply to employees of the Commission specified in that amendment beginning on and after the first day of the 13th complete calendar month occurring after the date of the enactment of this Act.

(b) Section 2 of the Federal Trade Commission Act (15 U.S.C. 42) is amended—

(1) by striking out "SEC. 2. That each" and inserting in lieu thereof "SEC. 2. (a) Each";

(2) by inserting, respectively, "(b)", "(e)", "(f)", and "(g)" before the second, third, fourth, and fifth paragraphs thereof; and

(3) by inserting after subsection (b) thereof, as so designated in paragraph (2), the following new subsections:

"(c) In addition to the other authority conferred by this section, the Commission is authorized to establish, assign the duties, and fix the compensation for not more than 25 attorney, economist, special expert, and outside counsel positions. Individuals may be appointed to such positions by the Commission without regard to the provisions of title 5, United States Code, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that such individuals shall be paid at rates not in excess of the maximum rate of basic pay then currently paid for GS–18, but not less than the minimum rate of basic pay then currently paid for GS–16, of the General Schedule under section 5332 of such title.

"(d) The appointment or removal of any officer (other than a Commissioner or the general counsel of the Commission) or employee of the Commission shall not be subject, directly or indirectly, to review or approval by any officer or entity within the Executive Office of the President.".

APPLICATION OF ACT TO SAVINGS AND LOAN INSTITUTIONS

SEC. 3. (a) Section 5(a)(2) of the Federal Trade Commission Act (15 U.S.C. 45(a)(2)) is amended by inserting after "banks," the following: "savings and loan institutions described in section 18(f)(3),".

(b)(1) Section 6(a) of the Federal Trade Commission Act (15 U.S.C. 46(a)) is amended by inserting after "banks" the following: ", savings and loan institutions described in section 18(f)(3),".

(2) Section 6(b) of the Federal Trade Commission Act (15 U.S.C. 46(b)) is amended by inserting after "banks," the following: "savings and loan institutions described in section 18(f)(3),".

(3) The proviso at the end of section 6 of the Federal Trade Commission Act (15 U.S.C. 46) is amended—

(A) by inserting after "banks" the following: ", savings and loan institutions described in section 18(f)(3),"; and

(B) by inserting ", in business as a savings and loan institution," after "banking".

(c)(1) Section 18(f)(1) of the Federal Trade Commission Act (15 U.S.C. 57a(f)(1)) is amended—

(A) in the first sentence thereof—

(i) by inserting "or savings and loan institutions described in paragraph (3)" after "banks" each place it appears therein; and

(ii) by inserting "or (3)" after "(2)";

(B) in the second sentence thereof, by inserting after "System" the following: "(with respect to banks) and the Federal Home Loan Bank Board (with respect to savings and loan institutions described in paragraph (3))"; and

(C) in the last sentence thereof—

(i) by inserting "each" before "such Board" the first place it appears therein;

(ii) by striking out "such Board finds that (A)" and inserting in lieu thereof "(A) either such Board finds that";

(iii) by inserting "or savings and loan institutions described in paragraph (3), as the case may be," after "banks" the first place it appears therein;

(iv) by inserting after "or (B)" the following: "the Board of Governors of the Federal Reserve System finds"; and

(v) by striking out "the Board" and inserting in lieu thereof "such Board".

(2) Section 18(f) of the Federal Trade Commission Act (15 U.S.C. 57a(f)) is amended by redesignating paragraphs (3), (4), and (5) thereof as paragraphs (4), (5), and (6), respectively, and by inserting after paragraph (2) thereof the following new paragraph:

"(3) Compliance with regulations prescribed under this subsection shall be enforced under section 5 of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464) with respect to Federal savings and loan associations, section 407 of the National Housing Act (12 U.S.C. 1730) with respect to insured institutions, and sections 6(i) and 17 of the Federal Home Loan Bank Act (12 U.S.C. 1426(i), 1437) with respect to savings and loan institutions which are members of a Federal Home Loan Bank, by a division of consumer affairs to be established by the Federal Home Loan Bank Board pursuant to the Federal Home Loan Bank Act.".

REVIEW OF CEASE AND DESIST ORDERS

SEC. 4. (a) The first sentence of section 5(c) of the Federal Trade Commission Act (15 U.S.C. 45(c)) is amended to read as follows: "Any person, partnership, or corporation required by an order of the Commission to cease and desist from using any method of competition or any act or practice may obtain a review of such order in the court of appeals of the United States for the circuit within which such person, partnership, or corporation resides or maintains its principal place of business, or in the United States Court of Appeals for the District of Columbia, by filing in the court within 60 days after the date of the service of such order, a written petition praying that the order of the Commission be set aside.".

(b) The amendment made in subsection (a) shall apply only with respect to petitions for judicial review of cease and desist orders served under section 5 of the Federal Trade Commission Act (15 U.S.C. 45) after the date of the enactment of this Act.

EFFECTIVE DATE OF CEASE AND DESIST ORDERS

SEC. 5. (a)(1) Section 5(g) of the Federal Trade Commission Act (15 U.S.C. 45(g)) is amended to read as follows:

"(g)(1) For purposes of this Act (other than section 19(d)), an order of the Commission to cease and desist shall become final upon the expiration of 60 days after such order is served, except as provided in subsections (h), (i), and (j). After an order has become final the Commission may modify it or set it aside as provided in the last sentence of subsection (b). Any such order may be stayed in whole or part, subject to such conditions as may be appropriate, by—

"(A) the Commission;

"(B) an appropriate court of appeals of the United States, if a petition for review of such order is pending in such court and if an application for such a stay was previously submitted to the Commission and the Commission, within the 30-day period beginning on the date the application was received by the Commission, did not grant the application; or

"(C) the Supreme Court, if an applicable petition for certiorari is pending.

"(2) For purposes of section 19(d), such an order shall become final—

"(A) upon the expiration of 60 days after such order is served if no petition for its review is filed in accordance with subsection (c); or

"(B) if such a petition is so filed—

"(i) upon the expiration of the time allowed for filing a petition for certiorari, if the order of the Commission has been affirmed or the petition for review dismissed by a court of appeals of the United States and no petition for certiorari has been duly filed;

"(ii) upon the denial of a petition for certiorari, if the order of the Commission has been affirmed or the petition for review dismissed by a court of appeals of the United States; or

"(iii) upon the expiration of 30 days from the date of issuance of a mandate of the Supreme Court directing that the order of the Commission be affirmed or the petition for review dismissed.".

(2) Section 19(c)(1) of the Federal Trade Commission Act (15 U.S.C. 57b(c)(1)) is amended by striking out "by reason of section 5(g)(1)" and inserting in lieu thereof "under section 5(g)(1) and no petition for its review was filed in accordance with section 5(c)".

(b) The amendments made in subsection (a) shall apply only with respect to cease and desist orders of the Federal Trade Commission served under section 5 of the Federal Trade Commission Act (15 U.S.C. 45) after the date of the enactment of this Act.

ENFORCEMENT OF SUBPOENAS AND ORDERS

SEC. 6. (a)(1) Section 10 of the Federal Trade Commission Act (15 U.S.C. 50) is amended—

(A) by striking out "SEC. 10. That any" and inserting in lieu thereof "SEC. 10. (a) Any";

(B) by inserting, respectively, "(b)", "(c)(1)", and "(f)" before the second, third, and fourth paragraphs;

(C) by striking out the first two sentences of subsection (c)(1), as so designated in subparagraph (B), and inserting in lieu thereof the following: "Except as provided in paragraph (2), if any person, partnership, or corporation fails to comply with any subpoena or order (other than a cease and desist order) issued by the Commission under this Act and if such failure continues for 30 days after service on such person, partnership, or corporation of a notice of such default, such person, partnership, or corporation shall be liable to the United States for a civil penalty of not more than $5,000, as the court may determine, for each day that such failure continues after such 30th day. Such a civil penalty shall be recoverable in a civil suit, by and in the name of the Commission by any of its attorneys designated by it for such purposes, brought in a district court of the United States. If such a civil action is brought against one person, partnership, or corporation, it shall be brought in the district court of the United States within the jurisdiction of which such person, partnership, or corporation resides or transacts business. If such a civil action is brought against two or more persons, partnerships, or corporations, such civil action may be brought in any district court of the United States for a district within which the inquiry of the Commission is being carried on. In determining the amount of such a civil penalty, the court shall take into account the reasonableness and good faith of any action or inaction of such person, partnership, or corporation with respect to which such penalty is being assessed, and such other matters as justice may require. The amount of such civil penalty shall be payable into the Treasury of the United States."; and

(D) by inserting after subsection (c)(1), as so designated in subparagraph (B), the following:

"(2) Any person, partnership, or corporation which has been served with a notice of default issued by the Commission with respect to any subpoena or order referred to in paragraph (1) may apply to an appropriate district court of the United States requesting a stay of the accumulation of penalties under such paragraph for the default with respect to which such notice was served. If, before the expiration of 15 days after such person, partnership, or corporation is served with such notice, such person, partnership, or corporation—

"(A) makes such application; and

"(B) furnishes the court to which such application is made such records, documents, and other materials as may be required for the disposition of the application;

such person, partnership, or corporation shall, notwithstanding paragraph (1), not be liable for such penalties until the expiration of 45 days after service of such notice.

"(d) No court shall have jurisdiction over any action or claim seeking—

"(A) to stay the accumulation of any penalties authorized in subsection (c)(1) for for failure to comply with any subpoena or order referred to in such subsection; or

"(B) to challenge the validity of, or enjoin the enforcement of, any such subpoena or order;

unless the action is brought or the claim is made by a person, partnership, or corporation, or by a member of a joint venture, and a notice of default respecting such subpoena or order has been served upon such person, partnership, corporation, or joint venture.

"(e) No court shall stay the accumulation of penalties for failure to comply with any part of any subpoena or order referred to in subsection (c)(1) unless the party seeking such stay demonstrates that the applicable standards for such stays are satisfied as to such part.".

(2) The amendments made in paragraph (1) shall apply only with respect to failures to comply with a subpoena or order referred to in section 10(c)(1) of the Federal Trade Commission Act (as so designated in paragraph (1)(B) and as amended in paragraph (1)(C)) and issued after the date of the enactment of this Act.

(b) Section 16(a)(2)(D) of the Federal Trade Commission Act (15 U.S.C. 56(a)(2)(D)) is amended to read as follows:

"(D) relating to the enforceability or validity of a subpoena or order (other than a cease and desist order) issued by the Commission;".

(c)(1) Section 9 of the Federal Trade Commission Act (15 U.S.C. 49) is amended—

(A) by striking out "SEC. 9. That for" and inserting in lieu thereof "SEC. 9. (a) For";

(B) by inserting, respectively, "(b)", "(d)", and "(e)" before the second, fifth, and sixth paragraphs; and

(C) by striking out the third and fourth paragraphs and inserting in lieu thereof the following new subsection:

"(c) In case of failure to comply with any provision of a subpoena or of an order (other than a cease and desist order) issued pursuant to this Act, the Commission may invoke the aid of a court of the United States in requiring compliance with such subpoena or order. Any of the district courts of the United States within the jurisdiction of which the inquiry of the Commission is being carried on may, in the case of such refusal to obey, issue an order requiring compliance with such subpoena or order, and any failure to obey such order of the court may be punished by such court as a contempt thereof.".

(2) Section 9(b) of the Federal Trade Commission Act, as so designated in paragraph (1)(B), is amended by striking out the second sentence thereof.

CITIZEN PETITIONS FOR RULEMAKING

SEC. 7. Section 18(b) of the Federal Trade Commission Act (15 U.S.C. 57a(b)) is amended—

(1) by inserting "(1)" after "(b)";

(2) by redesignating paragraphs (1), (2), (3), and (4) as subparagraphs (A), (B), (C), and (D), respectively; and

(3) by adding at the end thereof the following new paragraph:

"(2) If the Commission receives a petition for the issuance, amendment or repeal of a rule described in subsection (a)(1)(B) of this section, the Commission shall either grant or deny the petition within 120 days after the date the petition is received by the Commission. If the Commission grants such a petition, it shall as soon as is practicable after the date the petition is granted, commence a proceeding under this section as requested by the petition. If the Commission denies such a petition, it shall notify the petitioner of the denial and the reasons therefor and shall publish such reasons in the Federal Register.".

STATEMENT OF BASIS AND PURPOSE

SEC. 8. The last sentence of section 18(e)(5)(C) of the Federal Trade Commission Act (15 U.S.C. 57a(e)(5)(C)) is amended to read as follows: "In the review under this subsection of such a rule, the court may not review the contents and adequacy of any statement of basis and purpose required by subsection (b)(4) except as part of a review of the rulemaking record taken as a whole.".

CONGRESSIONAL REVIEW OF RULES

SEC. 9. (a)(1) The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended (A) by redesignating sections 20 and 21 thereof as sections 21 and 22, respectively; and (B) by inserting after section 19 thereof the following new section:

"SEC. 20. (a) For purposes of this section, the term 'rule' means any rule prescribed by the Commission pursuant to section 18(a)(1)(B).

"(b)(1) The Commission shall, after prescribing a final rule, submit such rule to the Congress not later than 90 calendar days before the proposed effective date of such rule. Such rule shall be delivered to each House of the Congress on the same date and to each House of the Congress while it is in session.

"(2) No rule which the Commission is required to submit to the Congress under paragraph (1) shall be effective if, during the period of 90 calendar days of continuous session of the Congress after the date upon which such rule is submitted, there is enacted (with the approval of the President or by the overriding of a veto of the President) a joint resolution disapproving such rule. If such approval by the President occurs after the end of such 90-day period, or if such joint resolution is enacted by overriding a veto of the President after such 90-day period, then such disapproval shall be effective if such joint resolution was adopted by both Houses of the Congress before the end of such 90-day period.

"(3)(A)(i) Each rule submitted to the Congress under paragraph (1) shall be referred to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Interstate and Foreign Commerce of the House of Representatives, respectively. In the case of any rule referred to the Committee on Interstate and Foreign Commerce of the House under this clause, not later than the 5th day of session following the day on which such rule is submitted, a joint resolution shall be introduced (by request) in the House by the chairman of such committee or by a member or members designated by such chairman.

"(ii) A joint resolution with respect to a rule shall be referred to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Interstate and Foreign Commerce of the House of Representatives, respectively, and all joint resolutions with respect to the same rule shall be referred to such committees, by the President of the Senate or the Speaker of the House of Representatives, as the case may be. In the case of a joint resolution referred to the Committee on Interstate and Foreign Commerce of the House under this clause, such committee shall make its recommendations to the House of Representatives during the period of 45 calendar days of continuous session of the Congress following the date upon which such joint resolution is introduced.

"(B) If the Committee on Interstate and Foreign Commerce has not reported a joint resolution introduced under subparagraph (A)(i) (or, in the absence of such a joint resolution, the first joint resolution with respect to the same rule) at the end of the period of 75 calendar days of continuous session of the Congress after submission of the rule by the Commission, such committee shall be deemed to be discharged from further consideration of such joint resolution and such joint resolution shall be placed on the appropriate calendar of the House.

"(C)(i) When the Committee on Interstate and Foreign Commerce has reported, or has been deemed to be discharged (under subparagraph (B)) from further consideration of, a joint resolution with respect to a rule, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) for any Member of the House to move to proceed to the consideration of the joint resolution. The motion is highly privileged and is not debatable. The motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the joint resolution is agreed to, the joint resolution shall remain the unfinished business of the House until disposed of.

"(ii) Debate on the joint resolution, and on all debatable motions and appeals in connection with such joint resolution, shall be limited to not more than 2 hours, which shall be divided equally between individuals favoring and individuals opposing the joint resolution. A motion to further limit debate is in order and is not debatable. An amendment to, or a motion to postpone, a motion to proceed to the consideration of other business, or a motion to recommit the joint resolution is not in order. A motion to reconsider the vote by which the joint resolution is agreed to or disagreed to shall not be in order.

"(iii) Immediately following the conclusion of the debate on the joint resolution, and a single quorum call at the conclusion of the debate if requested in accordance with rules of the House, the vote on final approval of the joint resolution shall occur.

"(iv) If, before passage by the House of a joint resolution of the House, the House receives a joint resolution with respect to the same rule from the Senate, then—

"(I) the procedure in the House shall be the same as if no such joint resolution has been received from the Senate; but

"(II) the vote on final passage shall be on the joint resolution of the Senate.

"(4) For purposes of this subsection, the term 'joint resolution' means a joint resolution of either House of the Congress, the matter after the resolving clause of which is as follows: 'That the Congress hereby disapproves the rule submitted by the Federal Trade Commission to the Congress on , 19 .' (The blank space shall be filled with the appropriate date.)

"(5) For purposes of this subsection, continuity of session is broken only by an adjournment sine die. If continuity of session is broken after the submission of a rule by the Commission, the Commission shall be required to resubmit such rule at the beginning of the next regular session of the Congress and the time period specified in paragraph (2) shall begin on the date of such resubmission.

"(6) This subsection shall not apply in any case in which the Commission for good cause finds (and incorporates the finding and a brief statement of reasons for such finding in the rule prescribed) that emergency conditions exist requiring the immediate effect of the rule to avoid imminent harm to persons or property or to the public interest.

"(c)(1) To the extent practicable and appropriate, the Chairman of the Commission shall submit with each rule submitted to each House of the Congress under this section—

"(A) a paperwork impact analysis, for such rule, containing—

"(i) an estimate of the numbers of, and a description of the classes of, persons who would be required to file reports, maintain records, and fulfill any of the information-gathering requirements under such rule;

"(ii) an estimate of the nature and amount of the information required to be filed in such reports, the frequency of such reports, the nature and number of records that would have to be kept by such persons, and the amount of time such persons would require, and the costs which would be incurred, to keep such records and make such reports; and

"(iii) a description of steps being taken by the Commission to insure that there is no unnecessary duplication in recordkeeping and report filing resulting from the issuance of such rule;

"(B) a judicial impact analysis showing the probable consequences of such rule on the operation, workload, and efficiency of the Federal courts, including an analysis of the cost impact on and benefits to court administration, changes in judicial procedures, effects on jurisdiction, and demands on court personnel; and

"(C) such other explanatory and sup-

porting statements and materials as the Commission determines necessary and appropriate for congressional consideration of such rule.

"(2)(A) Except as provided in subparagraph (B), no material submitted to the Congress by the Chairman of the Commission under this subsection shall be subject to any judicial review, including any judicial review to determine whether such material is sufficient to comply with the requirements of this subsection. In the event the Commission finds that it is impractical or inappropriate to submit the information required under subparagraphs (A) and (B) of paragraph (1), the Commission shall submit a statement as to why it cannot so comply.

"(B) If any material submitted to the Congress by the Chairman of the Commission under this subsection also is included in any rulemaking record of the Commission, any determination regarding whether such material is subject to judicial review in connection with any review of such rulemaking record shall not be affected by the submission of such material to the Congress under this subsection.".

(2) The amendments made in paragraph (1) shall apply to any rule of the Federal Trade Commission which has not become final before the date of the enactment of this Act.

(b)(1) For purposes of this subsection—

(A) the term "Commission" means the Federal Trade Commission;

(B) the term "rule" means—

(i) any trade regulation rule prescribed by the Commission under section 6(g) of the Federal Trade Commission Act (15 U.S.C. 46(g)); and

(ii) any rule prescribed by the Commission under section 18(a)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 57a(a)(1)(B)); and

(C) the term "rulemaking record" has the meaning given it in section 18(e)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 57a(e)(1)(B)).

(2) Within 18 months after the date of the enactment of this Act, the Commission shall conduct a study of all the rules which the Commission has issued and which are in effect on the date of the enactment of this Act. At the end of such 18-month period, the Chairman of the Commission shall submit a report to the Congress. The report shall, to the extent practicable and appropriate—

(A) recommend the deletion of particular rules and portions of rules, including reasons for such recommendation; and

(B) recommend the initiation of appropriate rulemaking proceedings under the Federal Trade Commission Act (15 U.S.C. 41 et seq.) to make changes or modifications in particular rules or portions of rules.

(3) In any case in which the Commission proposes to delete any rule or portion of a rule during the 18-month period specified in paragraph (2), the Commission shall notify each House of the Congress of such proposal at the time such proposal is published in the Federal Register.

(4)(A) To the extent practicable and appropriate, the Chairman of the Commission shall include in the report submitted to the Congress under this subsection, for each rule which the Commission has issued and which is in effect on the date of the enactment of this Act—

(i) an economic impact analysis which takes into account, for such rule, the cost impact on and benefits to consumers and affected businesses (with particular attention to small businesses);

(ii) a paperwork impact analysis containing—

(I) an estimate of the numbers of, and a description of the classes of, persons who are required to file reports, maintain records, and fulfill any of the information-gathering requirements under such rule;

(II) an estimate of the nature and amount of the information required to be filed in such reports, the frequency of such reports, the nature and number of records that are kept by such persons, and the amount of time such persons would require, and the costs which would be incurred, to keep such records and make such reports; and

(III) a description of steps being taken by the Commission to insure that there is no unnecessary duplication in recordkeeping and report filing resulting from such rule;

(iii) a judicial impact analysis showing the effect of such rule on the operation, workload, and efficiency of the Federal courts, including an analysis of the cost impact on and benefits to court administration, changes in judicial procedure, effects on jurisdiction, and demands on court personnel; and

(iv) such other explanatory and supporting statements and materials as the Commission determines necessary and appropriate for congressional consideration of such report.

(B)(i) Except as provided in clause (ii), no material submitted to the Congress by the Chairman of the Commission under this paragraph shall be subject to any judicial review, including any judicial review to determine whether such material is sufficient to comply with the requirements of this paragraph. In the event the Chairman of the Commission finds that it is impractical or inappropriate to submit the information required under clauses (i) through (iii) of subparagraph (A), the Chairman of the Commission shall submit a statement as to why he cannot so comply.

(ii) If any material submitted to the Congress by the Chairman of the Commission under this paragraph also is included in any rulemaking record of the Commission, any determination regarding whether such material is subject to judicial review in connection with any review of such rulemaking record shall not be affected by the submission of such material to the Congress under this paragraph.

(5) The Committee on Commerce, Science, and Transportation of the Senate and the Committee on Interstate and Foreign Commerce of the House of Representatives shall, in the exercise of their oversight responsibilities, examine, study, and take other appropriate action with respect to the report submitted to the Congress under this subsection and referred to such committees.

AUTHORIZATION OF APPROPRIATIONS

SEC. 10. Section 21 of the Federal Trade Commission Act, as so redesignated in section 9(a)(1), is amended—

(1) by striking out "and" after "1976;" and

(2) by striking out "1977. For fiscal years ending after 1977, there may be appropriated to carry out such functions, powers, and duties, only such sums as the Congress may hereafter authorize by law," and inserting in lieu thereof "1977; not to exceed $65,000,000 for the fiscal year ending on September 30, 1978; not to exceed $70,000,000 for the fiscal year ending on September 30, 1979; not to exceed $75,000,000 for the fiscal year ending on September 30, 1980; and not to exceed $80,000,000 for the fiscal year ending on September 30, 1981.".

TECHNICAL AND MISCELLANEOUS AMENDMENTS

SEC. 11. (a)(1) Section 5(m)(1)(A) and section 5(m)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 45(m)(1)(A); 45(m)(1)(B)) are each amended by adding at the end thereof the following new sentence: "In such actions, the district courts of the United States are empowered to grant mandatory injunctions and such other and further equitable relief as they deem appropriate.".

(2) Section 6 of the Federal Trade Commission Act (15 U.S.C. 46) is amended by inserting after paragraph (h) the following new paragraph:

"(i) To accept gifts and voluntary and uncompensated services, notwithstanding the provisions of section 3679 of the Revised Statutes (31 U.S.C. 665(b)).".

(3)(A) Section 9(a) of the Federal Trade Commission Act, as so designated and as amended in section 6(c)(1)(A), is further amended—

(i) by inserting after "For the purposes of this Act" the following: ", or any other provision of law enforced by the Commission,"; and

(ii) by inserting "or other physical" after "documentary" each place it appears therein.

(B) Section 9(b) of the Federal Trade Commission Act, as so designated in section 6(c)(1)(B) and as amended in section 6(c)(2), is further amended by inserting "or other physical" after "documentary".

(C) The last sentence of section 9(d) of the Federal Trade Commission Act, as so designated in section 6(c)(1)(B), is amended by inserting "or other physical" after "documentary" each place it appears therein.

(D) The fourth sentence of section 5(b) of the Federal Trade Commission Act (15 U.S.C. 45(b)) and the third sentence of section 9(d) of such Act, as so designated in section 6(c)(1)(B), are amended by inserting after "writing" the following: ", or shall be recorded through the use of any electronic or mechanical recording device,".

(4)(A) Section 19(a)(1) of the Federal Trade Commission Act (15 U.S.C. 57b(a)(1)) is amended to read as follows:

"(a)(1) If any person, partnership, or corporation violates—

"(A) any rule under this Act respecting unfair or deceptive acts or practices (other than an interpretive rule, or a rule violation of which the Commission has provided is not an unfair or deceptive act or practice in violation of section 5(a)); or

"(B) any final cease and desist order issued by the Commission which is applicable to such person, partnership, or corporation; then the Commission may commence a civil action against such person, partnership, or corporation for relief under subsection (b) in a district court of the United States or in any court of competent jurisdiction of a State.".

(B) Section 19(d) of the Federal Trade Commission Act (15 U.S.C. 57b(d)) is amended—

(i) by striking out "subsection (a)(1)" and inserting in lieu thereof "subsection (a)(1)(A)";

(ii) by inserting before "or the unfair or deceptive act or practice to which" the following: "the cease and desist order violation to which an action under subsection (a)(1)(B) relates,"; and

(iii) by inserting "(as prescribed by section 5(g)(2))" after "has become final".

(b)(1) Section 5 of the Wool Products Labeling Act of 1939 (15 U.S.C. 68c) is amended by striking out "violating" in second paragraph and inserting in lieu thereof "wool".

(2) Section 9(b)(1) of the Fur Products Labeling Act (15 U.S.C. 69g(b)(1)) is amended by striking out "violating" and inserting in lieu thereof "violating".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3816) to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SUMMARY OF CONFERENCE ACTION

Briefly, in contrast to the previous conference report (Report No. 95-892), the conferees struck in its entirety the "equitable relief" section, which would have allowed the Federal Trade Commission (hereinafter in this statement referred to as the "Commission") to go to court to seek equitable relief (including the appointment of a trustee) in order to preserve a firm's assets for possible consumer redress if a law violation was found. The conferees also adopted a compromise which provides for a veto of a Commission rule by adoption of a joint resolution, subject to a Presidential veto (which could be overridden by the Congress), within a 90-day period before such rule could go into effect. Otherwise the conference report is substantially the same as the previous conference report, in providing for authorizations for fiscal years 1979, 1980, and 1981, and in containing a number of provisions designed to expedite the enforcement of Commission cease and desist orders and compulsory process orders.

QUALIFICATIONS OF MEMBERS

*House bill.*—The House bill contained no provision with respect to qualifications of members for service on the Commission.

*Senate amendment.*—The Senate amendment required the President to nominate persons for the Commission who are qualified by training, education, or experience to carry out the functions of the Commission. In addition, the amendment required the President to insure that the Commission is balanced with respect to the talents, backgrounds, occupations, and experience of the members nominated and appointed.

*Conference substitute.*—The conference substitute is the same as the Senate provision.

APPOINTMENT OF THE CHAIRMAN

*House bill.*—The House bill contained no provision with respect to the appointment of the Chairman of the Commission.

*Senate amendment.*—The Senate amendment provided for Senate confirmation of one of the Commissioners as Chairman of the Commission. It also codified existing law that the President appoints one of the Commissioners as Chairman and that the Chairman serves at the pleasure of the President. See section 3 of Reorganization Plan No. 8 of 1950, effective May 24, 1950, 15 F.R. 3175, 64 Stat. 1264.

*Conference substitute.*—The conference substitute does not contain any provision requiring Senate confirmation of one of the Commissioners as Chairman. The substitute does, however, adopt the Senate provision codifying existing law that the President appoints one of the Commissioners as Chairman and that the Chairman serves at the pleasure of the President.

AVOIDANCE OF CONFLICT OF INTEREST

*House bill.*—The House bill contained no provision with respect to avoidance of conflict of interest.

*Senate amendment.*—The Senate amendment contained two provisions designed to avoid both any conflict of interest or the appearance of a conflict of interest. First, it provided that no member of the Commission nor any employee classified as a GS-16 or higher shall, during the two years after leaving the Commission, represent anyone in any formal or informal proceeding before the Commission, or make any written or oral communication on behalf of any person with intent to influence the action of the Commission in connection with any proceeding involving a specific party which was under his official responsibility as a member or employee. Second, it contained a complete ban on former members or employees classified as GS-16 or higher making any appearance or communication with the intent to influence the action of any Commissioner or employee on any matter being considered by the Commission (including investigations, rules, and complaints) for one year after leaving the Commission.

*Conference substitute.*—The conference substitute adopts the Senate provision which prohibits former Commissioners and high-level staff members from making appearances or communications with the Commission, any Commissioner, or any employee of the Commission for a period of one year after such persons leave service with the Commission. The conferees intend the ban to apply to all matters of business, whether new or old, which are before the agency during that year. Thus, such persons would be prohibited from petitioning the Commission for the initiation of a rulemaking proceeding and from making any appearance or communication in connection with a Commission investigation, adjudication, rulemaking proceeding, or any other substantive matter.

However, the ban does not include contact concerning matters of an exclusively personal and individual nature. For example, a former Commissioner or employee covered by these provisions could appear before or contact the Commission on a personnel matter, a Freedom of Information request, a Privacy Act matter, a pension matter, or any other matter which relates to a personal right of the former employee.

The restriction also does not apply where such a person is representing the United States, as would be the case if he or she were to be employed by another department or agency of the Federal Government or to be reemployed by the Commission itself as either an employee or a consultant. Finally, the ban is not intended to apply where the former official, solely at the initiation of the Commission, is contacted for information or required to appear and give testimony. Otherwise, the prohibition does apply to self-representation.

The conferees dropped the two-year restriction concerning matters under the former Commissioner's or employee's official responsibility because they believed that this matter is adequately addressed by the provisions of section 207 of title 18, United States Code, and the Commission's own rules, which both prohibit such activities by *all* former employees, regardless of their grade, for one year.

NUMBER OF TOP LEVEL EMPLOYEES

*House bill.*—The House bill contained no provision with respect to the number of employees the Commission may employ at the supergrade level.

*Senate amendment.*—The Senate amendment provided for 25 positions at the Commission to be paid at the rates prescribed for supergrade positions.

*Conference substitute.*—The conference substitute adopts the Senate provision.

The Commission is currently authorized only 42 employees at the supergrade level, of whom 13 are administrative law judges. The following comparison of the ratio of Commission supergrade attorneys to attorney staffs in other organizations shows that the Commission has a worse ratio than other similar Federal agencies:

Antitrust, Justice, 1:17.
Justice Department, 1:19.
Securities and Exchange Commission, 1:19.
Federal Communications Commission, 1:20.
Federal Trade Commission, 1:22.

Further, the 29 supergrades at the Commission who are not administrative law judges are all in managerial positions. As a result, the Commission has no position or salary incentive beyond the GS-15 level to offer outstanding personnel who do not wish to become managers. Even with recent salary increases, the limitation on salaries at the GS-15 level for experienced litigators and other talented, specialized personnel makes retention of the best staff members a difficult task.

Similarly, the Commission has no incentives to offer experienced individuals who may wish to offer their services to the Commission for a limited period of time.

The substitute will enable the Commission to offer the necessary incentives to experienced litigators, senior economists, and other senior specialists who are not in management positions. While the substitute would permit the Commission to fill some or all of these positions from the outside, the conferees wish that it be understood that the principal purpose of the provision is to offer salary incentives to talented line personnel before using the new positions for short-term recruitment.

EXECUTIVE BRANCH POLITICAL CLEARANCE

*House bill.*—The House bill contained no provision with respect to political clearance of Commission personnel.

*Senate amendment.*—The Senate amendment provided that there would be no executive branch political clearance of any Commission employee.

*Conference substitute.*—The conference substitute is essentially the same as the Senate amendment, except that the position of general counsel of the Commission is not included. The intention of the substitute is to prohibit any executive branch political clearance of any employee classified as Schedule "C" or as a noncareer executive assignment.

APPLICATION OF ACT TO SAVINGS AND LOAN INSTITUTIONS

*House bill.*—The House bill exempted savings and loan institutions from the Commission's section 5 jurisdiction with respect to unfair methods of competition and unfair or deceptive acts or practices. An exemption also was accorded such institutions from the Commission's section 6 authority to compile information, conduct investigations and require the filing of reports. However, savings and loan institutions were still required to provide information and reports when the Commission investigation involved a person or entity not engaged in or only incidentally engaged in business as a savings and loan institution. In addition, the House bill amended section 18 of the Federal Trade Commission Act to require the Federal Home Loan Bank Board to establish a separate division of consumers affairs to act upon complaints regarding unfair or deceptive

acts or practices. The Board was further required to prescribe regulations defining unfair or deceptive acts or practices and to adopt Commission rules on such matters unless it finds that such acts or practices are not unfair or deceptive with respect to savings and loan institutions.

*Senate amendment.*—The Senate amendment exempted savings and loan institutions from the Commission's section 5 jurisdiction only to the extent that the Board is authorized to prohibit such acts or practices covered by section 5. No exemption from the Commission's section 6 authority was included. Section 18 of the Federal Trade Commission Act was amended to impose requirements upon, and provide authorities to, the Board similar to those under the House bill.

*Conference substitute.*—The conference substitute adopts the House provision. The conferees stress that the substitute is to operate prospectively. It is not the intention of the conferees to interfere wtih any further litigation in the case of *In re Perpetual Federal Savings and Loan Association*, FTC Docket No. 9083 (1978).

ENFORCEMENT OF SUBPOENAS AND ORDERS

*House bill.*—The House bill made several amendments to section 10 of the Federal Trade Commission Act, relating to the assessment of civil penalties for failure to comply with a Commission order to file annual or special economic or business reports. First, it made the penalty provisions applicable to all Commission orders (other than cease and desist orders), including subpoenas. Second, it raised the amount of penalties for failure to comply with a Commission subpoena or order (other than a cease and desist order) from a mandatory $100 per day to a range of from $0 to $5,000 per day. The amendment provided that in determining the amount of any such penalties, the court must take into account the reasonableness and good faith of any action or inaction of the person, partnership, or corporation against whom the penalties are being assessed, and such other matters as justice may require.

Third, the House bill modified the time frame regarding when civil penalties for noncompliance with Commission subpoenas or orders (other than cease and desist orders) would begin to accrue. Under present law, in such situations of noncompliance, penalties begin to accrue 30 days after the Commission issues a notice of default signaling its intention to seek civil penalties for noncompliance, unless the resisting company is able to secure a stay of penalties within that time. The House bill provided that penalties would begin to accrue after 30 days only if a company did not file for a stay of penalties within 15 days after the notice of default was served. If the noncomplying party filed with the court for a stay of penalties within 15 days and provided the court with all the necessary information to decide the stay petition, then penalties would not begin to accrue until 60 days after service of the notice of default, assuming that the noncomplying party failed to obtain a stay.

Fourth, the House bill prohibited any challenges to Commission subpoenas and orders (other than cease and desist orders) until the Commission issued a notice of default signaling its intent to seek penalties.

Fifth, the House bill provided that penalties for noncompliance would accrue as to any part of a Commission subpoena or order (other than a cease and desist order) with which a party failed to comply if a stay of penalties has not been obtained as to that part of such subpoena or order.

Sixth, the House bill authorized the Commission to bring suit against a noncomplying company for civil penalties in any district court within which the noncomplying company resides or does business.

Finally, the House bill provided that the amendments made by this section would apply with respect to failures to comply with a subpoena or order (other than a cease and desist order) that is issued after the date of enactment of the House bill.

*Senate amendment.*—The Senate amendment was the same as the House bill with the following exceptions—

(1) it omitted any reference to a defendant's reasonableness and good faith in determining the level of any civil penalties;

(2) it retained existing law with respect to when penalties begin to accrue after issuance of a notice of default, that is, 30 days thereafter;

(3) it authorized the Commission to bring suit for civil penalties against a single noncomplying company where that company resides or transacts business but if the suit were against two or more companies, the Senate amendment authorized the Commission to bring suit in any district court in which the inquiry of the Commission is being carried on;

(4) it set standards for when a court could refrain from enforcing any subpoena or order (other than a cease and desist order) of the Commission; and

(5) it provided that the amendments made by this section of the Senate amendment would apply with respect to failures to comply with a subpoena or order (other than a cease and desist order) insofar as they occur or continue after the date of enactment of the Senate amendment.

*Conference substitute.*—The conference substitute adopts the House provisions except in the following two respects: (1) it adopts the Senate provision on venue for civil penalties, that is, that the Commission can bring suit against a single company where that company resides or transacts business and against two or more companies in any district court where the inquiry of the Commission is being carried on; and (2) it provides that penalties will begin to accrue 30 days after a notice of default issues unless a company files all the necessary papers in seeking a stay of such penalties within 15 days after the notice of default is served. In that case, penalties will not begin to accrue until 45 days after service of the notice.

VENUE FOR ENFORCEMENT OF SUBPOENAS AND ORDERS

*House bill.*—The House bill provided that venue for a Commission suit to enforce a subpoena or order (other than a cease and desist order) would be proper in any district in which the Commission's inquiry is being carried on.

The House bill amended section 9 of the Federal Trade Commission Act, under which enforcement venue is bifurcated. Where the Commission seeks to enforce a subpoena, it may bring suit in a district where the inquiry is being carried on, which has been held to include the place where the Commission or the regional office of the Commission issuing the subpoena is located, and the place where the subpoena is returnable. The place where the documents sought by a subpoena are located may also be such a place. See, e.g., *FTC* v. *Browning*, 435 F.2d 96 (D.C. Cir. 1970); *FTC* v. *Cockrell*, 431 F. Supp. 558 (D.D.C. 1977); and *FTC* v. *Sherry*, CCH 1969 Trade Cas. section 72906 (D.D.C. 1969). Perhaps the best statement as to what constitutes a "place of inquiry" is found in *FTC* v. *MacArthur*, 532 F.2d 1135, 1140 (7th Cir. 1976): "The test whether the Commission is undertaking an inquiry in a particular place is whether that place and the activities there bear a reasonable relation to the subject matter of the investigation. Factors such as the convenience of the Commission, the location documents, and witnesses, and the corporate headquarters are relevant in determining whether there is an inquiry in a particular judicial district when the only action taken by the Commission is a request for information. As in other areas, the Commission's choice of place of inquiry is subject to the bounds of reasonableness."

On the other hand, in the case of enforcement of an order (such as an order to file a report or an access order), the Commission must proceed by writ of mandamus. No venue is specified for this proceeding, which is subject to the general provisions regarding venue and personal jurisdiction applicable to regular civil actions involving private parties. Particularly in cases in which the Commission is suing for enforcement of identical orders against a number of persons, partnerships, or corporations, the strict venue requirements may make it difficult or impossible to proceed in any single forum against all parties.

*Senate amendment.*—The Senate amendment likewise updated and streamlined the venue for enforcement of compulsory process, but included a requirement that, if there is only one person, partnership, or corporation involved, the Commission may maintain its suit only where the defendant resides or transacts business.

*Conference substitute.*—The conference substitute adopts the House provision. The conferees feel that there was no evidence that the Commission was abusing its authority in the case of the single recipient of a subpoena or order by bringing suit in an inconvenient forum. It therefore appeared unnecessary to provide additional restrictions on the process.

CITIZEN PETITIONS FOR RULEMAKING

*House bill.*—The House bill gave a specific right to petition the Commission for the issuance, amendment, or repeal of a rule under section 18(a)(1)(B) of the Federal Trade Commission Act. It required that the Commission respond to such a petition within 120 days of its receipt. If the Commission granted the petition, it was required to commence the requested proceeding as soon as practicable thereafter. If it denied the petition, it was required to so notify the petitioner, giving its reasons and publishing those reasons in the Federal Register.

*Senate amendment.*—The Senate amendment granted the same right of petition and required Commission response in the same time and manner. However, the right of petition encompassed not only section 18(a)(1)(B) rules but also any other rule and any order or regulation issued under any of the Acts the Commission administers.

Further, the Senate amendment, in cases of Commission inaction on or denial of a petition, granted the petitioner a right to sue to force the granting of the petition. If the petitioner, by a preponderance of the evidence in the material he had submitted to the Commission, met the standards set out in the section regarding appropriateness and need for the action, the court would be required to order the initiation of the requested Commission proceeding.

*Conference substitute.*—The conference substitute adopts the House provision.

STATEMENT OF BASIS AND PURPOSE

*House bill.*—The House bill amended section 18 of the Act with respect to court review of rulemaking proceedings under that section. The existing provisions of section 18 are open to the interpretation that the courts could not review a Commission failure to consider the factors specified by section 18(d)(1) for inclusion in a statement of basis and purpose issued pursuant to section 18(b)(4). Under the amendment, the court could consider the entire statement of basis and purpose as part of the rulemaking record in determining whether the Commission's action in promulgating the rule satisfies the judicial review standard specified by section 18. No separate review of the sufficiency or content of the statement of basis

and purpose was permitted. This review of the statement of basis and purpose would apply with respect to all rules where the rulemaking record has not been closed prior to the date of enactment of this Act.

*Senate amendment.*—The Senate amendment contained no comparable provision.

*Conference substitute.*—The conference substitute adopts the House provision.

CONGRESSIONAL REVIEW OF RULES

*House bill.*—The House bill provided that a Commission rule would not go into effect if a concurrent resolution disapproving such a rule were adopted within 90 calendar days of continuous session after the rule's issuance. Alternatively, the section provided for disapproval of a rule if one House adopted a concurrent resolution within 60 days and the other House failed to disapprove that resolution within 30 days thereafter.

*Senate amendment.*—The Senate amendment contained no directly comparable provision. However, section 102 contained a broad provision aimed at some of the same concerns for increased knowledge and control over Commission activities. It requires the Commission, within 660 days from the date of enactment of the Senate amendment, to prepare and submit to the Congress first an initial proposal and then a final recodification of all its rules. Each proposal was, to the extent practicable and appropriate, to include recommendations for transfer, consolidation, modification, and deletion of particular rules, as well as proposals for changes in structure, organization, language, etc., necessary to make the rules more up to date and easily understood. The recodification also would have included a comprehensive index of the rules.

The initial and final recodification proposals, to the extent practicable and appropriate, would include for each rule or class of rules an economic impact analysis, a paperwork impact analysis, a judicial impact analysis, and any other explanatory or supporting statements the Commission determined necessary and appropriate.

The term "rule" under the Senate amendment was broadly defined to include substantive statements of policy of general applicability and future effect, and also procedural rules and organizational rules of the Commission.

*Conference substitute.*—The substitute incorporates elements of each of the provisions. Thus, it establishes a procedure whereby Commission rules can be vetoed as well as a procedure for review of existing Commission rules in order to eliminate outdated ones and simplify those rules that are still appropriate.

The House bill provided a procedural mechanism for vetoing a Commission rule but had no requirement that the Commission provide the Congress with information concerning the potential impact of the rule on the paperwork of persons who would be affected by the rule and the potential impact on the Federal judiciary. Nor did the House provision deal with rules already in effect.

The Senate amendment, on the other hand, was designed to require the Commission to study all its past rules with a view of modernizing, simplifying, and codifying them. The relevant congressional committees would be involved in the review process in the exercise of their oversight responsibility. The Senate amendment, however, made no provision for expedited congressional consideration of Commission rules.

The conference substitute first seeks to strike a compromise between the strong House position in favor of the legislative veto and the strong Senate position in opposition to such a provision. The House position was expressed in the 272–139 vote on October 13, 1977, in favor of a motion to include a legislative veto provision in H.R. 3816. It was once again expressed in the 255–146 vote on February 28, 1978, to reject the first conference report on H.R. 3816. The floor debate in the House revealed that the vote reflected opposition to the fact that the conference report did not include a legislative veto provision and to the fact that it did include a provision which specifically would have allowed the Commission to go to court to seek equitable relief, including the appointment of a trustee, in order to preserve a firm's assets for possible consumer redress if a law violation was found. In this conference, the equitable relief section was struck in its entirety.

On the other hand, Senate opposition to the legislative veto was expressed in a 65–29 vote on July 20, 1978, against inclusion of a similar provision in the HUD authorization bill. While the HUD vote related to an executive agency and not an independent regulatory agency and while it was on a one House veto provision, the point was forcefully made by the Senate conferees that these are distinctions that are not meaningful to the Senate. In addition, a letter dated August 14, 1978, from the chairman and the ranking minority member of the Senate Government Affairs Committee confirmed this view, stating that,

"Volume 2 of our committee's 'Study on Federal Regulation' considered the matter (of legislative veto). In that regard, we concluded that 'Congress should reject an across-the-board use of the legislative veto for regulatory agency rules,' and that Congress 'refrain from routinely adding a legislative veto provision to regulatory agency statutes'. Thus, in our opinion, rules and regulations of the Federal Trade Commission should not be subject to 'legislative veto' by the Congress."

The compromise provision provides for expedited consideration by the Congress of a joint resolution of disapproval of any Commission Magnuson-Moss trade regulation rule.

Specifically, each proposed rule would be submitted to the Congress 90 calendar days prior to its effective date. Thereafter, the following expedited procedures would apply in the House. Within 5 days of the transmittal, a joint resolution would be introduced (by request) by the chairman of the House Interstate and Foreign Commerce Committee. The committee would then have 45 calendar days of continuous session (broken only by adjournment sine die) to make its recommendations to the House. If the committee had not reported such joint resolution at the end of the period of 75 calendar days of continuous session, the committee would be deemed to be discharged from further consideration and the joint resolution would be placed on the appropriate House calendar.

After a joint resolution was either reported by the committee or deemed to be discharged, it would be in order for any Member of the House to move to proceed to the consideration of the joint resolution. The motion would be highly privileged and not debatable nor subject to amendment, a motion to postpone, or a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion was agreed to or disagreed to would not be in order.

If a motion to consider the joint resolution were adopted, two hours of general debate would be permitted on the resolution. Motions to amend, to postpone, to proceed to consideration of other business or to recommit the resolution would not be in order, nor would a motion to reconsider the vote on the joint resolution.

The conferees did not change the Senate procedures because Senate rules already permit expedited consideration of such a resolution of disapproval. Senate rules provide that a single Senator may move at any time to discharge a Senate committee from further consideration of a joint resolution, whereas the rules of the House provide that a motion to discharge is in order only if a majority of the Members of the House have signed a discharge petition. Thus, the conferees are confident that Commission rules will receive the close scrutiny of both Houses of the Congress.

If a joint resolution is approved by both Houses in the 90-day period, the proposed Commission rule would not take effect, unless the President vetoed the joint resolution. In that case, the rule would take effect unless the Congress overturned the President's veto.

The conferees adopted the approach of a joint resolution as the only compromise that was available to them in light of the strong House and Senate positions that run in opposite directions. Since the one House veto (or one House without disapproval of the disapproval resolution by the other House) was not acceptable to both Houses, the conferees felt that the only constitutionally permissible option was a two House veto with Presidential signature. While some present laws do authorize the Congress to reject a rule by concurrence of both Houses, such provisions have never been considered by the Supreme Court and the conferees believe that they clearly violate section 7 of article I of the Constitution, which provides that,

"Every order, resolution or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the rules and limitations prescribed in the case of a bill."

To assist the Congress in reviewing rules on an informed basis, the conference substitute requires the Commission to file with each rule, in addition to the economic impact analysis already required by existing law, paperwork and judicial impact analyses and other necessary and appropriate explanatory materials.

The conference substitute also adopts a Senate-passed requirement that the Commission study and make recommendations regarding each of its trade regulation rules already in effect. Those recommendations are to include a report where practicable and appropriate on the economic, paperwork, and judicial impact of each rule proposed to be retained, deleted, or modified. The economic impact analysis will take into account the cost impact on, and benefits to, consumers and affected businesses, particularly small businesses. The paperwork impact analysis will include study of the number and classes of persons subject to the paperwork requirements of the rule, as well as an analysis of the nature, amount, and frequency of paperwork required, and of the Commission's effort to minimize burdens and unnecessary duplication. The judicial impact analysis will show the effect of the rule on the courts.

In sum, the substitute reflects the view that the Congress should have an opportunity for expedited review of Commission rules before they take effect and that existing Commission rules should be reviewed, and modified and simplified where appropriate.

GRANTING OF EQUITABLE RELIEF

*House bill.*—The House bill contained no provision with respect to the granting of equitable relief.

*Senate amendment.*—The Senate amendment authorized the Commission to go to court to seek equitable relief when the Commission had reason to believe (1) that any person, partnership, or corporation is violating any provision of law enforced by the Commission; and (2) that, for the purpose of preserving the assets of the person, partnership, or corporation for consumer redress,

the granting of equitable relief is necessary pending the issuance of a complaint by the Commission and until such complaint is dismissed by the Commission or set aside by the court on review, or until the order of the Commission has become final.

*Conference substitute.*—The conference substitute contains no provision with respect to the granting of equitable relief.

AUTHORIZATION OF APPROPRIATIONS

*House bill.*—The House bill authorized to be appropriated $63,000,000 for fiscal year 1978, and $70,000,000 for fiscal year 1979.

*Senate amendment.*—The Senate amendment authorized to be appropriated $65,000,000 for fiscal year 1978; $70,000,000 for fiscal year 1979; $75,000,000 for fiscal year 1980; and $80,000,000 for fiscal year 1981.

*Conference substitute.*—The conference substitute adopts the Senate amendment.

JOINT SUBMISSION OF BUDGET REQUESTS

*House bill.*—The House bill contained no provision with respect to joint submission of budget information.

*Senate amendment.*—The Senate amendment would have required the Commission to submit a copy of any budget information it transmits to the President or the Office of Management and Budget to the Congress at the same time.

*Conference substitute.*—The conference substitute does not contain the Senate provision. The conferees felt that this issue should not be handled on an agency-by-agency basis.

CONCURRENT SUBMISSION OF LEGISLATIVE RECOMMENDATIONS, TESTIMONY, OR COMMENTS

*House bill.*—The House bill contained no provision with respect to concurrent submission of legislative recommendations, testimony, or comments.

*Senate amendment.*—The Senate amendment provided that the Commission would be required to submit any legislative recommendations, testimony, or comments on legislation to the Congress at the same time it was submitted to the President or the Office of Management and Budget. In addition, the amendment provided that no officer or agency of the United States shall have any authority to require the Commission to submit such comments for approval prior to submission of the comments to the Congress.

*Conference substitute.*—The conference substitute contains no provision with respect to concurrent submission of legislative recommendations, testimony, or comments. The conferees felt that this was an issue that should not be handled on an agency-by-agency basis.

CONGRESSIONAL ACCESS TO INFORMATION

*House bill.*—The House bill contained no provision with respect to congressional access to information collected by the Commission.

*Senate amendment.*—The Senate amendment provided that whenever an authorizing committee of the Congress made a written request to the Commission for documents, the Commission must supply such documents within 10 days, or submit a statement as to why the Commission cannot comply. Further, the amendment provided that submissions of information under this provision would not have constituted an offense under section 1905 of title 18, United States Code.

*Conference substitute.*—The conference substitute does not contain a provision with respect to congressional access to Commission information. The conferees felt that Congress' right to secure information from the Commission was clear.

AUTHORITY OF THE COMMISSION TO REPRESENT ITSELF IN COURT TO SEEK CIVIL PENALTIES

*House bill.*—The House bill contained no provision authorizing the Commission to represent itself in court to seek civil penalties for violations of Commission rules and cease and desist orders.

*Senate amendment.*—The Senate amendment provided that the Commission could represent itself in court to seek civil penalties for violations of Commission rules and cease and desist orders.

*Conference substitute.*—The conference substitute does not contain a provision with respect to Commission self-representation to seek civil penalties for violations of Commission rules and cease and desist orders.

CONSUMER PRODUCT SAFETY COMMISSION AMENDMENTS

*House bill.*—The House bill contained no provisions amending the Consumer Product Safety Act.

*Senate amendment.*—The Senate amendment contained numerous amendments to the Consumer Product Safety Act.

*Conference substitute.*—The conference substitute contains no provisions amending the Consumer Product Safety Act.

## LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I have requested this time for the purpose of inquiring of the acting majority leader, the gentleman from California (Mr. DANIELSON), the program for the balance of today, if any, and for next week.

Mr. DANIELSON. Mr. Speaker, would the gentleman yield?

Mr. MICHEL. I will be happy to yield.

Mr. DANIELSON. Mr. Speaker, in response to the inquiry of the gentleman from Illinois (Mr. MICHEL) the program for the rest of today is that we have concluded our legislative calendar and propose to adjourn as soon as the closing comments have been made.

The program for next week is as follows:

On Monday, September 11, 1978, the House will meet at 12 o'clock noon.

There will be no suspensions.

We will take up H.R. 11280, the Civil Service Reform Act and carry it through to completion.

Following that we have scheduled the District of Columbia Calendar with seven bills, as follows:

H.R. 13224, transfer U.S. real property to District of Columbia Redevelopment Land Agency.

H.R. 12116, home rule charter amendments.

S. 3120, enlarge contracting authority of Commission on Financial Oversight.

H.R. 13243, revenue bonds for HFA.

H.R. 10311, District of Columbia Redevelopment Act amendments.

S. 1103, District of Columbia Reciprocal Tax Collection Act, and

S. 2556, rename District of Columbia Bail Agency.

Following that we have scheduled H.R. 11622, fuels transportation safety amendments with an open rule and 1 hour of general debate,

Plus H.R. 8729, Airport and Aircraft Noise Reduction Act, under a modified open rule with 2 hours of general debate.

On Tuesday, September 12, 1978, the House will meet at 12 o'clock noon and there will be eight suspensions. Votes on all suspensions will be postponed until the end of the suspensions.

The suspensions are as follows:

H.R. 12860, Rhode Island Indian land claims settlements.

H.R. 13311, ports and waterways safety amendments.

H.R. 12026, Indian Peaks Wilderness Area.

H.R. 12578, Miscellaneous Revenue Act of 1978.

H.R. 12165, extend duty suspension on waste and scrap metals.

H.R. 5265, temporary duty suspension on fluorspar.

A House resolution—which as yet has not been numbered—concurring in Senate amendments to H.R. 1337.

And H.R. 13331, United States Code amendments for Federal district courts.

These are to be followed by H.R. 12005, Justice Department authorizations under an open rule with 1 hour of debate, and,

H.R. 9214, International Monetary Fund, a motion to go to conference.

On Wednesday, Thursday, and Friday, the House will meet at 10 o'clock a.m. We have calendared the following items:

First, a conference report on House Concurrent Resolution 683, the second budget resolution.

Next, House Resolution 1276, funding for the Committee on Assassinations.

Then an as yet unnumbered House resolution, Executive Reorganization Plan No. 3.

After that we will take up the following:

H.R. 12611, Air Service Improvement Act of 1978, under an open rule, with 1 hour of debate;

H.R. 11733, Surface Transportation Assistance Act of 1978, under a modified open rule, with 2 hours of debate;

H.R. 1, Ethics in Government Act, under a modified open rule, with 2 hours of general debate; and

H.R. 12452, CETA amendments, on which we will complete consideration.

The House will adjourn by 9 p.m. on Tuesday, by 7 p.m. on Thursday, and by 3 p m. on Friday.

Conference reports may be brought up at any time, and any further program will be announced later.

Mr. MICHEL. Mr. Speaker, I thank the acting majority leader for his response.

I believe he would share my view that in view of our having the Civil Service Reform Act on the calendar until completed on Monday, with the balance of whatever there is on that bill, then with those District bills and the other two bills being scheduled for Monday, Members should be prepared to be here until a very late hour on Monday.

Mr. DANIELSON. I think that that would be a prudent attitude to take with respect to Monday.

Mr. MICHEL. Then, too, might I inquire in view of our hopefully drawing toward the end of the session, with only eight bills on suspension scheduled for Tuesday, while that is a good order of business, is the leadership planning to take up a considerable number of suspensions for the following Monday, September 18?

Mr. DANIELSON. The gentleman's surmise is correct. On Monday, the 18th day of September, there are at least 25 suspensions which are scheduled to be put on the calendar. The leadership is mindful of the fact that there are many suspensions and will make every effort to take care of them.

Mr. MICHEL. I think it is good that we have this particular dialog so that Members will be especially aware of that in making their weekend plans for the weekend after next, so as to be sure to be back here on the following Monday for fear of losing a chance to vote on some 25 suspensions.

Mr. DANIELSON. I think that is an excellent suggestion.

Mr. MICHEL. Mr. Speaker, I thank the gentleman. If he has nothing further to contribute to the program, I will be glad to relinquish my time.

Mr. DANIELSON. Mr. Speaker, I thank the gentleman for yielding.

## DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday of next week.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

## ADJOURNMENT TO MONDAY, SEPTEMBER 11, 1978

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

## DANGERS OF NITRITE BAN

(Mr. LEACH asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LEACH. Mr. Speaker, as a Representative from one of the largest pork-producing districts in the country, I would like to inform the House that I have today introduced legislation to spur research on nitrite substitutes and to mandate the Department of Agriculture to conduct further studies into the effects of nitrites on animals other than one strain of laboratory rats.

This legislation is designed to complement the bills introduced by Congressmen WAMPLER and MATHIS to prevent the disruption of consumer buying patterns and excessive losses to producers which would be the result of a precipitous nitrite ban.

Mr. Speaker, it would appear unreasonable to consider a ban on the use of nitrites when there is no meaningful effort underway by the USDA or the Food and Drug Administration to develop an effective and safe alternative.

There may be a need to develop alternative preservatives for meat, fish and poultry products. But what should be expected from the USDA is low-key scholarly research and prudent corrective measures rather than the high profile of public confrontation over how to insure the high quality of food products we take for granted in the United States.

In 1958 American cranberry growers lost a major portion of their market due to a mistaken cancer scare. There is no need for our pork producers to suffer the same consequences without any element of assistance from the Department of Agriculture, the primary Federal department charged with assisting farmers to profitably produce and market their products.

A product in use for hundreds of years should not be banned simply on the basis of one research project which fed rats 1,500 times as much nitrite on the average as humans ordinarily obtain from cured meats. In order to ingest a comparable amount of nitrite a person would have to eat 586 pounds of cured meat every day. Moreover, there is substantial evidence to indicate that nitrites consumed in food represent only a trivial percentage of the nitrites naturally manufactured and ingested into the human body.

Mr. Speaker, I urge the House to give early consideration to this issue. Livestock producers, especially pork producers, see the possibility of a lifetime investment of time and labor jeopardized by a bureaucracy unsympathetic to their concerns.

## THE PROBLEM OF DISCRIMINATORY DISTRICTING

(Mr. HANLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANLEY. Mr. Speaker, we have in this country a practice popularly known as political gerrymandering which, for nearly 200 years, has hindered the concept of fair and effective representation within congressional districts.

I am sure that you are well aware of what the gerrymander has done—and is capable of doing—as an instrument of partisan political profiteering. This discriminatory districting which operates unfairly to inflate the political strength of one group and deflate that of another, disrupts entire cities, towns and communities of interest for the sole purpose of creating and maintaining a political power base within a State.

Although it runs in direct opposition to the principles upon which our republic was founded, gerrymandering remains within the boundaries of the law. It is sad to say that we, as a legislative body, have done absolutely nothing to bring this unfortunate practice to an end.

Some progress in this area, however, has been made. The "one-man, one-vote" Supreme Court decisions of the mid-1960's, in addition to the many judicial breakthroughs in the early 1970's have taken great strides toward the creation of fair and effective political representation on the congressional level.

At the present time, all State constitutions contain some type of provision regarding redistricting and apportionment. Most State constitutions require the legislature to reapportion on a basis of population following each Federal decennial census, while many of them also explicitly provide for district compactness and contiguity.

Although the courts have entered this political thicket, and many State constitutions now contain redistricting provisions, the standards are usually too vague and unenforceable to amount to any substantial change.

The gerrymander's scalpel has not been deterred from successfully dissecting congressional districts. As a result, State legislatures are given the green light to perform their handiwork with virtually no opposition.

Congress is the only legislative body in the United States which exercises no influence over its own districting and the time has certainly come for us to constructively influence the manner in which the States conduct this process. Fair and effective representation is not a privilege which is determined through the whims and fancies of State legislators—it is a constitutional right. Gerrymandering is an evil practice and Congress, having the power and responsibility, ought to eliminate it.

I am introducing today a bill, which is designed to lessen the opportunity for such gerrymandering to take place. The proposed law will take districting power away from the State legislatures and give it to bipartisan commissions in the various States, which will be required to hold open hearings, assimilate public input and publicize their final plan to allow for citizens input and challenge.

In cases where States prove incapable of coming up with a workable and constitutional scheme, the U.S. district courts shall order the commission to set up a new plan within 60 days. Only in this way can we eliminate the possibility of a partisan court decision in this apportionment process.

An additional safeguard against making districting a political football would be the provision limiting this redistricting process to one per census. These commissions would be required to follow guidelines in their work, such as maintaining the integrity of political subdivisions to the greatest extent possible, making districts compact, keeping within general numerical requirements and taking into account the fair representation of minority groups.

The track record of some State legislatures in dealing with this matter is not good. Past performances prove that some

are incapable of creating fair and constructive plans for redistricting and are willing to place personal gain ahead of democratic principles.

It is time to put away the toys of gerrymandering. It is time to stop playing the manipulative games of old politics in a smoke-filled room. We must now enter into an era where fair and effective representation is no longer a meaningless phrase but a political reality.

This bill is not the complete answer. We will not establish a redistricting utopia through the passage of this bill, but I feel that sound reform is desperately needed, and my bill will go a long way toward eliminating this worthless and undemocratic practice.

## AMENDMENT TO LAND AND WATER CONSERVATION FUND ACT

(Mr. RONCALIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RONCALIO. Mr. Speaker, since the land and water conservation fund was authorized in 1964, the program has grown in popularity and use. More than $1.7 billion has been made available to States and local governmental units to acquire and develop open space, parks, and outdoor recreation areas throughout the country.

In 1976, Public Law 94–422 amended the Land and Water Conservation Fund Act to, among other things, provide for the sheltering and enclosure of ice skating rinks and swimming pools.

Although the 1976 amendment is conceptually helpful in extending the use of the land and water conservation funds for sheltering outdoor recreation facilities, in terms of application, it is hardly helpful.

Even though Congress recognized that there was a need to extend public use of certain outdoor recreation facilities which receive limited use, because of climatic conditions, outdoor recreation still receives primary consideration in the alloctaion of funds. Because the thrust of the program is outdoor recreation, the use of funds for sheltering is very limited.

The amendment allowed assistance to be provided for the sheltering or enclosure of swimming pools and ice skating rinks in areas of the country that suffer from severe climatic conditions. The conference report also states that the sheltering or enclosure would be limited to Northern tier areas of the country which are subject to extreme cold, heavy snow, or high wind conditions. In addition, eligible States were limited to using up to 10 percent of their yearly allocation for sheltering.

I am, therefore, introducing a bill today to permit States to shelter or enclose, at their own expense, any outdoor recreation facility previously or hereafter developed with moneys from the land and water conservation fund.

Early in the spring of 1977, the Heritage Conservation and Recreation Service issued proposed guidelines to implement sheltering provisions; and the comments on the proposals clearly indicated the problems with the existing law. The problems can be summarized as follows:

The requirement that eligible areas be defined by climatic conditions does not recognize the reality of political and jurisdictional boundaries. Many States and possibly some counties would be divided because of slight variations in average temperatures and snowfall.

The limitation to northern tier areas of the country imposed by the Conference Committee Report discounts factors which limit public use of outdoor recreation facilities in other areas of the country. Excessive rainfall, cool summer temperatures, sand and dust, hot weather, and extreme temperature fluctuations are factors which to one degree or another affect virtually every area of the Nation. These conditions limit the public use of many outdoor recreation facilities and, in some cases, can prevent certain activities from being offered at all. Ice skating, for example, can't be provided in an outdoor setting in our southern States.

Limiting the use of Fund assistance to 10 percent of a State's yearly allocation places many States in untenable positions. For States that do not receive extremely large allocations, this limitation creates more problems than it may solve. For example, there have been States which have had to turn down many otherwise excellent proposals because funding was insufficient. In other States, the sheltering proposals may require the State's funding limit for several years. The Fund is not sufficient to meet existing needs.

Swimming pools and ice skating rinks are not the only outdoor recreation facilities which are affected. Tennis, basketball, and other court games can be provided only during certain months of the year. In some cases, simple shelters can shade the facilities from severe sun or a screen can provide protection from strong winds or dust conditions. In all cases, however, our citizens are not getting their full dollar value from facilities which may lay idle for many months out of the year.

People with physical handicaps, youngsters, senior citizens, and others with medical disabilities are most affected by climate conditions.

The bill which I am introducing today would help alleviate the problems by—

First. All outdoor recreation facilities eligible for Land and Water Conservation Fund Assistance could be sheltered or enclosed. Eligibility would no longer be limited to sheltering of swimming pools and ice skating rinks.

Second. Sheltering or enclosure could be undertaken in any area of the country. The northern tier qualifications and cold climatic criteria would be eliminated. thus recognizing types and degree of climatic conditions that affect outdoor recreational activities.

Third. Sheltering or enclosure would be undertaken without assistance from the fund. therefore, not affecting the Federal budget.

These changes are realistic. practical, and would be instrumental in extending the use of recreational facilities to a broader range of individuals. for a longer period of time throughout the year.

## THE CETA PROGRAM—IT'S WORKING

(Mr. CHARLES H. WILSON of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

● Mr. CHARLES H. WILSON of California. Mr. Speaker, a few weeks ago, the House of Representatives considered, but did not conclude work on legislation extending the life of the Comprehensive Employment and Training Act (CETA).

Frankly, I am concerned that some of the amendments adopted during that initial debate will diminish the effectiveness of this important program. Recently, I received a very constructive and positive statement of support for extending CETA from the mayor of Redondo Beach, Calif., the Honorable Dave Hayward.

My colleagues who have questions as to whether CETA is accomplishing its objectives—training and putting people to work—should invest a few minutes in reading Mayor Hayward's letter.

I think the record of this California city is sound evidence to the Congress that the CETA program works, and that its life should be extended.

AUGUST 23, 1978.

Hon. CHARLES WILSON,
*U.S. Congress,*
*Lawndale, Calif.*

DEAR CONGRESSMAN WILSON: In recent months we have become aware of the controversy in Congress over reenactment of the Comprehensive Employment and Training Act (CETA). Cities across the nation have been criticized for their misuse and outright abuse of CETA funds and attention to the negative aspects has caused some elected officials to actually support elimination of certain CETA programs.

While it is clear that there have been instances of abuse, we feel that there have been far more positive affects of CETA, and would like to share with you some of those benefits in our Community.

Approximately one year ago numerous projects were begun under title VI of CETA in which long-term, low income residents were employed for 12 months.

Project goals including providing training to participants so that they would have greatly improved chances of finding unsubsidized work after CETA, and accomplishment of specific improvements throughout the Community. We believe that both goals have been achieved. Not only are participants given training in specific areas, but they are encouraged to take advantage of City CETA policies allowing job related education and verified interviews or tests for unsubsidized jobs during their working hours. Numerous projects have been completed by the City, the school districts and community based organizations throughout Redondo Beach CETA.

In the City, projects included: a concrete project in which sidewalks, curbs and crossgutters were repaired throughout the City as well as installation of handicap ramps in over 40 intersections; a sewer lateral replacement and cleanout project in which sewer laterals which had been almost totally clogged by roots of Magnolia trees in the North of the City were replaced on 751 homes. In addition, over 150 miles of sewer lines were cleaned; landscaping projects in which new landscaping and sprinkler systems were installed in several parks, parkettes, parkways and intersections. Erosion control as well as repair of vandalized planters throughout the City were included in the project and the affect on the aesthetics of the City has been enormous. The South Bay Union High School District has completed extensive landscaping and sprinkler installation at all three high schools and their painting project has enormously improved interiors and exteriors of schools, as well as stadium fences, bleachers and gymnasiums.

The elementary school district has utilized CETA employees to transfer pupil records to microfilm, and create Conservation, Ecology and Multiculture education curriculum packages. South Bay Children's Health Center, an organization which provides no cost dental and psychological health services to children, was able to completely refurbish their facilities and as a result provide better service to more children. The Director, Frank Masi, cannot say enough about the benefits of CETA.

Importantly, none of these projects would have been completed without CETA. Local funds were in no way substituted with federal funds. These projects would simply not have been accomplished.

Naturally, there have been some difficulties, but they have to do with training individuals who are part of the hard core unemployed. Working with such individuals is not an easy task, but the City and school districts have tried very hard to offer productive opportunity to all CETA participants who are, after all, our own residents. The projects mentioned are only a sample of CETA benefits under titles II and VI over the last year.

CETA titles I and II also offer unique opportunities of training and job placement for economically disadvantaged residents of Redondo, Hermosa and Manhattan Beaches. An On-the-Job Training program with TRW, the areas largest private employer, has resulted in over 90 percent placement, and a new training program in micro-electronic assembly through TRW will result in $5–$6 per hour placement wages in a high demand occupation. Other training offered through title I includes EKG Technician, clerical, welding, and auto mechanics and past placement rates have all exceeded 70 percent.

A new and very innovative program funded technicial training to long term unemployed under title III offers non-commercial video technician training to long term unemployed youth (18–21). In this program private sector consultants to Sony Corporation helped to create and implement an outstanding program.

Needless to say, with so many positive programs in our Community funded through CETA, it is extremely distressing to realize that those funds and the manner in which they may be used are in jeopardy.

Please consider our successes as you make decisions on CETA Reenactment. CETA has worked well in Redondo Beach and we are very anxious for it to continue.

Sincerely,

DAVID K. HAYWARD,
*Mayor.*●

## INTERNATIONAL LITERACY DAY FOCUSES NEED FOR WORLDWIDE ACTION

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. McCLORY. Mr. Speaker, in observance of International Literacy Day, it is important that we pause to note that there are literally 800 million adult persons around the world who are incapable of either reading or writing.

While the major problem of illiteracy exists in the underdeveloped or developing countries, it is important for us to recall that in our own Nation and other developed nations the problem of illiteracy is increasing.

An observance is taking place today in the State Department auditorium in recognition of International Literacy Day and I had hoped to attend this ceremony with other Members of Congress. Indeed, it had been my expectation to deliver remarks today at the Interparliamentary Union Conference taking place at this very time in Bonn, Germany.

Mr. Speaker, you were most gracious to appoint me as a delegate to this important conference; but, as my colleagues will understand, it has been incumbent for me to remain here for the legislative business which has taken place on the floor of this Chamber this week. However, I had prepared remarks to be delivered at the IPU meeting. These remarks, in my opinion, represent a significant statement in behalf of our Nation as we view the problem of illiteracy around the world from this vantage point of economic, social, and cultural development.

Mr. Speaker, I hope that all of my colleagues will join me today in directing their thoughts toward the problem of international illiteracy and will recognize that the ability to read and write are basic essentials to virtually every social, cultural, and spiritual advantage which is afforded to the human species.

Mr. Speaker, the title of the subject being discussed in Bonn, Germany, at the IPU Conference is "The Increase in Illiteracy as a Threat to World Development and as a Basic Cause of Poverty, Hunger, Disease, and Human Misery." My prepared remarks on this subject are attached for the benefit of my colleagues and of all who view the report of our proceedings in this Chamber today:

[Interparliamentary Union, 65th Conference, Bonn, Federal Republic of Germany, Sept. 3–14, 1978]

THE INCREASE IN ILLITERACY AS A THREAT TO WORLD DEVELOPMENT AND AS A BASIC CAUSE OF POVERTY, HUNGER, DISEASE AND HUMAN MISERY

Mr. Chairman, and fellow parliamentarians: today, September 8, has been proclaimed throughout the world as World Literacy Day. So I would like to take this opportunity to speak for a few moments on a problem of pressing urgency in all the nations of the world . . . illiteracy.

The continuing fight against illiteracy is important in industrialized societies just as it is in societies which have not yet attained a high standard of living. It is important to the productivity and the GNP of industrialized nations to have a high rate of literacy just as it is in the developing nations of the world. Recent studies and programs in some of the industrialized nations indicate that the ideal literacy rate has not been reached, despite generations of compulsory education. In my own country, despite a very high literacy rate for many years, information regularly comes to light of a hidden functional illiteracy, which means an inability to read well enough to function in an industriaized society. Much more pressing are the needs in developing countries which have fewer resources to devote to the eradication of illiteracy.

Few would argue that literacy is not an essential part of the developmental process. Governments have recognized the problem for years, and many have devoted considerable energy and expenditures to literacy programs, as well as to industrialization and other facets of economic development. On the surface, the problem appears to be gradually disappearing. In 1950, the world-wide illiteracy rate was 44 percent. Now it is estimated to be only 34 percent. But this impressive drop in the percentage of illiterates in the world does not reflect the tremendous growth in the world population during the same 28 years, from 1.6 billion in 1950 to an estimated 4 billion plus today. These figures mean that the actual number of illiterate adults in the world has increased from 700 million in 1950 to over 758 million today. And with population growth outstripping the abilities of developing nations to increase educational facilities, the number of children reaching adulthood without any formal schooling is also increasing.

Between 1954 and 1975, UNESCO attempted to help solve this problem of illiteracy with an intensive project involving 11 Third World countries. The Experimental World Literacy Program was aimed at halting the worsening situation with regard to illiteracy in the world . . . and changing the direction of the upward curve in the number of illiterate people. The program demonstrated the many difficulties in fighting illiteracy. All the money allocated for the programs was not spent. Responsibility for the literacy programs was scattered through many bureaucracies. Some of the governments did not give adequate support to the programs. Some pupils had to drop out to earn a living. In some countries with more than one language, the language used in the program was not the language spoken by a large segment of the people.

But the Experimental World Literacy Program was successful in some ways. It called attention throughout the world to the problems of illiteracy, and indeed kindled an increasing interest and effort among governments to attack the problems of illiteracy. It provided a large quantity of material resources which might not have been developed if the program had not taken place, and it demonstrated on a large scale several methods of literacy training. It taught the educators involved that literacy must be achieved by flexible programs, geared to the students, the society in which they live, and their needs. The Program had an important effect on education, especially in those countries directly involved. Adult education courses were added to the curriculums of teacher education programs. Follow-up programs to help the newly literate maintain their new skills were developed in some countries, including newspapers geared to new readers and the establishment of libraries and literacy centers.

The Program also showed that literacy must be tied to overall development, that the development of a nation creates both the need and the desire for literacy, and that since learning to read and write is a difficult task which requires highly motivated students, motivation is essential to the success of literacy programs. Literacy training alone cannot succeed. The UNESCO evaluation of the literacy program urged (1) that future literacy programs must "link literacy work with overall concerted action for development" including social changes as well as economic growth, and (2) that the function of literacy training must be interpreted in its widest sense to include improving the cultural, social and political situation of the student as well as the occupational and economic situation.

Literacy can provide a lubricant to ease a nation toward development. Literate people are more open to change . . . less hampered by traditional mores which may need to be changed in order to improve the economic situation. Literacy facilitates communication between sectors of the society. As the Population Reference Bureau stated in its study, *Literacy and World Population*,

"Literacy is perhaps the most important single way station to social and economic development, opening for the individual the door to innovative ideas, options, and actions and releasing him from only the known and traditional."

Nevertheless, the problems of the UNESCO literacy program, and other programs, have resulted in a certain amount of discouragement among educational experts and govern-

ments. We must guard against this discouragement and against any slackening of effort on the part of the nations or international agencies. There is compelling evidence that when a government gives a literacy program top priority, the program can succeed. Tanzania reduced its illiteracy rate from 67 percent to 39 percent in four years despite its status as one of the world's least-developed countries. Brazil's official statistics report that the illiteracy rate in that country has dropped from 36 percent to 18.7 percent since 1970. Iran has also been successful in substantially reducing the number of illiterates in its society.

The United States Congress has identified the reduction of illiteracy as one of the purposes of the foreign assistance program and in response the Agency for International Development has increased the amount of bilateral economic aid devoted to first level education programs, which include literacy.

Both the World Bank and UNESCO have announced substantial new programs to provide funds for literacy programs. For, while the problem of illiteracy is a universal one, it is most acute in the developing nations. Here illiteracy compounds and exacerbates every other manifestaton of underdevelopment, and adds to the sum total of human misery. Although the developing nations have less to spend on education, it is also true that many have not given education the highest priority. It is still true that developing nations as a whole spend more public revenue on military forces than on both education and health combined. And it has been pointed out in a survey of 140 nations that the top twenty nations in terms of expenditures for military purposes include several countries which rank very low in spending on health and education and equally low in their literacy rate.

The significance of the high rates of illiteracy in developing countries become clearer upon examining statistics showing who the illiterates are. The Population Reference Bureau points out that of all adult illiterates, most live in rural areas and most are women. An average of 80 percent of women in the developing countries are illiterate, and in some of the least developed, the percentage is virtually 100. This figure is especially disturbing since statistics have shown that educated mothers, even those with only a few years of schooling, tend to have fewer children and also are less likely to keep their children home from school to work. Equally tragic are the UNESCO figures on children between the ages of 6 and 11. Currently, more than half of these children in the developing countries are not in school, and if present trends continue, by 1985 less than 30 percent of the children in the least developed countries will be attending school, thus adding eventually to the number of adult illiterates.

The Interparliamentary Union has been intimately involved in the study of illiteracy and in the development of plans and programs aimed at the reduction of illiteracy in the world.

In light of all of these facts, this body has wisely reported a draft resolution supporting the right of all people to be literate, and acknowledging the unmistakable connection between literacy and social and economic progress. This resolution calls upon parliaments to bring about national awareness of the importance of literacy and to urge their respective governments to give high priority to literacy training, especially for women. I wholeheartedly support this resolution, and I urge its adoption by the membership.

I commend the Interparliamentary Union officers and delegates for designating an appropriate portion of time during this Conference for observing International Literacy Day . . . and for recognizing the significance of this day throughout the world.

## CALIFORNIA HOMEOWNERS BEWARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the savings and loan industry in California is playing both sides of an issue to its benefit and the victim of the maneuverings is the California homeowner.

The game is being played with a new mortgage instrument called a variable rate mortgage—a mortgage in which interest rates fluctuate to reflect changes in the money supply.

Mr. Speaker, interest rates on home mortgages are at the highest rate ever recorded by the Federal Home Loan Bank Board. Leading the pack in high interest rates is California, where interest rates topped 10 percent this year. It is virtually impossible to acquire a home loan with an interest rate under 10 percent in the State of California.

But, suddenly, prospective homeowners are seeing that the two largest savings and loan institutions in California are offering variable rate mortgages at 9¾-percent interest. The conventional, fixed rate mortgages are still offered at 10-percent interest.

But, on the other side of the street, over 100,000 California residents will experience increases in the interest rates on their variable rate mortgages—as much as one-quarter of a percentage point rise.

The predictions from California are that interest rates will rise in October on most home mortgages made with a variable rate since 1975, and an excess of 100,000 California homeowners will be affected.

What will this rise in the interest rate mean to a California homeowner holding a variable rate mortgage? On a $60,000 home made at a 9-percent rate of interest in 1975, it means at least a 2-year extension on their mortgage. It means an additional 2 years of monthly payments for these thousands of homeowners. And there was no assurance that interest rates will not rise on variable rate mortgages again in 1978.

Mr. Speaker, as the thousands of homeowners holding these mortgages realize their plight, countless other consumers are being lured into a similar fate by the one-quarter percentage point differential the savings and loan institutions are offering on a new home mortgage made with a variable rate.

The variable rate mortgage is the most controversial of several new loan plans springing up across the country that are referred to as alternative mortgage instruments. The interest rate on variable rate mortgage are designed to reflect changes in the money supply. In other words, the homeowner signs a 30-year mortgage with the agreement that his interest rates are subject to change, with a maximum allowance of a 2½-percent rise in the rate. So, the amount of future payments are always an uncertainty.

The variable rate mortgage is not confined to California, although it is the only State in which the mortgage instrument has been tested on a wide-scale basis. In addition to California, there are 16 States which currently allow State-chartered savings and loan associations to offer the loan plan.

Over the past few years, there has been tremendous pressure generated from the savings and loan industry for a greater availability of VRM's. Specifically, the industry seeks congressional approval to offer VRM's in Federal savings and loan associations across the country. Short of this, proponents maintain that VRM's should be offered in the States where State-chartered institutions offer the loan plan.

The Federal Home Loan Bank Board issued proposals for variable rate mortgages in 1975. Both Houses of Congress moved to prohibit the issuance of these regulations by wide margins. Yet, still the industry pushed for variable rate mortgages in Federal associations.

On June 28, despite serious objections from consumer groups, members of the housing industry and organized labor, the full Committee on Banking, Finance, and Urban Affairs narrowly approved an amendment to the Financial Institutions Regulatory Reform Act of 1978 which allows Federal savings and loans to offer VRM's in States which allow State institutions to do so. I vigorously opposed this amendment in committee. I repeated my concern in a statement of additional views to the committee report of the Financial Institutions Regulatory Reform Act. And as we near consideration of the Reform Act, I feel compelled to bring this issue, again, to the attention of my colleagues in the House.

The increases that California residents will soon face in their mortgage payments indicates the primary problem with VRM's—the inflationary burden posed to consumers. Homeowners are already at the mercy of rising property taxes, rising utility costs, and an inflation rate that will top 8 percent this year. The monthly mortgage payment has always been a set figure to pay each month—however, high, at least the figure was set and known to the homeowner. With the variable rate mortgage, these payments could easily climb right out of the homeowners budget, because of rises in the interest rate.

I find it particularly ironic that California homeowners will be so gravely affected by this mortgage instrument. I need not remind my colleagues of the passage of proposition 13 this summer. Consumers are sick and tired of the rules being changed in the middle of the game. To approve the issuance of VRM proposals is to completely ignore the mandate of the people.●

## LEGISLATION TO CONTINUE AND REAFFIRM THE FEDERAL COMMITMENT TO A NATIONAL CAPITAL TRANSPORTATION SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

● Mr. HARRIS. Mr. Speaker, today I am introducing legislation entitled the National Capital Transportation Amendments of 1978. My colleagues Mr. FISHER,

Mr. DIGGS, Mr. FAUNTROY, Mr. STEERS, Mr. MCKINNEY, and Mrs. SPELLMAN join me in cosponsorship.

Although this legislation is written specifically to amend the National Capital Transportation Act of 1969, it is in fact a continuation and reaffirmation of a Federal commitment that officially began nearly 20 years ago. The title to the National Capital Transportation Act of 1969 reads in part as follows:

The Congress finds that an improved transportation system for the National Capital region is essential for the continued and effective performance of the functions of the government of the United States, for the welfare of the District of Columbia, for the orderly growth and development of the National Capital region, and for the preservation of the beauty and dignity of the Nation's Capital. . . . The Congress therefore declares that it is the continuing policy and responsibility of the federal government, in cooperation with state and local governments of the National Capital region, to encourage and aid in the planning and development of a unified and coordinated transportation system for the National Capital region.

In keeping with that commitment, this legislation addresses the three major challenges faced today by the Washington Metropolitan Area Transit Authority:

First. Reaffirmation of the long-standing Federal Government financial commitment to complete a total Metro transit system in the Nation's Capital;

Second. Establishment of a method for the orderly retirement of bonds issued by the Washington Metropolitan Area Transit Authority; and

Third. Creation of an ongoing Federal participation in operating costs to reflect the special Federal benefits accruing from the Metro system.

The Washington Metropolitan Area Transit Authority (WMATA) recently released a "proposed financial plan for completion and operation of the public transportation system for the national capital area." This plan, which was developed at the request of the Urban Mass Transportation Administration (UMTA) and the Department of Transportation, presents two alternative methods to reach the stated objective. This legislation is designed to implement the alternative plan endorsed by the WMATA board. It calls for a continuation of the special Federal relationship that created Metro in the beginning. It calls upon the Federal Government to meet the obligations of a partnership entered into over 20 years ago with the local governments of the Washington metropolitan area.

It calls for a 101-mile Metro system to be completed and fully operational by 1985 at a savings of $200 million over the other financial approach proposed.

A 101-mile Metro system has been supported by an alternatives analysis recently conducted by one of this Nation's leading consulting firms. That 18-month analysis concluded that a 101-mile system was not just the best thing for regional transportation goals, but was the best thing for the total development of the Washington metropolitan region.

A 101-mile Metro system has also recently won the support of the Department of Transportation and the Urban Mass Transportation Administration.

That 101-mile Metro system will be completed in the shortest possible time at the greatest possible savings to local and national taxpayers through enactment of this bill.

Under this bill, up to $1.7 billion in Federal funds would be authorized beginning in 1980 for capital construction purposes. This amount added to already identified highway transfer funds would serve to complete the remaining 40 miles of Metro on an 80 percent Federal/20 percent State and local basis. This approach, which is consistent with Congress philosophy of providing "advance authorization," would enable Metro to be fully operational 2 years sooner than would be otherwise possible and at a savings of over $200 million.

The second major element of this legislation relates to payment of the interest and principal on the approximately $1 billion in construction bonds due to expire in 2010. It is unfair and unrealistic to expect the farebox or the local taxpayer to cover this expense alone. The approach set down in this legislation is financially sound and consistent with Federal assistance currently provided to all U.S. cities now constructing mass transit systems.

The bill calls for Federal participation in a sinking fund that would pay off the bonds as they mature and in the interest payments now borne strictly by the local taxpayers. The ratio for participation in both cases would be on an 80 percent Federal/20 percent local basis.

The third area addressed by this bill is a direct Federal operating subsidy to reflect the benefit and convenience of Metro to the Federal Government. In fiscal year 1980 the subsidy is $20 million and increases at a rate of 6 percent a year to $30 million in 1987.

The benefits of Metro to the day-to-day operation of the government are immense. This Federal participation, at less than 10 percent of current Metro operating costs, is small compensation for the convenience and savings from stations dedicated to government facilities such as the Pentagon, NIH, and Arlington Cemetery. Time and dollars saved by employees using Metro instead of taxes on official Government business and greatly decreased lost time due to inclement weather are just two other advantages of Metro to the Federal Government.

This legislation emphasizes the special obligations the Federal Government has to the citizens of Northern Virginia, the District of Columbia and suburban Maryland when it sets special requirements that go beyond those set for similar projects in other parts of the country.

The Washington Metro system is a transit system befitting of a Nation's Capital. President Johnson specified that this be so. Metro has the mark of the National Capital Planning Commission. Station and car designs were reviewed by the Fine Arts Commission. Such costly requirements do not exist for the taxpayers of Atlanta, Chicago, or Philadelphia or any other U.S. city as they design and build their mass transit systems.

Neither does any other system maintain stations built strictly at Federal Government request as Metro does.

Neither does any other system have mass transit stations located in buildings dedicated to Federal Government use.

Metro is not just another mass transit system.

Metro is the mass transit system of the Capital of the United States.

Metro does not serve just one city or State. Metro serves two States, Virginia and Maryland, and the District of Columbia.

This legislation continues and reaffirms the special nature of Metro and the special commitment the Federal Government has to it.

The text of the bill follows:

H.R. 14012

A bill to amend the National Capital Transportation Act of 1969 to authorize additional Federal contributions for the cost of construction of the regional rail system of the Washington Metropolitan Area Transit Authority, to provide an orderly method for the retirement of bonds issued by such Authority, and to provide an annual operation and maintenance subsidy to such Authority to reflect the special Federal relationship to such system

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "National Capital Transportation Amendments of 1978".

SEC. 2. (a) The National Capital Transportation Act of 1969 (D.C. Code, sec. 1–1441 et seq.) is amended by adding after section 13 the following new section:

"AUTHORIZATION OF ADDITIONAL FEDERAL CONTRIBUTIONS FOR CONSTRUCTION

"SEC. 14. (a) The Secretary of Transportation is authorized to make contributions to the Transit Authority, in addition to the contributions authorized by section 3 of this Act, for the purpose of financing in part the cost of construction of the Adopted Regional System.

"(b) Federal contributions under subsection (a) for the Adopted Regional System shall be subject to the following limitations and conditions:

"(1) The work for which such contributions are authorized shall be subject to the provisions of the Compact and shall be for projects included in the Adopted Regional System.

"(2) The aggregate amount of such Federal contributions made during any fiscal year shall be matched by the local participating governments by payment of capital contributions for such year in a total amount that is not less than 25 per centum of the amount of such Federal contributions.

"(c)(1) There is authorized to be appropriated to the Secretary of Transportation for fiscal years beginning on or after October 1, 1980, a total amount not to exceed $1,700,000,000 to carry out the purposes of this section.

"(2) Amounts appropriated under paragraph (1)—

"(A) shall remain available until expended; and

"(B) shall be in addition to, and not in lieu of, amounts available to the Transit Authority under the Urban Mass Transportation Act of 1964 and the Federal Aid Highway Act of 1973.".

(b) Section 3 of the National Capital Transportation Act of 1969 (D.C. Code, sec. 1–1442) is amended—

(1) by inserting "under this section" in subsection (a) after "Federal contributions"; and

(2) by inserting "under this section" in

subsection (b) after "Federal contributions" the first place it appears therein.

SEC. 3. Effective October 1, 1979, section 4 of the National Capital Transportation Act of 1969 (D.C. Code, sec. 1–1443), relating to District of Columbia contributions, is amended—

(1) by striking out "Commissioner" in subsections (a) and (d) and inserting in lieu thereof "Mayor"; and

(2) by striking out "aggregating not to exceed $269,700,000" in the first sentence of subsection (a); and

(3) by striking out "not to exceed $219,-700,000" in the second sentence of subsection (a) and inserting in lieu thereof "such sums as may be necessary".

SEC. 4. (a) The National Capital Transportation Act of 1969 (D.C. Code, sec. 1–1441 et seq.) is amended by adding after section 14 (as added by section 2 of this Act) the following new sections:

"PAYMENT OF BONDS

"SEC. 15. (a)(1) The Transit Authority shall establish a sinking fund to be used for the accumulation of assets for payment of principal on bonds and other obligations issued by the Transit Authority. The fund shall be established and administered in accordance with the provisions of the Compact providing for funds established by the Transit Authority, and moneys in the fund may be invested by the Transit Authority in accordance with the Compact.

"(2) Assets of the fund shall be used to pay the principal on bonds and other obligations issued by the Transit Authority as payments for such principal become due.

"(b)(1) Beginning October 1, 1997, the Secretary of Transportation may make contributions to the fund established pursuant to subsection (a).

"(2) Any Federal contribution under paragraph (1) shall be matched by contributions to such fund by the local participating governments in a total amount that is not less than 25 per centum of the amount of such Federal contribution.

"(c) The Transit Authority, with the approval of the Secretary of Transportation, may use income from the investment of moneys in the fund established pursuant to subsection (a) to pay interest costs incurred on obligations issued by the Transit Authority after July 13, 1972, but any such payment by the Transit Authority may only be made after the payment with respect to such costs by the Secretary of Transportation under section 10.

"(d)(1) The Secretary of Transportation may make contributions to the Transit Authority, in addition to any other contributions authorized by this Act, in amounts sufficient to provide for the payment of 80 per centum of the amount of interest costs on obligations issued by the Transit Authority after July 13, 1972, remaining after the payment with respect to such costs by the Secretary under section 10 and any amount paid by the Transit Authority with respect to such costs under paragraph (1).

"(2) Any Federal contribution under paragraph (1) shall be matched by contributions by the local participating governments in a total amount that is not less than 25 per centum of the amount of such Federal contribution.

"ANNUAL FEDERAL CONTRIBUTION FOR RAIL OPERATING EXPENSES

"SEC. 16. (a) The Secretary of Transportation is authorized to make an annual contribution to the Transit Authority to finance in part the cost of operating and maintaining the rapid rail transit system of the Transit Authority.

"(b) There is authorized to be appropriated to the Secretary of Transportation to carry out the purpose of subsection (a) the following amounts:

"(1) For fiscal year 1980, the amount of $20,000,000.

"(2) For fiscal year 1981, the amount of $21,200,000.

"(3) For fiscal year 1982, the amount of $22,500,000.

"(4) For fiscal year 1983, the amount of $23,800,000.

"(5) For fiscal year 1984, the amount of $25,200,000.

"(6) For fiscal year 1985, the amount of $26,700,000.

"(7) For fiscal year 1986, the amount of $28,300,000.

"(8) For fiscal year 1987, the amount of $30,000,000.

"(c) Contributions under this section shall be made without any requirement of a matching contribution by the local participating governments and shall be in addition to contributions under any other section of this Act.

"(d) Amounts appropriated under subsection (b)—

"(1) shall remain available until expended; and

"(2) shall be in addition to, and not in lieu of, amounts available to the Transit Authority under the Urban Mass Transportation Act of 1964.".●

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

● Mr. DRINAN. Mr. Speaker, I was unavoidably absent from the House of Representatives for a short time at the end of yesterday's session. Had I been present, I would have voted as follows: "no" on rollcall No. 734, the McClory substitute for H.R. 7308; "no" on rollcall No. 735, an amendment limiting the warrant requirements of H.R. 7308 to surveillance of American citizens; "no" on rollcall No. 736, a motion to recommit H.R. 7308 with instructions to allow certain warrantless surveillance; "no" on rollcall No. 737, final passage of the Foreign Intelligence Surveillance Act, H.R. 7308; "aye" on rollcall No. 738, to resolve into the Committee of the Whole for the consideration of H.R. 11280; "aye" on rollcall No. 739, to table a motion to reconsider the previous vote.●

## NEWSPAPER PRIVILEGE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. OTTINGER) is recognized for 5 minutes.

● Mr. OTTINGER. Mr. Speaker, today I am introducing a bill which grants journalists the right to withhold the identity of confidential sources and information received from those sources.

Freedom of the press is essential to the survival of our democratic system. Prosecution of journalists to require them to reveal their confidential sources of information and the details of such information is a substantial impairment of press freedom. Without the privilege of confidentiality, sources will simply stop taking the risks implicit in revealing important information to the press. Justice Douglas understood this when he wrote, "The press has a preferred position in our constitutional scheme, not to enable it to make money, not to set newsmen apart as a favored class, but to bring fulfillment to the public's right to know."

When newsmen sit in jail for refusing to reveal confidential sources and information, the chilling effect on freedom of the press is painfully obvious. When newsmen sit in jail, it is time for Congress to act. The first amendment to the Constitution says:

Congress shall make no law * * * abridging the freedom * * * of the press.

It is time for Congress to effectuate this important first amendment right against the encroachments that have recently been imposed by the courts. The text of the bill follows:

H.R. 14029

A bill to protect from disclosure the confidential sources and information of newspersons

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Newspersons' Privilege Act of 1978."

SEC. 2 The Congress declares that—

(1) fundamental to democracy in a Nation is the ability to keep its people fully informed, and fundamental to this is a free press; and

(2) basic to the realization of the function of a free press is the ability to rely on confidential sources; and

(3) recent court actions requiring the divulgence by the press of sources and information have undermined the capacity to carry out this vital function; therefore

(4) the Congress must insure the basic first amendment guarantee of freedom of the press by protecting newspersons' confidential sources and information.

SEC. 3. No newsperson shall be required by the Congress, by any committee or subcommittee thereof, or by any court, grand jury, or administrative body of the United States or of any State, to reveal any information or source of such information received by such newsperson while acting in a journalistic capacity.

SEC. 4. For purposes of this Act—

(1) the term "information" means any written, oral, or pictorial news, or other material;

(2) the term "journalistic capacity" means the compiling, gathering, editing, writing, and disseminating of information;

(3) the term "news medium or media" includes regularly published newspapers and periodicals, wire services, news agencies, news associations, makers of newsreels or documentary motion pictures, licensed broadcasting stations and networks, broadcasting services, and community antenna television services;

(4) the term "newsperson" means any person who is regularly employed in a journalistic capacity by any news medium or media, or any person who is not regularly employed by any news medium or media but whose primary occupation is the preparation of news material for a news medium or media and who has had a significant number of pieces or works published or broadcast by any news medium; and

(5) the term "source" includes any agency, or person from or through whom information was obtained, supplied, or delivered.●

## FINANCIAL PRIVACY LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

● Mr. PREYER. Mr. Speaker, later this month, it appears that the House will take up H.R. 13471, the Financial Institutions Regulatory Act of 1978. Of particular interest to me as the chairman of the Subcommittee on Government Information and Individual Rights is title XI of H.R. 13471, the Right to Financial Privacy Act of 1978. Based in large part on the work done by the Privacy Protection Study Commission, the Right to Financial Privacy Act is the only legislative recommendation of that Commission with a chance for passage by the House this year. Yet, although there is a great need for legislation spelling out standards for government access to bank depositor records, we must take great care to insure that any law we enact will effectively deal with this complex aspect of privacy protection. Our job in considering this bill is to decide whether it is adequate to its purpose.

Today, I would like to share with my colleagues some general observations on the purpose and design of legislation to regulate and control Government access to records maintained by banks about their customers' transactions. In doing this, I hope to explain the reasons why financial privacy legislation is needed and to suggest some standards by which the legislation can be measured. In the next few days, I intend to comment specifically on the features of the Right to Financial Privacy Act of 1978.

Financial privacy legislation has its origins in recent structural changes in the management of personal financial affairs. Not too many years ago, credit cards and checking accounts were rare, and most ordinary personal transactions were in cash. Today, we are in the midst of a transition to a so-called cashless society, and an ever-increasing percentage of our purchases of goods and services do not involve the exchange of cash. One of the major consequences of the use of other payment methods is the accumulation of large amounts of personal information in the hands of third parties such as banks and credit grantors.

The volume of personal financial information that is maintained in files beyond our control is surprisingly large. Suppose that your personal records were lost or unavailable but that you had to reconstruct your financial affairs for the last year. By going to the bank where you have a checking account, to department stores where you do business, to credit card companies, and other commercial establishments, you would probably be able to identify most of your transactions. However, this process would not permit you to trace any of your cash transactions. When you pay in cash for a newspaper, a meal, a taxi ride, or almost anything else, no one keeps a record of your identity or your purchase. The more cash you spend, the harder it is to use records maintained by third parties to determine after the fact how you have spent your money.

For most of this country's history, people conducted their business in cash, and a person's finances could not be reconstructed from records beyond that person's control. Because of a lack of a paper trail for most transactions, the only source of personal financial records was the individual himself. Nevertheless, even though personal financial records were not maintained elsewhere, the Government was prohibited from seizing the records maintained by an individual without probable cause. This limited availability of records was part of the overall balance struck in the Constitution between society's interest in law enforcement and an individual's interest in privacy and personal liberty.

That balance between individual liberty and the Government's investigatory powers has been affected by the change in modern recordkeeping practices. Records that were previously unavailable to the Government or that were accessible only after the individual had notice of and an opportunity to object to governmental access are now routinely kept by third party recordkeepers. These records are within easy reach of Government investigators, and a recent Supreme Court case confirms their availability.

In *United States* v. *Miller*, 425 U.S. 435 (1976), the Supreme Court decided that an individual has no constitutional protection against government demands for access to records about himself if the records are maintained by a bank. The Court held that an individual has no standing to challenge a government subpena issued to a bank, and that the individual has no protectible legal interest in the bank's records about his account and his transactions. Thus, despite the sensitive and revealing nature of these records, an individual has no legitimate expectation of privacy.

The Privacy Protection Study Commission's 2-year look at the problem suggested statutory modification of the Miller decision. To effectively do so, a financial privacy law must give the individual a statutory interest in depositor records as well as a statutory right to protect that interest. The experience with the Tax Reform Act of 1976 clearly shows that both of these features are crucial. Under that act, the Internal Revenue Service is required to give an individual notice that a summons has been served on a bank or other third party recordkeeper. The individual is then able to stop the recordkeeper from complying with the summons until a hearing is held, and the individual may intervene in the enforcement proceeding for the summons. This law gives standing to contest an IRS access request, but an individual still has no protectible legal interest. As the Privacy Protection Study Commission stated in its report of last year,

> The individual may go into court, but when he gets there he has nothing to say, because he has no legal interest to defend or to balance against the government's desire for the record.

It is not surprising therefore that all those who have actually gone to court in an attempt to quash an Internal Revenue Service summons have failed. Nor is it surprising that many who have initially filed an objection to a summons have later failed to appear in court to argue against IRS access, or that those who have appeared have made what appeared to be frivolous arguments. No substantive arguments are recognized under the tax reform law, nor, according to Miller, under the Constitution. By providing legal standing but no protectible legal interest in bank records, the Tax Reform Act accomplishes little. Standing to sue without a protectible legal interest is meaningless.

In enacting a general financial privacy law, we must take care not to repeat the mistakes of the Tax Reform Act. Individuals must not only be permitted to object to Government access requests for bank records, but they must be given a legally protectible interest in those records. The lesson of both the Miller case and the Tax Reform Act is that Congress and not the courts must define and limit the degree of intrusion into personal affairs that is permitted through the use of subpenas and summonses issued to banks.

How much protection should we allow? Some of the lines are relatively easy to draw. A financial privacy law is a failure if it does not prevent access by a government employee who is merely curious about someone's financial affairs and is on a fishing expedition. A financial privacy law is a failure if there is insufficient basis upon which the court can review the Government's access request.

On the other hand, we must take care not to be overly restrictive of legitimate law enforcement activities. A financial privacy law can also be a failure if it prevents access by a government investigator who has a legitimate and reasonable law enforcement purpose.

In evaluating the legislation before us, we should ask: What type of privacy interest in bank records are we creating? What type of access requests will be honored by the law? What burden must the individual shoulder to be successful in preventing Government access? Our goal must be to strike a fair and meaningful balance between the competing interests of privacy and law enforcement.

I hope to share further thoughts on this issue as we approach a vote on the measure.●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. BURGENER (at the request of Mr. MICHEL), for Monday, September 11, 1978, on account of official business to co-conduct Small Business Conference for firms seeking to compete for Federal contracts.

Mr. COTTER (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. CORMAN (at the request of Mr. WRIGHT), for today, on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the re-

quest of Mr. DOWNEY) to revise and extend their remarks and to include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. HARRIS, for 5 minutes, today.
Mr. DRINAN, for 5 minutes today.
Mr. OTTINGER, for 5 minutes, today.
Mr. PREYER, for 5 minutes, today.
Mr. MAGUIRE, for 45 minutes, on September 12.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. GREEN) and to include extraneous matter:)

Mr. FINDLEY in two instances.
Mr. LAGOMARSINO.
Mr. GILMAN
Mr. DORNAN.
Mr. KEMP in two instances.
Mr. ERLENBORN.
Mr. ROUSSELOT.

(The following Members (at the request of Mr. DOWNEY) and to include extraneous matter:)

Mr. HAMILTON.
Mr. SIKES in two instances.
Mr. FOUNTAIN.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. CARNEY.
Mr. IRELAND.
Mr. KILDEE.
Mr. APPLEGATE.
Mr. SIMON in two instances.
Mr. DINGELL.
Mr. ZABLOCKI.
Mr. KOSTMAYER.
Mr. POAGE.
Mr. BOLAND.

## SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 131. Joint resolution to change the name of Copan Dam and Lake in the States of Oklahoma and Kansas to Copan Dam and the Lake of the Delawares; to the Committee on Public Works and Transportation.

## BILL PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on September 7, 1978, present to the President, for his approval, a bill of the House of the following title:

H.R. 6669. To establish a comprehensive and coordinated national climate policy and program, and for other purposes.

## ADJOURNMENT

Mr. DOWNEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 20 minutes p.m.), under its previous order, the House adjourned until Monday, September 11, 1978, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4943. A letter from the Secretary of Labor, transmitting a report on the 1978 summer youth jobs programs, pursuant to section 705(c) of the Comprehensive Employment and Training Act of 1973, as amended; to the Committee on Education and Labor.

4944. A letter from the Secretary of Labor, transmitting a report on the exemption of certain switchboard operators from the minimum wage and overtime provisions of the Fair Labor Standards Act, pursuant to section 4(d)(2) of the act, as amended (88 Stat. 73); to the Committee on Education and Labor.

4945. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense articles and services sold commercially to the Philippines (transmittal No. MC–12–78), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

4946. A letter from the Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting the final report on programing and obligation of funds for Lebanon relief and rehabilitation, pursuant to section 495C of the Foreign Assistance Act of 1961, as amended (90 Stat. 762); to the Committee on International Relations.

4947. A letter from the Secretary of Health, Education, and Welfare, transmitting the first annual report of the Director of the National Institute of Arthritis, Metabolism, and Digestive Diseases on arthritis activities under the Arthritis Plan, pursuant to section 434(f) of the Public Health Service Act, as amended (88 Stat. 2224); to the Committee on Interstate and Foreign Commerce.

4948. A letter from the Secretary of Health, Education, and Welfare, transmitting the findings of the assessment of health professions schools' admissions criteria for bilingual and bicultural activities, pursuant to section 904(a) of Public Law 94–484; to the Committee on Interstate and Foreign Commerce.

4949. A letter from the vice president for Government affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for the month of May 1978, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

4950. A letter from the vice president for Government affairs, National Railroad Passenger Corporation, transmitting a report covering the month of June 1978, on the average number of passengers per day on board each train operated, and the on-time performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Pasesnger Service Act of 1973, as amended; to the Committee on Interstate and Foreign Commerce.

4951. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

4952. A letter from the Comptroller General of the United States, transmitting a report on the causes of food price rises (CED–78–170, September 8, 1978); jointly, to the Committees on Government Operations, Agriculture, and Education and Labor.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DANIELSON: Committee on the Judiciary. H.R. 11002. A bill to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies; with amendment (Rept. No. 95–1556). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee of conference. Conference report on H.R. 3816 (Rept. No. 95–1557). Ordered to be printed.

## REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X,

The bill, to strengthen and improve the early and periodic screening, diagnosis, and treatment program, and for other purposes (H.R. 13611, as reported on August 11, 1978) was referred by the Speaker as follows:

The Committee of the Whole House on the State of the Union discharged, and referred to the Committee on Appropriations for a period not to exceed 15 legislative days with instructions to report back to the House as provided in section 401(b) of Public Law 93–344.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANNUNZIO (for himself and Mr. CARNEY):

H.R. 14019. A bill to amend chapter 59 of title 38, United States Code, to provide for the recognition of representatives of the Italian American War Veterans of the United States, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. CONABLE (for himself and Mr. RANGEL):

H.R. 14020. A bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain employees' trusts organized to invest in real estate; to the Committee on Ways and Means.

By Mr. CONABLE (for himself and Mr. YOUNG of Florida):

H.R. 14021. A bill to amend the Internal Revenue Code of 1954 to permit a church plan to continue after 1982 to provide benefits for employees of organizations controlled by or associated with the church and to make certain clarifying amendments to the definition of church plan; to the Committee on Ways and Means.

H.R. 14022. A bill to amend section 403(b) of the Internal Revenue Code of 1954 with respect to computation of the exclusion allowance for ministers and lay employees of the church; to the Committee on Ways and Means.

H.R. 14023. A bill to amend the Internal Revenue Code of 1954 to extend the special elections for section 403(b) annuity contracts to employees of churches, conventions, or associations of churches, and their agencies and to permit a de minimis contribution

amount in lieu of such elections; to the Committee on Ways and Means.

By Mr. DOWNEY (for himself, Mr. MOAKLEY, Mr. WHITEHURST, Mr. GUYER, Mr. EMERY, Mr. FRENZEL, Mr. CARR, Mr. RANGEL, Mr. OTTINGER, Mr. CLAY, Mr. DRINAN, Mr. SOLARZ, Mr. MAGUIRE, Mr. STOKES, Mr. STARK, and Mr. MURPHY of New York):

H.R. 14024. A bill to permit regulation of automated blood pressure machines to insure the accuracy and reliability of their performance; to the Committee on Interstate and Foreign Commerce.

By Mr. HANLEY:

H.R. 14025. A bill to provide for an equitable procedure for establishing congressional districts; to the Committee on the Judiciary.

By Mr. JOHNSON of Colorado (for himself and Mr. YOUNG of Alaska):

H.R. 14026. A bill to provide means for the acquisition and retention of title to certain lands by the village corporation organized pursuant to the Alaska Native Claims Settlement Act for the Natives of the village of Kake, Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. LEACH (for himself and Mr. GLICKMAN):

H.R. 14027. A bill to direct the Secretary of Agriculture to conduct research with respect to the effects of nitrites on animals and with respect to possible nitrite substitutes; jointly, to the Committees on Agriculture, and Interstate and Foreign Commerce.

By Mr. MURPHY of Pennsylvania (for himself, Mr. MOAKLEY, Mr. SANTINI, Mr. WHITEHURST, Mr. LAGOMARSINO, Mr. RAHALL, Mr. PANETTA, Mr. STAGGERS, Mr. MATHIS, Mr. LEDERER, Mr. ERTEL, Mr BURKE of Florida, Mr. EILBERG, Mr. FOUNTAIN, Mr. FINDLEY, Mr. JEFFORDS, Mr. ROBERT W. DANIEL, Jr., Mr. CORRADA, Mr. SCHEUER, and Mr. FLOOD):

H.R. 14028. A bill to amend title 38, United States Code, to provide for an official memorial flag to honor war veterans; to the Committee on Veterans' Affairs.

By Mr. OTTINGER:

H.R. 14029. A bill to protect from disclosure the confidential sources and information of newspersons; to the Committee on the Judiciary.

By Mr. RICHMOND (for himself, Mr. EDWARDS of California, Mr. SEIBERLING, Mr. DRINAN, Mr. VOLKMER, Mr. BEILENSON, Mr. BUTLER, Mr. MCCLORY, Mr. THOMPSON, Mr. VENTO, and Mr. WAXMAN):

H.R. 14030. A bill to provide more effectively for the use of interpreters in courts of the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. RONCALIO:

H.R. 14031. A bill to amend section 6(e)(2) of the Land and Water Conservation Fund Act of 1965, as amended; to the Committee on Interior and Insular Affairs.

By Mr. SCHULZE:

H.R. 14032. A bill to amend the Internal Revenue Code of 1954 to increase the dollar amount which is required before certain gambling winnings are subject to income tax withholding; to the Committee on Ways and Means.

By Mrs. SPELLMAN (for herself, Mr. EVANS of Indiana, Mr. RICHMOND, and Mr. VOLKMER):

H.R. 14033. A bill to assist cities and States by amending section 5136 of the Revised Statutes, as amended, with respect to the authority of national banks to underwrite and deal in securities issued by State and local governments, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. RONCALIO (for himself, Mr. WEISS, Mr. BALDUS, Mr. BAUCUS, Mr. BONIOR, Mr. EILBERG, Ms. KEYS, Mr. ST GERMAIN, Mr. STEERS, Mr. BEARD of Rhode Island, Mr. FORD of Tennessee, Mr. YATRON, Mr. STOKES, Mr. MURPHY of Pennsylvania, and Mr. LEDERER):

H.J. Res. 1132. Joint resolution to authorize the President to issue a proclamation designating March, 1979, as "Youth Art Month"; to the Committee on Post Office and Civil Service.

By Mr. BEDELL:

H. Con. Res. 708. Concurrent resolution to establish a Presidential commission to evaluate defensive weapons systems; to the Committee on Armed Services.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. ICHORD introduced a bill (H.R. 14034) for the relief of Luis Acosta, doctor of medicine, Nereida Acosta, Julia Acosta, and Juan Carlos Acosta, which was referred to the Committee on the Judiciary.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1

By Mr. MOORHEAD of California:

—Page 44, line 2, strike out "; or" and insert in lieu thereof a dash.

Page 44, strike out line 3 and everything that follows through line 13 on page 45.

Page 45, strike out line 16 and everything that follows through line 21 on page 46.

Page 46, line 22, redesignate subsection (f) as subsection (c) and strike out "(a), (b), or (c)" and insert in lieu thereof "(a) or (b)".

Page 47, line 7, redesignate subsection (g) as subsection (d) and on page 48, line 3, redesignate subsection (h) as subsection (e).

—Page 44, line 2, strike out "; or" and insert in lieu thereof a dash.

Page 44, strike out line 3 and everything that follows through line 13 on page 45.

Page 45, strike out line 16 and everything that follows through line 21 on page 46.

Page 46, line 22, redesignate subsection (f) as subsection (c) and strike out "(a), (b), or (c)" and insert in lieu thereof "(a) or (b)".

Page 46, line 23, insert "(1)" immediately after "shall not apply if".

Page 47, line 6, strike out the period at the end thereof and insert in lieu thereof the following: "; or (2) the former officer's or employee's appearance before the agency is of a category exempt by the agency by general rule or regulation, approved by the Director of the Office of Government Ethics and published in the Federal Register, or the agency, after full disclosure of all facts by the former officer or employee, makes a written determination, subject to review by the Director of the Office of Government Ethics, that the former officer or employee will not exercise any undue influence on substantive agency action by virtue of his or her former association with the agency. All such written determinations shall be a matter of public record."

Page 47, line 7, redesignate subsection (g) as subsection (d) and on page 48, line 3, redesignate subsection (h) as subsection (e).

H.R. 11733

By Mr. BIAGGI:

—Page 195, strike out line 16 and all that follows down through and including line 2 on page 196.

Renumber succeeding sections and references thereto accordingly.

H.R. 12611

By Mr. YOUNG of Alaska:

—Page 138, after line 18, insert the following new section:

LABOR DISPUTES

SEC. 33. Within 10 days after the date of enactment of this section, the President, pursuant to section 10 of the Railway Labor Act, shall create a board to investigate and report on the dispute between Wein Air Alaska, Incorporated, and the Air Line Pilots Association. Such board shall report its findings to the President within thirty days from the date of its creation. After the creation of such board, and for thirty days after such board has made its report to the President, no change, except by agreement, shall be made by the parties to the controversy in the conditions out of which the dispute arose.

Renumber the succeeding sections of the bill accordingly.

H.R. 13850

By Mr. MOORHEAD of California:

—Page 46, line 22, strike out "; or" and insert in lieu thereof a dash.

Page 46, strike out line 23 and everything that follows through line 7 on page 48.

Page 48, strike out line 10 and everything that follows through line 14 on page 49.

Page 49, line 15, redesignate subsection (f) as subsection (c) and strike out "(a), (b), or (c)" and insert in lieu thereof "(a) or (b)".

Page 49, line 25, redesignate subsection (g) as subsection (d) and on page 50, line 21, redesignate subsection (h) as subsection (e).

# SENATE—*Friday, September 8, 1978*

*(Legislative day of Wednesday, August 16, 1978)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. JOHN MELCHER, a Senator from the State of Montana.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray:

O Lord who has promised never to leave us nor forsake us, we beseech Thee to draw near to us as we draw near to Thee. Dispel the dark forces which debase the human spirit and frustrate doing Thy will. Shed Thy light upon everyone in this place. May Thy saving and redemptive spirit pervade all that we do. When the way is hard and the direction unclear may some miracle of divine grace work Thy will for this Nation and the world. Fill our lives with joy and peace that our work may arise from hearts that are pure and motives worthy of Thy Servant who went about doing good, and in whose holy name we pray. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., September 8, 1978.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JOHN MELCHER, a Senator from the State of Montana, to perform the duties of the Chair.

JAMES O. EASTLAND,
*President pro tempore.*

Mr. MELCHER thereupon assumed the chair as Acting President pro tempore.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

## THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, does any Senator wish me to yield time?

## THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two measures which have been cleared for passage by unanimous consent and minority clearance has been secured also, I believe. They are Calendar Orders Nos. 1069 and 1094. I therefore ask unanimous consent that the Senate proceed to the consideration of those two calendar orders.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## PARLIAMENTARY CONFERENCES WITH JAPAN

The Senate proceeded to consider the joint resolution (S.J. Res. 111) to authorize participation by the United States in parliamentary conferences with Japan, which had been reported from the Committee on Foreign Relations with amendments as follows:

On page 1, line 4, after "periodically" insert "and when the Congress is not in session (except that this restriction shall not apply to meetings held in the United States)";

On page 1, line 7, after "House of" insert "Councilors";

On page 3, beginning with line 10, insert the following:

SEC. 5. No funds shall be authorized to be appropriated under this resolution until fiscal year 1980.

So as to make the joint resolution read:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That not to exceed twenty-four Members of Congress shall be appointed to meet jointly and periodically and when the Congress is not in session (except that this restriction shall not apply to meetings held in the United States) with representatives of the House of Representatives and House of Councilors of the Japanese Diet for discussion of common problems in the interests of relations between the United States and Japan. Of the Members of the Congress to be appointed for the purposes of this resolution (hereinafter designated as the "United States group") half shall be appointed by the Speaker of the House from the Members of the House (not less than four of whom shall be from the International Relations Committee), and half shall be appointed by the President of the Senate from the Members of the Senate (not less than four of whom shall be from the Foreign Relations Committee). Such appointments shall be for the period of each meeting of the Japan-United States Interparliamentary group except for the four members of the International Relations Committee, and four members of the Foreign Relations Committee, whose appointment shall be for the duration of each Congress.

SEC. 2. An appropriation of $50,000 annually is authorized, $25,000 of which shall be for the House delegation and $25,000 for the Senate delegation, or so much thereof as may be necessary to assist in meeting the expenses of the United States group of the Japan-United States Interparliamentary group for each fiscal year for which an appropriation is made, the House and Senate portions of such appropriation to be disbursed on vouchers to be approved by the Chairman of the House delegation and the Chairman of the Senate delegation, respectively.

SEC. 3. The United States group of the Japan-United States Interparliamentary group shall submit to the Congress a report for each fiscal year for which an appropriation is made including its expenditures under such appropriation.

SEC. 4. The certificate of the Chairman of the House delegation or the Senate delegation of the Japan-United States Interparliamentary group shall hereafter be final and conclusive upon the accounting officers in the auditing of the accounts of the United States group of the Japan-United States Interparliamentary group.

SEC. 5. No funds shall be authorized to be appropriated under this resolution until fiscal year 1980.

The amendments were agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. STONE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Later, the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all actions taken with respect to Senate Joint Resolution 111 today be vitiated.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. That had not been fully cleared all the way around.

I thank the Chair.

## INTERNATIONAL AGREEMENTS CONSULTATION RESOLUTION

The Senate proceeded to consider the resolution (S. Res. 536) expressing the sense of the Senate with respect to whether certain international agreements should be submitted as treaties, which had been reported from the Committee on Foreign Relations with an amendment to strike all after the resolving clause and insert in lieu thereof the following:

*Resolved,* That this resolution may be cited as the "International Agreements Consultation Resolution".

SEC. 2. It is the sense of the Senate that, in determining whether a particular international agreement should be submitted as a treaty, the President should have the timely advice of the Committee on Foreign Relations through agreed procedures established with the Secretary of State.

SEC. 3. The Secretary of the Senate shall transmit a copy of this resolution to the President.

The amendment was agreed to.

The resolution, as amended, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1171), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE RESOLUTION

The principal purpose of Senate Resolution 536, sponsored by Senator Glenn and cosponsored by Senator Clark, is to facilitate the implementation of the "advice" portion of the treaty clause to the extent that such provision is applicable to the question of whether a given international agreement should be submitted as a treaty. The treaty clause, article II, section 2, clause 2 of the Constitution, provides that the "President shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur."

In mandating that the President receive not only the consent but also the advice of the Senate, the Framers contemplated close collaboration between the President and the Senate throughout the entire treaty-making process. The Senate was expected to render advice, in the words of Wilson, "in the spirit of an executive counsel." For several reasons, primarily early, unfavorable experiences with the "advice" process and the vastly increased size of the Senate, the "advice" portion of the treaty clause has largely withered through disuse. Nonetheless, the committee believes that thorough collaboration during the negotiation of international agreements can only strengthen the treaty-making process and improve its end product.

This applies in particular to the question of what form a given agreement should take. Considerable controversy has arisen in recent years over the use of executive agreements in situations which arguably required treaties. The simplest and most logical way of eliminating such disagreements, it appears to the

committee, is to have a full exchange of views before and during the process of negotiation regarding the form that a given agreement of consequence should take.

BACKGROUND

The resolution expresses the sense of the Senate that, in determining whether a particular international agreement should be submitted as a treaty, the President should have the timely advice of the Committee on Foreign Relations through agreed procedures established through the Secretary of State. This provision is similar to consultation provisions contained in Senate Resolutions 424 and 486 in the 95th Congress as well as Senate Resolution 24 in the 95th Congress, all sponsored by Senator Clark. The latter resolution was incorporated in the Foreign Relations Authorization Act, Fiscal Year 1979 (S. 3076) as section 502, as reported by the committee. This section was stricken on the Senate floor, with the exception of the consultation provision on which the Senate receded in conference. This resolution is similar to that provision.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## SENATE TO CONVENE AT 11 A.M. ON MONDAY, SEPTEMBER 11, 1978

Mr. ROBERT C. BYRD. Mr. President, for the record, at what time does the Senate convene on Monday?

The ACTING PRESIDENT pro tempore. At the close of business today, the Senate will be in recess until 11 a.m. on Monday.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I yield such remaining time to Mr. PROXMIRE as he may desire.

Mr. PROXMIRE. I thank the distinguished majority leader.

## BEST WISHES TO JOANN BAREFOOT

Mr. PROXMIRE. Mr. President, today the Subcommittee on Housing and Urban Affairs of the Senate Banking Committee will be losing a valued and valuable staff member—JoAnn Sweet Barefoot. JoAnn was appointed to the subcommittee staff in January 1976. Since that time, she has made a lasting and significant contribution to such areas of committee concern as mortgage finance, community reinvestment, displacement, and unassisted housing programs. Her approach to any issue was characterized by thoroughness, perseverance, and objectivity. In legislative markups her cogent and articulate explanations and presentations of complex matters was as pleasurable to listen to as they were enlightening.

On September 11, JoAnn will formally begin a new and equally challenging career as Director of Customer and Community Programs at the Office of the Comptroller of the Currency. In that capacity, she will oversee the Office of the Comptroller's programs implementing its civil rights, consumer affairs, and urban lending initiatives. It is a responsibility which I know JoAnn will handle with ease and assurance.

Mr. President, on behalf of my colleagues and staff of the Banking Committee, I wish JoAnn the greatest success and happiness in her future career.

## THE GREAT TRADITION OF NATURAL LAW DEMANDS RATIFICATION OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, despite the often dismal record of man's treatment of his fellow man down through the ages, there has survived a belief in certain natural rights. From the Stoics and Roman jurists to the Atlantic Charter and Roosevelt's Four Freedoms, many have passionately defended the idea that men are entitled to make certain claims by virtue simply of their common humanity.

Can we deny the majesty of this belief?

Can we deny the powerful impact it has had over the centuries?

There seems no doubt that the assertions of certain Greek philosophers about the "natural" equality of men and their consequent right to freedom caused the contemporaries of those thinkers to become uneasy about the institution of slavery.

Similarly, the doctrines of the rights of man, including life, liberty, and the pursuit of happiness, were significantly connected to the American and French Revolutions.

Even the Communist Manifesto owed much of its success not to its "scientific" analysis of capitalist society, but to its denunciation of a kind of wage slavery and its appeal to all workers to assert their equal brotherhood.

But today, how do we treat fundamental human rights?

How should we treat fundamental human rights?

The Romans had an answer. In terms as applicable today as when they were first pronounced, Roman lawyers conceived of natural law as an ideal or standard, a standard fixed by nature, to be discovered and gradually applied by men.

For the lawyer, said the distinguished Roman jurist Ulpian, is not merely the interpreter of existing laws, but also the priest or guardian of justice, which is the "fixed and abiding disposition to give every man his right."

Today, centuries later, how energetically have we applied human rights?

How conscientiously have we tried to safeguard human rights?

Mr. President, whatever progress we have made in some areas of the world, we have not succeeded in stopping human rights violations from being a commonplace in the modern world. And it is shocking that the most fundamental of those human rights—the right to live—is still gravely threatened in many countries.

What is even more distressing is that the United States, with the right to live prominently contained in its Declaration of Independence, still has not ratified the United Nations Convention on Genocide that defines and punishes mass murder as a crime under international law.

In fact, 83 nations, many of which have nothing even resembling a written constitution or other written instrument of human rights, have seen fit to ratify this important treaty.

Who is responsible for this gross inconsistency in our policies?

Mr. President, it is none other than the U.S. Senate, which has had this document before it for nearly three decades.

Can we accept this delay?

Can we afford the diplomatic embarrassment that inevitably attends our failure to ratify the convention?

Can we condone any more needless deaths?

The answer to all these questions is no. It is time to stand behind the standard of natural law alluded to by the Roman jurists. It is time to place ourselves squarely in the middle of the great tradition of defending human rights. And the time to act is now.

## ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. Does the Senator from Indiana care to be recognized?

Mr. LUGAR. No, Mr. President, I yield back my time.

## AGRICULTURAL EXPORT TRADE EXPANSION ACT OF 1978

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the consideration of S. 3447, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (S. 3447) to strengthen the economy of the United States through increased sales abroad of American agricultural products.

The Senate proceeded to consider the bill.

The ACTING PRESIDENT pro tempore. The time for debate on this bill is limited to 1 hour, to be equally divided and controlled by the Senator from Florida (Mr. STONE) and the Senator from Kansas (Mr. DOLE), 30 minutes on any amendment, with 15 minutes on any debatable motion, appeal, or point of order.

Mr. STONE. Mr. President, I yield briefly to the Senator from Arkansas for a unanimous consent request.

Mr. HODGES. Mr. President, during consideration of this bill and any votes thereon, I ask unanimous consent that Randy Marble, Steve Moore, and Bill

Kennedy of my staff be granted privilege of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STONE. Mr. President, I ask unanimous consent that Nancy Foster of my staff, Bill Motes of Senator CLARK's staff, Dave Lyons of Senator LUGAR's staff, and the following staff members of the Committee on Agriculture, Nutrition, and Forestry be granted the privilege of the floor during consideration of S. 3447, including all rollcall votes thereon: Henry Casso, Carl Rose, Phil Fraas, Nelson Denlinger, Bill Lesher, Bill Taggart, and Stu Hardy.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STONE. Mr. President, I rise today on behalf of the Agricultural Trade Expansion Act of 1978, S. 3447.

This legislation is designed to strengthen the Nation's economy and improve the income of our agricultural producers. It would also serve to benefit the Nation's balance of payments and provide much needed strength for the dollar.

It would do that by selling more of our products abroad, as opposed to our present imbalance of purchasing far more than we sell abroad.

The legislation will provide the means for maintaining, developing, and increasing our agricultural export markets. While we have made significant strides in increasing our agricultural export markets during the past decade, there has been some erosion in our wheat exports, with our share going down from 31.5 million tons in the 1975–76 marketing year to 25.7 million tons in the 1976–77 marketing year, while the volume of wheat exports by Canada, Australia, and Argentina increased at the same time from 23.2 million tons to 27.0 million tons.

Mr. President, the legislation would provide a number of authorities for the Commodity Credit Corporation of the Department of Agriculture to increase the sale of U.S. agricultural products abroad. The CCC would be authorized to provide intermediate credit financing for the commercial sale of agricultural products for not less than 3 years nor more than 10 years to, first, develop, expand, or maintain the importing nation as a foreign market, on a long-term basis, for the commercial sale and export of U.S. agricultural commodities without displacing normal commercial sales; or, second, otherwise improve the capability of the importing nation to purchase and use, on a long-term basis, U.S. agricultural commodities.

Intermediate export credit could be used among other purposes, first, for the establishment of reserve stocks; second, for breeding livestock and poultry (including freight costs); third, to establish handling and related facilities; and fourth, to meet credit competition for agricultural export sales.

Intermediate export credit could not be used to encourage credit competition, or for the purpose of foreign aid or debt rescheduling. Intermediate export credit would carry the same interest rate, as nearly as practicable, as that charged by the CCC for short-term export credit.

The legislation would also establish short-term credits, not to exceed 3 years, to exporters who offer deferred payment terms. Some countries prefer to deal directly with an exporter rather than a Government agency such as the Commodity Credit Corporation. This program would provide another option to enable the United States to be competitive with other exporting nations.

The People's Republic of China would be eligible for credits under the deferred payment program as well as the existing 3-year CCC credit program.

S. 3447 also provides for the establishment of from 6 to 25 agricultural trade offices in countries or regions where there are major U.S. trade interests. The establishment of U.S. agricultural trade offices would serve as a catalyst for aggressive export trade promotion and the consolidation of Department of Agriculture-financed export promotion activities.

The legislation would also raise the level of our agricultural representation abroad from "agricultural attaché" to "agricultural counselor" in at least 16 countries. In most foreign nations, great significance is attached to titles, and having our agricultural representatives no higher than the level of "attaché" has caused problems in gaining access to key foreign government officials. Another nation competing with the United States for agricultural export markets will more than likely be represented by a counselor, and may, therefore, have an advantage in reaching key purchasing officials.

Mr. President, this Nation has reason to be proud of its record in agricultural exports with their value increasing from $6.3 billion in 1968 to $24 billion in 1977. In recent years the annual net favorable agricultural export balance has been in the $10.2 to $12.6 billion range.

Compare that with so many other of our American products and we can see how important it is for us to expand further on our strong point, which is agricultural export sales.

As a result of this trend, agricultural exports have become extremely important to the U.S. balance of payments. An unfavorable nonagricultural trade balance of $40.1 billion in 1977 was reduced to a deficit of $29.9 billion through agricultural export sales. In 1976, a $20.7 billion imbalance in nonagricultural trade was reduced to an $8.7 billion deficit, because of a favorable agricultural exports may reach $26 billion in 1975, the United States had a favorable balance of trade of $9.7 billion, and this was the result of a $12.6 billion favorable balance in agricultural trade. Agricultural exports may reach $26 billion in 1978 with a net agricultural balance of around $12 billion.

Our agricultural producers have become heavily dependent on a strong agricultural export market. Our farmers devote around 100 million acres each year to production for export—almost 1 acre in 3 that are harvested. Almost 20 percent of U.S. farm income is provided by export sales. We presently export over half of our wheat, soybeans, and hides each year, roughly 40 percent of our cotton, nearly a third of our tobacco and over a fourth of our rice and corn.

It is anticipated that the legislation could result in outlays by the Commodity Credit Corporation approximating $100 million in loans per year. However, the repayment record for CCC loan has been very good. In addition, the loans will bear interest at rates above the cost of money to the Government. Thus, after a few years, we would expect to have a net inflow of funds to the Government. At the same time we would expect the program to be helpful in opening new markets for U.S. agricultural commodities.

In addition, increased exports will undoubtedly mean improved farm prices, thereby saving the Treasury in terms of deficiency payments. In the case of corn, each cent per bushel increase in market price would reduce deficiency payments to producers by about $54 million; in the case of cotton each cent per pound increase would mean a $60 million reduction in payments; and in the case of wheat each cent per bushel increase would mean a reduction of about $20 million in payments.

Thus an increase in the average market prices of 10 cents a bushel for wheat and corn and 10 cents a pound for cotton, as a result of increased export sales, could result in annual savings to the Treasury of about $1.3 billion

We also should note that other segments of the economy benefit from increased agricultural export sales. A Department of Agriculture study shows that the $22 billion of agricultural exports in 1974 generated about $43 billion of total business activity.

With regard to employment, an estimated 1.2 million full-time civilian jobs were related to our agricultural exports in 1974. Of this, around 500,000 U.S. farmworkers—14 percent of the U.S. farm labor force—were required to produce the agricultural commodities exported in 1974.

In addition, more than 650,000 nonfarm jobs were directly or indirectly related to the assembling, processing, and distribution of agricultural commodities for export. Around 50,000 of these jobs were in food processing; 300,000 in trade and transportation; 100,000 in other manufacturing; and 200,000 in other services.

Of the total U.S. work force in 1974, about 4 percent were involved in producing food and related products, and just under 1 percent of the total U.S. nonagricultural civilian labor force were engaged in providing goods and services for agricultural exports.

In developing S. 3447, the Subcommittee on Foreign Agricultural Policy, which

I chair, drew upon bills introduced by Senators HUMPHREY, LUGAR, DOLE, CLARK, and STEVENSON.

Our April hearings were well received by the witnesses. The thrust of much of the testimony was to the effect that, although U.S. agricultural exports have increased in recent years, much of the increase has happened by chance and without attention or support. The United States, the witnesses indicated, is now facing growing competition from other agricultural exporting nations, and a more sustained effort is required in order to maintain and hopefully expand our export markets.

The size and significance of our agricultural export markets are finally beginning to be recognized by policymakers in both the legislative and executive branches. S. 3447 will further this recognition and provide a commitment toward further growth and development.

In conclusion I wish to thank our distinguished chairman, Senator TALMADGE, for his strong support, and also the dedicated efforts of my committee colleagues, especially Senators CLARK, DOLE, BELLMON, and LUGAR.

Mr. President, I urge that this legislation be adopted.

Mr. President, I ask unanimous consent that a summary of S. 3447 prepared by the staff of the Committee on Agriculture, Nutrition, and Forestry be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF S. 3447

The bill authorizes several new Commodity Credit Corporation credit programs to expand export sales of U.S. agricultural commodities, authorizes the appointment of agricultural counselors to serve as representatives of the Department of Agriculture in diplomatic missions abroad, and authorizes the establishment of U.S. agricultural trade offices in foreign nations.

The bill would—

(1) Authorize the Commodity Credit Corporation (the "CCC") to finance export sales of U.S. agricultural commodities out of CCC and private stocks on "intermediate" credit terms (in excess of 3 years, but not more than 10 years) to—

(a) develop, expand, or maintain the importing nation as a foreign market, on a long-term basis, for the commercial sale and export of U.S. agricultural commodities without displacing normal commercial sales; or

(b) otherwise improve the capability of the importing nation to purchase and use, on a long-term basis, U.S. agricultural commodities.

Intermediate export credit could be used, among other purposes—

(a) For the establishment of reserve stocks,

(b) For breeding livestock and poultry (including freight costs),

(c) To establish handling and related facilities, and

(d) To meet credit competition for agricultural export sales.

Intermediate export credit could not be used to encourage credit competition, or for the purpose of foreign aid or debt rescheduling. Intermediate export credit would carry the same interest rate, as nearly as practicable, as that charged by the CCC for short-term export credit (sec. 101);

(2) Require the Secretary of Agriculture, with respect to CCC "intermediate" export credit sales, to obtain commitments from purchasers to prevent resale or transshipment of the purchased goods to other nations and to prevent (with respect to sales to establish reserve stocks) domestic use of the reserve stocks in a manner inconsistent with an international commodity agreement or, if there is no applicable commodity agreement, domestic use except as needed for emergency relief required by a crop shortfall or other natural disaster (sec. 101);

(3) Provide that the cargo preference laws are not to apply to CCC "intermediate" export credit sales (sec. 101);

(4) Require the Secretary to provide "short-term" CCC financing (not to exceed 3 years) to exporters of United States agricultural commodities who need to provide their customers such short-term deferred payment terms to meet sales competition from other nations or to make additional export sales. This financing would be available only for export sales to nations that are eligible for direct CCC short-term financing and the People's Republic of China (sec. 201);

(5) Notwithstanding any other provision of law, authorize the CCC to provide direct short-term credit and deferred payment short-term credit for commercial sales of United States agricultural commodities out of private stocks to the People's Republic of China (sec. 202);

(6) Provide that the senior Department of Agriculture representative in the United States diplomatic mission at each of the major foreign agricultural posts (in no event less than 16 such representatives) will be given the title of "Agricultural Counselor" (sec. 302);

(7) Require agricultural counselors and agricultural attachés to submit annual reports to the Secretary (and the Secretary of State) (who shall transmit the reports to the agriculture committees of Congress) detailing the agricultural situation in the nations or areas to which the counselors and attachés are assigned (sec. 302);

(8) Require the Secretary to establish not fewer than 6 nor more than 25 United States agricultural trade offices in foreign nations to conduct foreign market development programs (sec. 402);

(9) Authorize the Secretary to establish one agricultural trade office in the United States (sec. 402);

(10) Authorize agricultural counselors, agricultural attachés, and agricultural trade officers to receive representation allowances (sec. 402); and

(11) Require the Secretary to report to Congress annually on the Department of Agriculture foreign market development activities (sec. 504).

Mr. STONE. Mr. President, I yield 5 minutes to the chairman of the Agriculture Committee, the distinguished Senator from Georgia (Mr. TALMADGE).

Mr. TALMADGE. I thank the floor manager of the bill and the ranking minority member. I congratulate the Senators and all other members of the subcommittee on doing an outstanding job.

Mr. President, as chairman of the Committee on Agriculture, Nutrition, and Forestry, I strongly support S. 3447—the Agriculture Export Trade Expansion Act of 1978. This bill would stimulate the growth of export markets for our agricultural commodies, and therefore merits the support of all Senators.

Five major provisions to maintain and expand our agricultural export markets are included in the bill. They are: First, the establishment of an intermediate export credit program; second, the extension of credit to exporters that offer deferred payment terms; third, the extension of Commodity Credit Corporation credits to the People's Republic of China; fourth, upgrading the title of our major foreign agricultural representatives from "agricultural attache" to "agricultural counselor"; and fifth, the establishment of agricultural trade offices in nations where significant market opportunities exist.

It is essential that S. 3447 be enacted. The value of U.S. agricultural exports has risen sharply in the past decade—from $6.3 billion in 1968 to $24 billion in 1977—and we have become dependent on a high level of agricultural exports for this Nation's economic well-being.

Agricultural exports are an important part of U.S. farm income. In recent years almost 20 percent of our farm income has been provided by export sales. We presently export over half of our wheat, soybeans, and hides each year, roughly 40 percent of our cotton, nearly a third of our tobacco, and over a fourth of our rice and corn. Consequently, our farmers devote over 100 million acres each year to production for export—almost one acre in three that are harvested.

In my home State of Georgia, exports are extremely important to farmers. Approximately $475 million worth of agricultural commodities produced in Georgia in 1977 were exported. These exports included such commodities as peanuts, soybeans, tobacco, cotton, broilers, and eggs.

Georgia exports have grown significantly in recent years, and could continue to increase since Georgia farmers, food processors, and manufacturers are just beginning to get a foothold in several overseas markets. This bill could help Georgia capture a larger share of these markets.

Mr. President, I ask unanimous consent that a letter to me from the Commissioner of Agriculture for the State of Georgia, Mr. Thomas Irvin, describing the importance of exports to Georgia agriculture and supporting export promotion legislation be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 9, 1978.

Hon. HERMAN E. TALMADGE,
*Senator, Subcommittee of Foreign Agricultural Policy, Russell Senate Office Building, Washington, D.C.*

DEAR HERMAN: This concerns S. 2384—Agricultural Trade Act of 1978 which, in my opinion, is one of the most important pieces of legislation to come before Congress this year.

The plight of our farmers calls for new outlets for the sale of agricultural products. Georgia farmers, food processors and manufacturers are just beginning to get a foothold in the overseas markets. The value of 1977 agricultural exports in Georgia alone increased $20 million over FY 1975 to reach a total of $475.7 million. The 1978 total could well be much higher as more companies are finding it profitable to enter the export market.

Nations, who in the past have been unable to import quality food products, are now reaching the point where they can participate in the international market, thus opening new markets for U.S. agricultural products. If USDA is afforded the opportunity to expand its credit term program under the CCC sales export program, open trade offices in new areas and upgrade personnel in trade offices, then U.S. opportunities to export more agricultural products will be greatly increased.

I strongly urge you to give serious consideration to favorable movement of this legislation.

With warmest personal regards, I am,
Sincerely,

THOMAS T. IRVIN.

Mr. TALMADGE. Mr. President, as the demand for our agricultural commodities is strengthened through export sales, commodity prices are maintained. With higher commodity prices, lower Federal outlays for agricultural support programs are made, and reduced deficit spending and lower taxes are the results.

The benefits of agricultural exports are not limited to agriculture. Our balance-of-trade deficit is reduced by agricultural exports. In 1977 our balance-of-trade deficit was reduced by over $10 billion because of a favorable agricultural trade balance.

In addition, a Department of Agriculture study shows that for the $22 billion of agricultural exports in 1974 there was about $43 billion of total business activity. Thus, each dollar of agritural exports stimulated an additional 96 cents of output—a multiplier effect of almost two. Of the additional $21 billion of activity, $6 billion occurred in agriculture and $15 billion in the nonfarm economy. Thus, about 70 percent of the additional economic activity occurred in the nonfarm part of the economy. This means an estimated 1.2 million full time civilian jobs were related to our agricultural exports in 1974.

There is no doubt that agricultural exports are essential to our farmers and the Nation's prosperity. Measures must be taken to at least maintain and, hopefully, expand these markets—especially in light of the bumper crops predicted for this year.

However, there are indications that, instead, we are losing ground in the worldwide agricultural export market. For example, our share of the world wheat export trade has been reduced in recent years.

It is feared that we will always remain the world's residual supplier of agricultural commodities because we do not have the means to compete effectively with other nations.

There is evidence that we do not offer credit terms as flexible as those offered by other nations. More flexible credit terms are extremely important to increased agricultural trade—especially in the long run.

Extended credit for breeding livestock, for example, will encourage nations to shift from a primarily grain diet to one that includes more meat. As personal tastes and preferences change and the demand for meat increases, this will generate an even greater demand for our corn and other grains to feed the livestock.

Furthermore, credit given to construct facilities to help importing nations handle, process, store, and distribute agricultural imports will increase their capacity to buy more from us many years to come since these facilities would be in operation for several decades.

It appears that other exporting nations are much more aggressive than the United States in competing for agricultural export markets. For example, other nations spend relatively larger amounts of money to promote export sales in terms of trade offices and other sales efforts.

Furthermore, it seems that other nations regard agricultural trade as more important to their economy since their foreign agricultural representatives are given higher rank than our representatives.

Mr. President, the five major program initiatives undertaken by S. 3447 will enable this Nation to begin to compete effectively with others for agricultural export markets.

The cost of the bill in the years ahead will be minimal and far less than its benefits. Increased agricultural exports will increase domestic agricultural commodity prices, raise farm incomes, reduce our balance-of-trade deficit, create jobs, strengthen the dollar abroad, and reduce Government support payments to farmers. In the long term, the bill could save the American taxpayers millions of dollars.

I commend my distinguished colleague from Florida, Senator STONE, for his efforts to bring this important bill to the floor of the Senate. As chairman of the subcommittee on foreign agricultural policy, Senator STONE has worked long and hard, through several hearings and markups, to develop this piece of legislation. Also, I commend the other Senators from the Committee on Agriculture, Nutrition, and Forestry, especially Senators CLARK, BELLMON, DOLE, and LUGAR, who also have spent many hours helping make this one of the most important agricultural bills that the committee has considered this year.

I urge the speedy approval of this bill by the Senate.

Mr. STONE. Mr. President, I thank the distinguished chairman of the full committee for all the assistance he has given this bill.

I yield to the Senator from Indiana (Mr. LUGAR), a member of our subcommittee.

Mr. LUGAR. Mr. President, I appreciate the distinguished chairman of our subcommittee yielding to me in order that I might make this statement.

U.S. exports of agricultural products have increased greatly since 1972. As Senator STONE pointed out earlier, the value of our exports rose from $9.4 billion in 1972 to $24 billion in 1977, and it has been estimated that the value of 1978 U.S. agricultural exports will exceed $26 billion.

As a result of this trend, agricultural exports have become extremely important to the U.S. balance of trade. For example, in 1973 a trade deficit of $8 billion in nonagricultural trade was offset by a $9.2 billion surplus in agricultural trade which resulted in an overall trade surplus of $1.2 billion. In 1976, a $20.7 billion deficit in nonagricultural trade was offset by a $12 billion surplus in agricultural trade resulting in an overall trade deficit of $8.7 billion. Similarly, in 1977 the overall trade imbalance was $29.9 billion. Without agricultural trade the deficit would have been over $40 billion.

Agricultural exports are an important factor in the market for farm products. Nearly 1 acre in every 3 that is harvested goes into the export market. Presently about 60 percent of U.S. wheat production, about 40 percent of U.S. cotton production, about one-third of U.S. soybean production, and about one-fourth of U.S. corn and rice production, are exported. About 20 percent of U.S. farm income is provided by export sales.

The benefits of agricultural export sales are not limited to the farm sector of the economy. A great many nonfarm jobs are dependent on the income accruing from export sales. Thousands of jobs in industries supplying agricultural inputs and marketing agricultural products would be nonexistent in the absence of export sales.

While the growth in U.S. agricultural exports has been impressive and is the only bright spot in a very dark U.S. export situation, the need for increasing U.S. agricultural exports has never been greater.

Farm income declined in 1977 to $19.3 billion, the lowest level since 1964 when adjusted for inflation. Farm income will probably rise in 1978, but once again due to inflation—rising prices of practically all farm inputs, real income will increase very little.

The United States is faced with its second consecutive bumper crop. It is estimated by USDA that corn production in the United States this year will be 6.5 billion bushels, up from last years record 6.4 billion bushels. Soybean production is estimated to be a record 1.8 billion bushels, up from 1.7 billion bushels last year. USDA has estimated ending stocks of corn this year to be 1.3 billion bushels, the highest level in years. Add this 1.3 billion bushels of corn left over to the 6.5 billion bushels of corn produced and the United States has a tremendous 7.8-billion-bushel supply of corn. Add this

corn to the record soybean crop, plus a wheat crop estimated to be 1.8 billion bushels, plus over 1 billion bushels of wheat carried over from the previous year, and we know that the United States has a tremendous amount of agricultural products to consume domestically or to export. I have not even mentioned the huge supplies of many other agricultural products such as cotton and rice.

Any increase in agricultural exports will strengthen farm prices. Farmers will then be able to receive more of their income from the marketplace instead of the Federal Treasury. An increase in exports that would keep market prices above target prices would save the many millions of dollars otherwise expended for deficiency payments promised to farmers.

The United States is currently faced with the biggest balance-of-trade deficit in its history. This trade imbalance is responsible for the continuing decline of the U.S. dollar. This situation of a trade deficit and declining dollar have exacerbated the inflation problem here in the United States. It is really very simple. If the United States is going to import huge quantities of petroleum, automobilies, and other manufactured goods, then the United States must export something to pay for these imports. An increase in agricultural exports would be most beneficial in correcting this unfortunate trade situation.

In January, I introduced a bill that would provide intermediate term credit for the purposes of financing the sale of agricultural commodities produced in the United States. The ideas expressed in my original bill are a substantial part of this legislation—the Agricultural Export Trade Expansion Act of 1978.

Mr. President, I recognize that a leader in this area for a long time was our late colleague, Senator Hubert Humphrey, whose bill, S. 2385, was a part of our consideration. Also, under the distinguished leadership of Senator STONE, the bill introduced by Senator CLARK, S. 2968, and the bill introduced by Senator DOLE, S. 2504, encompassed the areas that I think bear heavily upon any consideration of success in this area—namely, the work of our diplomatic agricultural counselors abroad and the ways and means of expanding exports in the countries that more or less have been friendly or might be sought to be friendly, without leading to great diplomatic imbroglios that might have interfered with this legislation.

An extraordinary job was done by our subcommittee chairman, Senator STONE, in weaving through both the agricultural and the diplomatic aspects of this legislation. We all are indebted to him and to the chairman of our committee, Senator TALMADGE, for their diplomacy and their leadership in making certain that this measure came to the fore.

This legislation would allow for the extension of CCC credit to foreign purchasers of U.S. agricultural products for a period of time greater than 3 years, but not more than 10 years at an interest rate equal to the cost of CCC funds. Three years financing of exports is currently available under conventional short term CCC credit.

This 3- to 10-year intermediate term credit would be available only for uses consistent with developing, expanding, or otherwise improving the capability of the importing nation to purchase and use, on a long-term basis, U.S. agricultural products. More specifically, this intermediate term financing could be used for the export of breeding livestock, the establishment of facilities in the importing nation to improve the handling, marketing, processing, storage, or distribution of imported agricultural commodities. For example, the money could be used for the construction of port facilities, grain elevators, processing plants, and so forth.

I mention this simply to indicate that we are not borrowing from current sales. We are looking toward legitimate purposes of establishing an intermediate term credit situation. The important point is that funds used for these purposes will serve to increase the long-term demand for U.S. agricultural products in foreign countries.

I strongly urge passage of this measure to promote export sales of U.S. agricultural products. This legislation would provide a step toward increasing farm income, reducing the need for Government deficiency payments to farmers, reducing the trade deficit, and strengthening the economy of this country.

Mr. STONE. Mr. President, I thank the distinguished Senator from Indiana for his kind words, but even more for the excellence of his work on the subcommittee and for the input which his own proposed legislation contributed in connection with this bill.

I yield to the ranking Republican member of the full Senate Agriculture Committee, whose bill was a valuable part and whose efforts are a valuable part of this bill.

Mr. DOLE. Mr. President, I thank the Senator from Florida. I commend him and the Senator from Indiana and others who really are responsible for this legislation. The need for it has been outlined rather clearly by the Senators who have spoken.

I share the view of the Senator from Florida, the Senator from Indiana, and the Senator from Georgia, as well as those of the Senator from South Carolina (Mr. MORGAN), who has been interested in this legislation and our efforts and his efforts for some time.

I know that the distinguished Senator from Arkansas will be offering an amendment which we all support and the Senator from Kansas will offer an amendment in a few minutes that would simply require that a minimum aggregate quantity of 7 million metric tons of U.S. farm commodities shall be exported under titles I, II, and III of this act during each of the next 4 years.

It seems to me that this would be of some assistance to what I consider to be a rather depressed farm economy, and I do not see any immediate hope for the American farmer. So this bill certainly will offer some assistance in the right direction as has been indicated before in the realm of exports.

As Senator TALMADGE indicated earlier, there are really five major provisions in this bill.

FIVE MAJOR PROVISIONS

This legislation contains five major provisions to maintain and expand our agricultural export markets. They are:

First: The establishment of an intermediate export credit program.

Second: The extension of credit to exporters that offer deferred payment terms.

And that might open up some markets in the People's Republic of China, for example. It would also, I think, provide a certain amount of flexibility. It is a new approach and one that I think could be helpful to our economy and to our farmers and to those who seek our commodities.

Third: The extension of Commodity Credit Corporation (CCC) credits to nations that promise to become significant new commercial markets;

A fourth important area is the upgrading of the title of our major foreign agricultural representatives from "agricultural attaché" to agricultural counselor." This may appear to be a cosmetic change but in the view of this Senator and others on the committee it will be helpful as they address some of the serious problems in each of their countries.

Fifth: The establishment of agricultural trade offices in nations where significant market opportunities exist.

The bill directly addresses areas that will increase the export of U.S. agricultural commodities. The cost of the bill in the years ahead will be minimal and far less than the benefits.

Increased agricultural exports will increase domestic agricultural commodity prices, raise farm incomes, reduce our balance of trade deficit, create jobs, strengthen the dollar abroad, and reduce Government support payments to farmers. In the long term, the bill could reduce budgetary outlays.

IMPORTANCE OF FARM EXPORTS TO U.S. ECONOMY

A large volume of farm exports is essential to U.S. agriculture. Our farmers devote around 100 million acres each year to production for export—almost 1 acre in 3 that are harvested. Almost 20 percent of U.S. farm income is provided by export sales.

I only suggest as the Senator from Indiana has pointed out we export a lot of our commodities. We presently export over half of our wheat, soybeans, and hides each year, roughly 40 percent of our cotton, nearly a third of our tobacco and soybeans, and over a fourth of our rice and corn. So exports, of course, are critical to our farm economy.

Besides providing an outlet for our abundant agricultural production, the export market serves to strengthen the demand side of the market price equation, and, thus, keep prices up. This is important not only to farmers, but to the Federal budget. Keeping farm prices above the target prices through increased exports saves Federal funds otherwise expended for deficiency payments paid to farmers under agricultural commodity legislation.

The benefits of agricultural exports are, however, not limited to agriculture.

A Department of Agriculture study shows that—for the $22 billion of agricultural exports in 1974—there was about $43 billion of total business activity.

Thus, each dollar of agricultural exports stimulated an additional 96 cents of output—a multiplier effect of almost two. Of the additional $21 billion of activity, $6 billion occurred in agriculture and $15 billion in the nonfarm economy. Thus, about 70 percent of the additional economic activity occurred in the nonfarm part of the economy.

U.S. BALANCE OF TRADE

It is also important to note that the value of U.S. agricultural exports has risen sharply in the past decade—from $6.3 billion in 1968 to $24 billion in 1977; and these exports have been a major positive factor in the U.S. balance of trade.

As a result of this trend, agricultural exports have become extremely important to the U.S. balance of payments. An unfavorable nonagricultural trade balance of $40.1 billion in 1977 was reduced to a deficit of $29.9 billion through agricultural export sales.

Agricultural exports may reach $26 billion in 1978, with a net agricultural balance of around $12 billion.

In a trade report for the marketing year 1976–77 published by the Department of State, corn, wheat, and soybeans ranked first, third, and fifth on the list of principal commodities exported by the United States.

Mr. President, agricultural, industrial, and political leaders increasingly have become convinced that a legislative initiative is necessary to strengthen efforts to increase agricultural exports.

The growing deficit in our balance of trade makes this legislation even more urgent. Agriculture has been one of the few bright spots in our balance-of-payments situation in recent years.

The decline in net farm income to just under $20 billion in 1977 provides a further incentive to increase our export sales and reduce stocks to more manageable levels.

This is why the Agricultural Export Trade Expansion Act ranks high on our list of legislative priorities for the 95th Congress.

Mr. President, I commend my colleagues for their efforts and also the staff in developing this legislation.

Mr. STONE. I thank the distinguished Senator from Kansas.

Mr. President, I ask unanimous consent that a statement by the Senator from Illinois (Mr. STEVENSON) on this bill be printed in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

STATEMENT BY SENATOR STEVENSON

I strongly support passage of S. 3447, The Agricultural Export Trade Expansion Act of 1978, and commend the distinguished Senator from Florida (Mr. STONE) for his outstanding leadership and hard work on this legislation.

In July, the U.S. ran a trade deficit of $3 billion, the fourth largest monthly deficit in U.S. history. The dollar plummeted.

The key to a stronger dollar is better U.S. trade performance which in turn depends upon improved export competitiveness. The July deficit was not caused by oil imports—they were down over the previous month. There were seasonal factors and special circumstnaces as there always are. But the key factor in the trade deficit is the declining competitiveness of the U.S. in the world—the decline in U.S. exports in July came in six of ten major caterogies, including agricultural products.

The Subcommittee on International Finance, which I chair, has conducted comprehensive hearings this year on ways to improve the competitiveness of U.S. exports. At a March 30 hearing in Chicago on Agricultural Export Policies, the Subcommittee heard extensive testimony on the need to improve our agricultural export programs in order to maintain and expand our agricultural export markets and meet increasingly stiff foreign competition. Three consistent suggestions were made by all the witnesses at that hearing—authorize the Commodity Credit Corporation to extend intermediate term credits in support of agricultural exports, enlarge the number of countries eligible for CCC programs, and improve our marketing and promotional activities abroad.

S. 3447 accomplishes each of these purposes. It provides for an intermediate export credit program to be conducted by the Commodity Credit Corporation which should increase the total world market for grains and other commodities. I appreciate the consideration given by the Subcommittee on Foreign Agricultural Policy and by the Committee on Agriculture, Nutrition and Forestry to my own bill in this regard—S. 3011. The availability of three to ten year credit terms, the exemption of the new intermediate credit program from the cargo preference laws, and a specific provision indicating that the intermediate credit program may be used to meet foreign competition are all necessary. In particular, I would like to stress that many of our best agricultural customers, such as Poland, need longer credit terms from the CCC because of bunchings of international debt that will be occurring over the next several years. Simply put, some countries will not be able to acquire substantial amounts of U.S. agricultural products without longer term credits.

S. 3447 will enhance our competitiveness in one of the most promising new export markets for our agricultural products—the People's Republic of China—by making it eligible for CCC financing out of private stocks and a new deferred payment program. S. 3447 will also improve our marketing efforts by providing for the establishment of Agricultural Trade Offices abroad and by upgrading the title of our major foreign agricultural representatives from "Agricultural Attaché" to "Agricultural Counselor."

These changes will benefit not only our trade balance but also our productive farmers and a hungry world. Almost one third of harvested cropland is devoted to agricultural products which are exported. My State of Illinois is the leading farm exporter, exporting farm products totalling $2.5 billion in 1977. It contributed an estimated 19 per cent of the feed grain, soybeans, protein meal, and soybean oil exported in 1977, and was our second largest exporter of meat products.

S. 3447 strikes the proper direction in our farm policy. We should be rewarding the American farmer for his productivity. We should be penetrating foreign markets with his crops, not pricing ourselves out of them. Instead of paying farmers to decrease food production, we should buy it and sell it to the earth's poor. We should use our productivity to assure a fair price for the farmer and food for a hungry, turbulent world.

I commend all the members of the Committee on Agriculture, Nutrition and Forestry for their throughful consideration of this bill, and the distinguished Chairman of the full Committee (Mr. TALMADGE) and the distinguished Chairman of the Foreign Agricultural Policy Subcommittee (Mr. STONE) for their prompt consideration of this most important legislation.

Mr. STONE. I yield to the Senator from Arkansas who I believe has an amendment.

Mr. HODGES. Mr. President, I thank the distinguished Senator from Florida.

He is to be commended, as are those who had so much input into this bill, for what I think is a significant step forward.

I personally know some of the difficulties he has had trying to hold together the State Department and our Agriculture Department and the committee. He has done a splendid job in bringing those various elements together.

I will offer in a moment an amendment to this bill, but I wish first to speak briefly on behalf of the bill, the need for and timeliness of such legislation. Farmers are always being told that the answer to their problems is a greatly expanded level of agricultural exports. This bill would enhance just such a development. Equally significant in my mind is the upgrading of some of our agricultural attachés to the rank of counselors and it should increase the authority with which they can deal with matters of agricultural trade. Establishing agricultural trade offices will increase both the visibility and access of our overseas agricultural representatives and the commodities available for export.

The provisions of the bill allowing for financing of intermediate credit sales, deferred payment sales and sales to the People's Republic of China, finally take account of the great complexity and variety of international agricultural trade today. The changes called for by this bill will greatly extend the flexibility and strength with which the United States can seek to expand agricultural exports and thus improve farm income.

However, I have one misgiving, and my amendment speaks to that point. In addition to providing for the financing of the sale of agricultural commodities to meet credit competition, for the construction of marketing and storage facilities, and for the export of breeding animals, S. 3447 would permit intermediate term financing of the sale of U.S. grain to be used in establishing a foreign country's reserve stock. My amendment would require simply that the Secretary of Agriculture notify the Senate Committee on Agriculture, Nutrition, and Forestry and the House Agriculture Committee of any such agreement and delay implementation of that agreement for 30 days after notification if Congress is in session, 60 days if Congress is not in session. This delay is necessary if Congress is to be able to fully evaluate the impact of a U.S. Government-financed sale to establish a foreign grain reserve and to allow some remedial action if the agreement is found to work against the interests of U.S. farmers.

I want to make it clear that no automatic veto power is intended and that this is not another effort to extend congressional control over program operations. The language in this amendment

is meant merely as a safeguard against a sale in violation of the spirit of this bill—a method of alerting us that an agreement has been made and of giving us time to assure that the agreement contains no long-run impacts that may be disadvantageous.

The Department of Agriculture has yet to win the complete confidence of American farmers. Time after time, the interests of farmers have lost out to the "war on inflation" or to the requirements of an "effective foreign policy." I need only go back as far as this last June for a demonstration. Only months after cattlemen had begun to see the first profitable prices in over 3 years, the import quota on foreign beef was raised, forcing live cattle prices down by almost $15 per hundredweight in a very short time.

The bill before us is meant to improve farm income by expanding agricultural exports. We should not, however, try to increase current export movement if it risks future damage to farm income. A grain reserve of unwarranted size made possible by provisions of this bill could be used to dampen or even control commodity prices at some time in the future.

This same fear generated several amendments which I offered in committee and which were adopted and stand in the current bill. Sections 6(B) and 6(C) of title I of the bill require that in any sales financed under this legislation for establishment of reserve stocks, the Secretary must obtain commitments from purchasers that will insure against any domestic sale or distribution of the reserve stocks except as dictated by an international reserve agreement governing the subject commodity, whether or not the purchasing country has signed the agreement. If there is no governing international agreement, there can be no domestic distribution except for emergency relief that would be required by a crop shortfall or some other natural disaster in that country. Any violation of these commitments by the purchasing country would result in the credit falling due immediately and the cessation of further USDA credits until payment had been made in full.

There has been much discussion during the last several years of the wisdom of allowing the U.S. Government to own any substantial quantity of grain. The size of the Commodity Credit Corporation inventory and the fear of its being dumped dominated American agriculture during the 1960's. To avoid a repeat of that experience, the administration has devoted much talk and energy to the concept of a domestic, farmer-held reserve. I agree that our Government should not hold any reserve. The temptation to use it for short-term economic political gains is too great. Similarly, while I sympathize with any nation's desire to guard against crop shortfall, I do not want any other government to have the power to depress commodity prices by dumping its reserve stocks for whatever short-term gains it may perceive. I am sure the spirit of this amendment reflects the concern of the Committee on Agriculture, Nutrition, and Forestry for the immediate and longrun health of the farm economy.

Mr. President, I urge acceptance of this amendment and encourage the passage of S. 3447 with this amendment.

● Mr. HUDDLESTON. Mr. President, the value of U.S. agricultural exports has risen sharply in the past decade to $24 billion in 1977; and these exports have been a major positive factor in the U.S. balance of trade.

Until 1960, agricultural imports often exceeded the value of agricultural exports, but since then agricultural exports have exceeded imports on a continuing basis.

In 1973, there was a dramatic upswing in the net favorable agricultural export-import balance. Since that time, the annual net favorable agricultural export balance has been in the $10.2 to $12.6 billion range.

As a result of this trend, agricultural exports have become extremely important to the U.S. balance of payments. An unfavorable nonagricultural trade balance of $40.1 billion in 1977 was reduced to a deficit of $29.9 billion through agricultural export sales. In 1976, a $20.7 billion imbalance in nonagricultural trade was reduced to an $8.7 billion deficit because of a favorable agricultural trade balance of $12 billion. In 1975, the United States had a favorable balance of trade of $9.7 billion, and this was largely the result of a $12.6 billion favorable balance in agricultural trade. I am told agricultural exports may reach $26 billion in 1978 with a net agricultural balance of around $12 billion.

In my judgment, a large volume of agricultural exports is essential to U.S. agriculture. Our farmers devote around 100 million acres each year to production for export—almost one acre in three that are harvested. Almost 20 percent of U.S. farm income is provided by export sales. We presently export over half of our wheat each year, roughly 40 percent of our cotton, nearly a third of our tobacco and soybeans, and over a fourth of our rice and corn.

Besides providing an outlet for our abundant agricultural production, the export market serves to strengthen the demand side of the market price equation and, thus, keep prices up. This is important not only to farmers, but to the Federal budget. Keeping farm prices above support prices through increased exports saves Federal funds otherwise expended for deficiency payments paid to farmers under agricultural commodity legislation.

But benefits of agricultural exports are not limited to agriculture. A USDA study shows that—for the $22 billion of agricultural exports in 1974—there was about $43 billion of total business activity. Thus, each dollar of agricultural exports stimulated nearly an additional dollar of output. Of the additional $21 billion of activity, $6 billion occurred in agriculture and $15 billion in the nonfarm economy. Thus, about 70 pecent of the additional economic activity occurred in the nonfarm part of the economy.

An estimated 1.2 million full-time civilian jobs were related to our agricultural exports in 1974. Of this, around 500,000 U.S. farmworkers—14 percent of the U.S. farm labor force—were required to produce the agricultural commodities exported in 1974. In addition, more than 650,000 nonfarm jobs were directly or indirectly related to the assembling, processing, and distribution of agricultural commodities for export. Around 50,000 of these jobs were in food processing; 300,000 in trade and transportation; 100,000 in other manufacturing; and 200,000 in other services.

Mr. President, this bill contains five major provisions to maintain and expand our agricultural export markets. They are: First, the establishment of an intermediate export credit program; second, the extension of credit to exporters that offer deferred payment terms; third, the extension of Commodity Credit Corporation ("CCC") credits to nations that promise to become significant new commercial markets; fourth, upgrading the title of our major foreign agricultural representatives from "Agricultural Attaché" to "Agricultural Counselor"; and fifth, the establishment of agricultural trade offices in nations where significant market opportunities exist.

Mr. President, S. 3447 is timely legislation. It is legislation that is highly important to our agricultural sector and our economy as a whole. I urge my colleagues to join me in supporting this measure.●

UP AMENDMENT NO. 1824

(Purpose: The amendment would require a 30-day waiting period (60 days if Congress is not in session) before any Commodity Credit Corporation financed intermediate credit agreement for the establishment of reserve stocks could become effective)

Mr. HODGES. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. HODGES) proposes an unprinted amendment numbered 1824.

Mr. HODGES. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 19, insert "(A)" after the paragraph designation.

On page 5, line 20, insert a comma after the word "subsection" and between that comma and the word "shall" insert the following: "except agreements to finance export sales for the establishment of reserve stocks,".

On page 5, add a new paragraph (B) after line 24 as follows:

"(B) Agreements to finance export sales of agricultural commodities under this subsection for the establishment of reserve stocks shall be subject to such other terms and conditions as the Secretary may deem necessary and appropriate. No such agreement, however, may become effective or be carried out until the expiration of 30 days following the date on which a detailed summary of such agreement or proposal is transmitted by the Secretary to the Senate Committee on Agriculture, Nutrition, and Forestry and the

House Committee on Agriculture, if transmitted while Congress is in session, or 60 days following the date of transmittal if transmitted while Congress is not in session.".

Mr. HODGES. Mr. President, I have described the amendment. This was discussed in committee. We simply did not have a final answer from the Department of Agriculture. We have been working on this. This is part of a series of controls and restrictions and guarantees the committee wanted and approved.

The Department of Agriculture is willing to go along with this amendment, and has given its consent thereto and, therefore, I ask for its adoption.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. HODGES. I yield.

Mr. CLARK. Mr. President, I ask unanimous consent that two members of my staff, Mr. Bill Motes and Marge Baker, be accorded the privilege of the floor during consideration of this debate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STONE. Mr. President, the majority manager of the bill will accept this amendment. We will do the best we can in conference to persuade our House colleagues to accept this good amendment.

Mr. DOLE. I certainly have no objection. I have checked it with my colleague, Senator LUGAR, and we are very happy to accept the amendment.

Mr. STONE. We yield back our time.

Mr. HODGES. I yield back my time and I ask for the adoption of the amendment.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was agreed to.

UP AMENDMENT NO. 1825

(Purpose: Adding a new title VI, relative to "Food for peace")

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 1825.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 22, line 11, insert the following:

TITLE VI

The Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof a new section 413 as follows:

"SEC. 413. (a) In order more adequately to meet the food requirements of hungry and malnourished people in the developing countries while at the same time providing additional export outlets for American farmers, a minimum aggregate quantity of 7 million metric tons of U.S. farm commodities shall be exported under titles I, II, and III of this Act during each of the following fiscal years: fiscal year 1979, fiscal year 1980, fiscal year 1981 and fiscal year 1982. This aggregate quantity requirement, shall not affect the title II minimum quantities required under Section 201(b) of this Act, since those minimums shall be a part of the total minimum requirement for all titles.

"(a) The export of an aggregate quantity of 7 million metric tons for each such fiscal year under titles I, II and III shall be mandatory unless (1) export supplies are not available as determined under section 401(a) of this Act, or (2) food needs of developing countries do not merit such quantity as gauged by (a) a lack of request for food assistance by the developing countries, or (b) a determination by the Food and Agriculture Organization of the United Nations that unfilled food requirements of the developing nations are less than 7 million metric tons during such fiscal year.

"(c) Should less than the minimum quantities required by this section be exported because of the above criteria, the President shall report to the appropriate committees of Congress the specific reasons for such shortfall.".

Mr. DOLE. Mr. President, I mentioned earlier, at least cited briefly, what the amendment does. It is not a difficult amendment to understand. I might suggest that there is some opposition to the amendment from the administration. Perhaps we could work it out in conference.

Mr. President, this amendment would simply require that a minimum aggregate quantity of 7 million metric tons of U.S. farm commodities shall be exported under titles I, II, and III of the Agricultural Trade Development and Assistance Act of 1954 (P.L. 480) during each of the next 4 years.

This 7 million ton minimum export level for Public Law 480 (the Food for Peace program) would be mandatory unless the President determined that export supplies are not available, or that the food needs of developing countries do not merit such quantity.

Mr. President, during the past 24 years, the Public Law 480 program (or Food for Peace program) has been responsible for $30 billion worth of farm commodity exports.

The great value of this program, in terms of assisting hungry and malnourished people in developing countries, while helping our own farmers, is impossible to comprehend. It is one of the great practical humanitarian steps of all times.

Unfortunately, our Public Law 480 shipments have been declining in recent years. During the decade from 1960 to 1970, for instance, we exported an average of 13.2 million metric tons annually under title I alone. In fiscal year 1978, however, only about 5 million metric tons will be exported under all titles of Public Law 480, and that figure will decline to only about 4 million metric tons in fiscal year 1979.

This quantity will not adequately meet the food assistance needs of about 30 developing nations that will be requesting far more food than the combined quantities planned for fiscal year 1979.

Mr. President, my amendment mandates an annual export level of only 7 million metric tons. Moreover, the amendment provides for a Presidential waiver of this minimum level in the event of a domestic food shortage or a lack of need among developing nations.

Therefore, I ask the support of my colleagues for this amendment which will not only address the food problems of food-short developing countries, but will also help U.S. farmers improve their incomes at a time when many of them are receiving prices less than the cost of production for the commodities they are asked to raise.

Mr. STONE. Mr. President, the distinguished Senator from Kansas makes a very good and valid point. In my capacity as chairman of the Subcommittee on Near East and South Asian Affairs of the Committee on Foreign Relations, I became aware, for example, of a Public Law 480 case in Tunisia, a good friend and ally of the United States, a moderate, one that is helping us, but one which suffered a drought this year.

Yet when the price varied with respect to some of the grains, the commitment and the request, which looked like it was all set to be delivered, had to be altered, had to be reduced, and then they had a difficult problem.

Many countries in the third and fourth world are affected by budgetary and price fluctuations when we are talking about the poorest of the poor getting enough to eat, and when we are talking about our own farmers and growers knowing how much actual product is going to be delivered under this program as opposed to the variations and fluctuations which create uncertainties caused by world price conditions.

So I would accept this amendment with enthusiasm and take it to conference. We do understand the administration does not want to favor any fixed level but, nevertheless, the point made by the distinguished ranking Republican member of our committee is a good and valid one. So we will do everything we can to persuade our House colleagues that it is the right thing to do.

I yield back my time.

Mr. MORGAN. Mr. President, will the Senator yield for just a moment?

The ACTING PRESIDENT pro tempore. The Senator from North Carolina.

Mr. MORGAN. Mr. President, I joined with the distinguished Senator from Kansas earlier this year in cosponsoring a bill that would have done the same thing, and I am delighted that he brought it to the floor as an amendment. I think it is an excellent amendment, one that will not only benefit the farmers of America but certainly aid the poor of the world.

I ask unanimous consent that the Senator allow me to join with him in cosponsoring this amendment.

Mr. DOLE. I thank my distinguished colleague. It is an oversight. It should have been the Dole-Morgan amendment, based on our earlier work, and I appreciate the floor manager's willingness to accept the amendment.

It just seems to me, as I tried to point out in the brief statement, that it serves a twofold purpose: When we look at the decline in our food for peace shipments with some 30 developing countries needing this assistance—and we are talking about food, and this is the kind of assistance most Americans are willing to support—also when you couple that with

what we consider to be a rather important part of our total economy, talking about agriculture, and when we see what is happening in rural America—not in every case but in many cases—where farmers are receiving far less than their cost of production for what they raise, that is why thousands of farmers came to Washington last December, January, February, and all through the spring months—it seems to me that the amendment does have merit.

I might also suggest this was a matter of great interest to our late distinguished colleague, who has probably done more in the food for peace area than anyone, and that was the late Senator Humphrey. So I am pleased that the amendment is acceptable.

The ACTING PRESIDENT pro tempore. Without objection, the Senator from North Carolina will be added as a cosponsor.

Is all time yielded back?

Mr. STONE. I yield back my time.

Mr. DOLE. I yield back my time.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

Mr. STONE. Mr. President, I yield to the distinguished cosponsor of this bill, the Senator from North Carolina (Mr. MORGAN) who, I believe, has an amendment.

Mr. MORGAN. Mr. President, I thank my distinguished colleague from Florida.

Mr. President, I am pleased to rise in support of the Agricultural Trade Export Expansion Act.

Before I begin my remarks, I would like to commend the Senator from Florida, Senator STONE, and the other members of the Senate Committee on Agriculture, Nutrition, and Forestry for developing this forward-reaching legislation.

This legislation is designed to strengthen the role of the U.S. farmer in the world market. As such, it should be considered major farm legislation.

The members of this chamber have discussed, on many occasions, the importance of agriculture in the world economy. This year we will earn about $25 billion in farm exports. Our overseas sales will generate domestic economic benefits of at least $50 billion, impacting in a significant way on an estimated 20 million U.S. jobs.

This legislation is made even more important by the sharp decline of the dollar. We need to export more to reduce our serious trade deficit. Even though agriculture has been one of the few bright spots in our international economic picture, I believe we can export even more food and fiber commodities.

This legislation should be viewed as one part of a two-part ongoing effort to increase our farm exports. Currently, our Government, represented by Ambassador Bob Strauss, is negotiating a new trade agreement that covers both industrial goods and farm commodities. We must have concessions on both tariff and nontariff trade barriers if we are to consider these negotiations to have been successful. Under the leadership of Ambassador Strauss, I believe that we will obtain such concessions.

Mr. President, I do not believe it necessary for me to review this legislation in depth. The four provisions—intermediate credit; establishment of trade offices; deferred payments to the People's Republic of China; and the naming of agricultural counselors—all are designed to move this Nation aggressively forward in the area of farm exports.

I would, however, like to discuss two provisions. The first has to do with the appointment of Agricultural Counselors. I believe that this is a positive step.

Across this Nation, farmers believe that the State Department has more say in farm export policy decisions than the Agriculture Department has. By upgrading the role of agriculture in rank-conscious embassies, agriculture will have more to say about issues of great importance such as trade policy, market development, and food assistance.

This particular provision has concerned me so much that I have introduced two amendments. One requires that these counselors be appointed within 3 years of enactment of this bill. Frankly, I am worried that they will never be appointed if such a provision does not exist. It is my understanding that the distinguished floor managers on both sides are willing to accept the first amendment.

My second amendment would have required that four individuals be named as Minister-Counselors of Agriculture. After much consideration, I have decided not to press this amendment. However, I think that such an amendment makes good sense from the standpoint of sound public policy, for the same reasons that the naming of Counselors makes sense. There are dozens of Ministers in our Foreign Service today. Given the importance of agriculture, it makes good sense to me that we have Minister-Counselors of Agriculture in key areas abroad. Because of my conviction on this approach, I am exploring the possibility of introducing similar legislation next year.

Mr. President, the second provision I would like to discuss momentarily concerns the arrangement of deferred payment sales, the provision that can be found in title II. I believe that this provision is innovative and responsive to a need that will help the United States make inroads into a potentially vast market. While I support this provision, which will help this Nation sell its food and fiber, I would have preferred a bill that would have facilitated credit arrangements with countries that are attractive markets for our farm commodities, but countries we cannot reach because of inflexible finanical arrangements.

Mr. President, I urge that my colleagues support this bill, and I thank our distinguished colleague from Florida for yielding.

AMENDMENT NO. 3580

(Purpose: To require that the sixteen senior Department of Agriculture representatives designated as Agricultural Counselors be designated as such within three years after the date of enactment of the bill)

Mr. STONE. I think the Senator should offer his first amendment now.

Mr. MORGAN. I was not sure whether I had called it up.

Mr. President, I ask that my first amendment, No. 3580, be called up.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. MORGAN) offers an amendment numbered 3580:

On page 10, line 18—

Mr. MORGAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 18, strike out the period after the word "Counselor" and insert in lieu thereof a colon and the following: *Provided further,* That not less than sixteen such representatives shall be designated as Agricultural Counselors within three years after the date of enactment of the Agricultural Export Trade Expansion Act of 1978.".

Mr. MORGAN. Mr. President, this amendment is very simple. My amendment would require that the individuals that are to be appointed to the rank of Counselor be appointed within 3 years of the date of enactment.

This amendment is not intended to be a criticism of the administration. However, I am fearful that there will be a delay in the appointment of these Counselors without such a provision.

Now, I would like to stress that this amendment does not mean that the administration is to wait 2 years and 10 months and then appoint 16 Counselors. Indeed, it is my hope that several Counselors will be appointed shortly after this bill is signed into law.

While I think it important the administration move quickly to name these Counselors, I do hope that the Department of Agriculture will consider individuals who currently are not in Government service. There are many individuals in the private sector with broad experience in market development and trade activities who should be considered for these appointments.

In summary, I expect that the Department of Agriculture will work to find the best individuals, from within or without Government service, to staff these new positions. It is my understanding that the floor managers have agreed to accept this amendment. Therefore, Mr. President, I move acceptance of the amendment.

Mr. STONE. Mr. President, speaking for the majority, we would accept the amendment of the distinguished Senator from North Carolina, and may I add a word: I am quite sympathetic with the Senator's second amendment, personally, and if time had permitted this year I would have loved to push that amendment to this measure. When the Senator offers it next year, I can assure the Senator that if it is assigned to the subcommittee that handled this bill, he will get an early hearing and personal, sympathetic attention from the chairman of the subcommittee, because I believe the Senator is quite right. that in a rank-conscious world, particularly the diplomatic world, the major agricultural markets, for example Japan, could well use a Minister-Counselor and not just a Counselor.

We are talking about big money, and we are talking about big efforts to balance our trade. In my previous travel abroad, I have found that the higher the official pushing for the sale of an American commodity or the lowering of the barriers to that commodity, the higher the official, the better chance you have in making some inroads in the difficult world of trade barriers and export-import sales.

So, speaking for the majority of the committee, we would accept the amendment just read.

Mr. LUGAR. Mr. President, speaking for the minority, we commend the Senator from North Carolina for a very constructive amendment. It follows along the fine work done within the subcommittee and the committee by Mr. CLARK in the production of legislation which upgrades the situation of agricultural diplomacy, together with, of course, the work of our subcommittee chairman, Senator STONE.

We would wish to echo the subcommittee chairman's words that the second portion of the distinguished Senator from North Carolina's remarks are equally commendable, even if such an amendment is not to be introduced today. We enthusiastically support the amendment.

Mr. STONE. Mr. President, I yield back the remainder of our time on this amendment.

The PRESIDING OFFICER (Mr. SASSER). Does the Senator from North Carolina yield back his time?

Mr. MORGAN. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment (No. 3580) of the Senator from North Carolina.

The amendment was agreed to.

Mr. STONE. Mr. President, I yield to the distinguished Senator from Iowa.

Mr. CLARK. I thank the Senator very much.

Mr. President, I support this bill and I hope my colleagues in the Senate will join me in voting to pass it very quickly so that we can complete work on it and get it signed into law this session.

This is, of course, a committee bill. We have all worked on it, I guess, every member of the committee, but many of the major provisions of the bill were also contained in a bill I originally introduced, S. 2968.

I particularly wish to commend Senator Stone and the Foreign Agricultural Policy Subcommittee, and the minority on the committee, for their work in developing this legislation.

Mr. STONE. Mr. President, will the Senator yield at that point?

Mr. CLARK. Yes.

Mr. STONE. I think the subcommittee ought to acknowledge its debt of authorship to the work of the Senator from Iowa. The Senator is quite correct in saying that his bill covers a lot of the subject matter of the subcommittee bill, and moreover, the subcommittee would say those provisions of his bill were extremely helpful to us in the preparation of the subcommittee bill.

Mr. CLARK. I thank the chairman very kindly.

I think this legislation is important not only to the people whom I represent in Iowa, the Iowa farmers, and not just the farmers in Iowa and in other parts of the country. It will help our entire agricultural export situation.

I represent a State that depends heavily on farm exports. Iowa is always either first or second in corn production, and first or second in soybean production. Our dependence on these crops means that production from one of every three acres in Iowa depends on overseas markets. Clearly, the growth and development of overseas markets is essential for a major share of the income of Iowa farmers—and for farmers across the Nation.

It is now a specific policy of our Government to depend on agricultural exports for both a major share of U.S. farm income, and for the $12 billion foreign exchange surplus we enjoy from agricultural trade. The administration used the explicit threat of a veto on many occasions last year when we were debating the 1977 farm bill in order to insure that Congress did not write provisions into that law that would damage our competitive position in foreign markets.

But competitive prices are not enough. If we are to have strong overseas markets, we must systematically work at developing and maintaining them. We must strengthen our market development programs for agriculture and make them more effective in finding new markets and hanging on to the customers we now have.

Other nations spend more of their revenue from exports on developing markets than we do, and they are threatening to beat us out of some markets. It is the purpose of this bill to strengthen our agricultural market development program; to give it more visibility and status; to give it some new tools for our exporters to work with; and to help it move outside the walls of the U.S. Embassy and into those cities where more of the agricultural trade takes place.

Mr. President, in spite of the fact that there is a real and significant need for the market development program to be strengthened and in spite of the fact that strengthening this program is entirely consistent with administration policy, I believe the administration opposes this bill. As I understand it, they would agree to the establishment of a greatly restricted program of intermediate credit, but oppose all the other provisions.

I must confess that I am somewhat puzzled as to why the administration continues to oppose this legislation. I visited with President Carter in late April in his office about this legislation. He seemed very receptive to the principles involved and, indeed, arranged for me to talk to Juanita Kreps, the Secretary of Commerce, who is responsible for coordinating an effort to try to increase exports. But very little has come of those discussions. No proposals were ever made by the administration and, to this date, although they apparently oppose this legislation, they have offered no meaningful alternative—indeed, as far as I know, no alternative of any kind—to increase agricultural exports.

I am deeply concerned by the administration's opposition to this bill—first, because I think it is simply wrongheaded. The administration is afraid to set up a broader intermediate credit program because they fear we might start a trade war with friendly competitors.

The answer to that concern is the observation that whether the State Department knows it or not, we are already in a trade war with some of these friendly countries. No one likes trade wars. But I am told by officials in USDA that our competitors use intermediate term credit when such terms are necessary to make sales.

In fact, we usually do not know the terms of their sales. We, at least, need to have intermediate credit to use as a threat in cases where our competitors use it against us, and that is the way the intermediate credit program in this bill would work. I think it is a good program, and that we need to have it.

Second, the administration's opposition is partly bureaucratic in nature, I think. They oppose the sections of the bill that would authorize more trade offices outside our embassies, and which would upgrade the rank of agricultural attachés. Frankly, I think this opposition is merely petty bureaucratic wrangling over turf. The State Department fears that USDA may get some authorities under this bill that would reduce the Ambassador's ability to control his mission.

I think it is this level of concern that annoys me the most about the administration's efforts against this bill. The State Department and OMB are greatly concerned about the bureaucratic pecking order. I fear that they are so concerned about these mechanical details that they have lost sight of concerns for the U.S. farmers, and for our balance of payments and the national need for foreign exchange. Like Senator TALMADGE, I wonder if we do not need a U.S. desk at the State Department to argue in the inner councils there for the needs of U.S. citizens and taxpayers.

I hope the Senate will pass this bill in spite of administration opposition.

All too often, Mr. President, our policy toward our agricultural market development programs seems to reflect the attitude that they are not really important. When there are shortages around the world, we seem to take the view that it is unnecessary to improve the basis for our agricultural trade, because we have so much of the available supply.

When there are surpluses here and around the world, our policy seems to reflect the view that either increases in foreign trade cannot be accomplished, or if they can, they will not be enough to do any real good. I think the simple fact is that in agriculture, as in high technology, we have one great advantage. These are our great advantages in terms of improving our balance of payments and the soundness of our dollar.

At any rate, as a result of these policies, our foreign market development programs have been turned on and off

several times since World War II. They have never been a central component of our agricultural policy. They have been peripheral, operating in the shadow of other efforts.

The PRESIDING OFFICER. All time of the proponents has expired.

Mr. CLARK. Will the Senator yield 2 minutes?

Mr. STONE. I ask the Republican manager of the bill if he can yield an extra 2 minutes to the Senator from Iowa.

Mr. LUGAR. I am very pleased to yield as much time as the Senator from Iowa requires.

Mr. CLARK. I thank the Senator very much.

It is my view that we can no longer consider the foreign trade component of our agricultural policy as secondary in importance. This is not because our domestic production or price policies are less important. It is because the success of our domestic policies now depend so heavily on the success of our foreign policies and programs.

The importance of our export policies and programs has increased dramatically since 1973. A change in economic circumstances and in world weather converted U.S. agriculture to an export orientation almost overnight. Almost overnight, we came to depend on foreigners for markets for more than half of our soybean production and a quarter of our corn production.

And, we have a very positive balance of trade in agriculture—perhaps some 12 billion in 1978. Clearly, our negative overall balance of trade would have been very much worse without the agricultural exports.

The factors that moved us to an export oriented agriculture were worldwide economic trends and weather, rather than a conscious change in our policy. Because we did not design the policy change, our system of efforts to maintain the increase our overseas markets has not kept pace. It is important that we upgrade these efforts, make them more visible and more effective, and that we insure that they are commensurate with the important role they play in maintaining and increasing the prosperity of American farmers.

Each of the provisions of S. 3447 would help meet that goal.

I believe the intermediate credit provisions of the bill are the most important. They are additions to the current program. We have short term (up to 3 years) commercial credits available from CCC at market rates, and we have very long-term credit under Public Law 480 that permits repayment over a 10- to 40-year period. However, for those purchasers who need somewhat better terms than the current 3-year CCC loans, but who do not need or who cannot qualify for the concessional sales provisions under Public Law 480 long-term programs, there is now no adequate source of credit.

Many countries that are potential markets for U.S. commercial exports do not have adequate facilities to handle or store these products. In many cases, these countries lack adequate credit to permit the construction of such facilities. S. 3447 would permit loans for such facilities.

It is impossible to know how much credit is needed under this program, or exactly what the cost would be. The programs would operate through the existing structure of CCC. The new authorities would permit loans, and Congress would reimburse CCC after the loans were made. The loans would be at commercial rates of interest, and would be repaid.

The level of loan activity under the program would depend on a number of factors, including the price of our products, and their availability both here and in importing countries. USDA estimates outlays under this program at approximately $100 million per year for the first year and at higher levels later on.

The second feature of this bill is to establish U.S. agricultural trade offices in a number of countries. We now have only one such office, in London. Elsewhere, the management of U.S. market development activities is but one of a large number of responsibilities agricultural attachés must carry out, working from U.S. Embassy offices. Because the attachés' attentions must be divided and because cooperators, and private trade representatives frequently cannot conduct business on the same premises as the attachés, coordination and consolidation of activities are greatly hindered. Furthermore, many nonresident exporters are discouraged by the lack of facilities and services at their disposal for market development activities.

This bill would permit trade offices to be located outside embassies. They would be headed by an assistant agricultural attaché and staffed by local nationals for professional and clerical help.

The offices would provide the data for the strategic planning activities needed to formulate long-term market development programs and policies. They would be responsible for the implementation and coordination of all USDA export market promotion activities within each country. They would assist visiting U.S. business representatives and nonresident cooperator personnel in their market development efforts and would provide guidance on the use of Public Law 480 as a development tool for U.S. agricultural markets.

These offices would also provide assistance for exhibits, sales teams, the trade opportunity referral system and assist in developing the industry support for removing trade barriers that inhibit U.S. agricultural exports.

In addition, this bill would upgrade the position of certain officials attached to the diplomatic missions of the United State from "attaché" to "counselor."

These are technical changes in structure, but they are important in making this program more visible and in making it work better.

The fact is, the rank of attaché is too low to permit agricultural representatives access to many of the meetings and functions they need to attend. It significantly reduces the effectiveness of these representatives. Increasing the status of these officials should help upgrade our program of expanding agricultural exports and make it more visible both here and abroad.

Mr. President, I have no illusions that these changes would instantly raise prices in our export markets. They would not. They are mainly technical changes, designed to make our system of export activities work better over the long term. They are not costly, and would far more than pay for themselves over the long run. I believe they are improvements that are long overdue. I hope my colleagues will join me in support of this bill.

Mr. President, I thank the distinguished chairman and the ranking minority member for granting me the time.

UP AMENDMENT NO. 1826

(Purpose: To make certain technical and clerical corrections in S. 3447)

Mr. STONE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. STONE) proposes an unprinted amendment numbered 1826.

Mr. STONE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 9, strikes out "For" and insert in lieu thereof "for".

On page 4, line 11, strike out "The" and insert in lieu thereof "the".

On page 6, line 23, strike out "Agricultural" and insert in lieu thereof "Agriculture".

On page 7, line 12, insert a comma immediately after "nations".

On page 7, line 13, insert a comma immediately after "sales".

On page 8, line 17, insert comma immediately after "commodities".

On page 10, line 4, strike out "whenever" and insert in lieu thereof "wherever".

On page 10, line 12, strike out "of" and insert in lieu thereof "as those of".

On page 13, line 25, strike out "17161" and insert in lieu thereof "1761".

On page 16, line 18, strike out "product for developing, expending" and insert in lieu thereof "commodity for developing, expanding".

On page 19, line 3, strike out "period" and insert in lieu thereof "periods".

On page 19, line 12, strike out "Embassy" and insert in lieu thereof "embassy".

On page 20, line 14, insert "Agricultural Trade" immediately after "the".

Mr. STONE. Mr. President, this is in the nature of a technical and clerical amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

AGRICULTURE AND WORLD TRADE

● Mr. McGOVERN. Mr. President, I support the Agriculture Export Trade Expansion Act of 1978 and view it as another step forward for the American agricultural community. This fiscal year exports will be up between $2 and $3 billion from last year's $24 billion and the volume of these exports will be up between 12 and 14 percent. Both will be new records. When nearly one in every three of our cultivated acres ends up

in international trade it is everyone's business to enact strong legislation to promote and expand our position in world trade.

This legislation pushes us forward on three basic fronts. First of all it expands CCC intermediate export credit from present limits of 3 years to a maximum of 10. A major breakthrough is including the People's Republic of China in that group of nations eligible for credit. Credit has become an important tool in international commerce as it has become in the Nation's national business community. Not only is it an expression of confidence with our trading partners but it gives us a competitive edge or at least an equal credit position with other nations who have a large stake in the international field.

The second important feature of the bill is that part which upgrades our present agriculture attachés to consular status. If we are going into the 1980's with a view toward expanding our agricultural exports, and this we must do, we must give our overseas representatives the status which they need and deserve in promoting our products and advising us of the crop conditions in nations far away from us where climatic conditions are volatile.

Not the last in order of importance is the authorization for establishment of a number of agricultural trade offices in important points of commerce throughout the world. State Department reservations notwithstanding, I feel that there are adequate safeguards in the history of this legislation to protect the integrity of our diplomatic services.

In connection with this legislation, I want to add a word of remembrance and tribute to our beloved and departed friend and colleague Hubert Humphrey. This legislation is Hubert Humphrey's kind of bill. Were he with us now he would applaud our efforts—and probably expand on them—Hubert Humphrey was as great an agricultural trader as this chamber has seen. This bill is certainly in the tradition of Hubert Humphrey's long public service to the Nation and I, for one, do not want to forget his long association with the subject.

Mr. President, as a member of both the Senate Agriculture Committee and the Committee on Foreign Relations I want to point out that in the course of the Senate's consideration of the proposed Agricultural Export Trade Expansion Act, I draw attention to the fact that there are a number of provisions in this measure which raise important foreign policy issues and which properly fall within the legislative purview of the Senate Committee on Foreign Relations. The bill, for example, authorizes short-term agricultural credits to the People's Republic of China; it also authorizes intermediate agricultural credits to permit the United States to compete more effectively against Canada, Australia, Argentina, and others; it provides for the designation of "Agricultural Counselors" in lieu of the more traditional "Agricultural Attachés," and it calls for the establishment abroad of at least six but not more than 25 "Agricultural Trade Offices."

Mr. President, all of these measures are soundly designed with one purpose in mind—to place American agriculture on a more competitive footing in the international arena. This goal is a worthy one and I fully support it. Having said this, I also recognize the foreign policy implications and potential legislative jurisdictional issues raised by the pending bill. Indeed, the jurisdiction of the Foreign Relations Committee is quite clear; it encompasses not only "relations of the United States with foreign nations generally," but also the "diplomatic service," "foreign loans" and "measures to foster commercial intercourse with foreign nations. . . ."

Mr. President, the long and the short of it is that there is much in this bill which the Committee on Foreign Relations could properly have asked to review and consider before it reached this stage of the legislative process. The chairman of Foreign Relations, the distinguished senior Senator from Alabama, was inclined to do just that in fulfillment of the oversight responsibilities assigned to the committee. These are serious responsibilities, as every Member knows and every committee chairman knows too well. In this particular instance, however, Senator SPARKMAN agreed not to request a sequestial referral of the bill in order to permit it to come up during this session. Under the circumstances and the severe time limitations we face, I believe that was the right decision—one in fact which I and others encouraged.

By the same token, however, I think the record ought to be made as clear as possible that this action does not denigrate the committee's jurisdiction or prejudice its oversight prerogatives in any way. In fact, I think it is well to put to advise the Senate that those issues contained in this bill which fall within the foreign policy area and which survive the legislative process this year will receive careful consideration and close scrutiny next year by the Committee on Foreign Relations. As chairman of the committee's Subcommittee on International Operations, I intend to review with the State Department and others the foreign policy implications of these issues during our regular hearings on the annual State Department authorization bill. These hearings will afford ample opportunity for the committee to undertake the kind of review that simply was not possible this year.

In summary, Mr. President, I applaud the spirit of accommodation that permits our consideration of this important measure during the current session and I look forward next year to examining several features of it more carefully from the foreign policy perspective.●

Mr. STONE. Mr. President, I believe there are no additional amendments or pending amendments, so I ask for third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. STONE. Mr. President, does the Republican manager of this bill have remarks at this time?

Mr. LUGAR. Mr. President, I wish to reiterate two things that have been said during this debate.

First of all, the imperative need for exports, the need for income on the part of American farmers and all who are dependent on our farm industry, is evident.

Second, I echo the remarks of the distinguished Senator from Iowa during this debate. He has visited with the President of the United States, the Secretary of Commerce, and others, in attempting to obtain the good will of the administration and various cabinet officials that is required for this legislation to be successful and to serve the country.

I hope that following the passage of this measure by this body and a successful conference with the House of Representatives, the administration will weigh the merits of this bill, which are evident to my colleagues today, and will proceed to give support to an expanded export program for this country.

Mr. President, I am ready to yield back my time.

Mr. STONE. Mr. President, I ask my distinguished colleague not to yield back his time just yet, because we may need a minute or two.

I ask unanimous consent that I may suggest the absence of a quorum, with the time to be charged to the time on the Republican side, since the time of the majority has expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. STONE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STONE. Mr. President, I ask for the yeas and nays on final passage of this bill.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STONE. Mr. President, I believe the Republican side is prepared to yield back their time.

Mr. LUGAR. I am prepared to yield back the time, unless the distinguished floor manager of the bill wishes time.

Mr. STONE. I do not.

Mr. LUGAR. I yield back the time.

The PRESIDING OFFICER. The bill having been read a third time, the question is, shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Delaware (Mr. BIDEN), the Senator from Arizona (Mr. DECONCINI), the Senator from New Hampshire (Mr. DURKIN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HAT-

FIELD), the Senator from Maine (Mr. HATHAWAY), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Rhode Island (Mr. PELL), the Senator from Michigan (Mr. RIEGLE), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I also announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. CURTIS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BARTLETT), the Senator from Massachusetts (Mr. BROOKE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from New York (Mr. JAVITS), the Senator from Nevada (Mr. LAXALT), the Senator from Maryland Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Kansas (Mr. PEARSON), the Senator from Illinois (Mr. PERCY), the Senator from Virginia (Mr. SCOTT), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), and the Senator from Michigan (Mr. GRIFFIN) would each vote "yea."

The result was announced—yeas 65, nays 1, as follows:

[Rollcall Vote No. 376 Leg.]

So the bill (S. 3447), as amended, was passed, as follows:

S. 3447

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Agricultural Export Trade Expansion Act of 1978".

DECLARATION OF POLICY AND PURPOSE

SEC. 2. It is hereby declared to be the policy of Congress, in order to raise farm income, create a more favorable balance of trade for the United States, and promote the general economic welfare, that the United States Government, in concert with private enterprise, engage in a systematic program to expand international markets for United States agricultural commodities. It is the purpose of this Act to provide the means for the development and implementation of such program.

DEFINITION

SEC. 3. The term "agricultural commodity" as used in this Act shall include any agricultural commodity or product thereof.

TITLE I—INTERMEDIATE CREDIT

SEC. 101. Section 4 of the Food for Peace Act of 1966 is amended to read as follows:

"SEC. 4. (a) Commercial export sales of agricultural commodities out of private stocks on credit terms of not to exceed three years may be financed by the Commodity Credit Corporation under its export credit sales program.

"(b)(1) Export sales of agricultural commodities out of Commodity Credit Corporation and private stocks on credit terms in excess of three years, but not more than ten years, may be financed by the Commodity Credit Corporation.

"(2) No export sale may be financed under this subsection unless the Secretary of Agriculture determines that the sale will—

"(A) develop, expand, or maintain the importing nation as a foreign market, on a long-term basis, for the commercial sale and export of United States agricultural commodities without displacing normal commercial sales; or

"(B) otherwise improve the capability of the importing nation to purchase and use, on a long-term basis, United States agricultural commodities.

"(3) Intermediate financing under this subsection shall be available for any use consistent with the provisions of paragraph (2) of this subsection, including, but not limited to, the following uses:

"(A) to establish reserve stocks consistent with international commodity agreements or other stock building plans acceptable to the United States;

"(B) the export sale of breeding animals (including, but not limited to, cattle, swine, sheep, and poultry), including the cost of freight from the United States to designated points of entry in other nations;

"(C) where determined feasible, for the establishment of facilities in the importing nation to improve handling, marketing, processing, storage, or distribution of imported agricultural commodities (either through direct financing or the use of local currency generated from the sale and import of United States agricultural commodities to finance all or part of such facilities); and

"(D) to meet credit competition for agricultural export sales.

"(4) Intermediate financing under this subsection may not be used to encourage credit competition, or for the purpose of foreign aid or debt rescheduling.

"(5) The terms of credit for export sales financed under this subsection shall include the following terms:

"(A) repayment shall be in dollars with interest at a rate equal, as nearly as practicable, to the rate charged by the Commodity Credit Corporation for financing under the Corporation's short-term export credit sales programs; and

"(B) the Secretary may, if the Secretary deems such action appropriate to protect the interest of the United States, require an initial payment from the purchaser at the time of sale or shipment of the agricultural commodity.

"(6)(A) The Secretary shall obtain commitments from purchasers that will prevent resale or transshipment to other nations, or use for other domestic purposes, of agricultural commodities purchased with financing provided under this subsection.

"(B) In financing export sales under this subsection for the establishment of reserve stocks, the Secretary shall obtain commitments from the purchasers that will prevent the domestic sale or distribution of such stocks, except in a manner consistent with an international reserve agreement governing the agricultural commodity involved that has been adopted with the advice and consent of the United States Senate, whether or not the purchasing nation has adopted the agreement. If no such international agreement exists, the Secretary shall obtain commitments from the purchaser that agricultural commodities purchased for the establishment of reserve stocks with financing provided under this subsection will not be sold or distributed domestically, except as needed for emergency relief required by a crop shortfall or other natural disaster.

"(C) If the Secretary finds that a purchaser has failed to comply with commitments made under this paragraph, the full amount outstanding under financing arrangements entered into by the purchaser under this subsection shall become immediately due and payable and no further credits or credit guarantees shall be available to the purchaser from any agency of the Department of Agriculture until payment in full of the amount due has been made.

"(7)(A) Agreements to finance export sales of agricultural commodities entered into under this subsection, except agreements to finance export sales for the establishment of reserve stocks, shall be subject to such other terms and conditions as the Secretary may deem necessary or appropriate and shall be subject only to review by the National Advisory Council on International Monetary and Financial Policies.

"(B) Agreements to finance export sales of agricultural commodities under this subsection for the establishment of reserve stocks shall be subject to such other terms and conditions as the Secretary may deem necessary and appropriate. No such agreement, however, may become effective or be carried out until the expiration of thirty days following the date on which a detailed summary of such agreement or proposal is transmitted by the Secretary to the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture, if transmitted while Congress is in session, or sixty days following the date of transmittal if transmitted while Congress is not in session.

"(8) The provisions of the cargo preference laws shall not apply to export sales financed under this subsection.

"(9) The authority provided under this subsection shall be in addition to, and not in place of, any authority granted to the Secretary or the Commodity Credit Corporation under any other provision of law.

"(c) There are hereby authorized to be appropriated such sums as may be necessary to reimburse the Commodity Credit Corporation annually for its costs for the programs established under this section.

"(d) The term 'agricultural commodity' as used in this section shall include any agricultural commodity or product thereof.".

TITLE II—COMMODITY CREDIT CORPORATION FINANCING OF DEFERRED PAYMENT SALES; CREDIT SALES TO THE PEOPLE'S REPUBLIC OF CHINA

COMMODITY CREDIT CORPORATION FINANCING OF DEFERRED PAYMENT SALES

SEC. 201. (a) To develop new market opportunities for the sale of United States agricultural commodities and to maintain and expand existing foreign markets for such commodities, the Secretary of Agriculture shall provide Commodity Credit Corporation financing to exporters of such commodities who wish to extend deferred payment terms to buyers in other nations in order to meet sales competition from other nations or to make additional export sales. Except as otherwise provided in section 202 of this title, financing under this section shall be available only with respect to sales to those nations that are eligible for financing under the short-term export credit sales program conducted by the Commodity Credit Corporation.

(b) Exporters who are willing to sell United States agricultural commodities to foreign buyers on deferred payment terms of not to exceed three years and who must extend such deferred payment terms in order to meet sales competition from other nations, or to make additional export sales, may apply to the Commodity Credit Corporation for financing such sales. Upon approval of the applicant's export sales plan by the Commodity Credit Corporation, and upon proof of export in accordance with the approved plan, the Corporation shall provide the necessary financing.

(c) Repayment to the Commodity Credit Corporation shall be made in dollars by the exporter in accordance with the terms and at interest rates contained in the approved export sales plan. Interest rates on such financing shall be no higher than those charged for financing under the short-term export credit sales program conducted by the Commodity Credit Corporation.

(d) The Secretary may, if the Secretary deems such action appropriate to protect the interests of the United States, require a performance guarantee from the exporter at the time of the sale.

(e) Financing agreements with exporters entered into under this section shall be subject to such other terms and conditions as the Secretary may deem necessary or appropriate and shall be subject only to review by the National Advisory Council on International Monetary and Financial Policies.

(f) The authority provided under this section shall be in addition to, and not in place of, any authority granted to the Secretary or the Commodity Credit Corporation under any other provision of law.

CREDIT SALES TO THE PEOPLE'S REPUBLIC OF CHINA

SEC. 202. Notwithstanding any other provision of law, in order to develop new, and expand existing, markets for United States agricultural commodities, the Commodity Credit Corporation may provide financing for commercial sales of agricultural commodities out of private stocks on terms of not to exceed three years to the People's Republic of China under (1) the short-term export credit sales program conducted by the Commodity Credit Corporation, and (2) the deferred payment program for exporters established under section 201 of this Act.

TITLE III—AGRICULTURAL COUNSELORS

FINDINGS

SEC. 301. Congress finds that the officials of the United States Department of Agriculture attached to the diplomatic missions of the United States play an important role in developing, maintaining, and expanding markets for United States agricultural commodities and that their position and responsibilities should be at a level commensurate with the magnitude and importance of the objectives they are assigned to accomplish.

AMENDMENTS TO THE AGRICULTURAL ACT OF 1954

SEC. 302. Title VI of the Act of August 28, 1954 (68 Stat. 908–910, as amended; 7 U.S.C. 1761–1768), is amended by—

(1) amending the title designation to read:

"TITLE VI—FOREIGN MARKET DEVELOPMENT";

(2) inserting immediately before section 601 the subtitle designation:

"Subtitle A—Agricultural Counselors and Agricultural Attachés";

(3) in section 601, striking out "agricultural products" wherever that phrase appears therein and inserting in lieu thereof "agricultural commodities", and striking out "said products" and inserting in lieu thereof "such commodities";

(4) in sections 602(a), 602(e), 604, and 605, striking "this title" wherever that phrase appears therein and inserting in lieu thereof "this subtitle";

(5) amending section 602(b) to read as follows:

"(b) Officers or employees assigned or appointed to posts abroad under this subtitle still have the designation of Agricultural Counselor, Agricultural Attaché, or such other titles or designations that shall be agreed to by the Secretary of State and the Secretary of Agriculture, and shall be accorded the same rank and privilege as those of other counselors or attachés in embassies: *Provided,* That the senior Department of Agriculture representative in each of the major foreign agricultural posts, as determined by the Secretary of Agriculture after consultation with the Secretary of State, but in no case less than sixteen such representatives, shall have the title of Agricultural Counselor: *Provided further,* That not less than sixteen such representatives shall be designated as Agricultural Counselors within three years after the date of enactment of the Agricultural Export Trade Expansion Act of 1978.";

(6) adding immediately after section 602 a new section 602A as follows:

"SEC. 602A. (a) To effectuate review of the worldwide supply, demand, and price of agricultural commodities and to promote understanding of problems involved in selling United States agricultural commodities to other nations, each officer or employee appointed and assigned to a post abroad under this subtitle shall annually submit a report, through the Chief of the United States Diplomatic Mission for the nation to which the officer or employee is assigned, to the Secretary of State and Secretary of Agriculture (who shall transmit such report to the chairmen of the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry) detailing the agricultural situation in the nation or area to which the officer or employee is assigned, and including the following information:

"(1) a summary of the supply, demand, and prices of each major agricultural commodity in the nation or area, in order to discover long- and short-term trends in such supply, demand, and prices;

"(2) present and projected imports and exports of agricultural commodities for the nation or area;

"(3) unusual patterns, changes, or distortions, such as those caused by governmental intervention, in the trade and consumption of agricultural commodities in the nation or area;

"(4) trade barriers in the nation or area affecting United States imports;

"(5) governmental and other impediments to domestic food production in the nation or area; and

"(6) other matters that the Secretary of Agriculture considers appropriate in carrying out this section.

"(b) The information in this report shall be compiled periodically on a nation-by-nation basis (or on an area basis where appropriate), organized in a format suitable for a general audience with an interest in foreign agriculture, and made available at a reasonable price to the public."; and

(7) adding at the end of section 604 a new subsection (c) as follows:

"(c) Upon request by the Secretary of Agriculture, each Federal department and agency shall make its services, personnel, and facilities available to the greatest extent within its capability to the officers and employees appointed and assigned to posts abroad under this subtitle in the performance of their functions. The Secretary of Agriculture may reimburse or advance funds to Federal departments and agencies for the services, personnel, and facilities that are made available.".

TITLE IV—ESTABLISHMENT OF UNITED STATES AGRICULTURAL TRADE OFFICES

FINDINGS AND DECLARATION OF POLICY

SEC. 401. (a) Congress finds that United States Government assistance in developing foreign markets for agricultural commodities is declining in real terms and in relation to total agricultural exports, that other major agricultural exporting nations are opening new markets through aggressive market development programs larger in scope than those of the United States, and that the economic strength of United States agriculture depends on developing, maintaining, and expanding international markets for United States agricultural commodities.

(b) It is hereby declared to be the policy of Congress that foreign market development programs be periodically reviewed for their cost effectiveness and that no new demands be made on the United States Treasury unless it can be shown that the benefits from such increased spending will be reasonable in relation to the costs to the United States taxpayer.

ESTABLISHMENT OF UNITED STATES AGRICULTURAL TRADE OFFICES

SEC. 402. Title VI of the Act of August 28, 1954 (68 Stat. 908–910, as amended; 7 U.S.C. 1761–1768), is further amended by—

(1) adding immediately after section 605 the following new subtitle designation and sections:

"Subtitle B—United States Agricultural Trade Offices

SEC. 605A. (a) For the purpose of developing, maintaining, and expanding international markets for United States agricultural commodities, the Secretary of Agriculture, after consultation with the Secretary of State, shall establish not less than six nor more than twenty-five United States Agricultural Trade Offices in other nations.

"(b) Each United States Agricultural Trade Office shall be directed and administered by an Agricultural Trade Officer who shall be a person who by reason of training, experience, and attainments is qualified to carry out the purposes of this subtitle.

"(c) Each Agricultural Trade Officer may be appointed without regard to the provisions of title 5 of the United States Code governing appointments in the competitive service, and may be paid without regard to the provision of chapter 51 and subchapter III of chapter 53 of title 5 relating to classification and General Schedule pay rates, except that no Agricultural Trade Officer may be paid basic pay at a rate in excess of the maximum annual rate of basic pay payable for GS–17 of the General Schedule contained in section 5332 of title 5.

"(d) Each Agricultural Trade Officer shall perform such functions and duties, and have such powers relating to foreign market development, as may be delegated from time to time by the Secretary of Agriculture, after consultation with the Secretary of State, and shall report directly to the Agricultural Counselor or other senior representative of the Secretary of Agriculture in the nation or nations of concern or to such other person

as the Secretary of Agriculture may designate.

"(c) Each Agricultural Trade Officer shall be responsible for the exercise of the powers and the discharge of the duties of the United States Agricultural Trade Office to which the Officer is assigned and shall have the authority to direct and supervise all personnel and activities thereof, subject to approval by the Agricultural Counselor or other senior representative of the Secretary of Agriculture in the nation or nations of concern and guidance from the Administrator of the Foreign Agricultural Service.

"(f) The Secretary of Agriculture may appoint, after consultation wtih the Secretary of State, such other personnel as the Secretary determines to be necessary, and may employ local nationals for the professional and clerical help necessary, to carry out the duties of the United States Agricultural Trade Offices.

"(g) No employee of any United States Agricultural Trade Office may engage in any business, vocation, or other employment, or have other interests, that are inconsistent with official responsibilities.

"(h) Upon the request of the Secretary of Agriculture, the Secretary of State shall regularly and officially attach Agricultural Trade Officers and personnel of United States Agricultural Trade Offices to the diplomatic missions of the United States in the nations in which such officers or personnel are to be assigned by the Secretary of Agriculture, and shall request for Agricultural Trade Officers and other Office personnel, and agricultural officers and employees stationed at United States diplomatic missions, diplomatic privileges and immunities equivalent to those enjoyed by Foreign Service personnel of comparable rank and salary.

"SEC. 605B. Subject to approval and guidance from the Administrator of the Foreign Agricultural Service and the Agricultural Counselor or other senior representative of the Secretary of Agriculture in the nation or nations of concern, the functions of each United States Agricultural Trade Office shall be to—

"(1) increase the effectiveness of agricultural export promotion efforts through consolidation of activities, providing services and facilities for foreign buyers and United States trade representatives, and coordination of market development activities sponsored by the Department of Agriculture;

"(2) establish goals by nation or region and agricultural commodity for developing, expending, and maintaining markets for United States agricultural commodities;

"(3) initiate programs to achieve the export marketing goals approved by the Department of Agriculture;

"(4) maintain facilities for use by nonresident cooperators, private trade groups, and other individuals engaged in the import and export of United States agricultural commodities where the use of such facilities will aid in the conduct of market development activities;

"(5) develop and maintain a current listing of trade, government, and other appropriate organizations for each agricultural commodity area and make such listing available to persons with a bona fide interest in exporting or importing United States agricultural commodities;

"(6) originate and provide assistance for exhibits, sales teams, and other functions for the promotion of United States agricultural commodities;

"(7) under the direction of the General Sales Manager, provide practical assistance for the use of the programs under the Agricultural Trade Development and Assistance Act of 1954, the export credit sales program, the export incentives program, and related programs of the United States Government where use of such programs will serve as a market development tool for United States agriculture;

"(8) supervise project agreements with United States cooperators, coordinate the activities of the United States Agricultural Trade Office with those of the cooperators, and submit annual recommendations to the Administrator of the Foreign Agricultural Service on the efficacy of coperator programs, including statements as to whether project agreements should be extended, amended, canceled, or allowed to expire;

"(9) publicize the services offered by the United States Agricultural Trade Office through advertisements in trade journals or by other appropriate means; and

"(10) perform such other functions as the Secretary determines necessary and proper for achieving the purposes of this subtitle.

"SEC. 605C. (a) In addition to the United States Agricultural Trade Offices to be established under section 605A of this subtitle, the Secretary of Agriculture may establish one such office in the United States if the Secretary determines that doing so would achieve the purpose of this subtitle.

"(b) Subject to exceptions made by the Secretary consistent with the purpose of this subtitle, any domestic United States Agricultural Trade Office shall operate under the same provisions of law applicable to any such office in another nation.

"SEC. 605D. Nothing in this subtitle shall be construed to diminish the authority of the officers and employees of the Department of Agriculture appointed and assigned to posts abroad under subtitle A of this title.

"SEC. 605E. In establishing the United States Agricultural Trade Offices, the Secretary of Agriculture, after consultation with the Secretary of State, may rent or lease (for periods of less than ten years) such offices, buildings, grounds, and living quarters as the Secretary of Agriculture may deem necessary, make payments therefor in advance, and maintain, improve, repair, and furnish water and utilities for such properties.

"SEC. 605F. United States Agricultural Trade Offices shall be centrally located in the cities of assignment to facilitate foreign trade meetings and foreign trade reliance on such offices for assistance in marketing activities, but shall not be colocated with a United States embassy.

"SEC. 605G. Upon request by the Secretary of Agriculture, each Federal department and agency shall make its services, personnel, and facilities available to the greatest extent within its capability to the United States Agricultural Trade Offices in the performance of their functions. The Secretary of Agriculture may reimburse or advance funds to Federal departments and agencies for the services, personnel, and facilities that are made available.";

(2) redesignating section 606 as section 606A and inserting immediately after new section 605G, as added by this Act, the following subtitle designation and new section 606:

"Subtitle C—Representation Allowances, Regulations, General Provisions, and Authorization for Appropriations

"SEC. 606. United States Agricultural Trade Officers, and officers and employees of the Department of Agriculture appointed and assigned to posts abroad under subtitle A of this title shall, under regulations prescribed by the Secretary of Agriculture, be entitled to a representation allowance in an amount determined by (1) the extent to which an Agricultural Trade Officer, or officer or employee, can effectively use such funds to further the purposes of this title and (2) the extent to which it is at a level commensurate with representational and promotional efforts by other major agricultural exporting nations competing in markets assigned to the Agricultural Trade Officer, or officer or employee.";

(3) redesignating sections 602(d), 602(f), and 603 as sections 606B, 606C, and 606D, respectively, and inserting the redesignated sections immediately after section 606A of this title, as redesignated by this section;

(4) in section 606C, as redesignated, striking out "subsection" wherever that word appears therein and inserting in lieu thereof "section";

(5) redesignating section 602(e) as 602(d); and

(6) adding at the end thereof a new section 609 as follows:

"SEC. 609. The term 'agricultural commodity' as used in this title shall include any agricultural commodity or product thereof.".

## TITLE V—GENERAL PROVISIONS

### IMPLEMENTATION OF THIS ACT; REGULATIONS

SEC. 501. (a) The Secretary of Agriculture shall implement this Act as expeditiously as possible consistent with the efficient and effective administration of the programs established under this Act and their integration with related foreign agricultural programs.

(b) The Secretary may issue such regulations as may be necessary to implement the provisions of this Act.

### AVAILABILITY OF APPROPRIATED FUNDS

SEC. 502. Appropriations made available to carry out foreign agriculture related functions within the Department of Agriculture shall be available to implement the provisions of this Act.

### PROHIBITION AGAINST DISCRIMINATION

SEC. 503. No person shall on the ground of sex, age, race, color, religion, handicap, or national origin be excluded from participation in, denied the benefits of, or subjected to discrimination under, any program or activity funded in whole or in part with funds made available under this Act.

### ANNUAL REPORT

SEC. 504. The Secretary of Agriculture shall transmit to Congress each year a report that shall include a comprehensive statement of the activities and accomplishments of the Department of Agriculture in developing, maintaining, and expanding foreign markets for United States agricultural commodities during the preceding year.

### EFFECTIVE DATE

SEC. 505. The provisions of this Act shall become effective October 1, 1978.

## TITLE VI—EXPORTATION OF FARM COMMODITIES

SEC. 601. The Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof a new section 413 as follows:

"SEC. 413. (a) In order more adequately to meet the food requirements of hungry and malnourished people in the developing countries while at the same time providing additional export outlets for American farmers, a minimum aggregate quantity of seven million metric tons of United States farm commodities shall be exported under titles I, II, and III of this Act during each of the following fiscal years: fiscal year 1979, fiscal year 1980, fiscal year 1981, and fiscal year 1982, This aggregate quantity requirement shall not affect the title II minimum quantities required under section 201(b) of this Act, since those minimums shall be a part of the total minimum requirement for all titles.

"(b) The export of an aggregate quantity of seven million metric tons for each such fiscal year under titles I, II, and III shall be mandatory unless (1) export supplies are not available as determined under section 401(a) of this Act, or (2) food needs of developing countries do not merit such quantity as

gauged by (A) a lack of request for food assistance by the developing countries, or (B) a determination by the Food and Agriculture Organization of the United Nations that unfilled food requirements of the developing nations are less than seven million metric tons during such fiscal year.

"(c) Should less than the minimum quantities required by this section be exported because of the above criteria, the President shall report to the appropriate committees of Congress the specific reasons for such shortfall.".

Mr. STONE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LUGAR. I move to lay that motion on that table.

The motion to lay on the table was agreed to.

Mr. STONE. Mr. President, I ask unanimous consent that the secretary of the Senate be authorized to make clerical and technical corrections in the engrossment of S. 3447.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STONE. Mr. President, I want to thank my distinguished colleagues, the Senator from Indiana (Mr. LUGAR), the Senator from Kansas (Mr. DOLE), and the other members of our subcommittee, Senator CLARK, Senator MORGAN, and others, who participated in this bill, and also the committee staff who worked diligently to make this bill a constructive effort to extend agricultural sales.

I yield the floor.

## ORDER OF BUSINESS

Mr. STONE. Mr. President, I ask unanimous consent that I be allowed to yield to the distinguished Senator from Georgia for the introduction of and the immediate consideration of a resolution without intruding on the time of the bill and that the record not be interrupted so that the resolution and remarks of the distinguished Senator from Georgia will appear after the passage or action on the current bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

## EXPRESSION OF THE SENSE OF THE SENATE ON OUTCOME OF THE MIDDLE EAST SUMMIT CONFERENCE

Mr. NUNN. Mr. President, I send to the desk a resolution and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the resolution.

The legislative clerk read as follows:

S. RES. 554

Whereas President Jimmy Carter, Prime Minister Menachem Begin, and President Anwar Sadat have requested people of all faiths to pray that peace and justice may result from the deliberations of the Middle East Summit Conference: Now, therefore be it

*Resolved*, That it is the sense of the Senate to urge people of all faiths to pray that the outcome of the Middle East Summit Conference will be successful, and that the deliberations of the Conference will be based on understanding, humility, and willingness to negotiate for solutions acceptable to all sides in order to further the effort for lasting peace and justice in the Middle East.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. SPARKMAN. Mr. President, reserving the right to object, and I do not intend to object, I do want to call attention to the fact that always, in the past, when resolutions such as this were offered, I as chairman and other members of the Foreign Relations Committee have insisted that they be referred to the committee for consideration. I do not intend to make that objection to this pending resolution because of the urgency and timeliness of it. Therefore, I shall not object, but I do not want this to be considered as a precedent in any way, because I think the only orderly way of handling these things, generally, is for them to be referred to the committee for consideration. This is an unusual case, and I, therefore, shall not object. Moreover, it is a resolution that I agree with completely.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the immediate consideration of the resolution.

The Senate proceeded to consider the resolution.

Mr. NUNN. Mr. President, I, of course, want to thank my colleague from Alabama, the chairman of the Foreign Relations Committee (Mr. SPARKMAN) for his understanding in permitting this resolution to be considered in a timely fashion. I do believe that if every Member of the Senate read the resolution, there would be 100 percent approval of it.

I have a number of cosponsors. The Senator from Alabama (Mr. SPARKMAN) has indicated that he will cosponsor the resolution. Also, Mr. CURTIS, Mr. HATFIELD of Oregon, and Mr. CHILES are original sponsors of the resolution.

I ask unanimous consent that the following Senators' names be added as cosponsors: Senator ANDERSON, Senator BELLMON, Senator ROBERT C. BYRD, Senator CHAFEE, Senator CRANSTON, Senator DANFORTH, Senator DECONCINI, Senator DOLE, Senator HANSEN, Senator GLENN, Senator HEINZ, Senator LUGAR, Senator MCCLURE, Senator PACKWOOD, Senator PERCY, Senator RANDOLPH, Senator STONE, Senator TOWER, Senator TALMADGE, Senator SCHMITT, Senator SASSER, Senator HOLLINGS, Senator HODGES, Senator LEAHY, Senator GARN, Senator RIEGLE, Senator STEVENS, Senator THURMOND, Senator ALLEN, and Senator MORGAN.

Mr. President, I ask unanimous consent their names be included as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, Wednesday afternoon, in a statement released at Camp David, President Carter, President Sadat, and Prime Minister Begin made a direct appeal for the prayers and support of people of all faiths as they begin their historic deliberations.

Mr. President, I would like to quote very briefly from that joint appeal. It states:

After four wars, despite vast human efforts, the Holy Land does not enjoy the blessings of peace. Conscious of the grave issues which face us, we place our trust in the God of our fathers, from whom we seek wisdom and guidance. As we meet here at Camp David we request people of all faiths to pray with us that peace and justice may result from these deliberations.

It is signed by Mr. Begin, Mr. Sadat, and Mr. Carter.

Mr. President, this really is a direct apepal from the leaders involved in this crucial set of negotiations for the prayers and support of people of all religious faiths as they begin their historic deliberations.

The resolution I off today is in response to this earnest and sincere solicitation of our prayers.

When I say "our prayers," I mean all the people of the United States and the world.

The three principals, although of different faiths, are deeply religious men. I am convinced that each truly seeks a meaningful and lasting peace in the Middle East.

This resolution calls on men and women of all faiths to prayerfully and reverently ask for God's guidance in the current deliberations at Camp David. Today, there can be no doubt that the three men gathered in the Cactoctin Mountains depend on the support of Almighty God as they seek to find mutually agreeable solutions to extremely complex problems.

There are many specific ways Americans can respond to the request for prayerful support from Mr. Begin, Mr. Sadat, and Mr. Carter on their search for peace. I will not in any way attempt to name all those ways today, because I cannot even envision all the ways that this prayerful support could come about through various groups in this country.

But churches and religious groups may want to hold special prayer services to pray specifically for the success of the Camp David summit conference.

Churches, synagogues, and mosques throughout the country may want to place a special emphasis on this initiative in their regular worship services over the next few days.

Men and women in public life may want to make a statement in support of the appeal.

Citizens may want to send messages supporting this "call to prayer" to the capitals of Israel and Egypt and to the White House.

These are just a few things people can do throughout the country.

A great repository of spiritual faith and strength exists within the hearts and minds of millions of citizens of this country and, indeed, throughout the world. I am confident Americans will respond with prayerful support of President Carter, President Sadat, and Prime Minister Begin as they continue their crucial mission searching for peace and justice in the land that is still known as the Holy Land, the Middle East.

I thank my colleague from Florida for yielding me this time. I thank the Senator from Alabama for his consideration in allowing this resolution to be brought forward for immediate consideration.

Mr. President, I will certainly yield

for comments any other Senator would like to make.

Mr. SPARKMAN. Will the Senator yield to me briefly?

Mr. NUNN. I am glad to yield.

Mr. SPARKMAN. I also want to say that I have discussed this with Senator CASE, the ranking minority member of the Foreign Relations Committee, and he is in full accord. He is not on the floor at the present time, but I believe the record should show that he supports this decision.

Mr. NUNN. I also express my appreciation to Senator CASE for his consideration.

Mr. LUGAR. Mr. President, I appreciate the comments by the distinguished Senator from Alabama, the chairman of the Foreign Relations Committee, that the resolution was cleared with the minority and, specifically, Senator CASE.

I commend Senator NUNN for an extraordinarily perceptive and sensitive resolution, of which I am proud to be a cosponsor.

I agree that the procedural question was important, that the Foreign Relations Committee should have been consulted, obviously has been on the majority and minority sides, and I simply wanted to record that for the record.

Several Senators addressed the Chair.

Mr. NUNN. I thank the Senator from Indiana for his comments and for his cosponsorship of this resolution.

Mr. President, I ask unanimous consent that during this day other Senators who have not been able to be contacted in terms of their cosponsorship of this resolution be permitted to add their names as cosponsors for the remainder of this legislative day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Will the Senator from Georgia yield?

Mr. NUNN. I yield to my colleague from Vermont.

Mr. LEAHY. Mr. President, I ask unanimous consent that my name be added as a cosponsor of the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I found the call for prayer from Camp David to be a very moving one this week. I know, as a Catholic, I found myself joining our Baptist President, the Jewish Prime Minister of Israel, and the Moslem President of Egypt in prayer.

I hope that that was the attitude taken not only by those of us in Government, but by those throughout the United States and throughout the world.

None of us can predict what will be the result of Camp David, but, certainly, it is a setting in which there is total bipartisan hope for success.

There is no more troubled area in the world than the Middle East today. There is no area showing greater potential for disaster, disaster that conceivably can be worldwide, than the Middle East, and there is no area in the world needing the good will of all people more.

So I commend my colleague from Georgia for the resolution. I hope the combined prayers, wishes, hopes, aspirations of people in this country and, really, throughout the world, will help to move forward the talks at Camp David.

Mr. NUNN. I thank the Senator from Vermont for his comments.

Mr. GLENN. Will the Senator yield?

Mr. NUNN. I yield.

Mr. GLENN. Mr. President, I appreciate the Senator's yielding.

I would like to be added as a cosponsor of the resolution. I think it is very worthwhile. I commend the Senator from Georgia for his initiative in placing this resolution before the Senate. I think it is needed. I think we see too much going our own way in the world today and maybe not the way of whatever higher powers there are to guide us, whatever our religious background may be.

I commend the Senator from Georgia for bringing this to the attention of the Senate and I ask to be added as a cosponsor.

Mr. NUNN. I thank my colleague from Ohio.

Mr. President, I ask unanimous consent the Senator from Ohio be added as a cosponsor and that the Senator from Arkansas (Mr. HODGES) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. I thank the Senator from Florida for yielding.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 554) was agreed to.

The preamble was agreed to.

## THE NATURAL GAS CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I would like to inquire at this time, so that Senators will be on notice as to what to expect during the afternoon, as to whether or not it would be possible to call up the gas conference report today, debate it, and get an agreement that for today only there would be no motion to table the conference report. This would protect Senators who are away from a surprise motion to table the conference report on, perhaps, the most important subject matter that has come before the Congress, and it would allow for some debate during the afternoon, with the time equally divided.

So I, therefore, ask unanimous consent that Senator JACKSON proceed with calling up the conference report today, that there be no votes with respect to the conference report, that no motion to table the conference report be in order today, and that the time for debate be equally divided between Mr. JACKSON and Mr. HANSON or their designees. That is my request.

Mr. ABOUREZK. Mr. President, reserving the right to object, may I be recognized?

Mr. ROBERT C. BYRD. Mr. President, I have the floor. The Senator may reserve the right to object.

The PRESIDING OFFICER. The Senator may speak on the reservation.

Mr. ABOUREZK. We went all through this yesterday, a couple of times. I have to just reiterate what I said yesterday when I objected to the same sort of request, now modified somewhat with respect to time.

If the majority leader or the distinguished chairman of the Energy Committee would like to bring up the national gas conference report under the Senate rules, either one has that right. Nobody is objecting to anybody bringing up the natural gas conference report. I am all for it. Everyone I know in this little coalition we have is all for bringing it up. The only thing we cannot agree to is some sort of a motion or—we do not want to preclude ourselves from offering anything, from any right we have under the rules, offering a motion, a tabling motion or whatever. We just do not want to preclude ourselves from that.

If we were to agree not to have any kind of a tabling vote today, for example, what would happen? I think everyone recognizes that Senator JACKSON, Senator METZENBAUM, and myself would be here on the floor discussing it with each other all day long, and everybody else goes home. We would be here, on perhaps the most important domestic issue of the last decade, talking to ourselves. I do not think that is right or fair, and I would hope the distinguished majority leader would not ask us to go through that.

We believe that if Members of the Senate are in their offices, at least if they think there is a vote or there might be a vote coming up, we believe we will have a shot, at least, at getting some of them over here to listen to the debate.

As I said yesterday, the conference report we are to consider was drafted in secret. We were not allowed to ask questions on it, we were not allowed to debate it all during the year; it was kept even from those of us on the conference committee who did not agree with deregulation.

I think we are entitled and I think the Senator is entitled to at least have an open-air debate, a debate out in the sunshine, as I have heard said so many times around here, where Senators can listen to the debate and where we can talk and argue back and forth; and I would hate, through a procedural maneuver, just to send everyone on back to their States to campaign for a few days, and the rest of us just sit here and talk to each other about it.

So, Mr. President, I regretfully and reluctantly must object to the unanimous-consent request.

Mr. ROBERT C. BYRD. Mr. President, I respect the distinguished Senator from South Dakota tremendously. I respect him for many reasons. I respect his courage, his forthrightness, and his integrity, and I respect his being against the conference report.

Let me say, however, when the Senator says there would be no objection to bringing up the conference report, that conference reports are privileged, and if they cannot be brought up by unanimous consent, they can be brought up by nondebatable motion. So it is not a question of being able to bring it up today. The question is whether it can be brought up without a surprise motion to table that conference report being made.

I had the votes here yesterday to defeat a tabling motion. My concern was, if we brought it up yesterday, that today, about 4 o'clock in the afternoon or 5 o'clock in the afternoon, or 6 o'clock, 7 o'clock, or 8 o'clock in the afternoon, a motion to table that conference report could be made, and I was not about to anticipate such a vote occurring when I would be concerned about absentees, many on both sides of the question, many on both sides of the aisle.

So for that reason I shall not ask Mr. JACKSON to proceed with the conference report this afternoon, because a motion could be made to table that conference report at any time today, up until midnight.

But, Mr. President, for the information of the Senate, agreement or no agreement, the Senate will proceed on Monday to take up the natural gas conference report. I have sought an agreement that would protect Senators from a sudden surprise motion, but all Senators are now on notice. They will be alerted over the weekend to expect anything to happen beginning Monday. There can be procedural votes, there can be motions to table the conference report, there can be votes on getting the Sergeant at Arms to get Senators to come in—there can be all kinds of motions made, if Senators want to indulge in them, and some of them are nondebatable and require immediate votes.

So, with that, may I say that the Senate is coming in at 11 o'clock on Monday morning, and Senators may expect anything, and they should, of course, prepare their schedules accordingly.

So, for today—and I apologize for the rollcall vote; I make no bones about it, I asked for that rollcall vote. I had not previously asked for a rollcall vote this year, but I asked for that rollcall vote so I could see what our absentee situation was, just in the event we did call up that conference report today, and to see where the votes were, and for various other reasons in connection with the natural gas conference report. I apologize to the Senate for doing that; I thought the reasons were sufficient, but that I should point them out.

Mr. METZENBAUM. Mr. President, will the majority leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. METZENBAUM. I think it is only fair that the majority leader be advised, and I would hope he would advise other Members of the Senate, that at some time on Wednesday a motion to recommit with instructions will be brought up. At exactly what point that will be brought up is undetermined at the moment, but I think it would be fair to say we would not anticipate bringing that up on Monday or Tuesday.

I think I reflect a great body of opinion here in the Senate, particularly on the part of those who have joined in the "Dear Colleague" letter relative to the motion to recommit, that we do not anticipate nor do we support a motion to table the conference committee report, it not being our desire to kill the bill, but rather to have a positive alternative.

Mr. ROBERT C. BYRD. I appreciate what the Senator has said. I do not doubt his sincerity, and I know his word is his bond. But without absolute unanimous consent to guarantee no motion to table at any time today I cannot afford that risk, because when a Senator gets the floor, he cannot be taken off the floor, and can speak up to midnight and then move to table. As I say, I cannot afford to run that risk this afternoon.

May I say that I will make no further unanimous-consent requests with respect to the natural gas conference report today, and I will protect all Senators on both sides of the aisle against any unanimous-consent request that deals with the energy conference report, with this exception: I would like to get unanimous consent that the Senator from Washington (Mr. JACKSON) be recognized on Monday after the two leaders have been recognized under the standing order, or at any time during the day, and I will assure Mr. METZENBAUM and Mr. ABOUREZK that that will not be done until they are on the floor.

I ask unanimous consent that Mr. JACKSON be recognized at some point during the afternoon on Monday to call up the conference report.

The PRESIDING OFFICER (Mr. BURDICK). Is there objection?

Mr. ABOUREZK. Mr. President, reserving the right to object, and I shall not object, you are only asking, not for him to hold the floor, but just that he be recognized to call up the conference report, and at that time the rules take effect?

Mr. ROBERT C. BYRD. Exactly. I just want to guarantee that the conference report will be called up at that time.

Mr. METZENBAUM. Will the majority leader be good enough to explain why the unanimous-consent request is needed?

Mr. ROBERT C. BYRD. It is so that Senator JACKSON will get the floor. That is the only point.

Mr. BARTLETT. Mr. President, reserving the right to object, those of us on this side of the aisle, Senator HANSEN and myself, would also like to be notified.

Mr. ROBERT C. BYRD. Yes.

Mr. BARTLETT. I listened to a unanimous-consent request a little while ago and we got here as quickly as we could. We would like to be notified of any action to be taken. If that is the understanding, that is fine. If that is not the case, we will just be on the floor.

Mr. ROBERT C. BYRD. May I apologize to the Senator? I knew the request would be objected to. I knew the Senator's side was ably represented, and I knew the request was going to be objected to. I apologize to the Senator.

Mr. JACKSON. I will assure the Senator that the minority side will be notified in advance before I call up the conference report.

Mr. BARTLETT. Not only the minority side, but also Senator HANSEN and myself.

Mr. JACKSON. Specifically, Senator BARTLETT and Senator HANSEN.

Mr. ABOUREZK. I think the reason for Senator BARTLETT's concern is that he knew I was over here, and he knows I have been negotiating to get a poison gas facility built in South Dakota in exchange for my vote on the natural gas bill. He is concerned that I might sell out. That is why he is concerned.

[Laughter.]

Mr. ROBERT C. BYRD. Mr. President, today is a good day for jokes but we should get on with our work.

Mr. LUGAR. Reserving the right to object, and I will not object, I want to assure my colleague (Mr. BARTLETT) that I was going to object in his behalf as I know his feelings. I would raise the question with the majority leader, respectfully, if he has any idea, or if he could advise us, about what time on Monday morning or afternoon Senator JACKSON might be seeking recognition, if there is any time in mind?

Mr. ROBERT C. BYRD. The Senator thinks between 11 o'clock and noon.

Mr. LUGAR. Between 11 o'clock and noon on Monday he anticipates his opening statement?

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. One moment. Is there objection? The Chair hears none and it is so ordered.

## SECOND CONGRESSIONAL BUDGET RESOLUTION

Mr. HUDDLESTON. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on House Concurrent Resolution 683.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the concurrent resolution (H. Con. Res. 683) revising the congressional budget for the U.S. Government for the fiscal year 1979, and requesting a conference with the Senate on the disagreeing votes of the two House thereon.

Mr. HUDDLESTON. I move that the Senate insist upon its amendment and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MUSKIE, Mr. MAGNUSON, Mr. HOLLINGS, Mr. CRANSTON, Mr. CHILES, Mr. ABOUREZK, Mr. BELLMON, Mr. DOLE, Mr. MCCLURE, and Mr. HEINZ conferees on the part of the Senate.

## LICENSE FEES AND EXEMPTIONS UNDER THE PERISHABLE AGRICULTURAL COMMODITIES ACT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1079.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 976) to amend the Perishable

Agricultural Commodities Act, 1930, relating to practices in commodities.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Agriculture, Nutrition, and Forestry with an amendment to strike all after the enacting clause and insert the following:

SECTION 1. (a) Effective January 1, 1979, section 1 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499a), is amended by—

(1) in subsection (6), striking out "$100,000" and inserting in lieu thereof "$200,000"; and

(2) in subsection (7), striking out "$100,000" and inserting in lieu thereof "$200,000".

(b) Section 1 of the Perishable Agricultural Commodities Act, 1930, is further amended by inserting in subsection (6) immediately after "(C) no person buying any commodity" the following: "other than potatoes", except that no person buying potatoes for processing solely within the State where grown shall be deemed or considered to be a dealer under subsection (6) of section 1, as amended by this subsection, until January 1, 1982.

SEC. 2. Section 3(b) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499c(b)), is amended by—

(1) striking out "$100" in the third sentence and inserting in lieu thereof the following: "$300, plus $50 for each branch or additional business facility operated by the applicant in excess of twenty such facilities, as determined by the Secretary. Total annual fees for any applicant shall not exceed $1,000 in the aggregate";

(2) inserting immediately before the fourth sentence a new sentence as follows: "The Secretary may assess a single uniform license fee for all applicants, or the Secretary may assess a graduated fee based upon the amount or type of business conducted by the applicant or both.";

(3) inserting immediately after "referred to above:" in the fourth sentence the following: *"Provided,* That the amount of money accumulated and on hand in the special fund at the end of any fiscal year shall not exceed 25 percent of the projected budget for the next following fiscal year:"; and

(4) inserting "further" immediately after *"Provided"* in the fourth sentence.

Mr. ROBERT C. BYRD. Mr. President, there may be rollcall votes on amendments to this bill and a rollcall vote on passage. I assure all Senators I will not ask for any further rollcall votes today, because I have the information I need.

May I ask Mr. HUDDLESTON if he has any indication of rollcall votes on amendments or final passage?

Mr. HUDDLESTON. I will advise the majority leader I have no information that any amendment or final passage will require a rollcall vote. I know of one amendment, the amendment by the Senator from Iowa.

Mr. ROBERT C. BYRD. Would Mr. CLARK indicate whether or not he expects a rollcall vote?

Mr. CLARK. Mr. President, I have no desire to ask for a rollcall vote.

Mr. HUDDLESTON. Mr. President, I do not think we can guarantee there will not be a rollcall vote so far as we know now.

Mr. ROBERT C. BYRD. I think we better take Mr. HUDDLESTON's words exactly at face value as we would at any time. He says, for the information of the cloakrooms, there can be no guarantee that there will not be rollcall votes on amendments or on passage. He knows of no desire for rollcall votes on anyone's part at this point, but they could occur.

I thank the Senate and I thank the Senator.

Mr. BAYH. Will the Senator yield for a unanimous-consent request?

Mr. HUDDLESTON. I yield,

Mr. BAYH. Mr. President, I ask unanimous consent that a member of my staff, Mr. Jay Townsend, be permitted access to the floor during the debate and discussion on this particular legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, S. 976 amends the Perishable Agricultural Commodities Act (PACA) to—

First. Increase from $100,000 to $200,000 the value of fresh and frozen fruits and vegetables that retailers may purchase, and the value of transactions frozen food brokers may negotiate, annually before they become subject to PACA license requirements, effective January 1, 1979;

Second. Make potato processors subject to licensing under PACA as "dealers" (except that no person buying potatoes for processing solely within the State where grown would be deemed to be a dealer until January 1, 1982);

Third. Permit increasing the maximum annual license fee from $100 to $300, plus $50 for each branch or additional business facility in excess of 20, up to a total of $1,000, and permit the Secretary of Agriculture to assess a single uniform license fee for all applicants, or a graduated fee based upon the amount or type of business conducted by the applicant or both; and

Fourth. Limit the amount of money that could be accumulated and held in the special fund for the administration of PACA at the end of each fiscal year to not more than 25 percent of the projected PACA budget for the next fiscal year.

The basic objective of the Perishable Agricultural Commodities Act (PACA) is to establish a code of fair-trading practices governing the marketing in interstate and foreign commerce of fresh and frozen fruits and vegetables and cherries in brine and to aid in the enforcement of contracts for marketing these commodities. Under PACA, it is unlawful for any commission merchant, dealer, or broker in connection with any transaction in interstate or foreign commerce to engage in certain unfair trade practices. Among these are:

First. To reject or fail to deliver in accordance with terms of a contract, without reasonable cause;

Second. To dump, discharge, or destroy without reasonable cause any lot received on consignment;

Third. To fail or refuse to account correctly and pay promptly for any lot;

Fourth. To fail to perform any specification or duty arising out of a contract without reasonable cause;

Fifth. To misrepresent or misbrand as to character, kind, grade, quality, quantity, size, pack, weight, condition, degree of maturity, or State, country, or region of origin; and

Sixth. To fail to maintain adequate records and accounts. Enforcement is through a system of licenses. Every commission merchant, broker, and dealer, including certain retailers and processors, operating subject to PACA is required to be licensed. Most applicants encounter no problems in obtaining licenses. However, the Secretary of Agriculture may deny licenses to certain individuals for specific reasons spelled out in the law, including false or misleading statements in the application, a history of repeated violations of PACA, the criminal record of the applicant, failure to pay reparation awards, or failure to furnish required surety bonds. Licenses may be suspended or revoked for violations of PACA.

There are two main phases of activity in administering PACA. First, the Secretary is authorized to hear and decide disputes that involve claims for damages resulting from any violation of the fair trading principles. Complaints are filed with the Secretary; investigations are made as warranted; and, if possible, amicable settlements are worked out between the parties. If a dispute cannot be settled informally, it may become a formal proceeding in which the parties are given an opportunity to submit evidence in support of their positions, either at an oral hearing or by written submissions of evidence. If the Secretary concludes that a violation has occurred, he determines the amount of damages sustained and issues an order requiring the offender to pay such damages to the injured party by a specified date. The offender's license is automatically suspended unless he pays the amount of the award or appeals the Secretary's decision to a district court of the United States, as provided in PACA.

The second main phase of activity relates to disciplinary measures. These include administrative proceedings by the Secretary to suspend or revoke licenses for violations of PACA and court actions to collect civil penalties for operating without a license, together with injunctions to restrain further operations.

Mr. President, this legislation raises the exemption for both retailers and frozen food brokers from the licensing requirement of PACA from $100,000 to $200,000. The proposed increase in the index of wholesale food prices that have taken place since the amount of the exemption was last set by Congress in 1969. Since 1969, wholesale prices for fresh fruit and vegetables have doubled.

PACA is self-supporting from annual license fees. These fees are deposited in a special PACA fund and all costs of administration of PACA—except for legal services—are financed from these fees.

The Secretary may set the level of the annual license fee, within the maximum provided in the law, at an amount suffi-

cient to provide the revenue to meet anticipated expenses for administering PACA. Before the license fee can be raised, the Secretary must publish the proposed rate, giving all interested persons an opportunity to file their comments or objections. The present maximum fee authorization of $100 was established in 1969.

The statutory ceiling on license fees must be raised because of: First, the declining number of firms operating subject to license, and second, the increasing cost of administering the law. At present, the number of firms licensed is approximately 16,127, compared with an all-time peak of about 27,000 in 1956. This trend toward fewer licensees results from the continuing mergers and consolidations in the fruit and vegetable industry and the closing of many small firms.

Despite the decline in number of firms licensed, the number of complaints filed under PACA and the requests for advice and assistance have remained relatively constant. During the past fiscal year, a total of 2,318 reparation complaints were handled by the Department under PACA. Informal amicable settlements were arranged in 1,268 such cases, resulting in payments to the parties of approximately $5.5 million. In addition, 382 formal orders were issued by the Department's judicial officer awarding reparations amounting to over $2.3 million. The Department makes no charge for the handling of these complaints.

This bill limits the amount of money that could be accumulated and held in the special fund for the administration of PACA at the end of each fiscal year to not more than 25 percent of the projected PACA budget for the next fiscal year. Since the administration of PACA is dependent entirely on fees collected, the Department of Agriculture should maintain a reasonable reserve of collected fees to support the continued provision of program services. However, this reserve should be limited to the minimum amount necessary for reserve purposes, which is estimated to be one-fourth of annual program expenditures.

Mr. President, this bill is equitable and fair and I urge my colleagues to join me in support of this measure.

Mr. President, I ask unanimous consent that the committee amendment be agreed to and that the bill as amended be considered as original text for purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, will the Senator yield briefly?

Mr. HUDDLESTON. Yes; I yield.

Mr. TALMADGE. Mr. President, I should like to compliment the distinguished chairman of the subcommittee for the outstanding job he did on the bill.

I also commend the ranking minority member of the subcommittee and the full committee (Mr. DOLE) and Senator LUGAR and Senator CLARK for the outstanding jobs they did on this legislation. I wholeheartedly support its passage and urge the Senate to approve it.

Mr. DOLE. Mr. President, I only say, as has been expressed by the distinguished floor manager, the chairman of our committee, that this is a good bill.

Since it was enacted in 1930, the Perishable Agricultural Commodities Act has served us well in assuring fair trading and market practices in the fresh and frozen produce industry.

PACA protects growers from certain unfair trade practices, including nonpayment by commission merchants, dealers, and brokers of contract obligations. The Secretary of Agriculture may hear and decide disputes involving claims for damages resulting from violations of the act.

The Secretary may also take disciplinary actions against violators.

PACA's licensing system is an important enforcement tool. But since 1930, the fee charged for licenses has been the same for all operators, regardless of their size.

The structure of today's food marketing system has changed since 1930. Now there are not only the local operators, but large retail chains with hundreds of stores across the country. Branch stores often get their produce from local growers as well as through national chain distribution systems.

It seems to me that these big operators should carry more of the burden of financing PACA than the small operators.

The bill contains a provision permitting the Secretary of Agriculture to assess up to $50 for each additional branch store or business location that a licensee has, over 20 branches, up to a total of $1,000. Within this framework, the Department of Agriculture should be able to adjust the fee scale to provide adequate funding for PACA without hurting licensees like the "mom and pop" store whose operations are mostly local.

Mr. President, I urge the enactment of S. 976.

Mr. BUMPERS. Mr. President, I ask unanimous consent that Wanda Weaver of my staff be permitted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CLARK. Mr. President, I ask unanimous consent that Bill Motes and Marge Baker of my staff be granted the privilege of the floor.

Mr. LUGAR. I make a similar request for David Lyons of my staff.

Mr. DOLE. I ask the same privilege for Dolores Klumpp of my staff, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1827

Mr. CLARK. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. CLARK) for himself and others, proposes unprinted amendment numbered 1827.

Mr. CLARK. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, after line 5 add a new section as follows:

SEC. 3. Section 3(b) of the Farm Labor Contractor Registration Act of 1963, as amended (78 Stat. 920, as amended; 7 U.S.C. 2042), is amended—

(a) by striking out the word "or" at the end of paragraph (8), striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon and the word "or"; and

(b) by adding at the end thereof a new paragraph (10) as follows:

(10) Any person who would be required to register solely because they are engaged in any such activity solely for the purpose of supplying full-time students or other persons whose principal occupation is not farmwork to detassel hybrid seed corn or sorghum for seed, and to engage in other incidental farmwork for a period not to exceed four weeks in any calendar year: *Provided*, That such students or other persons are not required by the circumstances of such activity to be away from their permanent place of residence overnight: *Provided, further*, That such full-time students or other persons, if under 18 years of age, are not engaged in providing transportation in vehicles caused to be operated by the contractor.".

Mr. CLARK. Mr. President, I ask unanimous consent that Senators BAYH, LUGAR, PERCY, STEVENSON, and MORGAN be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CLARK. Mr. President, I am submitting today an amendment designed to correct a problem that is an example of government out of control. This amendment would exempt a portion of the seed industry, including the hybrid seed corn industry, from the Farm Labor Contractor Registration Act of 1963.

Congress passed FLCRA in 1963 to protect migrant and seasonal workers who were being exploited by professional farm labor contractors. It was legislation that was very badly needed. When the act was amended in 1974, I supported that effort because the Labor Department was not adequately protecting workers from exploitation by unscrupulous contactors.

The Senate report to the 1974 amendments described the migrant workers which the act was intended to protect:

Today, the bulk of the migrant workforce is made up of Mexican-Americans, Puerto Ricans, West Indians, and native born black Americans.

Migrant and seasonal farm workers have long been among the most exploited groups in the American labor force. Despite their hard toil and valuable contribution to our nation's economy, their lot has historically been characterized by low wages, protracted hours, and horrid working conditions. The families, and particularly the children of these workers have also suffered from the typical symptons of chronic poverty—being undereducated, ill-fed, poorly housed, and lacking even the most rudimentary health and sanitary facilities.

The 1974 amendments to FLCRA were designed to prevent this exploitation by requiring farm labor contractors to be fingerprinted, to register annually with the Secretary of Labor, and to designate the Secretary as their agent for service of process. Detailed information concerning the vehicles and housing provided for workers was required as well

as compliance with special insurance provisions, and a medical examination for vehicle drivers. In addition, contractors were required to keep detailed employment records and make detailed disclosures to workers concerning all aspects of the worker's employment.

FLCRA required annual registration and detailed information (including fingerprints) because of the transient nature of this type of farm labor. Because migrant and seasonal farm workers often traveled far from their homes and because (as the Senate report indicated) they suffered from all of the handicaps of poverty, they were extremely dependent upon the contractor that recruited them and vulnerable to exploitation. The 1974 amendments have improved the protection of these workers.

Until last year, the Labor Department did not seek to enforce FLCRA against the seed corn industry. However, last year, the Labor Department made a series of decisions that extended the provisions of the act to people who are clearly not migrants by any reasonable definition, and who were not intended to be included in the coverage provided by the act. These are young people ranging in age from 14 to 16 years old who work for an average of 10 days to 2 weeks each summer to detassel seed corn, eliminate "rogue" plants, and perform other functions, related to seed production.

These young people normally work within 30 or 40 miles of their homes and return to it each evening. The act, as it is now construed by the Department of Labor, defines these persons as seasonal and migrant farm workers.

Because the act defines these young people as "migrant and seasonal farm laborers," any person—usually a local high school principal or coach—who recruits, hires, transports, supervises, or deals with these young people while they are detasseling corn, must now register as a farm labor contractor. That means that the law treats established, well-known local citizens in exactly the same way it treats the most unscrupulous, fly-by-night labor contractor.

My constituents in Iowa are very much up in arms about this, Mr. President, and I must say that I do not blame them. I think that it is ridiculous for the Government to classify a local high school coach or principal as a migrant labor contractor if he arranges for some of his students to detassel corn during the summer. I have been contacted by the Governor of Iowa, the chairmen of the house and senate agriculture committees of the Iowa State Legislature, and by the ranking members of those committees.

I have been contacted by several seed corn companies, and by dozens of private individuals. The people of the State of Iowa I believe, think that this application of the FLCRA is a prime example of what is wrong with our Government today. It is an example of the failure on the part of the Government to be sensitive to the difference between an important need for a strong protection, and a situation where such rule is frustrating, costly, and unnecessary.

Mr. President, I consider my amendment to be a last resort. Last February 23, when I first became aware of the construction the Department of Labor was putting on this act, I wrote to Secretary of Labor Ray Marshall and asked him to reconsider the decision to regulate corn detasseling operations under FLCRA. I discussed the problems with Assistant Secretary Elisberg in my office, and I discussed it with Secretary Marshall over the telephone. My staff had repeated contacts with USDA staff over the issue as well.

However, the Department of Labor has refused to change its position.

In a May 2 letter, signed by Assistant Secretary Elisberg, USDA said that existing exemptions in the law would be adequate when the industry modified its operations to take advantage of them.

Mr. President, the existing exemptions do not get to the root of the problem, and they are not adequate. The current exemptions do not change the fact that young Iowans who live at home and work near home, are classified as migrants because they work a few days detasseling corn. And the current exemptions do not change the fact that established local citizens must register and be fingerprinted and fill out long forms if they want a few days work arranging for kids to detassel corn.

And, the current exemptions do not effectively exempt most of those Congress intended to exempt in 1974. To detassel seed when it must be detasseled, workers must be moved to where the fields are. Frequently, that is more than 25 miles from the home of the person arranging for the labor. And, to arrange for labor, it is common for advertisements to be put in local newspapers.

If that paper has a circulation beyond a 25-mile radius from the home of the person arranging for the labor, he must register as a contractor. Most newspapers have a circulation beyond that radius. Thus, the current exemptions do not effectively deal with the problem.

Because we were unable to get relief from these rules from the Department of Labor, I am offering this amendment today. It is a narrow amendment. It is specifically designed to exempt from the FLCRA young people who work in the seed industry during the summer, primarily corn detasselers. I believe it would not affect other types of workers.

Mr. President, temporary summer work such as detasseling has been performed by young people in my State for many years; and there has never been any evidence of exploitation of the type which FLCRA is intended to prevent. Detasselers are covered by the minimum wage and child labor provisions of the Fair Labor Standards Act as well as by the Occupational Safety and Health Act.

In most cases, they are transported to the fields either in personal vehicles driven by local adults, who many of the young people have known all their lives, or in school buses subject to State school bus inspection laws and driven by specially licensed drivers. Companies operating in my State maintain liability insurance for their vehicles equal to that required by FLCRA.

The number of jobs provided by the seed industry to young people each year is very large. The American Seed Trade Association estimates that more than 280,000 young people are engaged as temporary employees by the seed industry. Pioneer Hi-Bred International, Inc., which is headquartered in Des Moines and produced about 30 percent of the seed corn in 1977, employed about 50,000 people in detasseling last year, paying wages of nearly $14 million. DeKalb AgResearch, Inc., another large company active in Iowa, employed 32,000 detasselers in 1977.

Not only does the seed industry utilize primarily student labor, but also the supervisors who recruit and transport them are not professional contractors.

Normally, detasselers are recruited, transported, and supervised by employees of the seed companies or by other community residents seeking some extra income through part-time work. Many of the people in my State who would be required to register are schoolteachers or college students who have returned home for summer vacation. In summary, the people employed on a part-time basis by the seed industry are generally middle-class Americans, far different from the exploited groups which FLCRA was originally intended to protect.

Under the Labor Department's present policy, any individual who recruits students to work in the seed industry or transports them beyond 25 miles would be required to register. As a result, thousands of community residents who organize or transport young people on a part-time basis must register as farm labor contractors. The American Seed Trade Association estimates that more than 19,000 people would have to register. In contrast, during 1977, the Department of Labor reported about 12,000 registrations for all agriculture activities (other than the seed industry throughout the entire country).

Registration of these individuals is not necessary and will harm legitimate enforcement of FLCRA. The adults that recruit and transport young people in the seed industry have been adequately regulated by State and local law for many years. When Congress looked into the exploitation of migrant workers, it found no evidence of abuse in the seed industry. I have heard from many people in my State who resent the unnecessary paperwork associated with registration, and especially the requirement to be fingerprinted. Unnecessary enforcement of FLCRO breeds resentment against this law and against the Government employees that enforce it, but more importantly, it diverts Labor Department resources from focusing on the abuses and exploitation that the act was originally intended to prevent. I am concerned that if resentment continues to grow, the public may seek to have the entire law repealed; thereby ultimately damaging the very groups which the law was intended to protect.

The amendment that I am introducing is a narrow exemption to FLCRA that will exempt the seed industry to the extent that it does not use traditional migrant workers and professional con-

tractors; and it will not disturb the coverage of "day haul" operators which Congress, in 1974, sought to regulate.

On two other occasions, since 1974, amendments to FLCRA were adopted, exempting activities which were never intended to be covered. Like certain activities of the sheep-shearing industry and the custom poultry industry, the activities of the seed industry I have enumerated today should not be covered by FLCRA.

Mr. President, we in Congress must reduce the unnecessary intrusion of the Federal Government into the lives of the ordinary citizen. My amendment is intended to correct just such an abuse, without in any way diluting the protection the act was originally intended to afford.

Mr. President, I ask unanimous consent to have Senator DOLE added as a cosponsor of the legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, it is a privilege for the Senator from Indiana to be able to join with my colleague and friend from Iowa in introducing this amendment.

I have been working with our distinguished colleague from Iowa and have shared many of the same frustrations he has shared. I would like to reiterate the general thrust of his very detailed and very thorough explanation of why this amendment is necessary.

When Congress amended FLCRA in 1974 strengthening the act, I supported that effort because the Labor Department was not adequately protecting migrant workers from exploitation by unscrupulous farm labor contractors. Hearings held by both the House and the Senate demonstrated that many contractors recruited workers with exaggerated promises, skimmed large amounts from the worker's wages, transported them for long distances in unsafe vehicles, failed to furnish adequate housing, and paid workers in cash without keeping records of withholding taxes.

In order to combat these abuses, the major provisions of FLCRA (as strengthened by the 1974 amendments) require that farm labor contractors register annually with the Secretary of Labor, and be fingerprinted. Detailed information concerning the vehicles and housing provided for workers is required as well as compliance with special insurance provisions and a medical examination for vehicle drivers. In addition, contractors are required to keep detailed employment records and make detailed disclosures to workers concerning all aspects of the worker's employment.

Annual registration and detailed information was required because of the transient nature of this type of farm labor. Since migrant and seasonal farmworkers often travel far from their homes, they are extremely dependent upon the contractors that recruit them.

Until a few years ago, anybody who spent much time in a migratory labor camp, could not help but come away with the terrible feeling that this really was not the way people who work for a living should be treated in the United States of America. I believe that the 1974 amendments have greatly improved the protection of these workers.

However, having been a supporter and involved in the passage of that original act, it came as a significant shock to the Senator from Indiana to see that particular act, designed to meet a very real life-or-death emergency situation, construed to be applicable to a totally different and unrelated situation.

One of the first jobs I had as a young farm boy was to work for a neighbor who was in the seed corn business, and participate in the detasseling process.

It is a short-term, short-period kind of situation. It involves the use, primarily if not totally, of neighborhood kids, friends, families, farm neighbors, and their children in trying to meet the intense labor requirements at a given moment.

Recently, the Labor Department has begun imposing FLCRA upon the seed industry which rarely employs traditional migrant and seasonal farmworkers and professional farm labor contractors. The seed industry should be subject to FLCRA to the extent that it employs migrant workers and professional farm labor contracts; however, for the most part, the industry hires local young people ranging in age from 14 to 16 years old for a few weeks each season to detassel seed corn, eliminate "rogue" plants, and perform other functions. These young people normally work on farms nearby their homes and return home each evening.

They receive the minimum wage and are protected by the child labor provisions of the Fair Labor Standards Act and by the Occupational Safety and Health Act. In addition, they are normally transported in schoolbuses which are subject to State schoolbus inspection laws or in personal vehicles driven by the same adults that might transport them to the community swimming pool. Companies operating in my State maintain liability insurance for their vehicles equal to that required by FLCRA. According to the American Seed Trade Association the number of jobs provided by the seed industry to young people each year is approximately 280,000.

Mr. President, normally, detasselers are transported and supervised by employees of the seed companies or by other community residents seeking some extra income through part-time work. Many of the people in my State who would be required to register are schoolteachers or college students who have returned home for summer vacation. It is not unusual for a high school football coach to recruit his players in order to raise money for uniforms.

Under the Labor Department's present policy any individual who recruits students to work in the seed industry or transports them beyond 25 miles would be required to register. This would require the Department to register thousands of these community residents as farm labor contractors. According to the American Seed Trade Association approximately 19,000 people would be required to register. In contrast, during 1977, the Department of Labor reported about 12,000 registrations for all agricultural activities throughout the entire country. It is hard to believe that the Department can protect the workers that the act was intended to protect with its current resources if it actually enforces FLCRA against the seed industry.

Moreover, the registration of these individuals serves no useful purpose and is virtually unenforceable. Because the individuals who supervise and transport the detasselers also live permanently in the community, annual registration, fingerprinting, and the other requirements designed to keep traveling contractors subject to regulation are not needed; State and local law is sufficient. In addition, since these supervisors work for only a few weeks a year and since there are literally thousands of them, it would be virtually impossible for the Labor Department to insure registration.

When this matter first came to our attention, I thought it would be relatively easy to resolve. I shared the experience that has already been related to the Senate by our good friend from Iowa of trying to persuade the Secretary to rectify this problem administratively. I think the problem was a handful of bureaucrats under the Secretary with the immediate responsibility for carrying out this act. They first refused to consider it. Second, they said, "We'll take a look at the regulation."

Later, they said, "We'll not change the regulation, but we will just turn our head and not enforce it very much."

That is a ridiculous state of affairs and that is why I think this amendment which is before the Senate now is critical.

Mr. President, FLCRA was intended to protect migrant workers by registering professional farm labor contractors. We in Congress never expected the Labor Department to register high school teachers. In 1974 when the strawberry industry in the Pacific Northwest expressed its concern that the act might be applied to teenage berry pickers and the community adults that supervised them, we specifically referred to this as the kind of situation the act was not intended to cover. The problem now confronting the seed industry in my State is virtually identical to that anticipated in 1974 by the strawberry industry. I am sure that had we known in 1974 that the Labor Department would seek to enforce FLCRA against the seed industry several years later, this too would have been mentioned as another illustration of the kind of activity which the act was not intended to cover.

The amendment that I am cosponsoring is a narrow exemption to FLCRA that will exempt the seed industry to the extent that it uses student workers and community supervisors. If a corporation or farmer uses both traditional migrant and seasonal farmworkers as well as students and other local temporary workers, it is the intention of this amendment that the corporation or farmer would be covered under the FLCRA only to the extent that it acts as a farm labor contractor with respect to traditional migrant or seasonal farmworkers. The corporation or farmer would not be sub-

ject to the act with respect to the students and other temporary local workers referred to in this amendment.

Mr. President, I deeply believe in the goals of FLCRA; the Federal Government has a legitimate role in protecting traditional migrant and seasonal farmworkers because of a long history of abuse and exploitation of this underprivileged workforce which is so vital to our Nation's economy. However, FLCRA was never intended to apply to the situation I have referred to today in which thousands of teenagers work in fields near their homes for a few weeks each summer. The intrusion of the Federal Government in this way is unnecessary and must be stopped.

I appreciate the excellent job the Senator from Iowa has done. I have considered it a privilege to work with him.

Mr. LUGAR. Mr. President, I appreciate very much the opening statements made on this amendment by Senator CLARK and my distinguished colleague from Indiana (Mr. BAYH).

Mr. President, early in July, I received a number of letters from the seed industry in Indiana and from young people employed in the detasseling of hybrid seed corn in Indiana informing me of a Department of Labor policy which regards these young people as migrant laborers and requires labor contractors engaged in the hiring, transporting, and supervising of these young people to follow complicated registration procedures.

This Labor Department policy is based on a new interpretation of a law to protect traditional migrant work crews. Beginning in 1976, the Department of Labor began to apply the Farm Labor Contractors Registration Act of 1963 (FLCRA) to the activities of the seed industry, principally, seed corn detasseling. These work activities are performed during several weeks of the summer by high school and college students on summer vacation. Students have historically detasseled, rogued, and pollinated seed crops and were never treated as migrant workers until 1976. Incidentally, most of the supervisors of these student crews are students or teachers, also on summer vacation.

On July 21, 1978, I wrote to Secretary Ray Marshall suggesting that the Department of Labor had stretched the intent of the FLCRA by applying it to seed corn detasselers. Labor, however, advised me that its application to detasselers was within the scope of the FLCRA as amendment in 1974. I disagree.

My study of the FLCRA's legislative history indicates that Congress did not intend for it to apply to the detasseling situation. In fact, report language accompanying the 1974 amendments offers specific direction that the act was not to apply to student or other local berrypickers in the Pacific Northwest—a situation nearly identical to that of seed corn destasselers.

On August 2, in an informal sense, I introduced an amendment to the Labor-HEW appropriations bill, H.R. 12929, which would, in effect, overturn this policy of the Department of Labor toward young workers who fill summer jobs detasseling seed corn in Indiana and other States. This amendment was referred to the Committee on Appropriations where no action was taken.

Shortly after introducing this amendment, I learned of a similar effort to correct this situation initiated by Senator CLARK. I have since joined this effort with Senators CLARK, CULVER, BAYH, and PERCY. We have drafted this amendment which would exempt certain activities of the seed industry from regulation under FLCRA. Activities exempted include detasseling but also include activities such as roguing and hand pollenating which are typically performed by young people. This amendment is narrowly drawn so that only temporary employees of the seed industry who work in the fields near their homes would be exempted. Furthermore, our amendment would not affect the various State and Federal laws, including OSHA and the Fair Labor Standards Act, which currently protect student detasselers.

I urge passage of this amendment that would correct a situation that has threatened the summer jobs of 280,000 young people.

Mr. President, clearly, the points at issue here have been well made, but let me reiterate them for the sake of my colleagues.

Each of us who has been in contact with young people involved in detasseling seed corn, whether in the State of Iowa, a great corn producing State, the State of Indiana that often ranks along with and just behind Iowa in terms of production of corn each year, realize that something has occurred here that we believe was not intended. Senator CLARK, Senator BAYH, both indicated, others might, as I will, that we have been in communication with the Secretary of Labor, Mr. F. Ray Marshall, and his agents to see whether this could, in fact, be clarified by simply administrative language and policies of that Department.

I think each of us have been frustrated and confounded that a point of view that seemed to us relatively commonsense and straightforward has not been accepted.

In view of that, each one of us in our own way has proceeded to try to bring some commonsense to the situation.

I am very pleased to be a part of the introduction of the amendment today and a part of this debate. I am hopeful that the signal given by what I am certain will be unanimous—well, I hope unanimous—but at least overwhelming consent, will be a relief to a problem which has been meaningful.

My colleague from Indiana (Mr. BAYH) has described in detail his youth in working with the detasseling process. In my own experience, I had a similar happy occupation on my own farm in Indiana working with other people.

I think that the facts of the matter are that in a narrow sense the Department of Labor is trying not to give ground unnecessarily. I appreciate the idealism through which this is all being approached.

Some time ago a 25-mile limit had been mentioned as the defining point as to what becomes a neighborhood farm exercise and something involving migratory labor of 25 miles on most country roads in Indiana or here or elsewhere is not very far. There should be a greater capacity to move and to work than this rather narrow conscription.

So, on behalf of many persons in the State of Indiana and on behalf of young people everywhere who are involved in this constructive activity, I hope the amendment will be adopted, and adopted with a pretty strong voice here today.

Mr. WILLIAMS. Mr. President, because the Committee on Human Resources has had no opportunity to hold hearings on this proposed exception to the Farm Labor Contractor Registration Act, I would like to emphasize the narrow scope of what is being proposed here.

I certainly understand the negative reactions by many citizens in the Midwest, about the application of the Farm Labor Contractor Registration Act to local people who transport high school students and other persons who are not migrant or seasonal farmworkers to detassel corn. Certainly, no one would suggest that high school students are migrant workers in the usual sense of that term. And, of course, no one would argue that high school principals or other responsible members of the community should not be trusted to transport students to engage in this work.

The language which has been developed makes clear that no exemption will be provided by this amendment for people who are engaged in farmwork as their usual or principal employment. This is, therefore, a very narrow exemption. It involves only crews composed principally of students who are employed to detassel hybrid seed corn, and to engage in some incidental activities, during a 10-day to 2-week period each summer.

Limitations in the amendment insure that migrant and seasonal farmworkers will lose no protections. The amendment also provides that children under 18 years of age will not be used to transport groups of workers under this amendment.

With these limitations, I am satisfied that the amendment is narrow and meets the problem at hand without weakening necessary protections for migrant and seasonal farmworkers.

This amendment does amend legislation that came from the Human Resources Committee dealing with the registration of farm labor contractors.

The Senator from Iowa has described completely all the reasons that prompted us to pass that farm labor contractor legislation, the crew leader legislation, as it was formerly called. He described the exploitation that had been discovered, on the part of those who recruit, and contract to supply, farm workers to the farms for the harvest.

The most recent expression of the need for protection in this area is found in the Farm Labor Contractor Act Amendments of 1974. The situation to which this amendment is addressed was not described in the purposes of the earlier Crew Leader Registration Act. As a matter of fact, I have learned that the particular processes of corn detasseling began after we had developed that basic

legislation. I understand that following the corn blight of the early 1970's, new strains of corn were developed, and out of that came the necessity for manual detasseling of the corn. All this came after the passage of the Farm Labor Contractor Registration Act of 1963.

This amendment is narrowly defined to reach the situation that now prevails in the detasseling of corn, where mostly young people, students, are taken for brief periods, described in the amendment, to the farms. They are not migrant laborers. They return to their homes in the evening, and it is a local situation.

We have been given every assurance that within the local community there will be adequate protection and concern for the young people who are involved in this part of agriculture, the detasseling of corn and other limited activities.

With this understanding about the limited nature of the amendment, our committee will not object to this amendment. It is an exceptional situation and can be reached through this amendment.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. BAYH. Mr. President, I should like to express my sincere appreciation to my good friend and colleague from New Jersey for his cooperation in this matter. It was really as a result of his leadership that we first were made aware of the terrible problem that existed in some of the migrant labor camps.

All of us who are concerned about decent workplaces for Americans, wherever they may work, owe the Senator from New Jersey a deep debt of gratitude. I express that to him again, as I did at the time we were considering the legislation.

Mr. WILLIAMS. I thank the Senator from Indiana.

I appreciate the way this situation came to us. The members of our committee are sensitive to the application of law in situations about which we did not have information when we passed the basic legislation. We try to respond as we have, in not blocking or attempting to defeat their amendment to the law.

Mr. LUGAR. Mr. President, on behalf of those on this side of the aisle, I commend the distinguished Senator from New Jersey.

The minority members of his committee also have been notified and have given their assent to this measure, as I understand it.

I simply wish to reiterate what my colleague from Indiana has pointed out: We appreciate the sense of humanity and the commonsense that are involved. The problems of migratory workers are serious, as are the problems of youth. This has been a meeting of the minds, for which we are grateful.

Mr. WILLIAMS. I appreciate the statement of the Senator from Indiana.

I know that our ranking minority member, the Senator from New York (Mr. JAVITS), although he is not here on the floor, is aware of this and shares my feeling that we will not oppose the amendment.

Mr. CLARK. Mr. President, one further word: I particularly thank the Senator from New Jersey for his cooperation and work. I think everyone in this body knows the efforts he has made in this particular area, both through his subcommittee and through the committee generally. I add my commendations.

I thank Senator BAYH for working carefully with us over the last several days with regard to this amendment, and I thank the other sponsors: Senator LUGAR, Senator CULVER, Senator DOLE, and others.

Mr. President, I ask unanimous consent that the name of the Senator from New Mexico (Mr. DOMENICI) be added as a cosponsor.

The PRESIDING OFFICER (Mr. RIEGLE). Without objection, it is so ordered.

Mr. CLARK. Mr. President, it really has been through a cooperative effort by all the people mentioned here that we have been able to put this amendment together. I appreciate the comments of my colleagues, and I hope the managers of the bill will see fit to accept the amendment.

Mr. DOLE. Mr. President, I support this amendment, which I have previously cosponsored.

The distinguished Senator from Indiana (Mr. LUGAR) has pointed out that last year the Department of Labor ruled that persons employed in the detasseling of seed corn are required to register under the Farm Labor Contractor Registration Act. The amendment simply exempts corn detasselers from the FLCRA.

During the last session of Congress, Congress granted similar exemptions from the Farm Labor Contractor Registration Act for berrypickers and for crews on custom combiners.

Persons employed in corn detasseling are usually neighborhood high school students, not adult migrant laborers. Corn detasseling is an important source of employment to thousands of young people in the corn-belt States. If the Department of Labor ruling is permitted to stand, this source of employment is likely to dry up because employers—those who operate hybrid seed corn farms—will be subject to the massive paperwork registration requirements under the FLCRA.

I therefore urge my colleagues to support this amendment which benefits both employers and laborers in hybrid corn operations.

Mr. HUDDLESTON. Mr. President, I commend all those who have participated in the development of this amendment and have presented it here. It does address itself to a very serious and real problem, and I think it is an adequate and proper solution to that problem.

We are happy to accept the amendment.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I yield.

Mr. BAYH. Mr. President, I think we would be in error if we did not express a special note of gratitude to the distinguished Senator from Kentucky, who is a principal mover of this particular piece of legislation. We appreciate his sensisivity and his willingness to consider this amendment on the merits. Without his help, we would not be prepared to meet the successful results which I anticipate are going to be forthcoming.

Mr. HUDDLESTON. I thank the Senator from Indiana.

Mr. President, is there time remaining on the amendment?

The PRESIDING OFFICER. There is no time limit on the bill.

Mr. LUGAR. Mr. President, the minority is delighted to accept this amendment.

I second the comment made by my colleague from Indiana, Senator BAYH, that we deeply appreciate the work of Senator HUDDLESTON and his staff in working out this matter with the distinguished Senator from New Jersey and others on the Human Resources Committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HUDDLESTON. Mr. President, I know of no further amendments to the pending bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 976

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. (a) Effective January 1, 1979, section 1 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499a), is amended by—

(1) in subsection (6), striking out "$100,000" and inserting in lieu thereof "$200,000"; and

(2) in subsection (7), striking out "$100,000" and inserting in lieu thereof "$200,000".

(b) Section 1 of the Perishable Agricultural Commodities Act, 1930, is further amended by inserting in subsection (6) immediately after "(C) no person buying any commodity" the following: "other than potatoes", except that no person buying potatoes for processing solely within the State where grown shall be deemed or considered to be a dealer under subsection (6) of section 1, as amended by this subsection, until January 1, 1982.

SEC. 2. Section 3(b) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499c(b)), is amended by—

(1) striking out "$100" in the third sentence and inserting in lieu thereof the following: "$300, plus $50 for each branch or additional business facility operated by the applicant in excess of twenty such facilities, as determined by the Secretary. Total annual fees for any applicant shall not exceed $1,000 in the aggregate";

(2) inserting immediately before the fourth sentence a new sentence as follows: "The Secretary may assess a single uniform license fee for all applicants, or the Secretary may assess a graduated fee based upon the amount or type of business conducted by the applicant or both.";

(3) inserting immediately after "referred to above:" in the fourth sentence the following: "*Provided*, That the amount of money accumulated and on hand in the special fund at the end of any fiscal year shall not exceed 25 percent of the projected budget for the next following fiscal year:"; and

(4) inserting "further" immediately after "*Provided*" in the fourth sentence.

SEC. 3. Section 3(b) of the Farm Labor

Contractor Registration Act of 1963, as amended (78 Stat. 920, as amended; 7 U.S.C. 2042), is amended—

(a) by striking out the word "or" at the end of paragraph (8), striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon and the word "or"; and

(b) by adding at the end thereof a new paragraph (10) as follows:

"(10) Any person who would be required to register solely because they are engaged in any such activity solely for the purpose of supplying full-time students or other persons whose principal occupation is not farmwork to detassel hybrid seed corn or sorghum for seed and to engage in other incidental farmwork for a period not to exceed four weeks in any calendar year: *Provided*, That such students or other persons are not required by the circumstances of such activity to be away from their permanent place of residence overnight: *Provided, further*, That such full-time students or other persons, if under 18 years of age, are not engaged in providing transportation in vehicles caused to be operated by the contractor.".

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 976.

The PRESIDING OFFICER. Without objection, it is so ordered.

## INTEREST RATES ON UPLAND COTTON PRICE SUPPORT LOANS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1076 while both Mr. HUDDLESTON and Mr. LUGAR are in the Chamber.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 3468) to amend the Agricultural Act of 1949 to ensure that the interest rates on price support loans for upland cotton are not less favorable to producers than the interest rates for such loans on other commodities (Rept. No. 95–1154).

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That section 103(f) of the Agricultural Act of 1949 is amended by striking out the fourth sentence of paragraph (1).

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1154), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SHORT EXPLANATION

The bill would place upland cotton in the same category and on the same basis as other agricultural commodities with respect to the interest rates charged eligible producers on price support loans.

BACKGROUND AND NEED

I.

Prior to the enactment of the Food and Agriculture Act of 1977, there was no statutory provision specifically relating to the charging of interest by the Commodity Credit Corporation on price support loans for eligible commodities. Thus, the rate of interest to be charged, if any, and the method of computation were matters for administrative discretion.

II.

The Food and Agriculture Act of 1977, however, contains a specific provision for determining interest rates on price support loans for upland cotton. The act adds section 103 (f)(1) to the Agricultural Act of 1949, which provides, in pertinent part, that the rate of interest on loans to cooperators on the 1978 through 1981 crops of upland cotton shall be established quarterly by the Commodity Credit Corporation on the basis of the lowest current interest rate on ordinary obligations of the United States.

III.

Until October 1, 1974, it was the policy of the Commodity Credit Corporation to set interest rates on commodity loans on a crop-year basis with all loans on a particular crop bearing interest at the same rate from disbursement to repayment.

Effective October 1, 1974, the interest rate policy was changed to provide that commodity loans would be subject to changes in the interest rate while they were outstanding. The Executive Vice President of the Commodity Credit Corporation was directed to review the interest rate semiannually, each March and October, and to establish and publicly announce a rate which would recover the Corporation's cost of borrowing.

IV.

The policy on semiannual review of interest rates for commodity loans has not been followed since March 1, 1976. At that time, the Commodity Credit Corporation made the interest rate of 7.5 percent per year (which was established on October 1, 1975, for commodity loans) effective for a 1-year period—April 1, 1976, through March 31, 1977. On April 8, 1977, the Secretary of Agriculture announced that a rate of 6 percent per year would be effective for the 1977 crop loans and that the same rate would apply from April 1, 1977, on outstanding crop loans.

V.

On June 13, 1978, the Commodity Credit Corporation announced that the annual interest rates on price support loans for 1978 crop commodities, except upland cotton, would be increased from the then 6 percent to 7 percent, effective immediately. The increased interest rate reflected an increase to the Corporation in the cost of money that it borrows from the Department of the Treasury.

VI.

On July 26, 1978, the Commodity Credit Corporation announced that the interest rate on price support loans for upland cotton would be increased from 6 to 7¾ percent, effective immediately. This increase reflected the change in law made by the Food and Agriculture Act of 1977. It was also announced that future interest rates on upland cotton price support loans would be evaluated and announced quarterly.

VII.

The bill being reported by the committee would repeal the statutory requirement regarding the interest rate to be charged on price support loans for upland cotton. The enactment of the bill would enable the Commodity Credit Corporation to charge the same interest rate on price support loans on upland cotton as is charged on loans for other commodities, thereby resulting in more equitable treatment of all producers.

Mr. ROBERT C. BYRD. Mr. President, I know of no further rollcall votes today, and the cloakrooms can make that announcement.

## OSAGE TRIBE IN OKLAHOMA

Mr. ROBERT C. BYRD. Mr. President, there is one measure that has been cleared for consent on both sides. It is Calendar Order No. 1080. I ask unanimous consent that the Senate proceed to the consideration of that measure now.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1081) to amend the laws relating to the Osage Tribe in Oklahoma.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs with an amendment to strike all after the enacting clause and insert the following:

That section 9 of the Act of June 28, 1906 (34 Stat. 539, 545), as amended is further amended to read as follows:

"SEC. 9. There shall be a quadrennial election of the officers of the Osage Tribe as follows: A principal chief, an assistant principal chief, and eight members of the Osage Tribal Council shall be elected, to succeed the officers elected in the year 1974 at a general election to be held in the town of Pawhuska, Oklahoma, on the first Monday in June 1982, and on the first Monday in June of each fourth year thereafter, in a manner to be prescribed by the Secretary of the Interior, and said officers shall be elected for a period of four years commencing on the first day of July following the election. In case of a vacancy in the office of principal chief or other officer by death, resignation or otherwise, the vacancy shall be filled in a manner to be prescribed by the Osage Tribal Council. In the event of a common disaster and a quorum of five of the Osage Tribal Council does not survive, the Secretary shall appoint a principal chief and/or the number of councilmen necessary to complete a total of eight, to serve until the next quadrennial election. The Secretary is hereby authorized to remove from the council any member or members for good cause, to be by him determined, after the party involved has had due notice and opportunity to appear and defend himself. The tribal government so constituted shall continue in full force and effect until January 1, 1984, and thereafter until otherwise provided by Act of Congress.".

SEC. 2. (a) The first paragraph of section 3 of the Act of June 24, 1938 (52 Stat. 1034, 1035), as amended, extending the mineral estate reserved to the Osage Tribe by the Act of June 26, 1906 (34 Stat. 539), is further amended by striking the phrase "until the

eighth day of April 1983, and thereafter until otherwise provided by Act of Congress" and substituting, in lieu thereof, the phrase "in perpetuity".

(b) The second paragraph of section 3 of the Act of June 24, 1938 (52 Stat. 1034, 1035), as amended, is amended by striking the phrase "unless otherwise provided by Act of Congress" and inserting, in lieu thereof, the phrase "and thereafter until otherwise provided by Congress".

(c) The fourth paragraph of section 3 of the Act of June 24, 1938 (52 Stat. 1034, 1036) is amended by striking the phrase "January 1, 1984" and inserting, in lieu thereof, the phrase "January 1, 1984 and thereafter until otherwise provided by Congress".

SEC. 3. (a) The Act of February 5, 1948 (62 Stat. 18) is hereby repealed.

(b) Any Osage Indian having received a certificate of competency under paragraph 7 of section 2 of the Act of June 28, 1906 (34 Stat. 539, 542); section 3 of the Act of March 2, 1929 (45 Stat. 1478, 1480); or the Act of February 5, 1948 (62 Stat. 18), may make application to the Secretary of the Interior to revoke such certificate and the Secretary shall revoke such certificate: *Provided*, That revocation of any certificate shall not affect the legality of any transactions heretofore made by reason of the issuance of any such certificate. Restrictions against alienation of lands heretofore removed are not reimposed.

(c) Sections 3 and 4 of the Act of February 27, 1925 (43 Stat. 1008, 1010–1011); and section 4 of the Act of March 2, 1929 (45 Stat. 1478, 1480); and sections 1 and 3 of the Act of June 24, 1938 (52 Stat. 1034) are hereby amended by striking, wherever they occur, the phrases "of one-half or more Indian blood", "of more than one-half Indian blood", "of one-half or more Osage Indian blood", and "or who is one-half or more Osage Indian blood".

SEC. 4. In order to conserve natural resources and provide for the greatest ultimate recovery of oil and gas underlying the Osage mineral estate, the Secretary of the Interior is authorized to establish rules and regulations under which oil and gas leases producing from a common source of supply may be unitized.

SEC. 5. (a) Section 8 of the Act of April 18, 1912 (37 Stat. 86, 88), is hereby amended to read as follows: "Any person of Osage Indian blood, eighteen years of age or older, may dispose of his Osage headright or mineral interest and the remainder of his estate (real, person, and mixed, including trust funds) from which restrictions against alienation have not been removed by will executed in accordance with the laws of the State of Oklahoma: *Provided*, That the will of any Osage Indian shall not be admitted to probate or have any validity unless approved after the death of the testator by the Secretary of the Interior. The Secretary shall conduct a hearing as to the validity of such will at the Osage Indian Agency in Pawhuska, Oklahoma. Notice of such hearing shall be given by publication at least ten days before the hearing in a newspaper of general circulation in Osage County, Oklahoma, and by mailing notice of such hearing to the last known address of all known heirs, legatees, and devisees. The cost of publication shall be borne by the estate. The rules of evidence of the State of Oklahoma shall govern the admissibility of evidence at such hearing. All evidence relative to the validity of the will of an Osage Indian shall be submitted to the Secretary within one hundred and twenty days after the date of the petition for approval of such will is filed with the Secretary, unless for good cause shown the Secretary extends time: *Provided*, That such time shall not be extended beyond six months from the date of the first hearing. For purposes of determining the validity of any will, the Secretary is hereby granted the same subpena power as is vested in the courts. All costs of obtaining witnesses and evidence before the Secretary shall be borne by the party producing such witnesses or evidence, subject to such costs being taxed to the estate in the event that District Court of the State of Oklahoma having jurisdiction should determine such costs beneficial to the whole estate. Notwithstanding any appeal from the decision of the Secretary, approval of such will by the Secretary shall entitle it to be admitted to probate without further evidence as of its validity or, upon disapproval thereof, the heirs may immediately petition for letters of administration in the district court. No appeal from the order of the Secretary approving or disapproving any will shall stay the issuance of letters testamentary or of administration: *Provided*, That such letters shall not confer power to sell any restricted assets by virtue of any provision in such will, pay or satisfy legacies, or distribute property of the decedent to the heirs or beneficiaries until the final determination of the appeal, but all other action taken by the district court pending said appeal shall be valid and binding. No court except a Federal court shall have jurisdiction to hear a contest of a probate of a will that has been approved by the Secretary. Such appeals shall be on the record made before the Secretary and his decisions shall be binding and shall not be reversed unless the same is against the clear weight of the evidence or erroneous in law.".

(b) Section 3 of the Act of April 18, 1912 (37 Stat. 86), is hereby amended to read as follows: "That the property of deceased and of orphan minor, insane, or other incompetent Osage Indians, such incompetency being determined by the laws of the State of Oklahoma which are hereby extended for such purpose to all Osage Indians, shall, in probate matters, be subject to the District Court of Oklahoma having jurisdiction. A copy of all papers filed in the district court shall be served on the Superintendent of the Osage Agency at the time of filing, and said Superintendent is authorized, whenever the protection of the interest of the Osage Indian requires, to appear in the district court. The Superintendent of the Osage Agency or the Secretary of the Interior, whenever he deems the same necessary, may investigate the conduct of executors, administrators, guardians, or other persons having charge of the estate of any minor, incompetent, or deceased Osage Indian. Whenever he shall be of the opinion that the estate is in any manner being dissipated, wasted, or permitted to deteriorate in value by reason of the negligence, carelessness, or incompetency of the executor, administrator, guardian, or other person in charge of the estate, the Superintendent of the Osage Agency or the Secretary is authorized, and it shall be his duty, to report said matter to the district court, take the necessary steps to have such case fully investigated, and prosecute any remedy, either civil or criminal, as the exigencies of the case may require The costs and expenses of any civil proceedings shall be a charge upon the estate of the Osage Indian or upon the executor, administrator, guardian, or other person in charge of the estate of the Osage Indian and his surety, as the district court shall determine. Every bond of the executor, administrator, guardian, or other person in charge of the estate of any Osage Indian shall be subject to the provisions of this section and shall contain therein a reference hereto: *Provided*, That no guardian shall be appointed for a minor whose parents are living unless the estate of said minor is being wasted or misused by such parents: *Provided further*, That no land shall be sold or alienated under the provisions of this section without approval of the Secretary.".

(c) Section 7 of the Act of February 27, 1925 (43 Stat. 1008, 1011), as amended, is hereby further amended to read as follows: "Hereafter none but heirs of Indian blood and children legally adopted by a court of competent jurisdiction and parents, Indian or non-Indian, shall inherit from Osage Indians any right, title, or interest to any restricted land, moneys, or Osage headright or mineral interest.".

(d) Notwithstanding the provisions of subsections (a), (b), and (c) of this section, disposition of any Osage headright or mineral interest shall be subject to the provisions of section 7 of this Act.

SEC. 6. (a) With the approval of the Secretary of the Interior, any person of Osage Indian blood, eighteen years of age or older, may establish an inter vivos trust covering his headright or mineral interest except as provided in section 8 hereof; surplus funds; invested surplus funds; segregated trust funds; and allotted or inherited land, naming the Secretary of the Interior as trustee. An Osage Indian having a certificate of competency may designate a banking or trust institution as trustee. Said trust shall be revocable and shall make provision for the payment of funeral expenses, expenses of last illness, debts, and an allowance to members of the family dependent on the settlor.

(b) Property placed in trust as provided by this section shall be subject to the same restrictions against alienation that presently apply to lands and property of members of the Osage Tribe, and the execution of such instrument shall not in any way affect the tax-exempt status of said property.

SEC. 7. After passage of this Act, a person not of Osage Indian blood, except a child legally adopted by an Osage Indian in any court of competent jurisdiction and the lineal descendants of such adopted child, subject to the stipulation that such adopted child or his lineal descendants cannot alienate his Osage headright or mineral interest and the devolution thereof is limited to intestacy, will, or inter vivos trust the same as if he were of Osage Indian blood, is prohibited from receiving more than a life estate in an Osage headright interest owned by any Osage Indian, such adopted child or his lineal descendants, whether such interest is received by will inter vivos trust, or Oklahoma law of intestate succession. Upon the death of such recipient, the Osage headright or mineral interest shall vest in the remaindermen thereof who are of Osage Indian blood, adopted children, and/or lineal descendants of such adopted children designated by the will or inter vivos trust of the deceased Osage Indian, his adopted child, or the lineal descendants of such adopted child. If such instrument does not designate remaindermen thereof who are of Osage Indian blood, adopted children, and/or lineal descendants of such adopted children, or if the deceased died intestate, the Osage headright or mineral interest shall vest in his heirs pursuant to the Oklahoma law of intestate succession, subject to the above limitations. On the death of the non-Osage beneficiary or heir, except in the case of adopted children or lineal descendants of such adopted children, such Osage headright or mineral interest shall vest in the Osage Tribe and the tribe shall pay the estate of the non-Osage beneficiary or heir the market value of such Osage headright or mineral interest. Payments under this section shall be made from Osage tribal mineral funds authorized to be expended by section 8(b) hereof.

SEC. 8. (a) Any individual right to share in the Osage mineral estate (commonly referred to as "headright") owned by a person not of Indian blood may not, without the approval of the Secretary of the Interior, be sold, assigned, or transferred. Sale of any such interest shall be subject to the right of the Osage Tribe to purchase it within forty-five days at the highest legitimate price offered the owner thereof.

(b) Prior to the time any tribal mineral income is segregated for distribution to in-

dividual headright owners, the Secretary of the Interior, at the request of the Osage Tribal Council, may direct the use of any such income for the purchase of Osage headright interests offered for sale to the Osage Tribe pursuant to this section or vested in the Osage Tribe pursuant to section 7 of this Act.

SEC. 9. Under such regulations as the Secretary of the Interior may prescribe, the heirs and legatees of any deceased owner of an Osage headright or mineral interest, real estate on which restrictions against alienation have not been removed, and funds on deposit at the Osage Agency may be determined by the Secretary is such aggregate interests do not exceed $10,000: Provided, That no court of competent jurisdiction has undertaken the probate of the deceased's estate and a request for such administrative determination has been made to the Secretary by one or more of the heirs or legatees.

SEC. 10. An Osage Indian or his estate is exempt from the payment of all estate, inheritance, and income taxes on any Osage headright or mineral interest and the income derived therefrom.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill is passed.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1157), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 1081, as introduced by Senator Bartlett, for himself and Senator Bellmon, is to amend and supplement various laws relating to the Osage Indians of Oklahoma.

BACKGROUND

The Osage Indians were traditionally and aboriginally located in southern Illinois and Indiana. When first contacted by white explorers, the Osage were located in Missouri and northern Arkansas. Through a series of treaties with the United States, beginning 1808 and ending in 1870, the Osage gradually ceded these lands and were removed westward.

By the act of July 17, 1870, a reservation was created for the Osage in northeastern Oklahoma. The reservation contained 1,470,934 acres and is now coterminous with Osage County, Okla.

In 1887, Congress passed the General Allotment Act of February 8, 1887 (24 Stat. 388) which provided that the various Indian reservations would be allotted, in individual tracts, to the members of the tribe and any remaining lands would be declared surplus and sold to white settlers. The Osage strongly resisted the allotment of their reservation and the 1887 act was made inapplicable to them.

However, in 1906, Congress passed the Osage Allotment Act of June 28, 1906 (34 Stat. 539) over strong protests from the Osage.

This act provided for the allotment of 480 acres to each member of the tribe and, after making certain reservations for schools, dwellings, cemeteries, Government buildings, et cetera, the remaining lands were to be divided equally among the members. The Secretary of the Interior was authorized to issue certificates of competency to adult Indians, authorizing them to convey their lands, except that 160 acres of homestead lands were to remain inalienable and nontaxable for 25 years or during the life of the allottee. Oil, gas, coal, and other minerals were to be reserved for the tribe for 25 years, were to be subject to lease by the tribal council, with the approval of the Secretary, and royalties were to be paid to the tribe. Minerals then were to become the property of the individual allottees. Allotted lands were to be subject to lease for farming and grazing purposes, with approval by the Secretary.

Funds of the Osage Tribe were to be held in trust for 25 years and then distributed to the individual members except that (1) moneys received from sale of land in Kansas and any moneys found due on claims against the United States were to be placed to the credit of the individual members of the tribe, were to draw interest as provided by law, and the interest was to be paid quarterly to members or to parents or guardians in the case of minors, and (2) royalties from mineral leases moneys received from sale of town lots or from grazing lands were to be placed in the Treasury to the credit of the individual members of the tribe and distributed at the same time as interest on trust funds. Provision was made for election of the tribal officers and council.

The 1906 act constitutes the basic Federal law regulating the property and affairs, including tribal government, of the Osage Indians, and the descent and distribution of interests in individual trust lands and property and in tribal property. This act has been amended and supplemented by several subsequent statutes, particularly with respect to extending the life of the Osage Tribal Council, and in extending the tribal mineral reservation, and the trust status of the individual allotments.

LEGISLATIVE HISTORY

S. 1081 and S. 1087 were introduced by Senator Bartlett, for himself and Senator Bellmon. No hearings were held on the legislation.

A companion bill, H.R. 11894, was introduced on April 5, 1978 by Representative Risenhoover. A hearing was held before the House Interior Subcommittee on Indian Affairs and Public Lands on April 20, 1978. The House Committee on Interior and Insular Affairs reported H.R. 11894 on August 9, 1978.

COMMITTEE AMENDMENTS

The committee adopted an amendment in the nature of a substitute which incorporates the text of S. 1081–S. 1087 and S. 1089. Sections 1 through 9 of the substitute are identical to the companion measure in the House, H.R. 11984. The committee consolidated the bills in this fashion in order to expedite resolution of differences between the House and Senate versions of the legislation.

Section 10 of the substitute is identical to S. 1089. This section exempts an Osage Indian or his estate from payment of all estate, inheritance, and income taxes on any Osage headright or mineral interest and the income derived therefrom. This section does not appear in the House companion measure, H.R. 11894, but is identical to H.R. 4384, which was introduced by Mr. Risenhoover on March 2, 1977 and referred to the Ways and Means Committee.

EXPLANATION

The provisions of the substitute amendment are as follows:

Section 9 of the 1906 act, as amended, establishes the Osage Tribal Council and provides that such council shall continue in full force and effect until January 1, 1984. As of April 22, 1977, the Osage Tribe consisted of 9,205 persons of Osage blood who are carried on the Agency census records. Of these 9,205 individuals, an estimated 7,022 have no interest in the tribal mineral estate (known as a headright interest) and, under departmental regulations, have no vote in tribal election and no right to hold elective office, in the Osage Tribal Council. Osage headright interests may be passed by inheritance from one Osage to another. The inheritance process has resulted in some persons accumulating several headright's interests; others acquiring only a fractional interest; and still others of substantial Osage blood not acquiring any headright interest at all. In the last few years, a group of persons of Osage blood have filed suit against the Department of the Interior alleging that the tribal council has statutory authority only for management of the Osage mineral estate and not for general government of the Osage tribe. Section 1 of the substitute would extend the existence of the tribal council indefinitely and provides for filling of the various offices in the event of a common disaster. The committee does not intend by enactment of this section to affect in any way the question involved in the lawsuit noted above (*Logan et al.* v. *Andrus et al.* (Civ No. 77–165–C), N. D. Oklahoma). This section is similar to S. 1081.

Existing law with respect to the Osage provides that the mineral estate underlying the Osage reservation shall be reserved to the tribe until April 8, 1983 or until otherwise provided by Congress; that the property of the individual Osage shall continue to be held in trust until January 1, 1984, unless otherwise provided by Congress; and that the homestead allotment of individual Osage shall be exempt from taxation until January 1, 1984.

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, that Senators may be permitted to speak up to 10 minutes therein, and that the period not extend beyond 1 hour and that I then be recognized for any final statement or orders that I may get before recessing.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

## EXECUTIVES MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGES FROM THE HOUSE

At 11:35 a.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to House Concurrent Resolution 683, revising the congressional budget for the U.S. Government for the fiscal year 1979,

requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. GIAIMO, Mr. WRIGHT, Mr. LEGGETT, Mr. MITCHELL of Maryland, Mr. BURLESON of Texas, Mr. DERRICK, Mr. OBEY, Mr. SIMON, Mr. MINETA, Mr. LATTA, Mr. CONABLE, Mr. DUNCAN of Tennessee, and Mr. REGULA were appointed managers of the conference on the part of the House.

The message also announced that the House disagrees to the amendment of the Senate to H.R. 6536, an act to establish an actuarially sound basis for financing retirement benefits for policemen, firemen, teachers, and judges of the District of Columbia and to make certain changes in such benefits; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. DIGGS, Mr. DELLUMS, Mr. FAUNTROY, Mr. MAZZOLI, Mr. MCKINNEY, and Mr. WHALEN were appointed managers of the conference on the part of the House.

## HOUSE JOINT RESOLUTION REFERRED

The following joint resolution was read twice by its title and referred as indicated.

H.J. Res. 1088. A joint resolution providing financial assistance for the city of New York; to the Committee on Appropriations.

## COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–4283. A communication from the Vice President, Indian Claims Commission, reporting, pursuant to law, final determination with respect to cases before the Commission in docket numbered 59, 29–E and 133–B; to the Committee on Appropriations.

EC–4284. A comunication from the Chairman, National Transportation Safety Board, transmitting, pursuant to law, the Board's 1980 budget submission; to the Committee on Commerce, Science, and Transportation.

EC–4285. A communication from the General Counsel, Department of Energy, transmitting, pursuant to law, notices of meetings related to the International Energy Program; to the Committee on Energy and Natural Resources.

EC–4286. A communication from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, the department's third report on State Medicaid program compliance with section 1902(g) of the Social Security Act; to the Committee on Finance.

EC–4287. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Agency For International Development's Housing Investment Guaranty Program," September 6, 1978; to the Committee on Governmental Affairs.

EC–4288. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Customs' Cargo Processing—Fewer But More Intensive Inspections Are In Order," September 7, 1978; to the Committee on Governmental Affairs.

EC–4289. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Nuclear Regulatory Commission Needs to Aggressively Monitor and Independently Evaluate Nuclear Powerplant Construction," September 7, 1978; to the Committee on Governmental Affairs.

EC–4290. A communication from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report of findings of the Assessment of Bilingual and Bicultural Awareness Activities in Health Professions Schools; to the Committee on Human Resources.

EC–4291. A communication from the Secretary of Health Education, and Welfare, transmitting, pursuant to law, a report of findings of the Assessment of Health Professions Schools' Admissions Criteria for Billingual and Bicultural Activities; to the Committee on Human Resources.

EC–4292. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, orders suspending deportation, as well as a list of persons involved; to the Committee on the Judiciary.

EC–4293. A communication from the Assistant Attorney General for Legislative Affairs, Department of Justice, transmitting a draft of proposed legislation to improve the physical security features of the motor vehicle and its parts, increase the criminal penalties of persons trafficking in stolen motor vehicles and parts, and to curtail the exportation of stolen motor vehicles, and for other purposes; to the Committee on the Judiciary.

EC–4294. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, orders entered in 1,243 cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of such aliens; to the Committee on the Judiciary.

EC–4295. A communication from the National Commander, Military Order of the Purple Heart, transmitting, pursuant to law, its report of financial audit for the fiscal year ending June 30, 1978; to the Committee on the Judiciary.

## PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions and memorials, which were referred as indicated:

POM–784. A concurrent resolution adopted by the Legislature of American Samoa; to the Committee on Armed Services:

"HOUSE CONCURRENT RESOLUTION No. 106

Whereas, the Congress is now considering S. 1607, cosponsored by Senators Daniel Inouye and Spark Matsunaga, and H.R. 7161, sponsored by Congressman Richard White, identical bills that would include the Territory of American Samoa in the Junior Reserve Officers Training Corps for our high school students; and

"Whereas, in the statement of Deputy Assistant Secretary of Defense, Mr. I. M. Greenberg, he states that the 'enlistment rate is about three times the national U.S. rate' (speaking about American Samoan enlistments into the U.S. Armed Services now); and

"Whereas, Mr. Greenberg continues in that statement . . . (if) 'American Samoans can join our military forces, they should be able to join Junior ROTC. This proposed bill (H.R. 7161) corrects this inequity by enabling the high school students of American Samoa to participate in Junior ROTC'; and

"Whereas, the Fono has already passed one resolution endorsing this action HCR 44 of last August 1977, a copy of which it attached.

"Now, therefore, be it resolved by the House of Representatives of the Territory of American Samoa, the Senate concurring:

"That, the 95th Congress is respectfully requested to pass either S. 1607 or H.R. 7161 to correct the inequity of enabling the high school students of American Samoa to participate in the Junior ROTC program; and

"Be it further resolved, that the Chief Clerk of the House of Representatives is directed to send copies of this resolution to: Honorable John C. Stennis of Mississippi, Chairman of Senate Committee on Armed Services; Honorable Paul G. Hartfield of Montana, Member; Honorable Daniel Inouye of Hawaii, Member; Honorable Henry M. Jackson of Washington, Member; Honorable Spark Matsunaga of Hawaii, Member; Honorable Howard W. Cannon of Nevada, Member; Honorable John Tower of Texas, Member; Honorable Barry Goldwater of Arizona, Member; Honorable Melvin Price of Illinois, Chairman of House Subcommittee on Armed Services; Honorable Charles H. Wilson of California, Member; Honorable Richard White, Chairman of Subcommittee on Military Personnel; Honorable G. V. Montgomery of Mississippi, Member; Honorable Antonio Won Pat of Guam, Member; Honorable David Treen of Louisiana, Member; Honorable Elwood Hillis of Indiana, Member; Honorable I. M. Greenberg, Deputy Assistant Secretary of Defense for Program Management; Honorable Peter Tali Coleman, Governor of American Samoa; Honorable A.P. Lutali, Delegate-at-Large; Mr. Francis R. Valeo, Secretary of the Senate and Mr. Edmund L. Henshaw, Jr., Clerk of the House of Representatives."

POM–785. A joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

"ASSEMBLY JOINT RESOLUTION No. 95

"Whereas, Since the fall of South Vietnam to Communist forces three years ago, the United States has welcomed the arrival of over 100,000 Vietnamese refugees; and

"Whereas, Over 80 percent of these refugees are seeking a better life in California and are gradually joining the mainstream of American life; and

"Whereas, These refugees have come to this country in order that they may enjoy the freedoms and human rights which constitute the basic principles for our system of government; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to promote respect for the rights of Vietnamese refugees in this country by granting the status of permanent resident alien to those refugees who request such status in order that they may have the opportunity to enjoy fully the American way of life; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. CULVER:

S. 3489. A bill to amend the Internal Revenue Code of 1954 to allow an additional carryback of 7 years for excessive net operating losses attributable to product liability losses; to the Committee on Finance.

By Mr. STENNIS:

S. 3490. A bill for the relief of A. Z. M. Rabiul Hasan; to the Committee on the Judiciary.

By Mr. WALLOP (for himself, Mr. MELCHER, Mr. HAYAKAWA, Mr. CURTIS, Mr. LAXALT, Mr. GARN, Mr. GOLDWATER, Mr. YOUNG, Mr. HATCH, Mr. DECONCINI, Mr. HANSEN, and Mr. STEVENS):

S.J. Res. 159. A joint resolution providing procedures for congressional disapproval of implementation of national water resources policies, and for other purposes; to the Committee on Governmental Affairs.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CULVER:

S. 3489. A bill to amend the Internal Revenue Code of 1954 to allow an additional carryback of 7 years for excessive net operating losses attributable to product liability losses; to the Committee on Finance.

● Mr. CULVER. Mr. President, I am today introducing legislation drafted by the Department of Treasury and endorsed by the administration as appropriate short-term financial relief to businesses hard-pressed by the rising costs and limited availability of product liability insurance. It would allow businesses suffering product-liability losses to "carry back" such losses and apply them against their taxable income in the 10 preceding years. This is an extension specifically for product liability 7 years beyond the 3-year carryback currently granted for most business losses. Earlier in this Congress, I introduced other tax measures, which had emerged from Senate Small Business Committee hearings which I chaired and from comprehensive studies by a Federal Interagency Task Force on Product Liability. These earlier bills, S. 1611 and S. 3049, while somewhat different in detail, share the essential common feature of allowing businesses to deduct from taxable income contributions to a reserve trust to be used only for product-liability related losses. The carry back legislation, in intent and in some of its effects, resembles S. 1611 and S. 3049. Introducing it today should facilitate the comparison of these two approaches in the hope of fashioning the best immediate response to a very complicated and serious problem.

Product liability is the term describing legal responsibility for injuries caused by items which a firm manufactures, distributes, or sells. Typically, firms protect themselves financially from payments which they may have to make to injured consumers and workers by purchasing conventional insurance coverage. Until recently, the cost of this coverage was a relatively minor portion of most firms' business expenses. In the past several years, for reasons which are still not entirely clear, this situation has changed dramatically. Startling increases in premiums for product liability extend across a broad range of industries. Averaging as much as 200 percent a year for such entire industries as machine tool building, sporting goods, and pharmaceuticals, these increases made it difficult for many small- and medium-size firms to afford insurance coverage. The situation was even worse for many individual firms confronted with yearly premium hikes of well over 1,000 percent. Some risked "going bare," taking the chance that a sizable settlement against them would cause bankruptcy or leave injured consumers without redress. The interagency task force reported that the problem had contributed directly to a number of business failures.

We should not be lulled into thinking that this is a minor problem limited to the relationship between manufacturers and insurers. To the extent that businesses must absorb increased costs, they inevitably pass them on to consumers as higher prices. Because one of the most severely affected industries is the machine tool area, the cost of virtually all products—which must be produced by machine tools—will feel the impact to one degree or another. To the extent that firms go without insurance, injured consumers have no assurance that their injuries will be duly compensated.

Long-range solutions to the product liability problem inextricably involve such complicated and fundamental issues as tort law, workers' compensation, insurance ratemaking, and manufacturing practices. It is clear that legal changes in these areas will require careful work and lengthy consideration. In the meantime, it is equally clear, some measure of immediate financial assistance to businesses is in the public interest.

Both tax deductible reserve trusts and extended carryback allowances would facilitate the ability of firms to provide themselves with adequate risk coverage. In the case of reserve trusts, dollars which otherwise would have been paid as taxes can be held against the possibility that they might be needed for product liability related losses. In the case of the carryback extension, dollars which have already been paid as taxes can be recouped to pay similar costs. The taxpaying business faced with a net operating loss in a current year due to product liability could file amended returns for preceding years, deducting from taxable income for those years the unused portion of the current year's net operating loss. Refunded taxes would then be available to help pay the product liability settlement.

Although the Department of Treasury maintains that the carryback extension is an effective substitute for a proposed reserve trust, I believe that it also merits attention as a supplement to such a trust. Businesses trying to fund a truly catastrophic loss might well find trust dollars or potential refunds from an extended carryback capacity individually inadequate—but in combination sufficient to meet their needs. Another benefit of extended carryback would accrue to firms which faced net operating losses for reasons including, but not limited to, product liability costs. These other losses can now be carried back for 3 years and conceivably might exhaust the firm's potential for a refund under current law. An additional 7-year period solely to carry back product liability losses would be extremely valuable for such firms.

The U.S. Department of Commerce which recommended the reserve trust approach earlier this year identified a number of very beneficial secondary effects to such an approach. Whether the carryback provision would achieve all of the advantages of a tax-deductible reserve account, as the Treasury believes, is a question which merits serious attention.

Among the advantages of the reserve trust is the incentive it provides to manufacturers to emphasize safe products. Manufacturers operating with such a trust would see their own funds directly at risk. In order to protect that investment they would be far more likely to undertake and maintain efforts to minimize dangerous defects in their products. Whether they would feel a similar incentive with extended carry back availability in which the tendency would be to view the dollars at risk as the Government's money—taxes already paid—needs to be explored.

Similarly, another advantage of a reserve trust is its potential to bring competition to bear upon insurance carriers to charge affordable premiums. Though extensive data was assembled by the task force, it was insufficient to measure precisely the justification of premium increases in recent years. The task force did feel confident, however, that claims and settlements experience did not fully justify the rising charges and that insurers were "panic pricing." The existence of a reserve trust serving as "self-insurance" or to cover. and thus allow a firm to accept a higher deductible or partial self-retention (leading to reduced premiums) would give firms improved "bargaining power" with their insurance carriers. Theoretically, I am told, the potential refunds of extended carry back give the same power. Whether this actually would prove to be the case has to be demonstrated.

Finally the deduction for funds contributed to a reserve account will be discerned as an immediate tax benefit in the eyes of business owners. It will actively encourage them to protect themselves and their customers through the establishment of a self-insurance trust. The tax benefit of carry back is a potential one, realized only after a loss occurs. When realized it can pay only part of a product liability loss, since the loss is applied against previous taxable income—not against previous taxes. It would need to be supplemented from currently available funds. We need to give serious thought to whether manufacturers would set aside "post-tax" dollars for such a purpose.

In summary, Mr. President, the legislation which I am introducing today has certain independent advantages which argue for its adoption. Taken in conjunction with a provision for a tax-deductible reserve account it can make a strong contribution to the ability of firms to guard against product liability losses. The administration has now formally acknowledged that product liability difficulties are serious problems for thousands of American small businesses. It is also important that it has urged a responsible use of the IRS Code as appropriate short-term solutions are

sought. I am pleased to introduce this legislation today in the hope that it will let us move promptly in the weeks ahead to refine the precise terms which this relief measure should take. I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3489

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 172 of the Internal Revenue Code of 1954 (relating to net operating losses) is amended—

(1) by striking out "and (G)" in clause (i) of section (b)(1)(A) and inserting in lieu thereof "(G), (H), and (I),",

(2) by inserting at the end of subsection (b)(1) the following new subparagraphs:

"(F) In the case of a taxpayer who incurs a product liability loss (as defined in subsection (i)) for any taxable year beginning after December 31, 1977, the smaller of—

"(i) the excess of the net operating loss for such year (determined without regard to any portion thereof attributable to a foreign expropriation loss) over the sum of the taxable income (as determined under paragraph (2)) for each of the 3 prior taxable years to which such loss may be carried under subparagraph (A)(i), or

"(ii) the product liability loss for such taxable year,

shall be a net operating loss carryback to each of the 7 taxable years preceding the earliest of such 3 prior taxable years.

"(I) In the case of a taxpayer who incurs a net operating loss for a taxable year beginning after December 31, 1977 (referred to in this subparagraph as the 'loss year') and who had both a net operating loss and a product liability loss (as defined in subsection (i)) for a prior taxable year beginning after that date (referred to in this subparagraph as the 'prior year'), if the amount of the net operating loss for the loss year which may be carried over under this subsection would be reduced by doing so, then the smaller of—

"(i) the net operating loss (determined without regard to any portion thereof attributable to a foreign expropriation loss) for the prior year, or

"(ii) the product liability loss for the prior year,

shall be considered to be a separate net operating loss for the prior year and shall be a net operating loss carryback to each of the 10 taxable years preceding the prior year.",

(3) by adding at the end of paragraph (2) of subsection (b) the following new sentence: "In the case of a taxable year to which paragraph (1) (H) applies, this paragraph shall be applied by treating the entire net operating loss as a net operating loss carryback to each of the 3 taxable years preceding the loss year and by treating that portion of the loss described in paragraph (1)(H) as a separate net operating loss carryback to each of the 7 taxable years preceding the earliest of such three taxable years." and

(4) by redesignating subsection (i) as (j), and by inserting after subsection (h) the following new subsection:

"(i) PRODUCT LIABILITY LOSS DEFINED; SPECIAL RULE.—For purposes of subsection (b)—

"(1) PRODUCT LIABILITY LOSS.—The term 'product liability loss' means, for any taxable year, the amount of the deductions under sections 162 and 165 attributable to product liability (as defined in paragraph (2)) and to expenses incurred in the investigation, settlement, and opposition to claims against the taxpayer on account of product liability.

"(2) PRODUCT LIABILITY.—The term 'product liability' means liability for damages on account of physical injury or emotional harm to individuals, or damage to or loss of use of property, on account of the manufacture, importation, distribution, lease, or sale by the taxpayer of any product if such liability arises after the taxpayer has completed or terminated operations with respect to, and has relinquished possession of, such product.

"(3) SPECIAL RULE.—For purposes of applying sections 6501 and 6511 to a net operating loss to which subsection (b)(1)(I) applies, the net operating loss for the prior year (as defined in such subsection) shall be considered to be a net operating loss for the loss year (as defined in such subsection).".●

---

By Mr. WALLOP (for himself, Mr. MELCHER, Mr. HAYAKAWA, Mr. CURTIS, Mr. LAXALT, Mr. GARN, Mr. GOLDWATER, Mr. YOUNG, Mr. HATCH, Mr. DECONCINI, Mr. HANSEN, and Mr. STEVENS):

S.J. Res. 159. A joint resolution providing procedures for congressional disapproval of implementation of national water resources policies, and for other purposes; to the Committee on Governmental Affairs.

● Mr. WALLOP. Mr. President, a sound, comprehensive, and workable national water resource policy is a priority. However, the formulation and implementation of such a policy cannot be unilateral. To do so is a recipe for confrontation. The States, the Executive, and the Congress must all interact if such a policy is to be successful.

Today we introduce a Senate joint resolution which provides for State notification and congressional review of regulations which would implement certain new national water resources policies. Through the procedures which we seek to establish here, certain water policies initiated by the Executive will be channeled through Congress and the States to insure the interaction that is absolutely necessary to the successful implementation of any such policy of national scope and importance.

A brief review of the recent history of development of a Federal water resources policy will highlight the need for this procedure. For well over 1 year now, the Executive has been engaged in a comprehensive review of Federal water resources policy. The first few months of that study, conducted without participation by the public, the States, or Congress, resulted in the publication of July 15 and 25, 1977, of option papers in the Federal Register. The scope of these water policy option papers was well beyond the proper scope of an exclusively Federal policy study. They dramatically pointed to the need for increased State and congressional participation in the development of a national water resources policy.

The controversy which ensued was productive in that it fostered an increased level of necessary participation. However, the forum for policy development was still exclusively Federal, while the possible ramifications of the study would likely be felt most heavily by States and the individual water users.

Concerned with this disparity, the Senate, on October 5, 1977, agreed to Senate Resolution 284, which expressed the sense of the Senate that no new national water policy be implemented without congressional concurrence and review by the States.

The water resources policy study culminated in the President's announcement of a national water resources policy on June 6, 1978, that policy basically contained only broad policy statements, however, it was generally conceded that the policy reflected the increased degree of public, State, and congressional participation in the process. It represented significant improvement over what had appeared to be the policy's initial direction a year before.

The President's general policy statement of June 6, was followed on July 12, 1978, by a series of more specific Executive memoranda to the heads of Federal agencies and departments.

In most cases, these Executive memoranda directed agencies and departments to improve internal procedures, prepare legislative proposals for submission to Congress, and to further study particular areas of water policy which had been identified as posing special problems. However, in a few cases, the memoranda directed the immediate implementation of policies which would directly impact upon the American people. In these cases, the directives are directly contrary to the sense of the Senate as expressed in Senate Resolution 284.

Our resolution speaks only to this last type of directive. It does not seek to block their implementation en bloc, but only to provide State and congressional review so that their implementation will have the benefit of comprehensive review, or will be quickly identified as a policy for which there is no concensus.

The potential impact of these policies is unknown. On July 10, 1978, the Subcommittee on Water Resources of the Committee on Environment and Public Works held hearings on national water policy. At that hearing, those in the executive branch charged with the implementation of these policies could not explain the meaning of the directives which they were charged with immediately implementing. Yet the implementation process goes forward.

Under the terms of our resolution, two specific types of policies would be subject to rule regulation review and State notification. First, those which would impose additional burdens on those who contract for municipal, agricultural, and industrial water supply from Federal projects. Second, those which would impose additional burdens on those who receive or seek Federal grant or loan assistance for water supply and treatment works. The resolution would also require congressional and State notification of Federal legal actions which might extinguish or diminish rights to the use of water under the Reservation Doctrine.

Specifically, Congress would be provided 60 days in which to disapprove any rule or regulation which would implement the policies described above. If either House passed a resolution stating in substance that the House did not approve of the rule or regulation, it would cease to be effective. The provisions of section 1017 of the Impoundment Control Act of 1974, 37 United States Code 1407, would apply to the procedural require-

ments of such a resolution in either House.

The States would be provided with not less than 60 days notification before regulations to implement this limited portion of the policy could be promulgated.

Finally, our resolution would require the heads of Federal agencies or departments to notify Congress before instituting legal action which might extinguish or diminish rights to the use of water which have been perfected under State laws through the use of the doctrines of Federal or Indian reserved water rights. This does not represent a congressional affirmation of either doctrine or reserved rights. It does not seek to limit the powers of the Federal Government to claim or protect any of its property rights. It only seeks at this time to insure that Congress and the affected States will be informed of how the process of "inventory and quantification," which has been ordered, is progressing, and of the conflicts which may be generated by its implementation.

Mr. President, I wish to reemphasize that this resolution is not intended to put us at loggerheads with the executive branch on water policy. On the contrary, it seeks to establish a procedure through which policy on a limited number of issues will be implemented with full review so as to identify conflicts early. In this way we can insure that those policies which are implemented have had the benefit of wide review and consideration, and hopefully of consensus as well.●

## SENATE RESOLUTION 557—SUBMISSION OF A RESOLUTION REQUESTING THE PRESIDENT TO APPOINT A SPECIAL PROSECUTOR IN CONNECTION WITH GSA

Mr. ROTH submitted the following resolution which was referred to the Committee on the Judiciary:

S. RES. 557

Resolved, that it is the sense of the Senate that:

1. the President, with the advice and consent of the Senate, immediately designate an individual of the highest character and integrity from cutside the Executive Branch to serve as special prosecutor for the government of the United States in any and all criminal investigations, indictments, and actions arising from any illegal activity by any persons acting individually or in combination with others, relating to the General Services Administration.

2. the President should grant such special prosecutor all authority necessary and proper to the effective performance of his duties, subject to the following guidelines:

DUTIES AND RESPONSIBILITIES OF THE SPECIAL PROSECUTOR

THE SPECIAL PROSECUTOR

There will be appointed by the President with the advice and consent of the Senate within the Department of Justice a Special Prosecutor to whom the President & Attorney General shall delegate the authorities and provide the staff and other resources described below.

The Special Prosecutor shall have full authority for investigating and prosecuting offenses against the United States arising out of any illegal activity by any persons acting individually or in combination with others, relating to the General Services Administration.

STAFF AND RESOURCE SUPPORT

1. Selection of staff.

The Special Prosecutor shall have full authority to organize, select, and fire its own staff of attorneys, investigators, and supporting personnel, on a full or part-time basis in such numbers and with such qualifications as he may reasonably require. He may request the Assistant Attorneys General and other officers of the Department of Justice to assign such personnel and to provide such other assistance as he may reasonably require. All personnel in the Department of Justice including United States Attorneys, shall cooperate to the fullest extent possible with the Special Prosecutor.

2. Budget.

The Special Prosecutor will be provided with such funds and facilities to carry out his responsibilities as he may reasonably require. He shall have the right to submit budget requests for funds, positions, and other assistance, and such requests shall receive the highest priority.

3. Designation and responsibility.

The personnel acting as the staff and assistants of the Special Prosecutor shall be known as the General Services Administration Special Prosecution Force and shall be responsible only to the Special Prosecutor.

CONTINUED RESPONSIBILITIES OF ASSISTANT ATTORNEY GENERAL, CRIMINAL DIVISION

Except for the specific investigative and prosecutorial duties assigned to the Special Prosecutor, the Assistant Attorney General in charge of the Criminal Division will continue to exercise all of the duties currently assigned to him.

APPLICABLE DEPARTMENTAL POLICIES

Except as otherwise herein specified or as mutually agreed between the Special Prosecutor and the Attorney General, the Watergate Special Prosecution Force will be subject to the administrative regulations and policies of the Department of Justice.

PUBLIC REPORTS

The Special Prosecutor may from time to time make public such statements or reports as he deems appropriate and shall upon completion of his assignment submit a final report to the appropriate persons or entities of the Congress.

In particular, the Special Prosecutor shall have full authority with respect to the above matters for:

Conducting proceedings before grand juries and any other investigations he deems necessary;

Reviewing all documentary evidence available from any source, as to which he shall have full access;

Determining whether or not to contest any assertion of "Executive Privilege" or any other testimonial privilege;

Determining whether or not application should be made to any Federal court for a grant of immunity to any witness, consistently with applicable statutory requirements, or for warrants, subpoenas, or other court orders;

Deciding whether or not to prosecute any individual, firm, corporation or group of individuals;

Initiating and conducting prosecutions, framing indictments, filing informations, and handling all aspects of any cases within his jurisdiction (whether initiated before or after his assumption of duties), including any appeals;

Coordinating and directing the activities of all Department of Justice personnel, including United States Attorneys;

Dealing with and appearing before Congressional committees having jurisdiction over any aspect of the above matters and determining what documents, information, and assistance shall be provided to such committees.

In exercising this authority, the Special Prosecutor will have the greatest degree of independence that is consistent with the Attorney General's statutory accountability for all matters falling within the jurisdiction of the Department of Justice. The Attorney General will not countermand or interfere with the Special Prosecutor's decisions or actions. The Special Prosecutor will determine whether and to what extent he will inform or consult with the Attorney General about the conduct of his duties and responsibilities. The Special Prosecutor will not be removed from his duties except for extraordinary improprieties on his part.

● Mr. ROTH. Mr. President, today I am submitting a resolution calling for the President to appoint an independent special prosecutor to be confirmed by the Senate to investigate the General Services Administration.

I believe this action is vital to insure the investigation is thorough and impartial. The alleged corruption in GSA has been called the largest money scandal in our Nation's history. After months of investigation, we still do not have a clear idea of the dimensions of these problems. We only know they are enormous and pervasive. We need a special prosecutor, fully empowered to investigate and prosecute.

I am very distressed to learn the current special counsel will soon leave GSA with a great amount of unfinished work. I am concerned that whatever momentum the current investigation has, might be slowed by this move. I have also learned the President has asked one of his closest friends and Attorney General Griffin Bell's former law partner to monitor and observe the GSA investigations. While I appreciate the President's concern, I believe this action in no way satisfies the need for an independent special prosecutor, confirmed by this body.

The American people are outraged by the press accounts of the GSA corruption. It is time to put a stop to this swindle and begin to restore public confidence in our Government.●

## NOTICE OF HEARINGS

AGRICULTURAL RESEARCH AND GENERAL LEGISLATION SUBCOMMITTEE—HEARINGS OF THE USE OF NITRITES IN THE PROCESSING OF MEAT

● Mr. LEAHY. Mr. President, I would like to announce that the Agricultural Research and General Legislation Subcommittee, of which I am chairman, will soon hold the third in a series of hearings on "Chemicals in Food and Agriculture." This section of hearings will be held on the issue of the use of nitrites in the processing of meats and will be held on September 13, 14, 15, and 25, from 8 a.m. to 11 a.m. in room 322, Russell Senate Office Building.

The series of hearings on "Chemicals in Food and Agriculture" were started in 1977. These hearings began with a broad overview of the state of science in regard to detection of chemicals in our food supply and then explored the status of regulation of these chemicals by Government. This series of hearings was undertaken to establish an objective record to which Congress can look when it addresses issues in this area of crucial importance to health and well-being of our Nation's 220 million citizens.

We are now about to address the issue of nitrites. Nitrites are used in the cur-

ing of meat and meat products. These additives are used for several reasons including botulism prevention, and color and flavor enhancement. However, their safety and their status as additives have been recently called into question by a study conducted by Dr. Paul Newberne of the Massachusetts Institute of Technology for the Food and Drug Administration, which indicates that nitrites may be carcinogenic.

These hearings on nitrites will focus on the Newberne study and its health, legal, and economic implications, the effects of a ban or limitation of the use of nitrites, especially focusing on the issue of botulism, the health effects of continued use of nitrites as additives, the alternatives to nitrite cured meats and their feasibility, and the economics of nitrite use or disuse.

Because of the limited time available for hearings at this time, the subcommittee will only be able to allow presentations from invited witnesses. These invited witnesses will cover all viewpoints and all segments of the affected public, industry, and Government—see attached witness list. However, we encourage all interested parties to submit written statements for the hearing record.

It is our subcommittee's hope that these hearings will provide an objective forum to thoroughly explore this complex issue.

To submit statements or for further information, please contact Ms. Denise Alexander, hearing clerk, Senate Agriculture, Nutrition Committee, room 322, Russell Senate Office Building, Washington, D.C. 20510 or call 202/224-2035.

The list follows:

SCHEDULE

Wednesday, September 13, 8 a.m. to 11 a.m.:

Dr. Paul Newberne, Professor of Nutritional Pathology, Department of Nutrition and Food Science, Massachusetts Institute of Technology.

Thursday, September 14, Scientific Panel on Newberne Study 8 a.m. to 9:45 a.m.:

Dr. William Lijinsky, Director of Chemical Carcinogenesis Program, Frederick Cancer Research Center.

Dr. John Weisburger, Vice President for Research, Naylor Danna Institute for Disease Prevention.

9:45 a.m. to 11 a.m.: Scientific Panel on Botulism.*

Friday, September 15, 8 a.m. to 8:30 a.m.:

Marvin Garner, Executive Vice President, National Pork Producers Council.

8:30 a.m. to 10:00 a.m., Consumers and Health Advocates Panel:

Ellen Haas, Director, Consumer Division, on behalf of Community Nutrition Institute and the Consumer Federation of America.

Mike Jacobson, Executive Director, Center for Science in the Public Interest.

Anita Johnson, Environmental Defense Fund.

Bill Schultz, Staff Attorney, Public Citizen Litigation Group.

10 a.m. to 11:30 a.m., Industry Panel:

Richard Lyng, President, American Meat Institute.

Stephen Krut, Assistant Executive Director, American Association of Meat Processors.

Arthur Buring, President, Buring Food Group, Inc., accompanied by Dr. William Brown, ABC Research, on behalf of National Independent Meat Packers Association.

Monday, September 25, 8 a.m. to 11 a.m.:

Dr. Donald Kennedy, Commissioner, Food and Drug Administration.

8 a.m. to 11 a.m.: Carol Tucker Foreman, Assistant Secretary of Agriculture.●

*To be determined.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate today to hold a hearing on truck safety.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

## ERA EXTENSION: THE ISSUE IS FAIRNESS

● Mr. GARN. Mr. President, many of my colleagues think that only those opposed to the Equal Rights Amendment in principle are disturbed by the process of extending the time limit for State ratifications. I suppose we are inclined to be more concerned than others, but it is only fair to note that many institutions and groups who strongly support ERA oppose the political power play now pushing the extension through the Congress.

As an example, I cite the New Republic. This magazine is not normally thought of as a bastion of conservatism, or resistance to social issues. And the New Republic strongly supports the ERA.

But its editors oppose extension, at least as it is being carried out.

In an editorial in the issue of July 29 of this year, the editors raise three questions: First, the length of the extension; second, rescission; and third, whether or not a two-thirds vote is required. TNR does not answer these questions; merely notes that they are real questions, and troubling. "These procedural problems make us doubt the wisdom of extension."

These same procedural questions trouble me, Mr. President, and lead me to use whatever parliamentary tactics are available to me to see that they are resolved properly before an extension for ERA is voted on.

Mr. President, I invite all Senators to read the editorial mentioned, and ask that it be printed in the RECORD.

The editorial follows:

ERA: START FROM SCRATCH

This has become the summer of the ERA. The Equal Rights Amendment was originally scheduled by Congress to be ratified or rejected by the states after a seven year period ending on a cool day now eight months away: March 22, 1979. But still three states short of the 38 needed for ratification and running out of time, the ERA was brought back to the capital in the July heat for a new lease on life. On July 9, a crowd in white sweated under the DC sun and posed a grand question: can there be a time limit on justice, the cause of equal human rights? Others in ordinary dress, both for and against the ERA, have been asking a more prosaic question: is extension of the ratification deadline for the ERA a fair or advisable procedural innovation? Sitting bleached under the TV lights in the committee room last week, opponents and proponents of the extension got their first answers from the House Judiciary Committee. Yes, there is a time limit—until June 30, 1982; but yes, extension is fair and advisable—for three and a quarter years. Proponents clapped at the results. We support the ERA, but we doubt this is the way to achieve it.

The long day of debate dealt with the constitutional procedure of extension, not with the substance of the ERA. Citing Supreme Court precedents and the testimony of constitutional scholars, the committee members generally agreed that Congress has the power to enact an extension of a ratification time limit that Congress itself has imposed. Here the consensus stopped. Committee members disagreed on the policy of exercising that power. Among those who supported an extension, there were three points of controversy. First, the length of the extension. How many years satisfies the vague standard that three-fourths of the states approve an amendment "contemporaneously"? Second, the issue of rescission. If states that have ratified an amendment wish to change their minds, is this merely fair play or a dangerous constitutional innovation? Third, the question of method. Must an extension be approved by the two-thirds majority required to start the amendment process, or only by a simple majority?

These procedural problems make us doubt the wisdom of extension. The controversy over procedure is not likely to be resolved easily, and it shouldn't be. It is a constitutional controversy and involves, like the ERA debate, principles we like to think are fundamentally important. But neither the constitution nor the ERA need be sacrificed to the other. If the extension passes, it may mean bad press for the ERA and a bad precedent for the constitutional process of amending. An extension could be the arbitrary time limit that ends up killing the ERA; if it fails to be ratified, even with a three-year extension—which can't be ruled out—the amendment will be dead.

Even if the ERA is ratified after an extension, its symbolic power may be diminished by general sentiment that the ratification procedure smacked of foul play, especially if rescission are not allowed. To tamper with the constitutional amendment procedure now makes it more susceptible to tampering later, when the purpose may not appeal to liberals who want to fiddle now.

Instead of extending the ERA, why not start from scratch if its deadline expires without three more ratifications? A conservative House Judiciary Committee has passed an extension and is hopeful that it will pass a full House, even with a two-thirds majority, if the Rules Committee calls for it. This makes it hard to believe that a new ERA, unencumbered by constitutional problems, wouldn't be approved. Ratification would be a bigger project with a fresh start, but there would be more time and fewer public relations problems. Polls show that most people support the ERA on its merits. A new beginning would shift the debate back to those merits. If the ERA is an important and necessary amendment, and we feel it is, an examination of what it really means should give it the full and informed support it may now lack.●

## THE MISEDUCATION OF MILLIONS: THE ALARMING RISE OF FUNCTIONAL ILLITERACY IN AMERICA

● Mr. McGOVERN. Mr. President, it is intolerable, but true, that on International Literacy Day in 1978, America's standing in world literacy ratings is fall-

ing sharply. The United States, the first country to provide public education for all, has now been surpassed by the Soviet Union in effectively educating its citizens. According to the United Nations in 1970, the U.S. illiteracy rate was three times higher than that of the Soviet Union; 2 million Americans of at least normal intelligence were illiterate, according to the U.N. count.

In fact, even this estimate of America's illiteracy rate is too low. The results of new and more accurate tests reveal that one out of every five Americans is reading with serious difficulty; they cannot read a newspaper intelligently, understand directions on household articles, or comparison shop for value. But nowhere is the evidence more frightening than among our youth. In 1977, Gilbert B. Schiffman, director of the Federal right-to-read program, reported that—

> At least one out of ten students nearing the end of high school is still not able to do basic everyday reading tasks . . . in certain low socio-economic areas the ratio exceeds one out of five.

Even many prospective teachers are not truly literate. For example, in 1976 one-third of the applicants for teaching jobs failed an eighth grade general knowledge test in Florida. And as the problem worsens, educational agencies do less and less about it, even though study after study continues to document the dimensions of our failure.

According to the national assessment of educational progress in 1974–75:

> Thirteen percent of all seventeen year olds were functionally illiterate.
>
> Forty-two percent of all blacks in that same age group were functionally illiterate.

But even these percentages understate the problem by not including high school dropouts, whose illiteracy rates are very high. The National Institute of Education estimates that "the majority of functionally illiterate students are dropping out of high school before they graduate."

U.S. STUDENTS BEHIND EUROPEANS

Unfortunately, the problem is not confined to those who drop out or are only hoping for a high school diploma. Incredibly, many college-bound graduates are also borderline literates. Colleges and universities complain that one out of four incoming freshmen need remedial help in reading and writing. The University of California found that 75 percent of the State's top high school students failed a nationally used English composition test in 1975. And as a group, American students scored considerably lower on achievement tests than students from other industrially advanced nations: 21.7 points lower in math than students in Germany, 25.5 points below students in Japan, and 31 points below British students.

Over the last 14 years, scholastic aptitude test scores have fallen steadily. There has been a 49-point drop in verbal skills and a 32-point drop in math skills. Annegret Harnischfeger and David Wiley found that a significant drop in English course enrollments, 11 percent nationwide and 19 percent in California from 1972 to 1975, along with a drop in basic and practical course enrollments, could account for the lower scores. They suggest that a 10-percent decrease in the total number of classroom hours spent in teaching the fundamentals caused the 10-percent drop in SAT scores. According to this study, and a later study by the college board, other causal factors included the high incidence of absenteeism and a 50-percent cut in homework. Both studies agreed that changes in test material were not responsible for the falling scores, but that softer academic requirements might be. The college board cautioned, however, that no diagnosis was certain: "The truth is that the real causes for this complex change are at present unknown." There is no certain explanation, but there is absolutely no excuses. Every high school graduate in this country should have at least a basic knowledge of the three R's.

Sadly, this is not the case. The problem is chronic and getting worse. And if this trend continues—if illiteracy remains underinvestigated and research tools underdeveloped—an already deteriorating situation will become an educational disaster and a national disgrace.

Therefore, the first step toward ending illiteracy is the most basic one. We lack an operational definition that sets the goals and standards that American education must meet. Lyndon Johnson once said:

> The answer for all our national problems—the answer for all the problems of the world—comes to a single word. That word is education.

Yet we have not defined even the minimal meaning of education—the threshold at which education makes a meaningful economic and vocational difference for students.

The Federal right-to-read program broadly and vaguely defines the "literate person as one who has acquired the essential knowledge and skills in reading, writing, and computation required for effective functioning in society." In other words, literacy does not mean that one can simply read or write one's name or, at the other extreme, that one can appreciate and understand intricacies of a Faulkner novel. The real meaning of literacy lies somewhere in between. But, as of today, no one has discovered or set its boundaries.

THIRTY MILLION ADULT AMERICANS "FUNCTIONALLY INCOMPETENT"

Dr. Norvell Northcutt, director of the adult performance project, attempts to close this gap by offering a more specific terminology than "functional illiteracy" to describe the increasing lack of basic skills. In defining "functional competency," he draws a mathematical relationship between the mastery of basic educational skills and economic or educational success. Literacy, in his study, is a set of applied skills necessary to survival in a technological society. He defines three levels of functional competence. At the lowest level, the functional incompetent cannot effectively read a want ad, fill out a job application, or perform simple computational tasks. By this standard, 16 percent of whites, 44 percent of blacks, and 56 percent of Spanish surnamed adults—30 million adult Americans—are functionally incompetent. According to another study, 20 million Americans over the age of 16 cannot read well enough to understand a want ad. All too often, economic poverty is due primarily to educational impoverishment.

Employers cannot and will not hire people who can barely read or write. When they do, as the armed services have been learning to their distress, they assume a high risk. An astounding 30 percent of Navy recruits, according to Adm. Hyman Rickover, are a danger to themselves and to costly naval equipment because they lack basic educational skills. One illiterate recruit recently caused $250,000 in damage because he could not read a repair manual; he tried and failed to follow the illustrations.

ECONOMIC COSTS OF LOWER LITERACY

A solid education is the essential foundation upon which a productive life is based. If that foundation is weak or defective, what is built atop it will not be straight or strong, but crooked and near collapse. Young Americans who lack a minimally functional base cannot enter society at the ground level and work their way up. Rather, they swell our unemployment lines; they fill our prisons and our drug treatment centers. Instead of becoming taxpayers, they become taxeaters. at an annual public cost of nearly $6 billion.

We are ending up with three classes in this society—the very rich, the very poor, and the very taxed. Unless some changes are made soon, the welfare and the unemployment rolls will grow even faster; the divisions will cut even deeper.

Once again, America must pay more in the end for spending less in the beginning. The latest bill for Federal aid to education authorized a meager $47 million for basic skill training. It would make more dollar sense to prevent higher social costs in the years ahead by spending additional money on basic education now. Exorbitant public expenditures for treatment programs have bought insignificant gains. Many young Americans who enroll in vocational or occupational programs find their basic educational skills so deficient that they are unable to profit from job training.

ILLITERACY BARS YOUTHS FROM JOBS

According to a recent survey in New York City, many employers consider the lack of basic educational skills—rather than the lack of specific job skills—to be the decisive obstacle in hiring unemployed inner city youth. Mayor Edward Koch of New York argues:

> These youths will never be able to successfully function in society unless, along with everything else, they are given remedial education, which can and should be done.

The most recent unemployment statistics show that nearly half of the black youth looking for work cannot find it. Adolph Slaughter of the District of Columbia Manpower Department has graphically explained the educational roots of this unemployment rate:

> Most of these unemployed don't have the educational skills to impress an employer. They can't speak well, they can't add well enough for you to put them on a cash register. . . . This is a problem here in Washington and in Chicago and New York, all the

big cities. . . . They lack educational skills and they need those things to sell themselves. It's just pitiful.

How can it be that after 12 years of schooling so many have learned so little?

The answer is neither simple nor self-evident. It is not primarily the fault of teachers, who on the whole are better educated than ever; they have to cope with many problems that arise outside the schools, but affect performance in classrooms. The cycle of poverty, shattered family lives, overcrowded schools, and teachers who must spend more time disciplining than teaching only begin to catalogue the list of contributing factors. The educational fads that tried to make learning easy rather than certain. the corroding effect of television, a decline in the total number of hours spent in school, and big city schools with a majority of poor students all have added to the large number of unemployable high school graduates we have today. And Federal efforts to stem the tide of functional incompetence have been inadequate and ineffective.

FEDERAL HELP: DECLINING AND MISALLOCATED

In 1965 title I of the Elementary and Secondary Education Act provided Federal assistance to improve the education available to low income, low achieving children. Yet, as the years go by and as illiteracy grows, the funds to combat it shrink. In 1967 the title I program served approximately 7.6 million children at an average level of $378 per child. But in fiscal 1977, only 5.2 million children received assistance at the same average level. This amounts to a 30 percent decrease in real spending.

Equally disturbing is the limited range of title I funds. Only 57 percent of those children who are eligible actually receive assistance. This means that 5 million children suffer from serious deficiencies that go untreated. Furthermore, of those who are helped, over half are not low achievers and nearly two-thirds are not low income.

There are several reasons for this misallocation of resources. One is that the allocation formula is based upon an outdated 1969 survey which insufficiently reflects the movement of the poor from the rural South to the urban Northeast. By the time new data becomes available, the currently used data will be 13 years old. In the farthest stretch of the imagination, could we see the Defense Department using 13-year-old data to plan military strategy? Yet that is exactly what we are doing with our educational strategy, which will determine the future strength of both our domestic economy and our defense.

Second, the process for distributing Federal dollars often results in less needy schools receiving more funds. The Federal Government allocates money to school districts based on the number of eligible children. The districts, however, may use their discretion in budgeting the money. Paul T. Hill, director of a 1977 study of compensatory education, explains that the "local educational agencies are using the flexibility now provided by the statutes and regulations to deliver services in schools which have relatively low concentrations of low income children." As a result, children whose real needs qualified a school district in the first place to receive Federal dollars may never benefit from a single dime of those dollars.

Third, where districts compete for scarce Federal funds, the district which spends the least per child usually receives the most aid. Government policy actually penalizes the district that makes a conscientious effort, even at fiscal sacrifice, to establish and expand remedial programs. The districts that lose such a competition are usually in urban areas where operating costs are higher and the number of poor children is greater.

To compound the irony, title I programs may actually hinder more children than they help. Title I students receive less time in reading and basic skills than nontitle I students. One-fourth of title I students are isolated from the other students which tends to lead to ethnic and racial segregation and tracking. These "pullouts" are more likely to miss some or all of their regular instruction than students who receve title I instruction in their regular classrooms.

Finally, fewer than 1 percent of American high school students benefit from title I, even though it was designed to aid both elementary and secondary schools. Consequently, the child who makes gains in the early years forfeits those gains in later years because funds are not available. The National Institute of Education sums up the situation in 1978:

The schools are failing to provide the help necessary to decrease the number of functionally illiterate students between the ages of twelve and seventeen.

A 1974 survey of high school students revealed that 89 percent felt the most seriously inadequacy in their schools was that students struggling with math and reading were ignored.

THE TREND TOWARD COMPETENCY TESTING

Many parents concerned about their children's substandard academic achievement have pushed for minimal competency tests. This grassroots movement took the educators and legislators by surprise; but today many States are seriously considering competency testing.

It is astounding that an industry, second only to the military in spending and employment, is subject to little or no systematic checking. Only after students graduate do the inadequacies of their preparation become apparent. However, a few graduates refuse to forget what they did not learn in school. Recently a high school student of normal intelligence sued his school in San Francisco for educational malpractice—he had been awarded a diploma even though he could only read at the fifth-grade level. This is not an isolated case. Such litigation is the first sign of the enlarging perception that schools may be liable for educational failure. The legal counsels of various State offices of education agree that the number of such suits will increase and that increasingly they will succeed during the next 5 years.

Forty-two States have moved toward adopting or developing competency tests, but only five States have completed the task. The majority are a long way from full implementation. States often lack the necessary resources for the development of a reliable and fair testing instrument. Some States complain that it is impossible to achieve a consensus as to what the requirements for high school graduation should be. In order to avoid paralyzing and protracted indecision, to insure that success in one State does not mean failure in another, and to avoid possible racial or ethnic bias in testing, the Federal Government should formulate optional national criteria for competency testing.

Competency testing should not be used, or misused, as a final day of reckoning. The tests should not be misused merely to label a student a failure or a success. Their greatest potential value would be as a tool to diagnose educational problems at all grade levels and to assist and guide teachers in developing prescriptive programs. It is vital to catch and correct basic deficiencies at an early age rather than waiting until the 11th or 12th grades when the difficulties are chronic. By then, time permits just a last ditch effort which will most likely result in a diploma that certifies only attendance, rather than one which reflects achievement and competence.

A PROPOSAL TO ESTABLISH A NATIONAL COMMISSION ON LITERACY

If we continue on our present course, it will mean that we have effectively denied the right to an education to those who need it most. We have closed the door of education behind poor students and the door of opportunity in front of them. No one knows the final answer, but we must begin at least to raise the right issues. I intend to introduce Federal legislation with the following five objectives:

First, the Federal Government should establish an independent National Commission on Literacy. The current educational establishment faces an inherent conflict of interest in attempting to address the problem of illiteracy. An example of the most disheartening kind came in a report for the National Institute of Education in January of 1978 which asserted, with hardly a shred of proof, that illiteracy is largely an aberration and that its high incidence is an exaggeration. The report offers no new research or documentation. To refute the estimates of the adult performance level project, the Harris study and the Educational Testing Service that between 5 and 15 percent of those in the professional or managerial occupations are functionally illiterate, the NIE report relied upon a simple and simple-minded argument:

Surely one would want to conclude that the functional literacy label had been applied inappropriately to individuals in the professional-managerial class.

Certainly one would want to conclude that, but unfortunately, it is neither logically necessary nor empirically proven. The studies finding relatively high illiteracy rates could be flawed; however, one cannot draw the inference that because they may not be 100 per-

cent accurate, they are 1 percent accurate. The NIE baldly states, but does not even barely show, that because a person has a job, he must be functionally competent at a professional level. Educational authorities agree that many such employees may get by with inadequate basic skills by having others do for them what they cannot do for themselves. At best, they are likely to be minimally competent in a narrow field, with little chance for advancement or change in jobs or careers.

The NIE report also concluded that "few, if any, functional illiterates were actually awarded high school diplomas." Yet recent evidence points to a directly opposite conclusion. It has become apparent that the number of repeaters has been held down artificially by policies of social promotion. Only within the last year have students in Washington area schools been held back when they did not meet minimum requirements for promotion to a higher grade. In that year retention rates rose dramatically; they are now 7 to 70 percent higher in various schools. It is clear that the end of social promotion and the advent of accountability mean that students will no longer have a sheepskin to disguise basic deficiencies. The NIE study unfortunately took that disguise at face value.

It is disturbing that the latest study for the National Institute of Education is an excuse rather than an examination of illiteracy. Too often the related agencies absolve the industry they are supposed to evaluate. The NIE study of illiteracy proves one point above all others—we need an independent commission to study the problem.

Second, the National Commission on Literacy should examine the possibility, the desirability, and the content of competency standards. The initial object should be the development of an operational definition of basic literacy: What every young adult, at minimum, needs to know in order to function successfully in American society. It should be emphasized that any Federal aid to education must provide the States with incentives not only to meet these standards, but to surpass them.

Third, the Commission should evaluate current programs and explore possible innovations to raise literacy levels through classroom instruction. The Commission should investigate present Federal and State programs (title I in particular), identifying their strengths, their weaknesses, and their bureaucratic inefficiencies. The extent and the effects of social promotion should also be measured. In light of recent evidence, it seems likely that this policy accounts for the larger number of illiterates graduating from high school today. Finally, the Commission should examine how teachers can make a difference, even in the vast majority of cases where the basic difficulties of students are not the teachers' fault. They should be encouraged to do their best job in teaching basic skills. Teachers should be rewarded for a job well done, not blamed for bad results caused by social problems outside the schools.

Fourth, the Commission should consider alternative solutions outside the traditional school setting. It has been empirically demonstrated that young people make tremendous gains in reading achievement when they are taught job skills and basic skills in unison rather than separately. Educational dollars may be more wisely spent on programs that are more than merely academic.

Jerry Kolker, director of the New York City Department of Employment, reported in 1977:

> I have personnally witnessed youngsters with a fifth grade reading level advanced three grades simply because they were not in school, but were in a work situation where they saw a direct relation between the skill they were learning and the need to improve their academic expertise.

Fifth, the commission should analyze the effectiveness of current Federal assitance in combating illiteracy and the effect of different formulas to distribute such funds. It is unacceptable to appropriate enough money to reach only half of those who need help, and then to misallocate even those insufficient funds. At the very least, there should be full funding of currently successful compensatory education and reading improvement programs.

Something is very wrong in American education. No one in education should be scurrying to protect particular professional interests. Public officials and educational leaders should be searching out the causes without fear or favor and with one paramount interest—the effective education of our children. Our children come first. Efforts to improve our country—efforts in health, housing, the economy, and defense—will be depleted if our children are shortchanged in the schools. What good does it do to spend $130 billion a year to defend our Nation militarily in the world when the citizens we seek to protect are ill equipped to function educationally in the world they live and work in every day? ●

## MR. JACK KAHN, SR.

● Mr. CURTIS. Mr. President, I would like to share with my colleagues a letter I recently received from Mr. Jack Kahn, Sr., an outstanding, patriotic citizen of Sarasota, Fla.

A veteran of World War II, Mr. Kahn distinguished himself in battle, and has since contributed his time, effort, and resources to the betterment of America and her people. Mr. Kahn is a founding member of the U.S. Citizens' Congress and its Education Foundation. His thoughts in this letter are consistent with his humane endeavors, and merit particular attention today when legislators often look down on the citizenry rather than up to it. I ask to print the letter in the RECORD.

The letter follows:

SARASOTA, FLA.,
*August 5, 1978.*

Hon. CARL T. CURTIS,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR CURTIS: Politics, more often than not, is the science of the image and nuance. The turn of a phrase, the degree of accessibility, the aspects of the relationship between petitioner and petitioned, all are components which swing the balance among legislators themselves, between legislators and the citizenry and among the three coequal branches of government.

From the first televised hearings conducted by Senator Estes Kefauver in the 1950's to the final gavel of Senator Sam Ervin in 1974, the seating arrangement of the members of the Committee in relation to the witnesses has deeply troubled me. The sight of Senators poised on high peering down upon the witness, strikes a discordant note and illbefits the fine and noble traditions of our Republic.

More importantly, the psychological effect of the image, on the legislator, witness and audience, may actually thwart the purpose of a hearing—the inflow of information. The witness, be he Cabinet member, labor leader, environmentalist, business leader or John Q. Public, is handicapped at the outset by his physical subordinance. Unlike a court of law, a Congressional hearing renders no judgement on the witness, and the legislators are not unbiased. The witness is clearly at a disadvantage.

Surely courtesy, equity and the principle of the consent of the governed would be wellserved if the legislator were to step down from the forbidding, semi-circular rampart to the level of the legislated where ideas can meet and survive or perish on their own merits.

Sincerely yours,

JACK KAHN, Sr.●

## IRS EDUCATION RULES SEEN HURTING POOR

● Mr. STONE. Mr. President, after studying S. 2388, a bill to provide for the exclusion from gross income of certain employee educational assistance programs, I have joined as a cosponsor of this bill. Senator PACKWOOD and Senator JAVITS, the principal sponsors of the bill are to be congratulated for a proposal which, if adopted, would encourage educational opportunity for many of America's workers. The present IRS rules make an unreasonable and unfair distinction against educational assistance to employees if such educational training is related to a new job or business. S. 2388 would correct this situation.

Sylvia Porter has written an excellent article on this subject in the September 6, 1978, Washington Star. I ask that Sylvia Porter's article entitled, "IRS Education Rules Seen Hurting Poor" be printed in the RECORD.

The article follows:

IRS EDUCATION RULES SEEN HURTING POOR

(By Sylvia Porter)

A secretary at a medium-size corporation decides to study for a degree in business administration, with the goal of moving up to a better paying, more demanding job at the same company. Her employer, as many do, pays for her tuition.

A market analyst at the same corporation also takes advantage of the employer's tuition aid program and he, too, gets a degree in business administration.

But here the similarities between the two

employees end. The secretary, under current Internal Revenue Service rules, must pay federal income taxes on the tuition support she receives from her employer. The higher-paid market analyst does not.

Q. Why the difference in taxation of education benefits?

A. Because the market analyst's training was related to his present job, while the additional schooling the secretary received could have prepared her for a job or business.

Tuition fees paid by employers for education or training to maintain or improve an employee's skills in a present job are nontaxable, under today's IRS rules. The employee need not report the payments as income, and if the payments are reported, they may be claimed as deductions.

But if the assistance helps the employee qualify for other jobs, the aid must be reported as income and is fully taxable.

If workers pay for the education themselves, the same distinctions on taxation apply.

It is this "job-related distinction" that is currently under attack in Congress.

Led by Sens. Robert Packwood (R.-Ore.) and Jacob Javits (R.-N.Y.), about 30 senators are co-sponsoring a bill to change IRS practice to make all education assistance provided by employers tax-exempt. You, the employee, could then exclude from your income all tuition fees, cost of books, supplies, etc., paid for or provided in-house by your employer. It wouldn't matter whether the training was related to your present job or to a future one.

Backing this Employer Education Assistance bill are some unions, Motorola, Mobil Oil, the American Hospitalization Society, and the American Society for Training and Development as well as other groups involved in education. These supporters argue that the present job-related test hits hardest at those who most need new skills and can least afford to pay taxes on additional training.

Specifically, these are lower-level workers: the typist striving to become a secretary, the secretary eager to become a para-legal, the mechanic who dreams of being a mechanical engineer. Today's IRS rules hinder the development and upward mobility of these workers.

"The big losers are unskilled persons, women and minorities," says Packwood. "They are less likely to have any skills to which training can relate, more likely to have low-paying, undesirable jobs. And perhaps, they are less likely to participate in a program if, the day training begins, the employer withholds an additional amount from their small paycheck to cover the federal tax."

The U.S. Treasury opposes the proposal, roughly estimated to cost about $23 million in '78, rising to $40 million in '83, reports my Washington associate, Brooke Shearer. It argues that exempting employer-provided education assistance would discriminate against, say, full-time students or workers in firms without such programs. These people would continue to pay for their education out of after-tax income, while some employees would receive schooling tax-free. It adds that highest-income taxpayers would receive the greatest benefits.

Raising the tax-exempt levels of income would be a more direct and equitable way of attacking the problems of the poor, it insists. And it fears a growing loss of revenue if many people arrange to receive tax-free tuition aid instead of taxable higher pay.

The measure has strong support in the Senate and companion bills have been introduced into the House. But the administration offers little basis for compromise.

Sen. Russell Long, D.-La., chairman of the Senate Finance Committee, will decide the fate of the bill. Long wants a tax law in '78, is anxious to steer clear of any amendments which are controversial and might slow down the tax bill. His assessment of support and opposition to this measure is the key.●

## THE SECOND CONCURRENT BUDGET RESOLUTION

● Mr. HART. Mr. President, I commend the distinguished chairman of the Senate Budget Committee for the work he and the committee have performed so diligently over the last several months. In this era of budget deficits and demands for fiscal responsibility, perhaps no committee of the Congress has as great a responsibility for gaining and maintaining the public trust. In my judgment, no committee deserves the public trust more.

The clearest message the American people have sent to their elected officials this year is that the time has come for more responsible Federal spending and the more efficient use of every tax dollar. The time has come for public officials to take another, more careful look at the long-term implications and results of the programs and policies they enact. The Budget Committee's second concurrent budget resolution before the Senate is an encouraging step in this direction.

In the time that has passed since the adoption of the first concurrent budget resolution, the committee has thoughtfully and effectively responded to major changes in the economy such as the decline in unemployment and the increasing rate of inflation. As the Senator from Maine has pointed out, the second concurrent resolution has reduced Federal spending by $9.3 billion in outlays, a reduction which represents a cut of nearly 2 percent in the level contained in the first budget resolution. The Senator must be commended for bringing a spending resolution before us which reduces the deficit projected in the first resolution by $8.6 billion, nearly 17 percent. Even more significant is the fact that the resolution provides for a 2-percent reduction in the future cost of Government by reducing budget authority for fiscal year 1979 by more than $11.1 billion.

The Budget Committee has, for perhaps the first time, given us an opportunity to get real congressional control over the budget—with all the hard and painful choices that responsibility includes. While some public figures and elected officials have sought to appease their constituents with rhetorical demands for less Federal spending and across-the-board cuts in the budget, the congressional Budget Committees have nurtured and shaped a process that will permit us to establish meaningful budget priorities. The across-the-board cuts that are now proposed with some regularity in the Senate are nothing more than a political sleight of hand whose hypocracy is bound to come back and haunt us. There is simply no substitute for the Senate doing its homework, no matter how difficult the task may be. This is what the Senate Budget Committee has been charged to do, and has done well.

I believe strongly that American taxpayers want the Congress to control the growth of the Federal Government. A combination of inflation and increased taxes has virtually eliminated any increase in family purchasing power over the last 7 years. We must reduce the burden of Federal taxes. We must reduce taxes in a way which neither aggravates inflation, nor reduces the growth of employment.

No one can disagree that the American people want controlled Federal budgets, less Federal spending, and the lower taxes that would result. What the American people want even more, however, is competence on the part of the government that was established in their behalf. We make a mockery of the public sentiment if we pretend to solve our economic dilemmas through across-the-board budget cuts or mechanical formulas to balance the budget. The American people expect their representatives to establish goals, objectives, and priorities. This is what a responsible budget process is designed to do.

I share a commitment with many of my colleagues to reduce the growth of Federal expenditures and achieve a balanced budget with lower rates of inflation and taxation. There are no easy means to this end. It's time that we face the work ahead and commit ourselves to confront it in a responsible fashion.

It has become clear that every Member of this body, regardless of which committees he sits on, must strive to familiarize himself with the budgetmaking process. I look forward to working with the Budget Committee and increasing my participation in one of the Senate's most important functions: the establishment of national spending priorities.●

## PHILIPPINE BASES RECONSIDERED

● Mr. McGOVERN. Mr. President, I am sure all Senators are aware of the broad questions involved in Philippine President Ferdinand Marcos' demand for a renegotiation of the 1966 agreement covering our rights to Clark Air Force Base and Subic Bay. While the current agreement runs until 1991, Mr. Marcos has demanded a renegotiation to provide, among other things, some $1 billion in rental for our continued access to these facilities.

Both the executive branch and the Congress seem to be dominated by the view that these bases are so vital to our security interests in the Pacific that we have no choice but to go along with the renegotiation. In my view that is not necessarily the case. There are a number of alternatives that deserve consideration.

The factors that should shape our thinking on this issue were outlined very succinctly in a compelling article which appeared in the Washington Post Outlook section on August 27. This piece was authored by Dr. George McT. Kahin, who is professor of international studies at Cornell University and who is one of the country's foremost authorities on Asian and Pacific affairs. Since it appeared during the recess and may therefore have escaped the attention of some of my colleagues, I ask unanimous consent that this thoughtful article be printed in the RECORD.

The article follows:

[From the Washington Post, Aug. 27, 1978]

THE NEED TO END OUR RISKY MILITARY TIES TO MANILA

(By George McT. Kahin)

On the northern Philippine island of Luzon, some 50 miles from Manila, stand two symbols of American Pacific power: the Navy's base at Subic Bay and the Air Force's Clark Air Base, two of the largest U.S. overseas bases. With the U.S.-Philippine 1951 Mutual Defense Treaty, they represent a major U.S. military commitment.

The Navy and Air Force are strongly wed to these bases, and the Pentagon offers many reasons why they should be kept. However, Congress recently has tended to question their strategic value and their political and financial costs. For some members of Congress, the mystique of Filipino-American brotherhood has been shattered as much by Philippine President Ferdinand E. Marcos' demands for a large payment of rent for the bases as by his destruction of the semi-democratic system they regarded as an American legacy to his country.

A modified agreement governing U.S. use of the bases was signed by Marcos in 1966. This was to run until 1991, with neither party having the right to alter its terms without the concurrence of the other.

However, since his proclamation of martial law in 1972 and his assumption of virtually dictatorial powers, Marcos has been demanding that the agreement be renegotiated to provided further Filipino control and a rental of well over $1 billion for a five-year period.

At the same time, Marcos expects the United States to honor its commitment to maintain the security mantle provided by the 1951 treaty—insisting this be broadened to provide firmer assurance of U.S. backing for his oil claims in the South China Sea.

The Carter administration has been involved in the same "delicate negotiations" for a new base agreement that Henry Kissinger got off to such a disastrous start. In December 1976, Kissinger yielded to Marcos' demands for rent and offered $1 billion in military and economic aid over a five-year period. Marcos turned down the offer. Apparently he believed that a new administration might give them more

But the Kissinger formula remains attractive to the Philippine leader because its one-shot transfer of funds bypasses potentially hostile yearly congressional scrutiny and leaves him in a financial position to buy arms from the United States. As the recently retired chairman of the Joint Chiefs of Staff, Adm. Thomas H. Moorer, acknowledged last year, "Rent from the bases—which more than likely will be in excess of $1 billion for a five-year period—will ensure Marcos a continued source of hard American currency should the Carter administration reduce aid in reaction to the alleged human rights violations of the Marcos regime."

Marcos has been doing well in his dealings with the present administration. Military aid has remained approximately the same as under Ford, and economic assistance has been significantly increased. Rather than refusing to pay additional compensation to keep the bases open and insisting upon adherence to the existing agreement, the assistant secretary of state for East Asian affairs, Richard Holbrooke, has secured presidential backing for picking up where Kissinger left off. The administration has mollified Marcos by a variant of Kissinger's proposal that provides for a large amount of annually appropriated economic support that need not be identified as rental for the bases. If Congress refuses to approve this increased aid, payment can be channeled through the International Monetary Fund, World Bank or other international agency where the administration's influence remains heavy and largely outside congressional control.

Whether remuneration to Marcos is called "rent" or by some euphemism more acceptable to Congress, the Philippines becomes the only country with which we have a mutual defense treaty that obliges us to pay for using local base facilities that serve the security needs of both countries. The costs of the bases have been borne by the United States, with wages and other U.S. expenditures bringing into the Philippines economy around $200 million a year. Beyond this, U.S. military personnel spend at least $50 million more.

Moreover, Marcos' demand for rent raises a serious question of precedent. We also have mutual defense treaties with Japan and South Korea, where we likewise have base facilities. If the United States pays rent to Marcos, why shouldn't these other countries exact rent?

Some knowledgeable officials believe that Marcos calculates he is better off with a publicly unresolved base dispute, and that he may continue making demands that he realizes the United States will not accept. This not only provides him with sustained leverage for exacting aid from Washington, but also helps give him the public image of a man willing to stand up to the United States. This is politically useful, both domestically and in his efforts to become a Third World leader.

Americans clearly have been misled as to the actual value of the bases and the 1951 Mutual Defense Treaty. Though for the Navy and the Air Force the bases are comfortable and convenient, they are no longer of fundamental importance to U.S. security. Indeed, our continuing occupation of them, together with certain features of the interrelated treaty, put some U.S. defense interests distinctly at hazard. There are strong arguments for positioning U.S. air and naval facilities elsewhere in the western Pacific and for either terminating the defense treaty or rewriting it.

HUMAN RIGHTS CONCERNS

While unsure as to their actual strategic value to the United States—and afraid to challenge Pentagon experts on this issue—many in Congress are dragging their heels on assistance because of Marcos' marital law. Their concern was not assuaged when the Department of State acknowledged last February that "no real steps have yet been taken toward the restoration of democratic government or the elimination of the more severe intrusions on individual rights," and said it had no reason to doubt the authenticity of continuing reports of human torture.

In April, Marcos staged a blatantly fraudulent election for what is actually a powerless legislative assembly. This was calculated to reduce congressional criticism by demonstrating that Marcos was moving back toward democracy. U.S. officials also believed that establishment of such an assembly would undercut congressional fears that any new base agreement might not endure after Marcos left office because while this new body might be Marcos' puppet, its endorsement would endow the agreement with a legitimacy that would continue beyond his death or loss of office.

But the nature of this "election" and the arrest of many of those who ran against Marcos' slate ensured that this maneuver would backfire. Congressional outrage was demonstrated in a letter drafted by the sober and respected Iowan, Berkeley Bedell, and signed by 114 members of the House. Expressing concern over violations of human rights, and shock at the conduct of the election and the arrests of opposition candidates, its signers made clear that their support for continued U.S. aid would be dependent upon "meaningful efforts to redress this situation."

Since then congressional disapproval has been less vocal, with many members bowing before the administration's arguments that criticism should be curbed lest it jeopardize U.S. base rights.

THE INTERNAL THREAT

Proponents of the bases now rarely argue that they are necessary to defend the Philippines under the Mutual Defense Treaty, for clearly adequate measures could be mounted from U.S. facilities outside the islands. The U.S. military privately acknowledges that there is no credible Soviet or Chinese threat to the Philippines, and it is evident that if either country were to try an air or naval assault, American power based in Japan and Guam could easily interdict the effort.

The only real threat to a Philippine government, it is widely agreed, is internal. Because of this and the ambiguity of the U.S. commitment under the Mutual Defense Treaty, any responsible discussion of keeping a U.S. military presence in the islands requires a close scrutiny of both the terms of this treaty, with their differing American and Philippine interpretations, and the political context within which it must operate. It is here that the Carter administration has been most complacent.

Both Subic and Clark are located near traditional centers of insurgent activity. The major insurgent force, the Maoist-oriented New People's Army, with 2,500 to 3,000 armed men, is still much smaller than its earlier counterpart, the formidable Hukbalahap, which in the early 1950s was strong enough to penetrate the suburbs of Manila. The NPA, however, is growing, and its emphasis upon building cadre, developing better rapport with peasants and acquiring weapons (mostly purchased surreptitiously from Filipino soldiers) rather than military confrontation gives a misleading impression of its potential capabilities.

Certainly the mounting economic disparities, the lack of progress with agrarian reform, the frequent brutality of the military and dissatisfaction with martial law provide increasing political capital for almost any opposition leadership. The possibility of increased insurgent activity adjacent to the bases is taken very seriously by some senior U.S. military officers.

With about 85 percent of the government's combat troops trying to suppress the rebellion by Filipino Moslems in the southern islands of Mindanao and Sulu or committed to garrison duty in the Spratley Islands, where many believe oil will be found, virtually no reserves are available to confront a serious increase in rebel activity in Luzon.

Nor should one overestimate the capacity of the Philippine military. Although their numbers have increased 300 percent since 1972, they have been able to achieve no more than a standoff with the Moslem insurgents, despite an enormous superiority in firepower.

Philippine military protection of the U.S. bases is not impressive. Several thousand impoverished peasant squatters have moved into Clark Air Base, and some are believed to have ties wtih the New People's Army. The fences around Clark and Subic are never fully intact, for there is a thriving black market industry in selling them for scrap.

Since the Carter administration has done nothing to disengage from the still operative Manila Pact—the center-piece of the old SEATO—the United States is bound to come to the support of either the Philippines or Thailand in case of external aggression. If their governments should be under serious threat from rebellion, presumably neither the present administration nor Congress would be disposed to accept the tortuous interpretation of the pact's language that per-

mitted the Johnson and Nixon administrations to employ it to send troops to fight an insurgency in Vietnam. Nor probably would they countenance interpretation of the U.S.-Philippine Mutual Defense Treaty as extending that commitment to countering a rebellion.

However, the existence of the Philippine bases provides something of a tripwire for American military intervention. Any American president would find it difficult not to order military measures against Philippine insurgents if they threatened military and civilian base personnel. It would be quite simple for Filipino insurgents to provoke an American military involvement that might be politically beneficial to them because of Philippine nationalist reaction.

A much more immediate danger is posed by the recent occupation of islets in the Reed Bank area of the Spratley Islands in the South China Sea some 250 miles west of Manila. These islands constitute a disputed area of overlapping claims by the Peking, Taipei, Hanoi and Manila governments, with the last three maintaining garrisons. The islet occupied by the Filipino troops is 200 yards from one garrisoned by the Vietnamese, whose claim has been inherited from that of the U.S.-supported Thieu government in South Vietnam. The reason for these expensive occupations is oil, believed to lie in the shallow seas surrounding the islets. Manila has already engaged at least one American firm in exploratory drilling, despite the efforts of the U.S. Embassy to discourage this.

Gen. Freddie Poston, commander of the 13th Air Force at Clark Air Base, told me, "An oil strike in the Spratleys could precipitate a dangerous situation." The Filipinos have very firm expectation of U.S. support if they get into trouble with the other claimants, and Gen. Poston has been under constant pressure from the Philippine military to put his planes on a standby alert to meet this contingency. So far he has refused.

This dangerous situation is not defused by our Manila Embassy's reiteration that the United States does not regard the Mutual Defense Treaty as applying to the Spratleys. The Filipinos insist that the treaty does cover them there. The treaty was drawn up during the Korean War when it was to the American interest that it cover our forces throughout the Pacific, and it is this language that has come back to haunt us. For its reciprocal Philippine protection extends not merely to attack against the Philippines themselves but also to Filipino "armed forces, public vessels or aircraft in the Pacific." It is difficult to argue that if its proivsions once covered Philippine-based operations of U.S. troops in Korea and later Vietnam (where SEATO was also invoked), it should not today cover a Philippine garrison in the Spratleys and supply ships and planes.

Because of heavy dependence on foreign oil, Marcos and his military leaders are intent upon holding onto and developing their Spratley claim. What if Marcos or a successor gets into serious trouble in the Spratleys and we don't use the air and naval power we have based at Clark and Subic to bail him out? Philippine nationalist sentiment would be outraged and probably no government could successfully resist the demand that we be ousted from the bases. Would the United States then have any alternative to withdrawal? The only answer one top military official could give me was: "Well if they didn't want us here, we'd have to leave."

KEEPING THE POLITICAL STATUS QUO

Keeping the American presence in the Philippines also draws the United States into the political arena in a way that heavily influences Philippine policies. We must support the government in power. This was perceived in the Senate's 1969 hearings by Sen. J. W. Fulbright, who observed that, because of our interest in the bases, "We will always resist any serious change in political and social structure of the Philippine government, which is very likely to be, in the long run, a detriment to the people of the Philippines." Thus, so long as the United States is intent upon keeping the bases, it will act to preserve the political status quo, even if that means support of Marcos' martial law regime.

Americans who have believed that it is traditional for this country to encourage democratic government may find it incongruous that U.S. military and economic assistance markedly increased in 1972 after Marcos proclaimed martial law. This year, the Carter administration is seeking the same $37.3 million in arms aid that was provided last year. This military support tells Filipinos that the United States stands four-square behind Marcos.

The symbolism was significantly enhanced in May when Vice President Walter F. Mondale, despite the strong opposition of Patricia Derian, the State Department's human rights coordinator, yielded to the urging of Holbrooke and Under Secretary David Newsom and traveled to Manila to sign a series of economic aid agreements to a kind that normally would be signed by an ambassador or other lesser official.

The administration's bases priority also provides Marcos with a useful foil for turning aside criticism of his political repression. It was because of the bases that the administration served notice that U.S. strategic interests—or more accurately, its definition of them—must take precedence over concern for human rights. The Marcos regime naturally concluded that it didn't have to take American protests over human rights very seriously. Thus, though Marcos' secretary of national defense assured Derian early this year that he would be "the first to order the investigation of any violation of human rights especially if those involved are members of the armed forces," some three months later when I visited the Philippines there was no indication of any investigation of the more than 80 officers cited by Amnesty International as allegedly involved in torture.

THE STRATEGIC ARGUMENTS

U.S. officials who argue for keeping the bases generally flourish a long list of reasons: their importance to U.S. global defense; their critical role in maintaining an equilibrium among the superpowers in Southeast Asia and for projecting U.S. power into that area; their contribution to the defense of South Korea, Japan and Taiwan; their superior effectiveness for surveillance of Soviet naval shipping in the Indian Ocean; their unique value as a back door for supplying Israel in case of another Middle East war, and their necessity for the defense of the Philippines.

With respect to global defense requirements, the U.S. has placed its major nuclear deterrents elsewhere. We have no ICBMs in the Philippines; our Polaris submarines use facilities in Guam, and we base our B–52s in Guam. It was understood during the Vietnam war that no Philippine government would permit B52s on its territory, so the United States had to build expensive facilities in Thailand and rely on its main base in Guam, from which it cost nearly four times as much to fly as it would have from the Philippines.

The thesis that the bases are essential for maintaining military equilibrium between the great powers in Southeast Asia simply does not stand up. There is nothing approaching equilibrium in the area, the ratio being enormously in favor of the United States. Only the United States has the capacity to maintain a substantial naval force in the area. American base facilities in Guam, Okinawa and Japan are close enough to permit sustained large scale naval deployment there. Moreover, the U.S. has access to facilities of friendly neighboring states, including Australia and Singapore, not available to the Soviet Union. The nearest Soviet base is Vladivostok and it is unlikely that any country in Southeast Asia, Vietnam included, would grant the Soviets a base.

U.S. officials are hard pressed to argue that planes of the 13th Air Force could not more effectively fulfill their primary responsibility of defending South Korea if based in Japan or Okinawa. The same holds for the view that U.S. withdrawal from the Philippines would signal to the Japanese and Koreans that we were abandoning Asia. The Japanese could be expected to welcome the Clark Field squadrons to facilities in Japan. The bases from which the 7th Fleet could most easily defend Japanese and South Korean waters are in Japan, not the Philippines.

Even if there still were vital American interests at stake in Southeast Asia, bases in the Philippines are no longer available for supporting U.S. military activities there. Regardless of whether U.S. public opinion would permit an American president to intervene militarily in Southeast Asia, it is clear that Philippine public opinion would be opposed. In July 1976, Marcos signed an agreement with Hanoi pledging that he would not allow the bases to be used by "any foreign country" for intervention against Vietnam or other countries of the region. The Philippines signed this pact (over strenuous U.S. objections) in part to ensure that Vietnam would not sell arms to the Moslem Filipino insurgents. (Whether or not Hanoi made such a pledge, it has made no arms available.)

ACCESS TO MIDDLE EAST

The argument that U.S. base facilities are needed to keep a back door to Israel open is specious. It overlooks recent advances in Air Force logistical capacity that permit our huge C5A Galaxies and C141 Starlifters to reach Israel via the Atantic directly from the United States. Unloaded, these planes can easily make it all the way without refueling and, by availing themselves of midair refueling, they can carry enormous loads—20 tons for the C141s.

Should countries of Western Europe again deny overflight permission, in the event of another Middle East war, we could reach Israel by flying over the Straits of Gibraltar because the range of our planes and the state of air tanker transport and mid-air refueling technology have advanced considerably since 1973.

Gen. Poston assured me that if he were given A15s, which are now being made available to both Israel and Saudi Arabia, he could operate toward the Middle East from Guam just as easily as he does with older planes from Clark Field. With ranges of at least 5,000, 6,500 and 7,000 miles respectively, the A15s and the C5A and C141 cargo transports can easily fly from Guam to the intermediate U.S. Indian Ocean base at Diego Garcia. They would only need the single refueling by air tanker that Poston's present shorter range planes require to get there from the Philippines.

Such Guam-based airpower would be as effective in keeping open Indian Ocean sea lanes as planes based in the Philippines. And the assertion that Philippine bases are necessary for Indian Ocean surveillance is outmoded; our Orion planes now make regular use of facilities in Singapore, much closer to the area.

We must not forget that Marcos has already felt the squeeze of an Arab oil embargo imposed as a consequence of his heavy-handed tactics against Moslem insurgents, and would not want a second reprisal. This would be likely if, during a renewal of Middle East fighting, he permitted the bases to be used for supplying Israel. Moreover, such action would antagonize the Philippines' two Moslem neighbors, Indonesia and Malaysia, the latter openly sympathetic to the cause of the Moslem insurgents.

THE RANGE OF ALTERNATIVES

Has the United States no choice but to remain in the Philippines, locked into a helpless dependency upon the unpredictable currents of local nationalism and the unpredictable moves of a Philippine dictator? Must American security interests remain hostage to the long-term threat of insurgent activity and the more immediate danger of embroilment in international disputes reflecting Philippine acquisitiveness rather than American defense needs? What are the feasible alternatives to remaining in the Philippines?

Moving the 13th Air Force from the Philippines 1,500 miles eastward to Guam would not pose significant difficulties. That island has well-developed air base facilities, with a longer runway than Clark. A guerrilla insurgency is unlikely to be mounted on its 209 square miles of well garrisoned territory, largely peopled by American citizens. The same would be true of the Northern Mariana archipelago that stretches northward from Guam.

Nor should the potential of the Northern Marianas be overlooked. It was from Tinian, one of the Northern Marianas, that the United States sent a plane to drop an atomic bomb on Nagasaki. Modern aircraft based there, or some 200 miles to the south on Guam, could easily operate in air space above Japan, South Korea and Taiwan. Both Guam and Tinian are closer than Clark to Tokyo.

The main loss in the Air Force's move to Guam and Tinian would be the excellent training facilities in the Clark complex. But these could be compensated for by heavier use of existing facilities in the United States or by development of new ones in the Marianas.

For the Navy, withdrawal from Subic would not be the loss that is sometimes alleged. The disadvantages clearly do not weigh so heavily as the threats to its continuing viability posed by unpredictable developments in the Philippines. The 7th Fleet's effectiveness in Southwest Pacific waters would not be greatly impaired if it made greater use of its major base facilities in Japan and Guam. In addition to communications facilities, Guam has considerable repair and logistical capacity, including a large drydock. If more extensive facilities were needed, these could be built in Guam and the Marianas.

In view of the 7th Fleet's responsibilities for keeping shipping routes open through the Straits of Malacca and its potential role in the Indian Ocean, Singapore is obviously much better positioned than Subic, some 1,500 miles northeast. The Singapore government would welcome greater American use of its modern Serangoon base. Some American officials try to spike arguments in favor of Singapore by asserting that its government makes drydocking facilities available to Soviet ships. The argument is dishonest because the Serangoon base, where Americans are welcome and the Russians are not, is on the other side of Singapore island from the commercial dry docks at Kepple harbor, the only place Russian ships are permitted.

Singapore is also hardly suitable terrain upon which to build up a guerrilla insurgency. Moreover, since the United States has no mutual defense treaty with Singapore, rental of its base facilities would not entail the incompatibility that attends such payment to the Philippines. (Which is not, of course, to say that the U.S. could not defend Singapore if this were to American interests.)

There is also the possibility of using the facilities of Australia at Darwin and North West Cape. These would require additional construction, but one location has well-developed communications and both have runways of at least 10,000 feet.

Moreover, withdrawal of the U.S. military presence from the Philippines need not mean abandonment of repair and logistical facilities at Subic and Clark. As a senior American diplomat said more than a year ago: "With the question of sovereignty and control finally resolved, the government of the Philippines would probably be as delighted as Singapore is to provide us with base facilities when we need them, for a fee." He observed that Manila would also probably accept the presence of small maintenance and repair teams on a permanent basis. Another formula would be to provide repair and logistical facilities at Subic and Clark under contract to American civilian management.

Thus a number of options could meet the needs of the Navy and Air Force. Initially some of them would be more expensive than Clark and Subic. However, they would all carry much less risk of exposing the United States to dangerous local political pressures and military entanglements.

THE DOMESTIC FACTORS

What then accounts for the administration's cap-in-hand approach to this arrogant Philippine dictator, and why is it unwilling to oppose his demand that the United States pay rent for the bases? One major reason is the reluctance of the U.S. military, especially the Navy, to give up what seems to be a good thing, and the Pentagon's consequent pressure on the administration for retaining the bases. They provide military facilities and physical amenities that are probably unmatched elsewhere outside the United States and unlikely to be duplicated at new bases.

Another is American domestic politics. In a period when the president is under attack for alleged weakness and indecisiveness in matters of defense and foreign policy, the administration believes that withdrawal of the U.S. military presence in the Philippines would strengthen the hands of its critics. This concern has apparently been heightened by the unwillingness of so many senators to relinquish American control over another traditional symbol of American overseas might, the Panama Canal, and the opposition of many of them to phasing out the U.S. military presence in South Korea.

The administration sees the Philippine bases and Mutual Defense Treaty as providing palpable symbols of a determination to maintain a forward position of U.S. power in the western Pacific and concrete evidence that the fiasco of Vietnam does not mean abandonment of a U.S. military capability in Southeast Asia.

A new base agreement with Marcos could dramatize—as the recent Panama treaty with Torrijos did not—the administration's resolve to maintain a posture of global military power. Being unaware of the insecure political foundations upon which these Philippine symbols of American strength rest, and of the unpredictable calls which a local insurgency or Marcos' oil claims might make on U.S. power based there, many Americans might find this gesture impressive. Moreover, it will make little difference that the Filipino people are unlikely to regard an agreement with Marcos as having any more legitimacy than the marital law rule under which he negotiated it, and consequently subject to their repudiation when he leaves the political scene. His departure may not be far off, but it is unlikely to come before the next U.S. presidential election.

Whatever the relative weight of these factors, the administration is keeping the United States hostage to unpredictable political developments within the Philippines and to Filipino military requirements that clash with U.S. strategic priorities. And it is doing so while acknowledging that the Manila regime continues to violate basic human rights. This policy reflects calculations of short-term expediency more than it does conscientious and responsible stewardship of fundamental American interests.

## THE NATURAL GAS CONFERENCE REPORT

● Mr. MUSKIE. Mr. President, In just a few days, the Senate will begin in earnest its consideration of the conference report on the natural gas bill.

This legislation, like much of the energy legislation considered by the Congress, is complex and very technical. Also, the provisions of the bill are sure to have a marked effect on our economy both in the near and longer term.

Several weeks ago, I asked the Congressional Budget Office to prepare an analysis of the conference documents available at that time. This morning, I would like to share the results of that CBO analysis with my colleagues.

In summary, the CBO analysis presents a positive view of the conference report. CBO determined that the provisions of the conference agreement will result in additional production of natural gas, protect consumers, and have a minimum impact on inflation and the economy in general.

Mr. President, I believe that the CBO report is a fair and accurate analysis of the provisions of the conference report on the natural gas bill. I ask that it be printed in the RECORD.

The report follows:

THE NATURAL GAS COMPROMISE

The CBO has not performed an independent analysis of the Natural Gas Policy Act of 1978. Instead we have reviewed the two existing studies which compare current policy to the House and Senate passed bills as well as to the Conference report. These two studies are: The Joint Explanatory Statement of the Committee on Conference (received July 31, 1978), and the Pricing Proposals by the Energy Information Administration (dated June 14, 1978; updated August 1, 1978). Given that review and our previous background in the natural gas area, we have made a number of qualitative and quantitative judgments regarding the potential impact of the Conference report. Essentially three topics are addressed in this overall review:

1. The objectives of the new legislation on natural gas pricing and the extent to which H.R. 5289 attains those objectives.

2. The current policy problem, that is, what should be assumed about future natural gas supplies, allocation of those supplies, and prices in the absence of new legislation.

3. A brief review of some of the strengths and weaknesses of the quantitative analysis contained in the Conference Committee Explanatory Statement.

THE GOALS OF NEW LEGISLATION

The principal objectives of H.R. 5289 are:

1. To permit interstate pipelines to compete with intrastate pipelines for new supplies of natural gas.

2. To increase the incentives for exploration and production of new natural gas.

3. To incrementally price at least some gas users who have realistic fuel alternatives so they will convert to coal or oil. This provision should also prevent wellhead prices from rising above the levels of competing fuels when deregulation finally takes effect. ...

4. To accomplish the above objectives with the minimum impact on the overall rate of inflation and, specifically, with the minimum impact on the prices paid for natural gas by residential users who, in general, are unable to switch to other fuels.

Advantages—CBO believes that H.R. 5289 accomplishes these goals reasonably well. The Conference agreement ends the price discrepancies between the intra and interstate markets and thereby enables the two groups to compete equally for new gas. Thus, gas curtailments, common in recent years in parts of the country served by interstate pipelines, will be reduced and possibly eliminated. Further, regions of the country not hitherto served by gas pipelines may have the opportunity to obtain natural gas.

H.R. 5289 raises the price for new interstate gas up to the approximate price of intrastate gas and allows for an orderly and predictable rise in prices over the next eight years. These price rises, combined with the special pricing provisions for high cost gas, should increase the supply of domestically produced gas by about .7 to .8 trillion cubic feet in 1985. This increase in domestic production could, in turn, reduce the demand for costly LNG imports and for other higher cost energy sources, including electricity. H.R. 5289 contains incremental pricing provisions that should transfer a portion of the new higher prices onto interstate boiler fuel users. This is the same group that is the target of the coal conversion portions of the Natural Energy Act. More than any other single group of fuel users outside the utility sector, industrial boiler fuel users have the technical potential to replace gas boilers with coal fired units. The advantage of these incremental pricing provisions is therefore not only to protect residential consumers from rapid large price increases, but it allocates the high cost gas to those consumers who can shift from natural gas to other fuels (principally oil and coal). Thus, at least a partial ceiling will be placed on the prices of new gas once complete deregulation takes effect.

Although the original analysis by the Energy Information Administration indicated that the Senate bill would have lower prices to residential consumers than the Conference agreement, CBO believes that their interpretation of the incremental pricing provision in the Senate bill was in error. (A letter to the Chairman of the Energy and Power Subcommittee of House Interstate and Foreign Commerce from the EIA Administration dated August 1, 1978 acknowledged the misinterpretation in the EIA analysis).

It is also important to note that the legislation gives the Federal Energy Regulatory Commission the right to extend the incremental pricing provision to all interstate industrial users which would, in turn, provide greater protection to residential consumers. Whether or not this will be implemented, however, is difficult to determine.

Disadvantages.—H.R. 5289 has three major disadvantages. First it represents a wealth transfer from consumers of gas to producers of gas. This transfer goes beyond the high prices paid for truly new gas and includes, in many cases, higher prices for already flowing gas. The Conference Committee has estimated these costs to be no more than $11 billion from now until 1985. In the view of the CBO, this $11 billion estimate is most likely an underestimate, but probably by no more than $9 billion. That is, the transfer from consumers to natural gas producers over the next 7 years is unlikely to exceed $20 billion. After consumer savings resulting from the increased domestic production are included, the net costs to consumers are unlikely to exceed $16 billion between now and 1985. (Details discussed in the last section of this paper).

Second, by immediately deregulating the prices for high cost gas, while retaining controls on all other gas, there is a possibility that the price of the high cost gas will increase dramatically. If such were the case, producers might channel their investment funds into these high cost resources and pass over lower cost and more accessible gas that was still under price controls. In such a situation, producers would be profiting at the expense of consumers who would be denied access to lower cost gas.

Third, the Natural Gas Policy Act of 1978 is extremely complex and, therefore, there are likely to be implementation problems. Despite the good intentions of the bill's authors, it is fair to say that this bill may allow abuse and legal challenge by producers. The extent of this abuse is, however, difficult to estimate at this time.

THE CURRENT POLICY PROBLEM

A major difficulty in estimating the consumer cost of H.R. 5289 is the great uncertainty over what gas prices would be in the absence of new legislation. Unlike oil and coal prices, where the major uncertainties evolve around OPEC prices and energy demands, interstate gas prices are regulated by the FERC. The current pricing policy used by the FERC (opinion 770 A) provides for increases in interstate gas price of one cent for each calendar year quarter. Nevertheless, many experts believe that, in the absence of new legislation FERC would diverge from this current policy and follow previously announced pricing formulas, thereby increasing interstate prices significantly. Other experts feel that the FERC would try to keep regulated prices constant in real terms. Further, those pricing decisions depend on the future price in the intrastate market. Given the great uncertainty with respect to pricing policies in future years, most analyses (including CBO) have assumed that gas prices will remain approximately constant in real terms in the absence of any new legislation. However, it is possible that without new legislation average gas prices would rise dramatically in real terms over the next decade. Were that to be the case, of course, H.R. 5289 could hold down consumer costs for natural gas.

STRENGTH AND WEAKNESSES OF THE CONFERENCE COMMITTEE REPORT

In the opinion of the CBO, the economic analysis contained in the Conference Committee is technically competent and relatively unbiased. It addresses the major sections of an extremely complex bill and makes reasonable estimates of the bill's impact.

Producer Revenues and Consumer Costs.—The principal conclusion of the Conference Committees' economic analysis is that, H.R. 5289 will increase producer revenues (for the same quantity of gas) by $7.4 to $10.8 billion from now until 1985. However, according to the Conference Report, consumers won't pay all these costs because H.R. 5289 will also stimulate .7–1.4 TCF of new natural gas production which will replace more expensive alternative energy sources, thereby reducing consumer costs to a net amount of $1–5 billion from now until 1985. On the basis of these calculations, the report concludes that the overall macroeconomic reports are virtually zero.

While CBO agrees with the direction of the estimates in the Conference report, we believe that total consumer costs could be some what higher but no more than $8–16 billion higher than the projections of current policy, over the 7 year period. The details of these differences are as follows:

1. The economic analysis of H.R. 5289 makes a complex set of assumptions regarding the volume of gas that would qualify for deregulation under the high cost provisions and for relatively high (regulated) prices under, for example, the stripper provisions. While this is difficult to forecast, the CBO's judgment is that the Committee may have understated the volumes of gas qualifying for the high priced categories, particularly for deep gas and for the stripper wells. Recent growth in the number of oil wells qualifying for the stripper provisions of EPCA would support such a conclusion. Therefore, the CBO believes that producers' revenues for this category may be understated slightly in the Conference report—possibly on the order of $3–5 billion from now until 1985.

2. The Committee seems to have made a strong effort to minimize the possibility that producers will take advantage of H.R. 5289 in a way not intended by its principal authors. Yet, in light of the extreme complexity of this bill, the possibility remains that producers will find a way to increase their revenues above the levels predicted by the Committee. CBO has no special knowledge in this area but believes that it is important to recognize the possibility of abuse under H.R. 5289.

3. The ranges of truly new production forecast by the Committee are, in the opinion of the CBO, too optimistic. We believe that additional production on the order of .7 TCF in 1985, which corresponds to the conservative estimate presented in the Conference Committee report, is the most likely outcome.

In summary, CBO believes that the likely increase in producer revenues over the 7-year period would range from $12–20 billion more than current policy. Offsetting those revenues by $4 billion in consumer savings from new gas production the likely consumer costs range from $8–16 billion.

A final point that may be important regarding price changes for a particular region. The high wellhead price of gas in 1985 in the intrastate market which is claimed in the EIA report under the terms of Conference agreement is, in the view of CBO, misleading. Because the compromise regulates gas prices until 1985 it is true that there is the potential for large increases thereafter to clear the market. However, the alternative proposed by the Senate is to allow prices to rise in the earlier years and thereby reduce potential price rises in the later years. The key point is that the consumer is not concerned solely with the new price in 1985. It is the average price that really matters and there is no doubt but that the Compromise agreement provides for lower consumer prices in 1985 then does the Senate bill. Examination of Table 2 in EIA's August 1, 1978 supplement clearly supports that statement.

Macro-economic Impacts.—Depending on the extent to which increased producer revenues are funneled into productive investments, the overall effects could be either slightly positive or slightly negative. However, in a $2 trillion economy, the effect would be relatively small in any event.

Regarding inflation, the effects are also likely to be small. If the increased consumer cost for gas were spread out evenly over the 7-year period, we expect the rate of increase of the GNP deflator would increase by a maximum of .05–.1 of one percent per year. If, as seems likely, the effects are very low in the initial years and build up in the later years, then we could see slightly larger inflation impacts in the 1982–1985 period.●

## JUVENILE ALCOHOLISM

● Mr. CULVER. Mr. President, we are witnessing an alarming increase in juvenile alcohol abuse. Testimony before the Juvenile Delinquency Subcommittee, which I chair, has shown that young people are beginning to drink earlier in life and in greater amounts. In my own State of Iowa, we have discovered that from 1974 to 1976 the earliest age of alcohol abuse fell from 9 years to 6 years of age. We also know that an estimated 17,000 Iowans between the ages of 14 and 17 have become heavy drinkers.

The task of preventing juvenile alcohol abuse is a difficult one. Alcoholism among young people has its roots in a society which tolerates and even encour-

ages the use of alcohol. In addition, the message which the media delivers to our youth is that drinking is glamorous and necessary for social acceptance.

At the Federal level, the Alcohol and Drug Abuse Education Office in the Department of Health, Education, and Welfare (HEW) provides training and resources for school programs in alcohol and drug abuse, education, and prevention. This office and its work deserve strong and continued congressional support.

Government programs alone, however, cannot halt the rise in juvenile alcoholism. We must also commit ourselves in our families, churches, and communities to provide the kind of personal guidance and support which will truly deter young people from the self-destructive use of alcohol. The importance of this approach was strongly supported by Mr. Gary Reidman, director of the Iowa Substance Abuse Authority, in an editorial that appeared in the Waterloo, Iowa Courier on August 20, 1978. Mr. Reidman traces the rise of alcohol's popularity among young people to its acceptance by society and to the relative lack of concern by parents about its use by their children. He suggests that parents should recognize alcohol as a drug and help to develop effective conditions for reducing the socially attractive appeal of alcohol.

I commend this article to my colleagues and ask that it be included in the RECORD.

The article follows:

SAYS NOT ENOUGH ATTENTION TO YOUTH ALCOHOL ABUSE

(By Gary P. Riedmann)

In the past 10 years we have heard much about the use of marijuana, heroin and other drugs by our youth.

Yet, at the same time, little attention has been given to the increasing use and abuse by young people of our society's most dangerous drug—alcohol.

The National Institute on Alcohol Abuse and Alcoholism estimates that there are 3.3 million teenagers in our country who are having problems with alcohol.

The proportion of teenagers who have experienced drunkenness has climbed from 19 percent to 45 percent in recent years.

These are national statistics, but we also have similar problems here in our own state, with data to support it.

In 1977, there were nearly 7,000 persons admitted to alcoholism programs for treatment. Of these, 900 or 13 percent, were under 21 years of age.

Younger and younger children seem to be drinking alcohol now.

In one statewide study conducted in 1974 and again in 1976, it was found that the earliest reported case of alcohol in 1974 was at age 10, while in 1976 it was age 6, with regular use reported by age 10.

The study also projected that 17,000 Iowa youth ages 14–17 exhibit a heavy drinking pattern.

Why is alcohol becoming more of a problem among our state's youth?

A primary reason is that alcohol has become such a socially acceptable drug to our society. This is true even to such a point that some parents are relatively unconcerned by their children's use of alcohol.

Undoubtedly, their reaction would be different if they discovered their child smoking marijuana.

Yet, at the same time, it is a fact that the disease, alcoholism, is the number three health problem in our country, causing more health, family, and adjustment problems and more directly or indirectly related deaths than any other drug.

The growing problem of the abuse of alcohol by young people has been blamed on a number of factors, including advertising, lack of parental supervision, lowered drinking ages and many others.

But in actuality, it is easy to see how the attitudes of society promote the use and abuse of alcohol.

We live in a chemical society. From an early age, children learn through watching others and television programs that alcohol is associated with having a good time and feeling good.

We see fathers and mothers coming home from the office or factory and reaching for a cold beer or martini "to help relax."

Some television programs subtly suggest that if a crisis develops, the immediate answer "to help cope" is to have a stiff drink.

Social events rotate around the use of alcohol, with friends pressuring you to "have just one more."

Young people are very aware of these attitudes and early develop the idea that alcohol is not a dangerous drug in the same sense as heroin.

Alcohol is not only acceptable, but also fun.

To use alcohol is to feel good.

If we are to deal with the rise in alcohol problems among youth, we must first deal with some of the attitudes of society.

Some ways you can personally help are:

Recognize that alcohol is a drug. Learn the facts about alcohol abuse and alcoholism. Understand that alcoholism is a disease which causes serious health and social problems.

Set proper models for youth to follow concerning the use of alcohol. Whether this means not using alcohol at all, or using more wisely, we must realize that we are helping to form either healthful or destructive attitudes toward alcohol by our own actions.

Explore ways for you and your family and friends to have a good time and feel good without the use of alcohol. There are many ways to relax after a hard day at work, and there are lots of unique non-alcoholic beverages that can add life to a party.

Through these ways and others, we can work together to insure that alcoholism does not become any worse among our youth.

There is so much talent and enthusiasm among our youth, it would be a shame to inhibit this potential by the use of alcohol.

For further information on alcohol or alcoholism or programs in the state, contact the Iowa Substance Abuse Information Center, Cedar Rapids Public Library, 428 3rd Ave. SE, Cedar Rapids, Ia., 52401.●

## ILLEGAL ALIENS

● Mr. HUDDLESTON. Mr. President, the problem of huge numbers of illegal aliens entering this country is escalating daily and it is imperative that this matter become a high priority item for the next Congress. A solution must be found in order to prevent the continued undermining of the labor force in this country.

In order to appreciate the severity and longrun implications of this problem, I believe it is imperative that we understand the motivating force behind most illegal immigration. Approximately 90 percent of the illegal aliens entering this country come from Mexico, and realization of the increasing economic and population pressures in that country should encourage us to enact strong measures to deal with the problem.

John Huey wrote an article for the August 30, 1978 edition of the Wall Street Journal which dramatically illustrates the Mexican dilemma and its impact upon illegal immigration in this country. Mr. Huey's article indicates that Mexico's unofficial plan for coping with the bleak economic future and burgeoning population is emigration through the "porous U.S. border." He quotes Patrick J. Lucey, U.S. Ambassador to Mexico, as saying, "They've [Mexican leaders] made it clear that they don't feel any sense of responsibility toward helping the U.S. with its problem of undocumented workers. The failure of [the U.S.] Congress to act on the question is viewed as a welcome breathing spell."

I do not believe that the United States can continue to act as a safety valve for other countries by permitting virtually unlimited immigration. Congress must act decisively and as soon as possible on this problem.

I ask unanimous consent that Mr. Huey's article be printed in the RECORD.

The article follows:

DESPITE RISING WEALTH IN OIL, MEXICO BATTLES INTRACTABLE PROBLEMS

(By John Huey)

MEXICO CITY.—Two years ago, in the waning days of Luis Echeverria's presidency, Mexico seemed near collapse. But since then, the tension that gripped this giant city has been soothed by visions of a sea of oil.

Mexico's sharp increase in its petroleum-reserve estimates has restored its international credit rating. Its $26 billion foreign debt seems certain to be whittled down, and phrases like "the next Saudi Arabia" are bandied about in flashy new discos springing up here.

But despite the oil-based balm, the cancers that have eaten away at Mexico for years are still afflicting it. So far, the private investment desperately needed to create jobs continues to lag. Mexican workers, robbed of purchasing power by inflation, are raising their wage demands and calling for more and longer strikes. Soaring population growth defies solution. Farm problems persist. And the flood of illegal emigrants to the U.S. continues as the primary safety valve.

It is becoming clear, in the words of a U.S. State Department economist, that "the problems of Mexico won't be solved by oil, and its major problems may well be worsened by it." Indeed, adds a Commerce Department analyst in Washington, "There is a growing school of thought that oil could be very harmful to Mexico right now. It's providing an excuse—a crutch—not to solve the basic structural problems." Some even compare Mexico's breakneck expansion of oil sales to a derelict selling his blood in the morning to buy an afternoon bottle of wine.

HUGE OIL RESERVES

Clearly, however, Mexico has plenty of blood to sell. Probable petroleum reserves are estimated at 31 billion barrels and possible reserves at 120 billion, while street-corner speculation puts the total at 160 billion barrels. Among other things, President Jose Lopez Portillo is expected to announce yet another sizable increase in reserves during his annual state of the nation address this Friday.

And amid a great debate over how to spend the newfound bounty, the money already has started pouring in. Pemex, the state-owned oil company, says exports this year should total about $2 billion, double last year's, and should hit $11.5 billion by 1985. Some U.S. observers see much-quicker growth in export revenue; they forecast $5

billion by 1980 and double that by 1982 or 1983. Such figures inevitably provoke comparisons with countries like Saudi Arabia, whose proven reserves exceed 150 billion barrels.

But other comparisons paint a far-different picture. The age makeup of Mexico's population of 64 million—almost half under 15 years old—is matched only by countries like Pakistan and Bangladesh. Mexico's income distribution ranks among the most unequal in the world, alongside countries like Uganda. And a slew of other social and economic ills presents an equally stark scene.

U.S. DEEPLY INVOLVED

These ills, moreover, are almost certain to become directly troublesome to the U.S. With almost 2,000 miles of common border, any further instability in Mexico will "create an entirely new type of international problem for the U.S.," a State Department official warns.

Of all these ills, unemployment is worrying Mexicans the most right now. The government concedes that only about half of the work force in Mexico City is fully employed, and official statistics show that industrial employment in the nation dropped 1.6% last year, with no signs of a reversal in the first half of 1978.

The job problem is evident in Mexico City whenever a traffic light turns red. Gaunt young men with rags and buckets rush out among the stopped cars and try to earn a few pesos by cleaning windshields. And their competition is constantly increasing. Each day, an estimated 1,400 country people pour into this city of 13 million and strain a system already struggling to import food and drinking water. Nationwide, an estimated 800,000 additional jobs a year are required just to avoid a rise in unemployment.

GRAVE NEED FOR JOBS

"The economic situation is grave," says Alfonso Sanchez Madariaga, No. 2 man in the Confederation of Mexican Workers, the nation's most-powerful labor group. He believes that the immediate need—quite apart from the future—is for five million new jobs, and he adds, "We are hoping that with the exploitation of oil, the government can create new jobs in all areas of basic industrial production."

But skeptics contend that employment isn't easily increased in "extractive" industries like petroleum, in which creation of one job requires an investment of $100,000 to $200,000, compared with only $1,000 to $2,000 in light manufacturing.

"There is no way that oil—its extraction, its refinement or its marketing—will improve employment in Mexico," says the skeptical State Department economist, who adds, "Given the way Mexico is organized, it (petroleum) will worsen income distribution." Professor Calvin Blair, longtime Mexico-watcher at the University of Texas, agrees. "If the government uses strong oil revenues as a reason for postponing fiscal reform—particularly tax reform," he says, "income distribution may well worsen."

Both income distribution and unemployment are intertwined in another of Mexico's devastating problems: the feudal inefficiency of its agricultural system. More than 45 percent of the labor force works millions of fertile acres but produces less than 10 percent of gross national product and receives only 6 percent of national income; half the farmers produce only 4 percent of total agricultural output and don't grow enough food to feed their own families; and the country hasn't grown enough to feed itself since 1971.

The agricultural system is divided between primitive ejido (communally owned) farms and large, mechanized agribusiness spreads. On the least-efficient farms, inferior seeds, insufficient fertilizer and archaic equipment hold down per-acre corn yields to less than one-quarter the U.S. average.

The farm problem is politically explosive. To one faction, nothing is as sacred as the field worker's right to own land—a tenet basic to the 1910 revolution. To another, nothing seems as urgent as increased efficiency. But Manuel Clouthier, president of Coparmex (a powerful employers' confederation), observes, "Every time agricultural production has increased anywhere, employment has decreased"—hardly what Mexico needs. Although the tension has eased since the violence that followed Mr. Echeverria's expropriations two years ago, the pressure for land reform hasn't abated; just last week the government expropriated about 26,000 acres of private land to be distributed to ejidos and accepted another 49,000 acres in "voluntary" donations.

If some solution isn't worked out, the benefits of oil exports could be largely lost. "Quite simply, the oil boom will be offset if agricultural production isn't increased," Mr. Clouthier says. He notes that producton dropped 1 percent in both 1977 and 1976. And even though 4 percent growth is forecast for this year, Mr. Clouthier cites projected imports—including 1.8 million tons of corn, 1.6 million tons of oilseeds and 700,000 tons of sorghum—as an alarming trend. As one agribusiness executive asks, "What good will it do to export $11.5 billion in oil in 1985 if we have to use it to pay for half our food in imports?"

BURGEONING POPULATION

Moreover, feeding Mexico today is literally only half the job that it will soon become. Already the 10th largest in the world, Mexico's population is expected to double by the year 2000. This surge—due to a high birth rate coupled with a relatively low death rate—is perhaps Mexico's worst problem, and the one least solvable by oil money. After decades of urging the populace to reproduce, the government's initial efforts to push birth control have met with some success in the past couple of years. But most experts credit that success to acceptance by the educated classes and express little hope of convincing the masses. Besides, demographers note, even if the birth rate suddenly plunged, population growth wouldn't be significantly affected for 20 years because of the multitude of women soon entering their childbearing years.

While oil revenues apparently can do little to solve such problems, they clearly can do much to aggravate some others: corruption, inflation and, subsequently, the distribution of income. The large influx of money understandably arouses widespread suspicion in a country that, ever since 1950, has seen strong economic development accompanied by deterioration in income distribution and by overt corruption. To combat doubt, President Lopez Portillo has initiated what appears to be the beginnings of an anticorruption campaign, but many observers wonder whether it is possible to overcome a malady so endemic here. As a popular expression puts it, "Oil, a gift of the gods; is the temptation of the Devil."

To the extent that oil money isn't used to service foreign debt, the funds also could become a temptation to spend—and thus a fuel for inflation. According to most U.S. estimates, inflation already is clipping along at well above 20 percent annually. Prices have risen so steadily that labor long ago was released from its voluntary 10 percent limit on wage increases and recently has been winning settlements as high as 16 percent. The unions are "more aggressive than they're been since they organized 40 years ago," a labor lawyer for several big corporations says. "They're better educated, and they expect more."

REAL WAGES DROP

But in real terms—adjusted for inflation—workers aren't getting more. A U.S. Embassy report shows that the average real wage declined in 1977 and will drop again this year. The report also counted, in the first quarter of this year, 427 strikes, 47 percent more than in the like 1976 period.

In the face of all these mounting pressures, Mexico's plan for stability has long been clear, most observers say. And it isn't oil.

"It's the same way the Irish and the English and the Germans and the Italians all solved their problems in the late 19th and early 20th Centuries, when their economies were transforming from agrarian to industrial," Prof. Blair of the University of Texas says. "Between 1890 and 1920, they sent 20 million immigrants to the U.S."

Mexican leaders don't deny the need for emigration. "They've made it clear that they don't feel any sense of responsibility toward helping the U.S. with its problem of undocumented workers," Patrick J. Lucey, U.S. Ambassador to Mexico, says. "The failure of (the U.S.) Congress to act on the question is viewed as a welcome breathing spell."

How these impoverished migrants will fare in the U.S. sparks much speculation here. But wealthier Mexicans have insured that they always will be welcome—by purchasing real estate in Texas, California, Colorado and elsewhere.

KEEPING U.S. TOEHOLDS

"We aren't seeing the large pools of money coming in, like we did during the Echeverria days; there's obviously a higher comfort level with Lopez Portillo," says Maylon Burnham, president of a San Diego real-estate firm that long has served Mexican investors. However, he says. "A lot of our Mexican investors have had opportunities to pull their money out, but they always prefer to roll it over into U.S. property. And we haven't seen any slowdown of the quarter-million, half-million and three-quarter-million-dollar investments.

Nor has Mexico seen any upturn in investment from the U.S., which accounts for more than 70 percent of foreign holdings here. In the 1978 first quarter, according to the central bank, new private foreign investment in Mexico totaled only $14 million, the lowest in at least six years. Business, a U.S. executive says, "is just sitting around waiting"—waiting to see what will happen next.

And concern over what comes next is increasing. For one thing, the fragility of oil dreams was made clear to most Mexicans by the failure of a much-heralded plan to sell natural gas to the U.S.; if failed because the price didn't conform to President Carter's energy plans.

"We don't know what the real situation is," a wealthy Mexican merchandiser complains, "but we're tired of fantasies. If the government has a plan for this petroleum, it should publicize it. We know the oil is a postponement; we just don't know what it's a postponement of." ●

## FOOD INFLATION

● Mr. McGOVERN. Mr. President, on Tuesday, August 29, the Labor Department reported that the consumer price index increased 0.5 percent in July. Though this monthly increase is the smallest since last December, the seasonally adjusted annual rate for the first 7 months of this year equals 9.8 percent—"the worst inflation rate in 3 years."

I have been deeply concerned over the extent to which food has been the main contribution to the double-digit inflation we have experienced this year. Due to the volatility of food prices, the figures for July essentially remained unchanged from the June statistics. However, it is imperative that we recognize that the American consumer is confronting a 15.3 percent seasonally ad-

justed annual rate of inflation for food. This is an intolerable situation.

A pertinent example of the severity of our present food price dilemma is in Washington, D.C., where supermarket prices rose 3.2 percent in the past 2-month period. In an article appearing in the Washington Post (August 30), a Washington shopper aptly expressed the depth of this problem: "It's absolutely ridiculous * * * During the last month, for the first time, my food bill amounts to more than half of my weekly paycheck."

Mr. President, I request that this Washington Post article of August 30, 1978, be printed in the RECORD.

The article follows:

[From the Washington Post, Aug. 30, 1978]

AREA PRICES UP 1.9 PERCENT

(By Charles S. Rowe, Jr., and Neil Henry)

Led by large increases for food, housing and transportation, consumer prices in the metropolitan Washington area rose 1.9 percent from June through July, slightly above the average national price increase of 1.8 percent during the two months, the Labor Department reported yesterday.

Since July a year ago, local consumer prices have risen 7.7 percent as prices nationwide increased 7.4 percent.

Locally, inflation is accelerating as the latest 1.9 percent increases in prices follows a 1.7 percent increase in April and May and an increase of seven-tenths of 1 percent during the first three months of the year.

During June and July, local food prices increased 2.8 percent, the largest increase for any of the major consumer expenditure categories. Grocery store food prices increased 3.2 percent during the two months. Nationally, food prices increased 2.2 percent during the two months.

Housing costs, which account for 46.7 percent of the average spending of Washington area consumers, increased 1.9 percent during the two-month period. Since July a year ago, local housing costs have risen 8.4 percent, while the costs nationwide have risen 8.8 percent.

Among housing costs, the cost of utilities increased 5.2 percent during June and July, partly reflecting an increase of 10 percent for gas and electricity.

The cost of traveling around the metropolitan area also increased significantly during June and July. Public transportation costs increased 2.5 percent and private transportation increased 2.6 percent. Since July 1977, local transportation costs have risen 6.2 percent compared to an increase nationwide of 4.5 percent.

The large increase in food prices was greatest for meats, poultry, fish, eggs, fruits and vegetables—which all increased in price more than 4 percent in the two months. Prices declined for a few products, including oranges, lettuce and tomatoes.

Among Washington shoppers interviewed yesterday, the increase in grocery store food prices came as no surprise. Many felt helpless while others were downright furious.

"It's absolutely ridiculous," said Louise Lemmon, cradling a bag of groceries in her arms as she left the Metro Supermarket at 141 P St. NW. "During the last month, for the first time, my food bill amounts to more than half of my weekly paycheck.

"You spend $4 or $5 for a piece of meat, and when you get home and cut away the fat you find it isn't hardly enough to feed one person, let alone four," she said. "Then when the rent comes due you wonder where all the money went."

Linda Jarman, interviewed outside the Townhouse Supermarket at 1800 20th St. NW, suggested a solution to the rise in local food prices.

"My husband and I are planning to move to rural North Carolina," she said, "because life is so expensive around here. I think down South we'll find it a bit cheaper to live."

Chau Phan, 71, who lives on 19th Street NW on a fixed income, left the store with a small bag of groceries.

"Last year, I was able to get a bag and a half of food for the same money," said Phan, who shops for food once a week with his wife. "My pension doesn't stretch at all, while food prices seem to always stretch. One or the other will have to give after a while."

Local consumers may find some relief in clothing prices, which decreased 2.1 percent during June and July. The price of footwear showed the sharpest drop, falling 5 percent as female apparel prices fell 3.4 percent and male apparel prices fell 1.8 percent. Nationwide, clothing prices fell 1.1 percent during the two months.●

## PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the three notifications I have just received.

The notifications follow:

In reply refer to: I–13504/77ct.

WASHINGTON, D.C.,
*September 7, 1978.*

Hon. JOHN J. SPARKMAN,
*Chairman, Committee on Foreign Relations, U.S. Senate,*
*Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78–66, concerning the Department of the Army's proposed Letter of Offer to Saudi Arabia for other than major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $460 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, USA, Director, Defense Security Assistance Agency.*

[Transmittal No. 78–66]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Saudi Arabia.

(ii) Total estimated value:

| | *Million* |
|---|---|
| Major defense equipment* | $0.0 |
| Other | 460.0 |
| Total | 460.0 |

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Management of construction of Ministry of Defense and Aviation Headquarters facility at Riyadh. The facility will include office and administrative space, cafeteria, mosque, auditorium, atrium, underground command center, parking garage, market facilities, gatehouses, roads, and all utilities.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: September 7, 1978.

WASHINGTON, D.C.,
*September 7, 1978.*

In reply refer to: I–2239/78ct.

Hon. JOHN J. SPARKMAN,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78–68, concerning the Department of the Army's proposed Letter of Offer to Saudi Arabia for other than major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $35 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, USA, Director, Defense Security Assistance Agency.*

[Transmittal No. 78–68]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Saudi Arabia.

(ii) Total Estimated Value:

| | *Million* |
|---|---|
| Major Defense Equipment* | $0.0 |
| Other | 35.0 |
| Total | 35.0 |

*As included in the U.S. Muntions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: One (1) 35 MW Power Plant at Khamis Mushayt Military Cantonment.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: September 7, 1978.

WASHINGTON, D.C.
*September 7, 1978.*

In reply refer to: I–4917/78ct.

Hon. JOHN J. SPARKMAN,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78–87, concerning the Department of the Army's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $272.1 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, USA, Director, Defense Security Assistance Agency.*

[Transmittal No. 78–87]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Saudi Arabia.

| Total | 272.1 |

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Additional design as required, con-

struction, and other related procurement, for Additional Support Facilities, Saudi Naval Expansion Program (SNEP), including U.S. Army Corps of Engineers costs for services provided in managing and administering the design and construction contracts. Facilities are to be located at Jubail.**

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(v) Date Report Delivered to Congress: September 7, 1978.●

## ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I suggest that the cloakrooms ask Senators, and I wonder if the cloakrooms know of any Senator who wishes to come over during morning business to make any statement or introduce a bill. If we could find out within 5 minutes the Senate could go out.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HANSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE NATURAL GAS COMPROMISE—PROS AND CONS

Mr. HANSEN. Mr. President, few issues we currently face are as complex and controversial as the question of whether to approve the report of the conferees on the natural gas part of the energy bill. The Congressional Research Service has now scheduled an informational debate seminar on this bill which may be of great value to Members and staff who are considering this critical question. Because of the late moment at which this program was arranged, notice of it may not have been delivered in time to all Senators' offices. For this reason, and because I believe that the program will provide an excellent airing of the arguments both for and against this legislation, I ask unanimous consent that the announcement of this program be included in the RECORD following my remarks.

There being no objection, the announcement was ordered to be printed in the RECORD, as follows:

THE NATURAL GAS COMPROMISE—PROS AND CONS

In response to the anticipated debate, the Congressional Research Service invites Members and staff professionals to a seminar on the Natural Gas Compromise.

Date: Tuesday, September 12, 1978.

Time: 9:00 a.m. to 11:00 a.m.

Place: Coolidge Auditorium, Library of Congress.

Panels will offer five-minute arguments on each of the following issues:

1. Is the natural gas compromise an enforceable piece of legislation?

2. What are the impacts of the compromise on consumers, both residential and industrial, compared to the status quo?

3. How will natural gas producers fare under the compromise, compared to the status quo?

4. How will gas supply respond under the compromise as compared to the status quo?

5. What is the impact of the compromise on the dollar, the balance of payments, and the U.S. image abroad?

6. Are there any practical current alternatives to the compromise and will Congress face the issue again if the compromise fails?

Written and oral questions from the audience will be entertained after the debate.

PANELISTS

*Pro*

Leslie J. Goldman, Prin. Dpty. Ass't Sec'y, DOE.

George H. Lawrence, Pres., American Gas Assoc.

William Demarest, Counsel, Energy and Power Subc.

J. N. Warren, Natural Gas Producer.

*Con*

Jack M. Allen, Pres., Indep. Petroleum Assoc.

Danny Boggs, Senate Energy Committee.

James Flug, Exec. Dir., Energy Action Committee.

A Noted Economist.

Mr. HANSEN. Mr. President, the administration argues that the country needs this gas bill to impress the outside world with its serious intent to control energy use and that the fate of the dollar might depend on the outcome of the vote.

But when the substance of this so-called compromise is weighed against its symbolism it reminds me of a man paying a bill with a bum check. And if this bill is passed, you can bet your bottom devalued dollar that it, too, will bounce.

As the distinguished chairman of the Finance Committee, (Mr. LONG) said in commenting on the bill:

What I find to be one of the most impressive arguments to some Senators, when thoroughly analyzed, becomes one of the most ridiculous. That is the argument that we must pass a bad bill, even though it be a very bad bill, because it will strengthen the dollar, that somebody abroad will think America has done something about the energy question and, therefore, they will have more confidence in the dollar.

. . . we might as well pass a blank sheet of paper and just write "energy bill" across the top of the sheet of paper and hope to fool somebody.

What good would it do us to pass a bad bill, a bill that is going to cause us to have less energy, not more energy, a bill that will hinder production, not increase production? What good will it do us to pass such a bill in the hope of fooling some foreigner?

Those are sophisticated people. They are not a bunch of idiots over there in Japan, in Europe, and elsewhere. They will know from everyone they talk to in the industry that the bill does more harm than good.

Mr. President, one of those European countries is doing just the opposite of what this so-called compromise proposes to do.

France is freeing itself of the yoke of price controls and restoring market forces as the prime mover in the French economy. For French Prime Minister Raymond Barre as well as President Valery Giscard d'Estaing, both trained economists, this bold new policy of economic liberalization constitutes a considerable economic and political gamble, for it inevitably means a period of rising prices and rising unemployment while waiting for the anticipated market forces to bring both down.

Barre pointed out that there are always risks in any policy, so it is important to acquire the means of limiting those risks. He said it was his belief that in the present state of the French economy, they had those means.

The price indices will go up in coming months, he said, but those increases are adjustments and not inflationary price rises.

Barre said:

Let's try to understand what is happening and understand that our policy is to build a sounder economy.

If this bill were a true deregulation bill such as the Senate passed almost a year ago rather than the monstrosity it is, I would be hailing it for partly restoring market forces as the prime mover in the U.S. energy economy as the French are doing.

Rather than that, this bill extends price controls and regulation to the only free gas market we have, the intrastate market.

The Energy Policy and Conservation Act of 1975 which extended price controls on crude oil has had a stifling effect on domestic crude production. Other than Alaska, domestic crude production continues to decline under a ridiculous four-tiered crude pricing system—lower tier oil, upper tier oil, stripper well oil, and foreign oil.

As though this jerry-built crude pricing system plus a crude oil entitlements program that encourages imports is not enough of a bureaucratic nightmare, this so-called natural gas compromise proposes to outdo the Rube Goldberg crude oil pricing system with one that was described by Robert J. Samuelson of the National Journal as "a law that promotes neither maximum gas production nor energy conservation and, simultaneously, is so complicated that it defies easy obedience or enforcement. Like all bad laws, it will ultimately breed contempt for the law."

Mr. Samuelson called the conference bill a "logrolling monstrosity."

The article ended with this observation:

So the Congress can choose between the disaster of passing an atrocious bill and the calamity of rejecting an "energy plan." It is a chapter straight from Dante.

With permission of the National Journal, I ask unanimous consent that the full text of Mr. Samuelson's copyrighted article be printed in the RECORD.

There being no objection, the article was ordered to be printed n the RECORD, as follows:

CONGRESS' CHOICE ON GAS BILL CHAPTER STRAIGHT FROM DANTE

(By Robert J. Samuelson)

There is no turning back once you start down the road to hell. Either you arrive or you get stranded in purgatory.

President Carter and Energy Secretary James R. Schlesinger might reflect on this during the final scenes of the natural gas debate—for it captures perfectly their predicament.

** Jidda, Riyadh and Dammam and includes: (1) Recreational Facilities, (2) Housing and Community Support Facilities, (3) Base Support Facilities, and (4) Base Accesss Roads and Channels.

If the bill passes, Congress will have enacted a law that promotes neither maximum gas production nor energy conservation and, simultaneously, is so complicated that it defies easy obedience or enforcement. Like all bad laws, it will ultimately breed contempt for the law.

But the bill also has acquired a symbolic importance far removed from its merits. If it fails, the United States will be seen—once again—as having rejected a "national energy program." Abroad, this rejection will confirm the view that the United States cannot manage its own economy.

Carter and Schlesinger have only themselves to blame for this denouement. Flawed in concept, their original natural gas proposal activated all the confusion and conflict inherent in this issue. The result was preordained.

The best way to understand their error is to take a detached look at natural gas—the way a Martian might.

Natural gas now supplies about 25 percent of the nation's energy and is used by more than half of all homes. Although nearly 60 percent of gas sales go to industry, this use is declining. Fearing future shortages, businesses have conserved more than consumers and have switched to other fuels.

Consequently, homes and apartments will constitute an ever-larger part of the gas market. For most residential users, gas prices today are cheaper than oil or electricity prices. Last year, for example, the average cost of gas for homeowners—$2.33 per thousand cubic feet—was about one-third less than the equivalent oil cost.

Federal price regulation accounts for much of this difference. About 55 percent of all gas moves between states (interstate) under prices set now by the Federal Energy Regulatory Commission and previously by the Federal Power Commission. The FERC has set wellhead prices ranging from 54 cents per thousand cubic feet (for gas discovered before 1973) to $1.50 (for gas discovered after 1975). Pipeline and distribution costs account for the rest of the retail price.

By contrast, gas produced and consumed in the same state (intrastate) isn't regulated and now sells for a wellhead price between $1.30 and $2.10 per thousand cubic feet.

The conclusions are relatively simple. The distinction between the interstate gas and intrastate gas means some consumers (in the interstate market) who want gas most can't get it because producers sell where the price is highest. So the government needs to end the distinction.

Likewise, the government needs to end price controls. If this would push prices up, it also would promote maximum production and conservation. The impact would extend over about a decade because most prices are now set by long-term contracts.

That Carter and Schlesinger did not accept this conclusion inevitably led to all their subsequent political and public relations problems. They simply fixed another artificial price for newly discovered gas, $1.75 per thousand cubic feet, and proposed applying this price to intrastate gas.

The justification for this new price does not stand scrutiny. Any higher price (they argued) wouldn't result in much more gas simply because there isn't much more. In fact, no one knows how much natural gas remains and, therefore, what the price should be. After two years of study, Resources for the Future Inc., a Washington research group, came to precisely that bland conclusion.

But if Schlesinger seriously believed in the scarcity of gas, the proper response would have been to let prices rise and to tax "excess" profits from producers. Holding down prices simply stimulates unnecessary consumption, depleting a scarce resource faster. It protects gas consumers, but creates more price pressures on oil—the most easily available substitute—and, consequently, hurts oil consumers. Because "conservation" was such a prominent part of the Carter rhetoric, this glaring inconsistency undermined the President's credibility.

Having embraced this ill-conceived plan, Carter and Schlesinger have been its chief victims. Not the least of its liabilities is a potentially stifling effect on the development of Mexico's vast gas reserves. Negotiations between the United States and Mexico over the export of two billion cubic feet daily to the United States (3 percent to 4 percent of total consumption) broke down early this year, in part because the Mexicans insisted on a price above the administration's regulated price.

Allowing a free market price would simplify talks with the Mexicans enormously. Mexico needs to sell its gas here. If it can't (or won't), it may slow its energy development. Much of the Mexican gas is found with new oil. The upshot is that there could be not only less gas production, but also less oil production—and more pressure on prices.

Nor did the Carter plan, inconsistent and incapable of being explained to the public, command much support in Congress. The resulting conference bill is a logrolling monstrosity. At last count, the bill contained at least 17 price classifications. Wells drilled to 15,001 feet get one price and those to 14,999 feet get another. Wells drilled within 2.45 miles of an existing well get one price and wells 2.55 miles away get another. Some gas would be freed from controls (theoretically) in 1985, and other gas wouldn't.

Consequently, almost no one is satisfied with the outcome. Staff members of the FERC fear that the bill may require detailed information on each new gas well—11,000 last year—and could not possibly be administered conscientiously. Sen. Edward M. Kennedy (D-Mass.) believes the bill will "result in endless litigation, delay and misunderstanding." The producers are appalled.

So Congress can choose between the disaster of passing an atrocious bill and the calamity of rejecting an "energy plan." It is a chapter straight from Dante.

Mr. ROBERT C. BYRD. Mr. President, I understand there is another Senator coming to the floor. As a matter of fact, I see him coming down the hall. I yield the floor.

## SENATE RESOLUTION 555 AND SENATE RESOLUTION 556—SUBMISSION OF RESOLUTIONS OF DISAPPROVAL OF MODIFICATION OF CERTAIN SHIPBUILDING CONTRACTS

(Referred to the Committee on Armed Services.)

Mr. PROXMIRE. Mr. President, I send to the desk resolutions of disapproval of the Navy's proposal to provide hundreds of millions of dollars of financial relief to bail out General Dynamics and Litton under Public Law 85-804.

Mr. President, I have just come from a hearing on this matter before the Joint Economic Committee. I testified there and before the Armed Services Committee.

This is one of the worst ripoffs in the history of our Nation. It is something that few people have had an opportunity to pay any attention to. I am very hopeful that we can get a vote on this. It will be difficult to do so, I realize, under the circumstances, but I am hopeful we can get a vote of the Senate up or down on this disapproval under the Senate rules. If we cannot get a vote, I propose that this should be a demonstration of why the rules should be changed, because the purpose of the law under which I am sending the resolution to the desk is to provide an opportunity for the Senate as a whole or the House of Representatives as a whole to disapprove settlements that are far above the contract terms. They have to be at least $25 million above the contract before we have an opportunity to vote on such a resolution. These are almost a billion dollars, in aggregate, above what the contract settlements provided.

I realize the hour is late and the Senate will go out of session shortly, so I will not detain the Senate by making a long substantive statement at the moment.

### AN APPEAL TO STOP A CLASSIC TAXPAYER RIPOFF

The proposals are objectionable on several grounds. They do not represent a solution to the shipbuilding claims problem. Because they were done as a result of threats by the shipbuilders to shut down operations, and because they provide them with hundreds of millions of dollars over and above the values placed on the claims by the Navy, they are bad precedents. They violate the integrity of the Navy's claims review process and they do severe injury to the defense procurement system.

The Navy wants to pay the two companies $541 million more than the value of the claims. It seeks to do this on grounds that to do so will facilitate the national defense. I fail to see how it facilitates the national defense. I believe the proposals will impair the national defense.

I do not object to the Navy's findings about the value of the claims. It says General Dynamics' claim is worth $125 million and Litton's is worth $312 million. But the Navy wants to pay the two firms $541 million over and above the value of the claims.

The issue is whether or not it facilitates the national defense to pay the firms $541 million more than the value of their claims.

The Navy has stressed the fact that without the relief it seeks to provide both firms face large losses on their Navy contracts. Indeed, the settlements were reached by splitting the potential losses between the Navy and the companies. The material supplied by the Navy implies that the contractors might go out of business if they had to absorb the total cost overruns.

### NO BANKRUPTCY PROBLEM

But there is no evidence that either company would go bankrupt without the generous bailouts offered by the Navy. Indeed, the audits conducted at the Navy's request show the opposite and the Navy now admits that neither company faces bankruptcy.

If we are not saving two contractors from bankruptcy, how are we facilitating the national defense?

Secretary Claytor believes these settlements will end the acrimonious relationship between the Navy and its shipbuilders and avoid expensive and time-consuming litigation over the claims.

Of course, if you give a defense contractor several hundred million dollars above the value of his claim he will agree

to stop arguing about it and to stop threatening you about it. But that hardly facilitates the national defense.

TAXPAYER SACRIFICED

What it does is sacrifice the taxpayers' interest to those of two large corporations:

First. The Navy is turning military muscle into fact by using funds that could build ships to pay for cost overruns;

Second. It is engaging in a form of backdoor welfare by paying shipbuilders $541 million over and above the value of their claims;

Third. It is rewarding waste, mismanagement, and inefficiency, because there is abundant evidence that the shipbuilders were unable to manage their labor forces and that corporate management is primarily responsible for the large cost overruns;

Fourth. It is giving in to the shipbuilders' threats to shut down operations unless its demands are met;

Fifth. It is establishing a harmful precedent which will lead to the needless expenditure of additional sums; and

Sixth. The Navy can provide no assurance that the contractors will refrain from filing future claims without adequate justification.

The message the Navy is sending out is this: If you are a large contractor and you dominate an important portion of the defense market, file an inflated claim and the Navy will pay the true value plus as much as 50 percent of the remaining portion.

The result will be to encourage future claims. It is highly probable that within a year or so we will be faced with new claims from the same and other contractors and we will find ourselves in the same predicament we are in today.

Indeed there is already evidence that General Dynamics is preparing the ground for a new major claim on the Trident. A memo by Admiral Rickover dated August 14, 1978, provides details on this new development. I will be very surprised if Litton is not doing the same thing.

NAVY POLITICAL APPOINTED TAKEOVER

The Navy is also telling the defense contractor community not to worry too much about the professional Navy claims examiners. After the claims examiners finish their work and determine, from the Government's perspective, what the claims are worth, the Navy's political appointees will take over. All the contractors have to do is wait for the political appointees to move in and deal directly with them. Likely as not, the political appointees will work out a way to bail you out.

I believe the better solution for the Navy is to enforce its contracts. Claims should be reviewed and settled strictly on their merits. If contractors do not agree to a settlement, as is their privilege, then the appeals process should be allowed to take its course.

The Navy and Congress should not give in to threats from contractors. When contractors threaten to stop work, the Government should coolly consider its options. The Government has options in these cases. If the shipbuilder tries to shut down, the Government can get an injunction from a Federal court to keep the yard open. In fact, this was done in the Litton case. When Litton decided to shut down in 1976, the Navy got a Federal injunction to keep the yard open.

Even if a company goes bankrupt, a Federal court can keep the company in business under the bankruptcy laws. As a last resort the Government can temporarily take over a shipyard if the contractor refuses to complete work on ships needed for national defense.

These are difficult choices for the Government to make, but the contractors are forcing the Government to make such choices. Unfortunately, in the present case the Navy has capitulated to the demands of the contractors rather than making the tough decisions.

MASSIVE BAILOUTS

I want to reiterate the point I have been trying to make that the Navy is proposing massive bailouts and that the present proposals are merely the tips of a gigantic bailout iceberg. Let me quote from a memorandum by Admiral Rickover to Secretary Claytor. The memorandum is dated August 14, 1978.

Rickover says:

The proposed PL 85-804 settlement with General Dynamics leaves the Navy vulnerable in future to unfounded and inflated claims of the same sort you are now proposing to settle.

The admiral goes on to say that—

Even after the announcement of the PL 85-804 settlement, Electric Boat is actively laying the groundwork for future claims on Trident and SSN 688 class submarine contracts; that unless special precautions are taken now, General Dynamics may well attempt in future to recover through new claims a major portion of the $359 million loss they are presently agreeing to absorb.

The remainder of Rickover's memorandum contains examples illustrating how General Dynamics is already taking advantage of the situation. Here is one, and I quote from the memorandum:

Recently the detailed government-furnished shielding drawings had to be revised to correct an error made by Electric Boat in its capacity as the government's design agent under the Trident design contracts. This revision added a requirement to drill a single 1½ inch hole in a steel shield box in each of seven ships. Fabrication of the affected part had not yet begun, so no ripout rework or disruption was involved. Nonetheless, the company contends that the drawing revision constitutes a change to the contract and has quoted a price of $1000 per ship to drill the hole. The Navy has rejected this request. Soon, I expect we will get a letter announcing that the company is proceeding with the work subject to submitting a claim.

Mr. President, even as we meet today General Dynamics and Litton are preparing new claims to be submitted in the near future. That is why Secretary Claytor's statements that the two companies are being forced to absorb large losses is nonsense. The ships that are the subject of the claims are still under construction. They would not be delivered to the Navy for years.

LOSSES OR PROFITS ON CONTRACTS

It is premature to talk about losses on ship contracts that would not be completed for years. This is especially so when the companies have a history of filing claims, are claims prone, and are known to be preparing the ground for future claims.

This is the second time the Navy has settled a claim from General Dynamics on the 688 submarine program. In 1976, the Navy gave the company $97 million on a $220 million claim. So this is the company's second bite of the apple. It is fair to say that it is now trying to get the portion it failed to get in 1976 and we would be fools to believe it will not try to get more after this settlement.

A few final words. It is time to rethink the way the Navy gets its ships. The premise of the present system is that private yards can build ships cheaper than Navy yards. But if we have to bail out the private yards and, in effect, guarantee them against losses the premise is undermined and the reason to rely on the private yards is lost.

I believe we ought to act on Admiral Rickover's suggestion that the Navy consider buying a shipyard as part of an overall settlement or that it uses an existing Navy yard which could be operated by a private contractor on a cost reimbursement basis as a Government-owned, contractor-operated shipyard. As an alternative, we might consider a TVA-type Government shipyard to provide the Navy with a facility to build some of its own ships and a measuring rod to compare the costs and performance of the private yards.

For the Navy to simply drop its tail and run whenever a company threatens to shut down or file a lawsuit is unacceptable. For the Navy to abandon its contractual rights and to be intimidated into bailing out the private shipyards is not in the interests of the Navy or the taxpayers.

We have a taxpayer ripoff before us and one that would not stop ripping until the Navy finds the courage to enforce its own contracts.

Mr. President, I send the two resolutions to the desk.

The PRESIDING OFFICER. The resolutions will be received and appropriately referred.

The resolutions are as follows:

S. RES. 555

*Resolved*, that the Senate disapproves the obligation of the United States proposed to be made by the Secretary of the Navy in modifications to contracts numbered N00024-71-C-0268 and N00024-74-C-0206 between the United States and the Electric Boat Division of General Dynamics Corporation, notification of such proposed obligation having been transmitted by the Secretary of the Navy to the Committee on Armed Services on June 22, 1978, under the provisions of the first section of Public Law 85-804 (50 U.S.C. 1431).

---

S. RES. 556

*Resolved*, that the Senate disapproves the obligation of the United States proposed to be made by the Secretary of the Navy in modifications to contracts numbered N00024-69-C-0283 and N00024-70-C-0275 between the United States and the Ingalls Shipbuilding Division of Litton Systems, Inc., notification of such proposed obligation having been transmitted by the Secretary of the Navy to the Committee on Armed Services on June

24, 1978, under the provisions of the first section of Public Law 85–804 (50 U.S.C. 1431).

Mr. PROXMIRE. Let me ask, Mr. President, under the rules, is there a possibility that these resolutions could be held at the desk if referred? Is there any regulation requiring when they have to be reported to the floor? If sent to a committee, is there a limit on how long the committee can hold them? As I understand, the resolutions have to be acted on by September 20 or they are dead and, therefore, the rules may prevent the Senate from having an opportunity to vote on this matter. Could the Parliamentarian and the Presiding Officer advise as to what our rights are under the rules?

The PRESIDING OFFICER. The Chair would advise that under the normal procedure, these resolutions would be referred to the Armed Services Committee, and would reside with that committee until that committee took action upon them.

Mr. PROXMIRE. Well, I have already pleaded with the Armed Services Committee to report a resolution of disapproval, but it fell on, I should not say deaf ears, but ears that were not sympathetic to this particular cause. It is a very fine committee, but they do not agree with me.

I wonder if a Senator, under these circumstances, has any rights of any kind that would enable him to secure a vote by the Senate, or if we have to find a way of changing the rules so that under these circumstances something can be done; or can the committee simply block, under the circumstances, any action on the part of the Senate?

The PRESIDING OFFICER. The Chair is advised that unless the committee having jurisdiction reports the resolution back to the Senate as a whole, the Senate as a whole is not in a position to take the matter up and vote on it.

Mr. PROXMIRE. So if the Armed Services Committee does not decide to act favorably on these resolutions of disapproval, there is no opportunity for the Senate to exercise its will in the matter; is that correct?

The PRESIDING OFFICER. The Chair is advised that that is the normal course and practice.

Mr. PROXMIRE. Well, then, Mr. President, I understand the situation; in that event I will do my best to persuade that able committee to report the resolutions even if they disagree with their substance, and give the Senate an opportunity to act upon them. I will see what else I can do.

I thank the Chair.

## GRASSLANDS MIGRATORY BIRD CONSERVATION ACT

Mr. ROBERT C. BYRD. Mr. President, I understand that Calendar Order No. 1096 has been cleared for action by unanimous consent. I, therefore, ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1096. Mr. HAYAKAWA is here, and he can speak for the minority.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 691) to provide for the preservation and enhancement of critical habitat for migratory waterfowl and other wetlands-dependent migratory birds of the Pacific flyway in the grasslands area of the San Joaquin Valley, Calif.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. HAYAKAWA. Mr. President, we have no objection. Indeed, I want to endorse this measure completely. This is an enhancement of the critical habitat for migratory waterfowl, and so on. I wish to indicate that it has my full approval, and no objections from our side.

Mr. ROBERT C. BYRD. Let me say, Mr. President, on behalf of Mr. CRANSTON, who is the author of the bill, that he not only is agreeable to the Senate's action on this bill today, but urges it.

The bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That the Act of August 27, 1954 (68 Stat. 879), is amended by deleting the last sentence of section 6 and inserting in lieu thereof the following: "If and when available, such water shall be delivered from the Central Valley project to the contracting entity, and the cost of furnishing the water shall not be reimbursable or returnable under the Federal reclamation laws: *Provided*, That, in order for the delivery of such water to continue on a nonreimbursable or nonreturnable basis—

"(a) the public organizations or agencies contracting with the Secretary of the Interior, excluding the State of California, shall deliver annually to the United States Fish and Wildlife Service (hereinafter referred to as the 'Service'), at no cost to the United States, not less than three thousand five hundred acre-feet of water during the period October 1 through November 30, inclusive, and not less than four thousand acre-feet of water during the period May 1 through September 30, inclusive, if available: *Provided*, That such amounts of water and times of delivery may be changed upon approval of the Secretary of the Interior:

"(b) the public organizations or agencies, excluding the State of California, shall construct, operate, and maintain any water conveyance facilities necessary to deliver the water referred to in section 6(a) of this Act to a point or points within the boundaries of such public organization or agency as designated by the Service, or to such points as may be mutually agreed upon by the public organization or agency and the Service. The Service shall be responsible for delivering the water from such point or points to appropriate locations within lands under its jurisdiction;

"(c) any contract entered into by the Secretary of the Interior and any public organization or agency pursuant to this Act shall provide that in the event the public organization or agency for any reason fails to carry out the obligations imposed upon it by said contract or by this Act, the rights of use of any facilities referred to in subsection (b), and the rights to all water contracted for by the organization or agency pursuant to this Act shall revert to the Secretary of the Interior for migratory waterfowl purposes in accordance with the laws of the State of California; and

"(d) in accordance with existing or future contracts, the use of lands located within the boundaries of the public organizations or agencies shall be restricted by covenants requiring that such lands be used only for the purpose of waterfowl and wildlife habitat conservation or other uses as may be mutually agreed upon by the public organizations or agencies and the Service.".

SEC. 2. The Act of August 27, 1954 (68 Stat. 879), is further amended by adding at the end thereof the following new section:

"SEC. 8. The Secretary is hereby authorized to negotiate amendments to existing contracts to conform said contracts to the provisions of this Act.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1173), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

The Central Valley of California, which includes the 98,000-acre area of the San Joaquin Valley, is the most important wintering area for waterfowl in the Pacific flyway. This area, the last remaining habitat of its kind in the San Joaquin Valley, supports approximately 50 million waterfowl use-days annually for many species of waterfowl and shorebirds such as long-billed curlews, great blue herons, and snowy egrets. The preservation of this valuable wildlife area is the Fish and Wildlife Service's highest priority for its Pacific flyway habitat protection program.

While there are two national wildlife refuges in this section of the San Joaquin Valley, over half of the managed waterfowl lands are controlled by private property owners, including the members of the 46,000-acre Grassland Water District. In 1954, Congress passed legislation which reauthorized the Bureau of Reclamation's Central Valley project, in the San Joaquin Valley, incorporating for the first time fish and wildlife conservation as a specific project purpose. The act authorized the Secretary of the Interior to deliver water to public agencies, including the Grasslands Water District, for developing and maintaining migratory waterfowl habitat, and to levy a charge for such water service at rates not to exceed the prevailing rate for class 2 agricultural water services.

The Grasslands Water District members currently manage their lands both as native pasture for livestock production and wetlands for wintering waterfowl. Unfortunately, higher land taxes and operating costs are forcing some of these individuals to convert their property from wildlife conservation to more economically attractive land-intensive uses such as sugar beet or cotton farming. If this continues to occur, the Secretary of the Interior will have to move under existing authority to acquire the private lands of the Grasslands Water District for wildlife habitat. Acquisition of the land has already been approved by the Migratory Bird Conservation Commission, the Merced County Board of Directors, and the California State Fish and Game Commission.

DISCUSSION OF MAJOR PROVISIONS

S. 691 provides an incentive to landowners to conserve their lands for waterfowl by removing the charge for Central Valley project water which is delivered to the Grasslands Water District for waterfowl conservation. The following conditions must be met: (1) The water district continues an existing agreement to deliver to the Fish and Wildlife Service 3,500-acre-feet of water each fall and 4,000-acre-feet each summer for wildlife conservation at no cost to the Federal Government; (2) it constructs, operates, and maintains conveyance facilities for delivery of this water; and (3) it agrees by contract

to arrange for the use of lands within its boundaries for waterfowl habitat.

The committee did not accept an amendment proposed by the administration which would have made the costs of furnishing the water reimbursable from surplus power revenues. This provision would, in effect, require power users to bear the cost of preserving waterfowl habitat in the San Joaquin Valley. Since this habitat is of national significance, the committee decided that the Federal Treasury should absorb any costs incurred by furnishing water to the Grasslands Water District for waterfowl conservation purposes on a non-reimbursable basis.

The legislation would result in a reduction of water service revenues at an approximate rate of $5,000 per year, for a total of $250,000 over the next 50 years. The alternative to the legislation, acquisition of the area by the Federal Government for waterfowl conservation, would cost the Federal Government between $14 million to $20 million, according to the Interior Department. This alternative would have the added adverse effect of removing land from the tax rolls of State and local jurisdictions.

The National Environmental Policy Act, of course, applies to any action under this act.

The committee's action relating to water revenues on this bill in no way is intended to prejudge the committee's action relating to national water policy. This bill's action to relieve local sponsors of some project costs should not be viewed as a precedent for future actions. The committee intends to undertake a serious evaluation of a coordinated water policy.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HAYAKAWA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

---

## RESOLUTIONS OF DISAPPROVAL OF MODIFICATION OF CERTAIN SHIPBUILDING CONTRACTS

Mr. PROXMIRE. Mr. President, will the distinguished majority leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. PROXMIRE. The majority leader was on the floor when I brought up my resolutions of disapproval. I want to make sure I am doing whatever I can under the rules to secure action to the extent that I possibly can.

It was my understanding, on the basis of the Parliamentarian's advice and the Presiding Officer's advice, that the resolution had to be referred to the committee, which it was, and that was proper. I understand that if I move to discharge the committee, although that motion would, in most circumstances, have great difficulty securing support—but even if I moved to do that, that motion would not be in order, I understand. It would have to lie over a day and then it could only be called up by unanimous consent.

Is that correct?

Mr. ROBERT C. BYRD. A motion to discharge—let me start with a few things here. A motion to discharge, of course, the Senator would have to give a day's notice and I would say that his chances to discharge the committee would be very poor under all of the circumstances that obtain in this instance. He could also ask unanimous consent—what is this, a resolution?

Mr. PROXMIRE. This is a resolution of disapproval that has been before the Armed Services Committee in a different form for a long time. There have been extensive hearings. They had the Secretary of the Navy, they had the GAO testify on it, and a number of others. So they have substantial documentation. They are well aware of the issue. They have had a substantial amount of time to consider it.

I appealed to them to report a resolution of disapproval and they have not decided to do so. What I am trying to do is all I possibly can to see if I can get an up or down vote on this on the floor of the Senate. I should be very grateful to the distinguished majority leader for any suggestion he has, as one who has truly mastered the rules and understands the opportunities and limitations of what a Senator can do.

Mr. ROBERT C. BYRD. I should have to say to the distinguished Senator that, in my 20 years in the service of the Senate, I do not believe I have seen a motion to discharge a committee that was controversial. We quite often do it by unanimous consent. If it is controversial, I cannot recollect any specific occasion on which it has been done. I am sure it may have been done during that 20 years once or twice, but if it is controversial, it has many obstacles, quite an obstacle course to run.

Of course, the motion, once the Senator had it before the Senate, could be tabled and——

Mr. PROXMIRE. We could get a vote on the tabling motion.

Mr. ROBERT C. BYRD. I would say the chances of discharging a committee, if he is having problems with getting the committee to act, his chances are about as good as the chances of a snowball in Shiloh.

Mr. PROXMIRE. I just want a vote on this. Of course, what I can do and certainly will do is try to persuade the Members to give us an opportunity to vote on the floor. That may or may not be successful. I doubt it will be, but I will try that route. It is one I take it I am free to pursue.

Mr. ROBERT C. BYRD. Yes.

Mr. PROXMIRE. My question is, Is there any other feasible action which the leader can suggest, because this is a puzzling situation? Here we have what is the biggest bailout in the history of the country, as far as I know, certainly the biggest in the Navy, almost a billion dollars. It is one that is extraordinarily controversial, one that has been bitterly attacked by Navy officials, including Admiral Rickover and other top Navy officials, who think it is a scandalous action to take. For that reason, I think it is one that Congress ought to decide under the Proxmire amendment, which provides that whatever settlement exceeds $25 million that is made under 85–804 is subject to a disapproval by either the House or the Senate.

So I think, when it is something that is this important, this far reaching, it sets a precedent which is likely to be far more expensive. It is one that should receive some deliberation on the part of the Senate when a Member presses it as I am trying to press it.

Mr. ROBERT C. BYRD. May I ask the Senator—I have been thinking about the rules while he has been talking and there may have been something I missed here. Is there a time limit on this disapproval?

Mr. PROXMIRE. Yes, there is. The time limit, I believe, is September 20. It expires September 20, dies, and action of any kind, a subsequent introduction, would not extend the time.

Mr. ROBERT C. BYRD. In the case of these disapproval resolutions on which there is a time limit, usually there are specifics in the law that are quite outside the normal rule of the Senate. The Chair could advise whether, in this particular instance, there is any other recourse that the Senator would have as a result of provisions that were written into the law governing the disposition of such a disapproval resolution, which are quite outside the normal rules of the Senate.

I ask the Chair that question.

The PRESIDING OFFICER. The Chair is advised that these resolutions have no special privilege under the law.

Does that answer the question the Senator is posing exactly?

Mr. ROBERT C. BYRD. No; it is not the answer.

Ordinarily, if a Senator wants to get a resolution on the Calendar, he can attempt to force it on, depending upon whether it is a joint resolution or a simple resolution or a bill. He can force it onto the Calendar by a certain mechanism. If it is a discharge resolution, about as far as it could get right now would be the table of resolutions and motions over, under the rule, which would mean that it would never get up, because there are at least nine resolutions and motions ahead of it and those are not at all likely to come over under the rule. There are so many roadblocks that can be thrown up against them at the only times during the day that they can possibly come over that it is next to impossible to get anything before the Senate by way of resolutions and motions over under the rule.

There is a mechanism under rule XIV for forcing bills onto the calendar, and I believe it also applies to joint resolutions. I am quite sure that rule does not put a simple resolution on the Calendar. It will put a simple resolution on the Calendar of Resolutions and Motions over, under the rule, but not on the General Orders Calendar, talking about a simple resolution.

Even if it were a bill or joint resolution that could be forced onto the Calendar via rule XIV, the Senator would still have a problem in getting it motioned up, which would be debatable, except during a certain period of a new legislative date, which rule was utilized by the majority leader in connection with the District of Columbia representation amendment, which has a lot of cracks into which to fall.

So I would say to the distinguished Senator that the only course I would see open to him—may I ask the Chair if rule XIV could be utilized in the instant case about which Senator PROXMIRE is talking, we are talking about a disapproval resolution?

The PRESIDING OFFICER. The Chair is advised that the resolution of-

fered by the Senator from Wisconsin could not be forced onto the Calendar of General Orders under rule VIII.

Mr. ROBERT C. BYRD. I mean, if the previous action referring the resolution to the committee already, if that action could be vitiated, could rule XIV——

The PRESIDING OFFICER. The Chair is advised, even if that action had been taken, that there is still no procedure for forcing a simple resolution onto the Calendar of General Orders under rule VIII.

Mr. ROBERT C. BYRD. Mr. President, I really did not need to answer that question because I already stated that if it is a simple resolution the only thing under rule XIV would be to put it on the Calendar of Resolutions and Motions over, under the rule. I thought it might be a joint resolution. but it is not.

Mr. PROXMIRE. It is a simple resolution.

The PRESIDING OFFICER. They are simple resolutions.

Mr. ROBERT C. BYRD. So the Senator really has no recourse other than to ask unanimous consent it be placed on the Calendar and, of course, there would be an objection to that. He would first have to ask unanimous consent that the referral to the committee be vitiated. There would probably be an objection to that. If he got unanimous consent to put it on the Calendar, he would have difficulty getting it up because that motion would be debatable, except at certain times, certain very nice moments during a new legislative day. that he might be able to get a motion to proceed without debate. But even if he got it up it would be debatable.

The other recourse is to move to discharge the committee, which the Chair has already discoursed on.

So I would say to the Senator that I think he has about exhausted all the practicable courses of action.

Mr. PROXMIRE. I want to thank the majority leader for his painstaking and thoughtful. most accommodating efforts to be helpful.

Mr. ROBERT C. BYRD. I think they are not open to him.

Mr. PROXMIRE. While I recognize the obstacles, I am still not completely discouraged. I intend to call members of the Armed Services Committee. the chairman of the committee. and others, to see if there is any possibility that they may report the resolution out.

I take it. that is my recourse.

Mr. ROBERT C. BYRD. That is the Senator's most practicable recourse. How practicable it may be remains to be seen. But I have great confidence in the Senator's tenacity and his persausive arts.

Mr. PROXMIRE. I thank the distinguished majority leader.

Mr. ROBERT C. BYRD. He is very persuasive, very dedicated, very tenacious, and determined.

## ORDER FOR CERTAIN ACTION TO BE TAKEN DURING RECESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may have until 4 o'clock p.m. today to enter statements into the RECORD, to introduce bills and resolutions, petitions, and memorials, and for committees to submit reports.

The PRESIDING OFFICER (Mr. STONE). Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized, during the recess of the Senate over until 11 a.m. on Monday morning, to receive messages from the other body and from the President of the United States, and that they may be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Vice President, the President pro tempore, and the Acting President pro tempore may be authorized to sign all duly enrolled bills and joint resoutions during the recess of the Senate over until 11 o'clock on Monday morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

## BEST WISHES FOR A GOOD WEEKEND

Mr. ROBERT C. BYRD. Mr. President, does any Senator wish recognition before the motion to recess is made?

If not, I thank all Senators, and with best wishes for a good weekend and with the prospects for hard days and diligent labors and many tests in the immediate days ahead, weeks ahead, may I say to the distinguished Senator from California (Mr. HAYAKAWA) I hope that the Senate can adjourn sine die—is that the correct pronunciation, sine die?

Mr. HAYAKAWA. Absolutely; that is perfectly acceptable.

Mr. ROBERT C. BYRD. Well, if it is acceptable to the Senator from California, it must be all right. It would be acceptable to Webster, would it not?

Mr. HAYAKAWA. Fine.

Mr. ROBERT C. BYRD. Sine die.

By the way, I often hear and use the words "p-e-r s-e."

Mr. HAYAKAWA. Per se.

Mr. ROBERT C. BYRD. Pronounced per se as in bee, or per se, as in bay. I pronounce it both per se, and per se, I suppose either is correct—is either correct?

Mr. HAYAKAWA. I would prefer per se.

Mr. ROBERT C. BYRD. Per se.

I will stick with per se.

Mr. HAYAKAWA. Chacun à son goût.

Mr. ROBERT C. BYRD. Speaking of words, I have heard these words pronounced in a myriad of ways. Amicus curiae, amicus curiae.

How would the Senator from California pronounce those words? I have heard amicus curiae, amicus curiae, amicus curiae, amicus curiae, and amicus curiae?

Mr. HAYAKAWA. Amicus curiae.

Mr. ROBERT C. BYRD. The Senator would.

Mr. HAYAKAWA. Yes. I took 4 or 5 years of Latin. I never got over it.

Mr. ROBERT C. BYRD. Well, I am not one to argue with the Senator, but I think I will just continue amicus curiae.

Mr. HAYAKAWA. That is dreadful.

Mr. ROBERT C. BYRD. Let me see if I can think of another word.

Well, sufficient unto the day is the evil thereof.

## RECOGNITION OF SENATOR PROXMIRE ON MONDAY, SEPTEMBER 11, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday, after the two leaders have been recognized and before Mr. JACKSON seeks recognition under the order previously entered, Mr. PROXMIRE be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR RECOGNITION OF SENATOR GOLDWATER AND SENATOR BAKER ON TUESDAY, SEPTEMBER 12, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Tuesday next Mr. GOLDWATER and Mr. BAKER each be recognized for not to exceed 15 minutes after the two leaders or their designees have been recognized under the standing order.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will shortly recess.

On Monday it will convene at 11 o'clock a.m. After the two leaders have been recognized under the standing order Mr. PROXMIRE will be recognized for not to exceed 15 minutes, after which Mr. JACKSON may be recognized to call up the conference report on natural gas pricing. The order for the recognition of Mr. JACKSON provides also that he may be recognized at any time during the day on Monday for that purpose. Am I correct, may I ask the Chair?

The PRESIDING OFFICER. The Chair is advised the Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. JACKSON has advised that he will be prepared to call up the conference report at a point between 11 o'clock and 12 noon on Monday. In view of the fact that Mr. Proxmire will have a 15-minute order, I would say that the conference report will be called up at some point between 11:20 or 11:30 a.m. and noon.

NATURAL GAS POLICY ACT CONFERENCE REPORT

Mr. President, for the information of all Senators, I sought several times unsuccessfully to get a time agreement to protect Senators against any motions to table the conference report up through next Wednesday, and I also sought to get an agreement that would allow for a definite hour to vote on a motion to recommit on Wednesday. These requests were objected to under the rules.

Mr. President, when the conference report is called up, therefore, many things can happen. There are various nondebatable motions that can be made, of course. I could list several of them but will only list a couple. One would be a motion to table the conference report; one would be to go into executive session.

Those are just two, and there are others. Of course, any Senator can make such a motion, which is nondebatable. And, in such a situation, there is nothing in the world that can be done by the leadership to protect absent Senators except to put in a quorum call or move to recess or adjourn if the leadership has the votes, or delay matters by demanding a rollcall vote on instructing the Sergeant at Arms to request the attendance of absent Senators, instructing the Sergeant at Arms to compel the attendance of absent Senators, or instructing the Sergeant at Arms to arrest absent Senators—which I have done on one occasion—which order did not have to be carried out because a quorum quickly appeared.

There can be quorum calls; there can be votes on procedural motions and matters. There can be a motion to adjourn with a rollcall vote demanded on it, and it is not debatable. There can be a motion to recess, a rollcall vote demanded on it, and it is not debatable.

What I am saying, Mr. President, is that Senators should be prepared for anything, be prepared for the worst case, hoping that the worst case does not happen. There is no way that the leadership can protect Senators in many of those situations.

There are of course, some situations in which the leadership can and will protect Senators.

Considering the circumstances surrounding this particular piece of legislation, it would be my suggestion that all Senators, as much as possible, be available for rollcall votes at any time beginning at noon Monday when the conference report is called up and continuing daily until it is disposed of.

Senators should also keep in mind that the order which was entered at the beginning of the session limiting rollcall votes to 15 minutes can be demanded, and Senators cannot be protected beyond 15 minutes if the regular order is called for and if a Senator is not on the floor seeking recognition to vote.

There is also no way that the leadership can force the Senate to go out of session on any day if a Senator has the floor and is talking at 6 o'clock, 7 o'clock, 8 o'clock, 9 o'clock, 10 o'clock, at night or 1 o'clock in the morning and declines to yield the floor. If that Senator wants to hold the floor, the leadership is helpless. It cannot make a motion to recess or to adjourn. The Senator holding the floor might, at his own discretion, put in a live quorum or make a motion to table the conference report at such a late hour.

What I am saying is that we are probably going to be in a situation that is not the norm; it can be an unusual situation, although usual if a filibuster occurs. I want to use that word carefully because I am not saying that a filibuster will occur on this occasion. However, there will be considerable debate. There should be a reasonable time for debate on this conference report, which is lengthy and which involves a complicated issue, even though the Congress has now considered it for 16 months and the conferees have discussed it back and forth for 8 or 10 months. Nevertheless, it is an issue that nobody should expect to be disposed of within a day, 2 days, 3 days, or perhaps even a week. So a reasonable length of time should transpire.

Sooner or later, however, I hope that the Senate will work its will up or down on the conference report. Naturally, I hope to see the Senate adopt the conference report, but this is a matter for each individual Senator to decide. My purpose here is just to emphasize that while the situation is not exactly a situation sui generis, it is, nonetheless, not at all the normal situation that confronts the Senate in our every day business, when Senators can often leave the floor with some assurance that they will be protected, or leave the floor with some assurance that there will be no votes, or some assurance that there will only be one or two votes, or whatever.

But there is absolutely no assurance which can be given with respect to the protection of Senators once this conference report is called up. Quite the contrary would appear to be the case, to wit, that anything can happen at any time unless—unless—the leadership is able to work out a time agreement, which it will try to do from time to time, to get a time agreement so that Senators can know in advance when a vote or votes will occur. That would be a different situation. But as long as we do not have a time agreement, then Senators have to protect themselves.

I would simply urge that they be prepared, be in town, be prepared to vote, be prepared to vote without warning, except the 15-minute warning that the rollcall vote bell gives, or a warning from the cloak rooms that a quorum is going to be called after which a rollcall vote will occur; be prepared for late sessions. It is not that I am desirous of keeping the Senate in late every day.

There might be an occasion or two when I would feel it necessary to keep the Senate in late, but this kind of situation really, Mr. President, is more under the control of the opponents than it is of the leadership, insofar as keeping the Senate in session late is concerned and insofar as making surprise tabling motions is concerned. Because of the rules, these are areas in which the opposition to any bill really has a measure of control that goes beyond the control of the leadership.

I am saying what I am saying in an effort to be helpful to all Senators on both sides of the issue. I have no desire to catch Senators out of town who are opposed to this measure, no desire whatsoever. If a motion to recommit were made, it would not be my desire to suddenly move to table that motion to recommit just because I might look down at the absentee sheet and find that they had 15 Members out and we had 8.

I am not interested in taking Members by surprise on a tabling motion. I would simply give Senators notice that, within 2 hours or 3 hours or 6 hours, or some such, I would seek recognition and move to table. Or if, in looking over the absentee sheets, I see all Senators are here who are going to be here today, tomorrow, and the next day, I might say that, as soon as Senator so-and-so finishes speaking, the matter having been discussed long enough, I shall seek recognition and I shall then move to table.

I do not want to take anybody by surprise on a motion to table, but I do not blame the opposition for doing it. If someone who is opposed to this conference report feels that he can take the Senate by surprise and move to table a conference report, I do not find any fault with him for doing that, although I would hope that does not occur. That is what I am trying to emphasize here, that Senators must take into consideration the very special circumstances that will be surrounding this controversial measure and be present and be ready to vote at any hour, at any time.

I close by saying that I hope that, from time to time, we can get time agreements that will give Senators on both sides of the aisle and both sides of the question notice in advance as to when a critical vote is going to occur such as a vote on a motion to recommit or a vote up or down on the conference report.

I should like to see us be able to work out time agreements. But this cannot be guaranteed at this time.

Having said that, I think I have said enough to alert Senators who read the RECORD that this situation that we are now about to confront is one in which every Senator had better have his eyes glued on the legislative radar, because storm warnings are apparent. I suggest that the seat belts be buckled and that people stay out of the aisle and be ready for politically climatic and procedurally climatic conditions that will be quite turbulent at points, with strong winds coming from various directions; and that everybody be prepared for a rough ride ad sudden jolts, but keep the faith and be prepared to vote at any time.

## RECESS UNTIL MONDAY, SEPTEMBER 11, 1978, AT 11 A.M.

Mr. ROBERT C. BYRD. So I shall thank the Senator from California, shake hands with him, and move, Mr. President, that the Senate, in accordance with the order previously entered, stand in recess until the hour of 11 o'clock a.m. on Monday next.

The motion was agreed to; and at 1:09 p.m., the Senate recessed until Monday, September 11, 1978, at 11 a.m.

## NOMINATIONS

Executive nominations received by the Senate September 8, 1978:

IN THE AIR FORCE

Lt. Gen. Bryan M. Shotts, U.S. Air Force (age 55), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. John Franklin Forrest, XXX-X... [redacted], U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. Julius Wesley Becton, Jr., [redacted], U.S. Army.

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

*To be lieutenant general*

Lt. Gen. David Ewing Ott, [redacted], (age 55), Army of the United States (major general, U.S. Army).

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

*To be lieutenant general*

Lt. Gen. Rolland Valentine Heiser, [redacted], (age 53), Army of the United States (major general, U.S. Army).

IN THE MARINE CORPS

Lt. Gen. Leslie E. Brown, U.S. Marine Corps, (age 58), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

The following-named officer under the provisions of title 10, United States Code, section 5232, to be assigned to a position of importance and responsibility designated by the President, in grade as follows:

*To be lieutenant general*

Maj. Gen. Adolph G. Schwenk, [redacted], U.S. Marine Corps.

# EXTENSIONS OF REMARKS

## AMERICAN LEGION SUPPORT OF HANLEY AMENDMENT

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. TEAGUE. Mr. Speaker, I have received a copy of a communication of September 5 with enclosed fact sheet outlining the American Legion's views on what impact the civil service reform bill, H.R. 11280, would have on minorities and women, and a rebuttal to Civil Service Commission Chairman Campbell's August 11 "Dear Member" letter. The American Legion has been in the forefront to preserve veterans preference in Federal employment.

So that the Members will have the benefit of the latest thinking of the American Legion on maintaining veterans preference in Federal employment, there follows a copy of their letter of September 5 with attachments:

SEPTEMBER 5, 1978.

DEAR CONGRESSMAN: The House of Representatives next week is expected to consider H.R. 11280—the Civil Service Reform Act of 1978. The American Legion would like to present its views on how modification in veterans preference in federal employment proposed by this legislation would effect Vietnam-era and disabled veterans and its impact on minorities and women.

VIETNAM-ERA VETERANS

The so-called "Schroeder amendment" would limit veterans preference in federal employment to a "one-shot" use within a period of 15 years after the date of discharge from military service. Should that amendment become law, about 5 million of the 8.5 million Vietnam veterans would have 0 to 5 years of employment preference remaining—not 15 years. Only those who entered military service before the termination of veterans preference on October 15, 1976 and left the service after October 1980 would receive the full 15 years of employment preference. According to DoD projections, more than 1.5 million of the 2.5 million people on active duty when veterans preference was terminated in 1976 will have left service before October 1980. Thus fewer than 1 million veterans will have the full 15 years of preference, and many of them will be retirees whose service began before the Vietnam War period.

The "Schroeder amendment" would also limit veterans' "reduction-in-force" benefits to 8 years following initial appointment to federal service. That means that all veterans who had been employed by the government for 8 years or more—including the Vietnam era veterans who entered federal service between August 5, 1964 (the official beginning date of the "Vietnam era") and October 1972—would immediately lose their "RIF" protection when the law became effective October 1980. The 84,000 Vietnam era veterans who entered federal service in 1973 would have 1 year of "RIF" protection, the 113,000 Vietnam era veterans who began government jobs in 1974 would have 2 years of "RIF" protection remaining, and so forth.

Representative Schroeder stated in the Report of the Committee on Post Office and Civil Service on H.R. 11280 that "Vietnam veterans hold 9.6 percent of the federal jobs which veterans overall have obtained." That statistic is inaccurate. In fact, according to Civil Service Commission statistics, 538,501 Vietnam-era veterans were hired by the federal government between 1972 and 1977. The CSC does not know how many Vietnam veterans entered federal service between 1964 and 1972, but assuming that only half as many Vietnam-era veterans were hired during that 8-year period as were hired during the 6-year period between 1972 and 1977, a total of more than 800,000 Vietnam veterans have been hired by the federal government. Since it has been so difficult to obtain a federal job in the first place, and since the general job market has been so tight, it is reasonable to assume that the vast majority of them are still working for the government. Thus there is a very strong possibility that about half of the 1.2 million veterans now in federal service are Vietnam-era veterans. Any legislation—such as the reduction in "RIF" protection—affecting veterans employed by the government would therefore adversely impact on Vietnam veterans more than the veterans of other wars.

A recent "fact sheet" sent to Members of Congress by Representatives Bonior and Schroeder claimed that "Of about 150,000 veterans being hired annually . . . over half are pre-Vietnam veterans." That is untrue. During the past several years Vietnam-era veterans have consistently accounted for at least 56 percent of the veteran new hires, while 5-point perference, pre-Vietnam veterans have accounted for less than 40 percent. In per capita terms (there are only 8.5 million as opposed to 21 million World War II and Korean War veterans), Vietnam veterans have been utilizing veterans preference at a rate more than three times greater than veterans of other wars. By 1980, when the proposed legislation would take effect, the average age of World War II veterans will be 60—at or near retirement age. Thus it is clear that the ratio of Vietnam veterans entering federal service will increase rapidly.

DISABLED VETERANS

It is not at all certain that the proposed legislation will significantly benefit disabled veterans, whose preference benefits will nominally remain unchanged. Indeed, disabled veterans have been somewhat of a "problem" for the Civil Service Commission.

CSC Chairman Campbell, commenting on a study done by his staff on the effect of veterans preference on the PACE register, remarked that "the effect on the percentage of women lies not in eliminating either the 5 or 10 point preference alone but equally in eliminating the 'top of the register' provision." In other words, a disproportionate number of veterans "blocking" the PACE and other registers are disabled veterans, who "float to the top" of the register if they receive a passing score. According to CSC statistics, in mid-1977 disabled veterans were at the top of 5,997 of the 14,683 civil service hiring registers.

If the proposed legislation becomes law, disabled veterans will continue to "block" nearly half of the registers. Will they actually be hired in greater numbers? Or will federal agencies continue to "bypass" veterans—disabled and nondisabled alike—by employing one or more of the 11 methods listed by the GAO in a report issued last year? Thus far the Carter administration's performance with regard to the employment of disabled veterans has been less than satisfactory: only 3.8 percent of the total hires in 1977 were disabled veterans and only 1.8 percent were disabled Vietnam veterans. It is true that the proposed legislation stipulates that agencies "may" appoint disabled veterans with disability ratings of 30 percent or more to career or career-conditional positions, but we do not believe that that is tantamount to assurance that significant numbers of such appointments will indeed be made. Thus we have no reason to believe that disabled veterans will be any better off with the new legislation than they are now.

The American Legion is convinced that an "aye" vote for the Bonior-Schroeder substitute to H.R. 11280 will be detrimental to veterans . . . especially to those who served during the Vietnam era. We all realize that the civil service system cries out for reform but to say "veterans preference" is the reason women and minorities are being impeded from advancing or being completely kept out of the federal government would, in our opinion, be a false allegation.

The facts we have outlined speak for themselves. The American Legion urges you to vote against the Bonior-Schroeder proposal and support the "Hanley amendment".

Sincerely,

MYLIO S. KRAJA,
*Director, National Legislative Commission.*

## CIVIL SERVICE REFORM IMPACT ON WOMEN AND MINORITIES

MINORITIES

In testimony before the House Subcommittee on Civil Service in October 1977 a Government Accounting Office official, commenting on his agency's recent study of the impact of veterans preference on the hiring of minorities and women for federal jobs (the only major study done on that subject to date) commented as follows:

"In 8 of the 44 registers we examined, the potential for minority job candidates to be

certified increased when preference was excluded. On 15 registers there was a decrease. Twenty-one showed no change in minority representation when preference was excluded. In 32 of the registers the change involved only one individual. So we found it difficult to come to a conclusion about the impact of veterans preference on minority employment." Thus the GAO refutes the oft-repeated claim that veterans preference is a significant obstacle to the employment of minorities, and indeed shows that veterans preference helps minority candidates twice as often as it harms them.

In March 1978 a spokesman for the National Alliance of Postal and Federal Employees, an association of black government workers, termed efforts to curtail veterans preference a "backlash against what some consider a disproportionate number of black veterans" and insisted that veterans preference is a "useful tool" for unemployed black veterans. The NAPFE spokesman is backed up by statistics: minorities account for 8.5 percent of the U.S. veteran population but for 19 percent of all veterans employed by the federal government. Minority veterans make up only 2 percent of the national work force but 9 percent of the federal work force. And during the past 3 years 28 percent of the veterans hired by the federal government have been minority veterans—who have accounted for more than 20 percent of all minority new hires.

Nor has veterans preference harmed the employment prospects of nonveteran minority job seekers. According to a Civil Service Commission newsletter released on August 23, 1978, "Minority full-time employment has steadily increased by an average of 1.2 percent per year since November 1975, despite an overall decline in total full-time federal work force for this period." The CSC newsletter also pointed out that minorities, who account for only 12 percent of the national population, hold 21.6 percent of the federal jobs, and that in 1977 the number of minorities in GS 14 and GS 15 positions increased by 6.4 percent.

WOMEN

In essence, therefore, the issue of veterans preference is one of veterans "versus" women. But the CSC has not claimed that veterans preference has discriminated against women at the lower levels of federal service. Women hold more than 35 percent of all government jobs and 42 percent of all white-collar General Schedule jobs. Those figures are lower than the ratio of women to the total population, but are significantly above the approximately 30 percent of the full-time, year-round jobs they hold in the civilian work force.

Nor does the CSC claim that veterans preference handicaps women on all civil service registers. Chairman Campbell, commenting on the GAO study of selected hiring registers, admitted that, "The most surprising thing . . . is that the pattern of effects is not consistent across all exams. In some cases women obtain little or no advantages by eliminating veterans preference. Eliminating some or all veterans preference advantages will not have a systematic favorable impact on women."

Rather, the CSC has focused on the PACE (GS 5–6) register, which is the principal source of potential managerial talent and which, it claims, affords the clearest evidence of the adverse impact of veterans preference on the employment prospects of women. In fact, assuming that the ratio of veterans who would have been selected without veterans preference would have equalled the selection rate of nonveteran males, and that the jobs lost by veterans would have been distributed proportionately among women and nonveterans, women would have picked up only about 300 jobs in 1977 had veterans preference been eliminated. Last year 6.5 percent of the 40,000 women eligibles on the PACE register were selected. Without veterans preference, 7.5 percent would have been selected. Clearly, the women's organizations which envision greatly enhanced employment opportunties for women with the elimination of veterans preference are going to be sorely disappointed.

In a speech at the Federal Women's Program Seminar held in Washington in the summer of 1977, Chairman Campbell emphasized that, "Veterans preference is only one, and probably not the most important, of many built-in hindrances to the accomplishment of a genuine merit system," and singled out the fact that 80 percent of all personnel actions in the federal government are done within the system as being an "especially powerful deterrent to women, minorities, and other well-qualified for employment in the federal service." Another recent GAO study noted that although federal agencies have made special recruiting efforts to attract women and minorities, they "still face problems in their recruiting efforts—such as scarcity of women and minorities for some disciplines, hiring freezes and funding limitations, and competition from other sectors of the employment market, particularly private industry." It is clear to us that those who attribute real or imaginary imbalances in federal employment to veterans preference are taking an inaccurate and simplistic view.

---

SEPTEMBER 5, 1978.

DEAR CONGRESSMAN: On August 15, 1978 CSC Chairman Alan Campbell sent a "Dear Member" letter to members of Congress in which he commented on the July 31, 1978 letter from VFW National Commander John Wasylik to members of the House and on a recent American Legion "fact sheet" on veterans preference. We will restrict our comments on Chairman Campbell's letter to his remarks regarding statements made by The American Legion.

1. With regard to preference benefits for disabled veterans, Chairman Campbell claims that "There would be statutory noncompetitive appointments, not before available, for veterans rated at 30 percent or more disabled."

In Fact, H.R. 11280, as amended by the House Committee on Post Office and Civil Service, stipulates only that "an agency may make a noncompetitive appointment leading to conversion to career or career-conditional employment of a disabled veteran who (1) has a compensable service-connected disability of 30 percent or more, or (2) is enrolled in or has successfully completed a course of job-related training prescribed by the Administrator of Veterans Affairs." (Chapter 31, Sec. 3112)

Although under the amended legislation agencies may appoint veterans with a disability of 30 percent or more, we do not believe that that amounts to assurance that the administration's performance with regard to the employment of disabled veterans will improve. Thus we will stick to the conclusion we reached in our "fact sheet": "There is no reason to believe that disabled veterans will be any better off with the new legislation than they are now."

2. "Reduction in preference for nondisabled veterans would increase the value of preference for the disabled."

Chairman Campbell offers no further explanation or statistical data to back up that assertion. We find it rather baffling. Under the existing law and the amended version of H.R. 11280, veterans with a compensable disability of 10 percent or more would "float to the top" of civil service registers if they received a passing score. Nondisabled veterans receive only a 5-point bonus, which is added to their passing scores. Thus disabled veterans always rise above nondisabled veterans on the registers. How, then, could 5-point preference veterans stand in the way of the employment of disabled veterans who rise to the top of the register?

3. Commenting on The American Legion's assertion that the OPM will be able to "pass over disabled veterans with ease," Chairman Campbell remarked, "There would be no change in present statutory 'passover' provisions."

The original civil service reform legislation presented to Congress by the administration provided for an expansion of the Rule of Three to a Rule of Seven and also permitted the OPM to substitute any other "referral and selection procedure" it deemed appropriate. It is true that that stipulation was omitted in the House Committee on Post Office and Civil Service. But the administration has made and is making vigorous efforts to restore that key provision.

A GAO report on veterans preference issued in October 1977 pointed out that the CSC "encourages agencies to make use of a variety of hiring practices when problems are encountered in obtaining women eligibles from CSC registers" and lists 11 ways agencies bypass veterans—disabled and nondisabled alike—who are "blocking" civil service registers. Furthermore, during the past several years the CSC has approved about three-fourths of the formal requests from agencies for permission to pass over veterans.

The administration clearly wants even more "flexibility" to pass over veterans. In an Option Paper circulated in the fall of 1977 in preparation for the drafting of the civil service reform legislation, the CSC explained why it desires such "flexibility": "Managers and selecting officials feel constrained by the Rule of Three, as defined in the Veterans Preference Act, which requires selection of individuals from among the three highest rated candidates. The issue is how to provide greater latitude to selecting officials in choosing candidates who best meet their needs." Some of the options suggested in that option paper were ranking candidates in five broad categories, permitting agencies to make selections from the top three applicants on a register plus the three highest ranking minorities or women on that register, etc.

It is clear to us that if the administration succeeds in putting such "flexibility" back into the legislation the OPM could, indeed, "pass over disabled veterans with ease."

Sincerely,

MYLIO S. KRAJA,
*Director, National Legislative Commission.*●

## LEGISLATION TO CONTINUE AND REAFFIRM THE FEDERAL COMMITMENT TO A NATIONAL CAPITAL TRANSPORTATION SYSTEM

---

## HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. HARRIS. Mr. Speaker, today I am introducing legislation entitled the National Capital Transportation Amendments of 1978. My colleagues Mr. FISHER, Mr. DIGGS, Mr. FAUNTROY, Mr. STEERS, Mr. MCKINNEY, and Ms. SPELLMAN join me in cosponsorship.

Although this legislation is written specifically to amend the National Capital Transportation Act of 1969, it is in fact a continuation and reaffirmation of a Federal commitment that officially began nearly 20 years ago. The title to the

National Capital Transportation Act of 1960 reads in part as follows:

The Congress finds that an improved transportation system for the National Capital region is essential for the continued and effective performance of the functions of the government of the United States, for the welfare of the District of Columbia, for the orderly growth and development of the National Capital region, and for the preservation of the beauty and dignity of the Nation's Capital. . . . The Congress therefore declares that it is the continuing policy and responsibility of the federal government, in cooperation with state and local governments of the National Capital region, to encourage and aid in the planning and development of a unified and coordinated transportation system for the National Capital region.

In keeping with that commitment, this legislation addresses the three major challenges faced today by the Washington Metropolitan Area Transit Authority:

First. Reaffirmation of the longstanding Federal Goverment financial commitment to complete a total Metro transit system in the Nation's Capital;

Second. Establishment of a method for the orderly retirement of bonds issued by the Washington Metropolitan Area Transit Authority; and

Third. Creation of an ongoing Federal participation in operating costs to reflect the special Federal benefits accruing from the Metro system.

The Washington Metropolitan Area Transit Authority (WMATA) recently released a proposed financial plan for completion and operation of the public transportation system for the National Capital area. This plan, which was developed at the request of the Urban Mass Transportation Administration (UMTA) and the Department of Transportation, presents two alternative methods to reach the stated objective. This legislation is designed to implement the alternative plan endorsed by the WMATA board. It calls for a continuation of the special Federal relationship that created Metro in the beginning. It calls upon the Federal Government to meet the obligations of a partnership entered into over 20 years ago with the local governments of the Washington metropolitan area.

It calls for a 101-mile Metro system to be completed and fully operational by 1985 at a savings of $200 million over the other financial approach proposed.

A 101-mile Metro system has been supported by an alternatives analysis recently conducted by one of this Nation's leading consulting firms. That 18-month analysis concluded that a 101-mile system was not just the best thing for regional transportation goals, but was the best thing for the total development of the Washington metropolitan region.

A 101-mile Metro system has also recently won the support of the Department of Transportation and the Urban Mass Transportation Administration.

The 101-mile Metro system will be completed in the shortest possible time at the greatest possible savings to local and national taxpayers through enactment of this bill.

Under this bill, up to $1.7 billion in Federal funds would be authorized beginning in 1980 for capital construction purposes. This amount added to already identified highway transfer funds would serve to complete the remaining 40 miles of Metro on an 80-percent Federal/20-percent State and local basis. This approach, which is consistent with Congress' philosophy of providing "advance authorization," would enable Metro to be fully operational 2 years sooner than would be otherwise possible and at a savings of over $200 million.

The second major element of this legislation relates to payment of the interest and principal on the approximately $1 billion in construction bonds due to expire in 2010. It is unfair and unrealistic to expect the farebox or the local taxpayer to cover this expense alone. The approach set down in this legislation is financially sound and consistent with federal assistance currently provided to all U.S. cities now constructing mass transit systems.

The bill calls for Federal participation in a sinking fund that would pay off the bonds as they mature and in the interest payments now borne strictly by the local taxpayers. The ratio for participation in both cases would be on an 80-percent Federal/20-percent local basis.

The third area addressed by this bill is a direct Federal operating subsidy to reflect the benefit and convenience of Metro to the Federal Government. In fiscal year 1980 the subsidy is $20 million and increases at a rate of 6 percent a year to $30 million in 1987.

The benefits of Metro to the day-to-day operation of the Government are immense. This Federal participation, at less than 10 percent of current Metro operating costs, is small compensation for the convenience and savings from the stations dedicated to Government facilities such as the Pentagon, NIH, and Arlington Cemetery. Time and dollars saved by employees using Metro instead of taxies on official Government business and greatly decreased lost time due to inclement weather are just two other advantages of Metro to the Federal Government.

This legislation emphasizes the special obligations the Federal Government has to the citizens of northern Virginia, the District of Columbia, and suburban Maryland when it sets special requirements that go beyond those set for similar projects in other parts of the country.

The Washington Metro system is a transit system befitting a Nation's Capital. President Johnson specified that this be so. Metro has the mark of the National Capital Planning Commission. Station and car designs were reviewed by the Fine Arts Commission. Such costly requirements do not exist for the taxpayers of Atlanta, Chicago, or Philadelphia or any other U.S. city as they design and build their mass transit systems.

Neither does any other system maintain stations built strictly at Federal Government request as Metro does.

Neither does any other system have mass transit stations located in buildings dedicated to Federal Government use.

Metro is not just another mass transit system.

Metro is the mass transit system of the Capital of the United States.

Metro does not serve just one city or State. Metro serves three States, Virginia, Maryland, and the District of Columbia.

This legislation continues and reaffirms the special nature of Metro and the special commitment the Federal Government has to it.●

---

## BALANCE(S) OF POWER SERIES, BOOK IV (D)—MEANING OF SOVIET MILITARY DOCTRINE

**HON. JOHN B. BRECKINRIDGE**
OF KENTUCKY
IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, today's article in the continuing Book IV of the "Balance(s) of Power" series, which sets forth Soviet intentions and doctrine, is concerned with the rudimentary meaning of military doctrine as understood and defined by Soviet leaders. Entitled "Soviet Military Thought," and written by Joseph Douglass under Air Force auspices, this brief article summarizes brilliantly the basic meaning of military doctrine inside the Kremlin. Introductory in nature, especially compared to later insertions that will be made in book IV, "Soviet Military Thought," nevertheless, illustrates—by referencing Soviet writings—how the Russians view this subject and, implicitly, how there interpretation differs from Western and Amercan sources.

The article follows:

SOVIET MILITARY THOUGHT

In ways that are particularly important to this analysis, the Soviets have certain concepts and words that are very different from their U.S. counterparts and that need to be recognized in reading the Soviet literature. Although largely taken for granted in the United States, the organization of military thought into specific categories, such as military doctrine, science, art, and strategy, and the Marxist-Leninist interpretation of certain words and concepts, such as war, one-man control, and independence are very important to the Soviet and an appreciation of this and the definitions is essential and requisite to understand what the Soviets are saying. This is especially so for "doctrine," "strategy," and "war." This chapter will review how these very basic terms are used in the Soviet Union. Other definitional problems and idiosyncrasies will be discussed in the following chapters as the need arises.

A. SOVIET MILITARY DOCTRINE

In the United States, military doctrine is a very flexible word that means very different things to different people. In effect, everyone has his own meaning. There is national doctrine, allied doctrine, Army doctrine, Air Force doctrine, and tactical nuclear doctrine, to mention but a few. In contrast, in the Soviet Union, there is only one, and that is official Soviet military doctrine.

In the Soviet Union, military doctrine is very carefully defined and promulgated. It is worked out in conjunction with the political leadership, and it represents their guidance to the military in preparing for war. As stated in *Military Strategy*, military doctrine is ". . . the expression of the accepted views of a state regarding the problems of political evaluation of future war, the state attitude toward war, a determination of the nature of future war, preparation of

the country for war in the economic and moral sense, and regarding the problems of organization and preparation of the armed forces, as well as of the methods of waging war. Consequently, by military doctrine one should understand the system of officially approved, scientifically based views on the basic fundamental problems of war." [Ref. 8, p. 38]

As stated in *The Officer's Handbook* in 1971:

"Military doctrine is worked out and determined by the political leadership of the state." [Ref. 13, p. 109]

"The Central Committee of the Party . . . works out Soviet military doctrine. [Ref. 13, p. 25]

"*Military doctrine* is a system of guiding views and principles of a state on the character of war under given specific historical conditions, the determination of the military tasks of a state, the armed forces, and the principles of their construction, and also the methods and forms for the solution of all these tasks, including armed conflict, which issue from the goals of the war and the socio-economic and military-technical capabilities of a country." [Ref. 13, p. 109]

In the Soviet Union, military doctrine is drawn up under the guidance of the Central Committee of the Party. In contrast, U.S. doctrine is developed by the military to guide their action and tends to equate more evenly with Soviet principles of operational art or tactics, which are more at the base of the hierarchal structure of Soviet military thought. In the Soviet Union, doctrine is at the apex, developed at the Kremlin; while in the U.S., doctrine is something developed at lower command levels in the Services. Thus, "doctrine" in the Soviet system is not even similar to "doctrine" in the U.S. system. Military doctrine in the Soviet Union is official and is to be used in preparing the country for war. It identifies the nature of the war, the preparations to be undertaken, and the priority tasks and problems.

The doctrine is promulgated in books such as *Marxism-Leninism on War and the Army* [Ref. 3] and publications such as *Communist of the Armed Forces*. The basic characteristics and some of its content are set forth in *Methodological Problems of Military Theory and Practice* and *The Officer's Handbook*. As an example of Soviet doctrine, consider the following excerpts from *The Officer's Handbook:*

Soviet military doctrine has an offensive character. . . . The Soviet Union . . . will conduct the war which the enemies impose on them in the most offensive manner in order to attain the smashing of the enemy in short times.

Soviet military doctrine allocates the decisive role in contemporary war to nuclear missile strikes of a strategic and operational-tactical character, the armed forces will employ conventional armament. [Ref. 13, p. 116]

The basic ingredients that have consistently made up Soviet doctrine since at least the late fifties are its offensive character, the importance of nuclear weapons, and the belief that the war will be decisive in its early phase and, therefore, short. Soviet military doctrine has consistently held that surprise attack is the most probable method whereby "the imperialists will unleash war";

As for the means the imperialists have of unleashing [sic] war, Soviet military doctrine considers most probable a surprise attack of the aggressor without a declaration of war. This precisely is the main thing the imperialists are counting on. They have repeatedly resorted to such means of unleashing war in the past. The aggressors resort to it under modern conditions, too, as was shown, for example, by the attack of Israel on the Arab countries. [Ref. 14, p. 321]

Finally, should world war come about, the basic tenets of Soviet military doctrine are that it will be the conflict of two diametrically opposed social systems, a coalition war that is definitely nuclear, will result in destruction of the capitalist system, and the world-wide triumph of the socialist system.

The major change, introduced in the sixties, allows for the possibility of an opening conventional phase (phase, not war) that subsequently escalates to all-out intercontinental war.

It is possible that war can begin by gradual escalation of a limited conflict into a world conflict. Imperialists can begin it and wage it for any time without using nuclear weapons with only conventional means. [Ref. 14, p. 321]

More recently, as discussed in Chapter VI, the possibility of limited nuclear war is being investigated and may well emerge as doctrine in the near future.

### B. MILITARY SCIENCE AND STRATEGY

Soviet military thought is divided into two major compartments; military doctrine and military science. Within military science, strategy is the most important element. Soviet military science is defined in *The Officer's Handbook* as follows:

*Soviet military science is a united system of knowledge on the preparation and conduct of armed conflict in the interests of the defense of the Soviet Union and other socialist countries against imperialist aggression.* In its functions include:

The discovery and investigation of the objective laws of armed conflict;

The development, on the basis of the knowledge of these laws, of the means and forms of armed conflict for the achievement of victory over the enemy;

The investigation of the problems and determination of the methods for the preparation of the territory of the country and the Armed Forces for war, and the comprehensive support of the armed struggle economically, politically, morally, materially and technically, scientifically, and in other ways;

The development of the bases for the organization and training and education of the troops in accordance with the requirements of contemporary war;

The development of the method of military science as a whole, its general theory, theory of military art, the military-technological sciences, and its other parts and branches. [Ref. 13, pp. 82–83]

The interaction and difference between military doctrine and military science are important. While military doctrine guides military science, military doctrine also is developed using the conclusions of military science. Military doctrine exploits the conclusions of various sciences. The doctrine rests upon the conclusions of military science particularly as regards determining the nature of a future war and the methods for conducting it, and for determining the structure and preparation of the armed forces. [Ref. 8, p. 38]

As described in *Methodological Problems of Military Theory and Practice:*

"Military science studies a much wider circle of problems than necessary for realization of the practical problems of construction of the armed forces of the state during the given period. It considers all the probable means and conditions of waging armed struggle, including those which are not typical for the given country and do not entirely coincide with its means. But the conclusions of military science use doctrine, proceeding from the real conditions and means of the country. No contemporary military science can disregard the appearance of nuclear missiles and their determining effect on the means and form of armed struggle. However, for states without nuclear missiles military doctrine had to show ways of military construction different from those which countries having very modern means of armed struggle can go. And these ways are developed by military science.

"Military science studies the development of military affairs in many countries and evaluates the state of the armed forces and military means of states and coalitions and condition of waging armed struggle in various theaters of military actions. The doctrine considers only those factors which affect the construction of the armed forces in its country. In other words, of the entire variety of phenomena and trends studied by military science, of all its generalizations and recommendations, military doctrine takes only those which correspond to the political course of the state and to its strategic means." [Ref. 14, pp. 327–328]

Although military doctrine and military science have much in common, it should be clear that there are important differences. In addition to the above example, military science focuses on the past, present, and future, while doctrine is pointed to the present and immediate future; that is, to foresee the nature of war and probable enemy in order to provide guidance to military science regarding the course to follow. A further difference is that ". . . doctrine, being developed and accepted by the state, is a single system of views and a guide to action free from any particular subjective views and evaluations. Inherent to science, in its development, is the struggle of opinions. In the system of military theories which comprise military science there may be several different points of view, different scientific ideas, and original hypotheses which are not selected by doctrine for practical application and they thereby do not acquire the character of official state views on military questions." [Ref. 13, p. 115]

Military science includes a number of different fields, such as history, administration and organization, training, and the military art. The most important of these components is military art, which is made up of strategy, operational art, and tactics. The most important of these, which is also critical to this study, is strategy.

*Strategy* is the part of military art which studies the foundations of the preparation and conduct of war as a whole and its campaigns. In practice it is policy's direct weapon. With respect to strategy, policy plays the leading and directing role.

Strategy is general and single for all the types of the armed forces of the country because war is conducted, not by some one type of armed forces or combat arm, but by their combined efforts. The coordination of the actions of all the types of armed forces in war is possible only within the framework of a single military strategy. [Ref. 13, p. 101]

The most important problem of strategy is the determination of the character of modern war, the possible means of its emergence and conduct, its stages (periods) and targets (problems), which are landmarks for its planning. [Ref. 14, p. 313]

Strategy and doctrine are the areas of greatest interest in this study—with operational art and tactics examined to obtain greater detail, where important, regarding the organization and employment of various force elements. Probably the single study most representative of strategy is Sokolovskiy's *Military Strategy*, third edition. The Soviet officer is still referred to this important book for basic strategy.

Military strategy and doctrine, although very similar in coverage, are different in principle. For example:

Military strategy occupies a subordinate position with regard to military doctrine. Military doctrine determines over-all policy in principle, while military strategy, starting from this over-all policy develops and investigates concrete problems touching upon the nature of future war, the preparation of a country for war, the organization of the armed forces, and the methods of warfare. [Ref. 8, p. 40]

What is most important is the relationship between doctrine and strategy in time of war.

During war, military doctrine withdraws somewhat into the background because in armed conflict they are guided primarily by military-political and military-strategic considerations and by the conclusions and generalizations which follow from the conditions of a specific situation. Consequently, war and armed conflict are guided not by doctrine, but by strategy. [Ref. 13, p. 116]

In evaluating the Soviet threat to NATO and the prospects for controlling and terminating a NATO/Warsaw Pact war in Europe, the Soviet doctrine and strategy are coequal in importance and preeminent in the whole field of military thought.

C. WAR

A word that can introduce considerable definitional problems is the very simple word "war." In the Soviet doctrine, war is not just one word. There are two types of war—just war and unjust war—and which war is being discussed often has to be inferred from the context of the sentence. The distinction between just and unjust war is not trivial. It is particularly important because the interpretation can cast considerable influence on the meanings attached to various discussions in tthe Soviet literature and, in particular, to those discussions that are associated with limited nuclear war. It is essential to understand *whose* war is being discussed in interpreting Soviet statements.

A war is just or unjust depending on the social content and goals of the war—not by who attacks first, where the war is fought, or whether the troops are attacking or defending themselves.

Just wars are those which are liberating, directed at class or national liberation. Also wars defending the people from outside attack and attempts to enslave them, to free colonies and dependent countries from imperialist oppression, and civil wars. A special place is occupied by wars in defense of the socialist fatherland. These are the most just of all wars since they defend the system under which they live as well as their native land and national independence.

Unjust wars are predatory wars organized by exploiting classes. Their goal is to seize territory of others, defeat and enslave other peoples and working classes.

Dividing wars into just and unjust is very important. It helps orient communist to each war. At the same time communists have never been pacifists, that is, against any war. [Ref. 15, p.2]

When one reads a statement regarding wars, he must ask whether the statement applies to just wars or to unjust wars—the context is most important. In brief, anyone challenging the Soviets is fighting an unjust war; and, any war in which the Soviets are involved is, from their position, a just war.

As stated in a 1975 *Communist of the Armed Forces* editorial:

"War still is explained by the Leninist principle of just and unjust wars. A war which might be unleashed by imperialism against the Soviet Union would be unjust and reactionary and a continuation of their predatory policies. From the socialist countries' side, it would be the most just and progressive war. It would be defending the most advanced social structure—socialism, for the benefit of of all progressive mankind. Such wars might be those of the working classes against the bourgeoisie and wars of national liberation. Only wars in the interests of socialism can be just from the point of view of the working masses." [Ref. 15, p. 5]

When the Soviets denounce warfare, call for declarations against weapons of mass destruction, and emphasize the need to work to make nuclear war impossible, the war they are talking about is the unjust war. Such statements do not mean that they are at all interested in having curtailed *their* capability to conduct just wars of similar scale and using similar weapons.

As stated most clearly by Colonel V. V. Larionov, a prominent Soviet authority on military affairs and composing editor of all three editions of Marshal Sokolovskiy's classic *Military Strategy:*

"As for the Soviet Union it has always resolutely opposed international agreements legalizing *unjust* wars. Our country is consistently struggling for general and complete disarmament. *That is, for the destruction of all material means for waging such wars."* [Emphasis added] [Ref. 16, p. 33]●

## WE WILL NEVER GIVE UP

## HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. HOLLENBECK. Mr. Speaker, the following letter to President Carter speaks eloquently for the feelings of thousands of Cuban-Americans and the others concerned with the plight of those people in Cuba who are enslaved and jailed both behind prison walls and on the outside but denied freedom of movement.

The text of the letter—hundreds of which will be addressed to the President—follows in both English and Spanish:

(NOTE.—The letter in English is included in the RECORD).

UNION CITY, N.J.,
*August 5, 1978.*

Mr. JAMES CARTER,
*President of the United States of America, The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: From the gloomy Cuban prisons through underground channels we have learned that the political prisoners confined in the dungeon known as "Combinado del Este" in Havana, are in hunger strike as a protest against the farce of the so called "International Youth Festival" being staged in Havana under the auspices of the Castro-Communist regime.

The Cubans in exile as the outspoken voice of our muzzled and enslaved compatriots come forward at this time to denounce the crimes and atrocities being committed by the Soviet's puppet repressive police to our brothers in Cuba, asking for the active support to our cause of the free men of the world.

We feel that we have been abandoned by some of our former friends and allies. An ominous curtain of silence has been imposed on our struggle. Our freedom fighters are being persecuted and jailed. However, our uncompromising decision is stronger than ever to continue the fight by every and all means until the tyranny in Cuba is overthrown.

We demand a worldwide mobilization for the implementation of the Human Rights Principles and the Helsinki Accords in our homeland. May we count on you?

We'll never give up.

Recently, through many efforts on my part and because of the voices raised here in the United States, the Castro regime has indicated a willingness to free some incarcerated behind prison walls and to allow others to move to freedom as well.

This is a beginning—a beginning only—and should not be allowed to cause us to cease our unstinting efforts on behalf of human rights and implementation of the Helsinki accords in Cuba. Our voices and our efforts must continue until freedom prevails.●

## VETERANS ORGANIZATIONS SUPPORT HANLEY AMENDMENT

## HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 7, 1978*

● Mr. TEAGUE. Mr. Speaker, during the past several months all Members have received a number of communications from national veterans organizations calling for the preservation of veterans preference in Federal employment. In this regard, veterans organizations who speak for Vietnam veterans, as well as older veterans, are in total agreement in their support of the Hanley amendment which would continue veterans preference rights for all veterans.

There follows, therefore, copies of communications received from Eric Sandstrom, national commander-in-chief of the Veterans of Foreign Wars of the United States; Billy O. Hightower, national commander of the Disabled American Veterans; and a letter to the President from Frances S. Wapnick, national president of the National Ladies Auxiliary of the Jewish War Veterans of the U.S.A., Inc., in which it is indicated that a number of Ladies Auxiliaries and women's veterans organizations have expressed their opposition to the modifying of veterans preference in Federal employment.

The letters follow:

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
*September 1, 1978.*

U.S. HOUSE OF REPRESENTATIVES,
*Washington, D.C.*

On August 24, 1978, the Senate passed S. 2640, the companion bill to H.R. 11280, the President's proposed Reform of Civil Service Laws. In its wisdom, and for which I commend that august body, the Senate left virtually undisturbed the Veterans Preference Act of 1944, as amended. The only modification thereof was to abolish veterans preference for able-bodied Armed Forces retirees in the grades of Major or Lt. Commander and above.

Due to the Schroeder Amendment, H.R. 11280, as reported by the House Post Office and Civil Service Committee, would greatly curtail veterans preference and be particularly detrimental to our younger Vietnam veterans, those, the Administration purports to help. Although the Schroeder Amendment is an Administration compromise somewhat ameliorating a strong anti-veteran posture, it is wholly unacceptable to us. The Schroeder Amendment so incensed the 16,000 voting delegates to our 79th National Convention, held in Dallas, Texas last month, that they unanimously passed Resolution No. 601 entitled, "Preserve and Extend Veterans Preference". a copy of which is appended to my letter. This resolution enjoins me to advise Congress and the President of the United States of the opposition of the Veterans of Foreign Wars of the United States to H.R. 11280 in its present form.

In view of the foregoing, and on behalf of our 1.85 million members of whom 500,000, or 27 percent, are Vietnam veterans, and the 610,000 members of our Ladies Auxiliary, I urge each of you, as our elected representatives, to defeat the Schroeder Amendment to H.R. 11280 and adopt the Hanley Amend-

ment, which will bring your bill in line with that passed by the Senate, in this respect.

Our entire membership, as well as all veterans and their families, who constitute nearly half the population of our great nation, will be following closely your vote with respect to veterans preference.

With best wishes and kind regards, I am

Sincerely,

ERIC SANDSTROM,
*National Commander-in-Chief.*

---

RESOLUTION NO. 601—PRESERVE AND EXTEND VETERANS PREFERENCE

Whereas, our federal government specially selected as mentally, morally and physically fit, certain members from its society, specially trained this group, subjected them to stringent rules and regulations removed them from home, family and employment, asked of them a special sacrifice, required some of them to suffer wounds they will live with forever; and

Whereas, a grateful nation, through its representatives in the Congress of the United States has, in recognition of that special service and loss of employment opportunity while defending the country in time of need, extended a long history of employing the returning veterans by enacting the Veterans Preference Act as contained in Title 5, U.S.C.; and

Whereas the term "veteran" includes every category of society—sex, age, religion, ethnic group, race, and creed; and

Whereas, absence from the highly competitive job market due to military service creates an unfair and unequal burden on veterans in competing for employment with their non-veteran peers upon completion of military service; and

Whereas, the veterans preference law accomplishes the legislative purpose of honoring veterans and provides a small advantage in competing for federal jobs; and

Whereas, there have been introduced into the Senate and the House of Representatives of the Congress of the United States proposed legislation known as S. 2640 and H.R. 11280, respectively, which bills would on their effective date, October 1, 1980, terminate veterans preference for more than 19 million non-disabled wartime veterans, including 3½ million nondisabled Vietnam veterans, and which bills would provide for termination of veterans preference for all of our nation's nondisabled veterans 10 years after they have completed their active duty military service; now, therefore

Be it resolved, by the 79th National Convention of the Veterans of Foreign Wars of the United States, that the Congress and the President of the United States be informed of this organization's strong opposition to the legislation proposed in S. 2640 and H.R. 11280 or similar type legislation; and

Be it further resolved, that this organization deplores each and every attempt to degrade, dilute or modify the historical precedence of giving job eligibility preference to those who were taken from their communities to serve their country in time of war, and that the President and the Congress of the United States reject any and all recommendations or requests for any change, amendment, or weakening of purpose of the Veterans Preference Act of 1944 as amended.

Adopted by the 79th National Convention of the Veterans of Foreign Wars of the United States held in Dallas, Texas, August 18–25, 1978.

---

DISABLED AMERICAN VETERANS,
*Washington, D.C., September 5, 1978.*

Hon. OLIN E. TEAGUE,
*U.S. House of Representatives,*
*Washington, D.C.*

DEAR CONGRESSMAN TEAGUE: The Disabled American Veterans is again urging your support for the "Jim Hanley Amendment" to H.R. 11280, the Civil Service Reform Act of 1978. Congressman Hanley's Amendment, as you know, will prevent the sharp curtailment of veterans' preference in Federal employment as presently proposed by the Civil Service Reform bill.

I know my immediate predecessor, Oliver E. Madows, has written to you previously on this subject. As the newly elected National Commander of the DAV, I would like to bring to your attention what I consider to be three very important points concerning the veterans' preference issue.

(1) By recent vote of 87 to 1 the Senate not only gave overwhelming support for retention of the five point preference for nondisabled veterans, but through adoption of the Cranston Amendment, voted to strengthen the 10 point preference extended to service-connected disabled veterans.

(2) The Cranston Amendment included a provision to eliminate the five point preference now given to military retirees ranked Major (or the equivalent) and above—the so-called "double dipper". The Hanley Amendment would do this also.

(3) The attached statistical data, assembled by the Civil Service Commission itself (but not given wide distribution), completely refutes the Administration's claim that the use of veterans' preference adversely impacts upon the hiring of women and minorities by the Federal government. In fact, it suggests just the opposite.

Thank you very much for your kind attention to this letter. I trust that it will lead you to support your colleague, Jim Hanley, in his efforts to preserve veterans' preference for our Nation's veterans.

Sincerely yours,

BILLY O. HIGHTOWER,
*National Commander.*

---

DATA TRANSMITTED BY ALAN CAMPBELL, CHAIRMAN, CIVIL SERVICE COMMISSION, TO CONGRESSWOMAN PATRICIA SCHROEDER IN A LETTER DATED JULY 24, 1978. THE C.S.C., AFTER BEING REQUESTED TO DO SO, LATER PROVIDED THE DAV WITH THIS SAME INFORMATION.

MINORITY HIRES

Figures below (rounded to nearest thousand) reflect governmentwide new hires (all pay systems). Figures do not include those for Guam, Hawaii and Puerto Rico.

| Calendar years | 1975 | 1976 | 1977 |
|---|---|---|---|
| Total new hires [1] | 458,000 | 509,000 | 495,000 |
| Total minority new hires | 141,000 | 145,000 | 141,000 |
| Total veteran new hires | 109,000 | 116,000 | 116,000 |
| Total minority veteran new hires | 29,000 | 31,000 | 31,000 |

[1] Does not include those who transferred, returned to duty, or restored to duty.

WOMEN NEW HIRES VERSUS VETERAN NEW HIRES

Figures below reflect only those new hires into General Schedule and pay systems for which an equivalency table can be supplied. Figures for Postal Service, Federal Wage Systems, etc., not available.

| New hires, GS and equivalent [1] | Calendar year— 1975 Women | 1975 Veteran | 1976 Women | 1976 Veteran | 1977 Women | 1977 Veteran |
|---|---|---|---|---|---|---|
| 1 | 6,594 | 577 | 7,444 | 609 | 7,019 | 597 |
| 2 | 35,079 | 5,676 | 33,177 | 5,690 | 33,743 | 5,266 |
| 3 | 45,582 | 11,681 | 48,230 | 12,312 | 50,522 | 12,413 |
| 4 | 22,054 | 7,948 | 25,165 | 8,055 | 27,434 | 8,726 |
| 5 | 9,679 | 7,455 | 10,919 | 7,574 | 11,192 | 7,749 |
| 6 | 1,673 | 1,076 | 1,606 | 1,119 | 1,614 | 1,126 |
| 7 | 4,324 | 5,565 | 5,091 | 4,818 | 5,131 | 4,536 |
| 8 | 854 | 334 | 892 | 330 | 950 | 306 |
| 9 | 3,165 | 3,956 | 3,157 | 3,482 | 3,323 | 3,325 |
| 10 | 77 | 104 | 80 | 90 | 112 | 86 |
| 11 | 1,058 | 2,525 | 1,099 | 2,174 | 1,321 | 2,162 |
| 12 | 398 | 1,662 | 454 | 1,517 | 537 | 1,500 |
| 13 | 228 | 1,014 | 207 | 847 | 284 | 700 |
| 14 | 117 | 679 | 120 | 500 | 164 | 421 |
| 15 | 65 | 749 | 66 | 554 | 124 | 478 |
| 16 | 7 | 109 | 5 | 64 | 16 | 46 |
| 17 | 2 | 63 | 4 | 31 | 11 | 34 |
| 18 | 0 | 31 | 2 | 19 | 6 | 27 |
| Total | 130,956 | 51,204 | 137,718 | 49,785 | 143,503 | 49,498 |

[1] DAV comment—Most new hires, for both women and veterans, occur in the ower GS levels. In recent years, women hires substantially outnumbered veteran hires in GS levels 1 through 8.

---

NATIONAL LADIES AUXILIARY,
JEWISH WAR VETERANS,
*Washington, D.C., May 16, 1978.*

The PRESIDENT,
*The White House*

MY DEAR MR. PRESIDENT: The National Ladies Auxiliary, Jewish War Veterans of the U.S.A., recently asked allied veterans organizations to join with us in the following statement: "We strongly oppose the Administrations proposal to act against veterans preference. Such action would further erode the rights of thirty million veterans and their families. We urge the Administration to refrain from stripping veterans of the rights they have earned in the patriotic service of our country".

The following organizations are united on the statement:

American Gold Star Mothers, Inc.

Daughters of Union Veterans of the Civil War.

Ladies Auxiliary of the Military Order of the Purple Heart.

Ladies Auxiliary, Veterans of World War I, Inc.

National Ladies Auxiliary, Jewish War Veterans of the USA.

National Woman's Relief Corps Auxiliary to the Grand Army of the Republic, Inc.

Polish Legion of American Veterans Auxiliary.

We trust that you will consider our statement in your future deliberations in the matter.

With sincere good wishes,

Sincerely yours,

FRANCES S. WAPNICK,
*National Presidents.*●

## VETERANS' PREFERENCES

## HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. ERLENBORN. Mr. Speaker, the well-known columnist and commentator, James J. Kilpatrick, recently did a commentary on the subject of Veterans' Preferences. It was aired over radio station WTOP.

Inasmuch as the House is currently considering the Civil Service Reform Act, I think this is a most germane and intelligent discussion of the subject.

I commend it to the attention of my colleagues.

The commentary follows:

COMMENTARY ON VETERANS' PREFERENCES

(By James J. Kilpatrick)

It was predictable, but it is disappointing all the same, that the American Legion and other veterans' groups should have erupted in knee-jerk opposition to Mr. Carter's proposals for civil service reform. The President's recommendations for retrenchment in this matter of "veteran's preference" are not extreme. They strike me as fair and reasonable, and ought to be adopted.

The present system goes back to the War Between the States, when Abraham Lincoln sought to reward the Union veterans with a little advantage in getting government jobs. The advantage carried over to the expanding system of Civil Service. As it operates today, a veteran now has a lifetime bonus toward a Federal job, even though he may have served a minimum hitch 20 years ago.

Under Mr. Carter's plan, the disabled veteran would continue to have a lifetime preference. For other veterans, the advantage would last for only ten years following their discharge from military services. High-ranking officers would get no special preference at all, on the theory that they need none to find satisfactory civilian employment. All this makes sense to me.

Persons in military service these days are better paid by far than they were in Lincoln's time. They have greater opportunities for job training, and for post-service education. It's a bit much to continue giving them a Civil Service advantage also, especially when the system operates inevitably against qualified women. Mr. Carter is on the right track here, and the Legion's opposition ought not to prevail. I'm James J. Kilpatrick.●

## TRIBUTE TO BASEBALL COACH ANG VACCARO

### HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. APPLEGATE. Mr. Speaker, last Wednesday, I had the honor of informing the House of Representatives of the American Legion Ohio State baseball champions. The team represented Teramana American Legion Post 33 of Steubenville, Ohio. In my remarks, I mentioned the names of the players and coaching staff, but for Head Coach Ang Vaccaro, this is not near enough.

Ang Vaccaro has guided and provided leadership to thousands of individuals over the years through his academic position as principal of the Steubenville High School and coach of both scholastic and amateur sports.

During his career as head coach of the Steubenville High School basketball team, Ang achieved a record of 213 wins and 98 losses. As head baseball coach for several years his teams enjoyed a total of 205 wins and only 23 losses. Because of these outstanding achievements, Ang Vaccaro had been inducted into the Ohio Basketball Coaches Hall of Fame upon his retirement as high school coach in 1960.

From the high school level, Ang turned his attention to the coaching of American Legion baseball, serving as head coach of Steubenville Post 33 for all of its 32 years. During that time, his teams won two State championships, one in 1964 and just 3 weeks ago for the 1978 crown. This past season, the team accomplished a 41 and 6 record, just missing a chance to go to the American Legion World Series by two runs in the final game of the Great Lakes Regional Tournament.

What is most impressive though, is Ang's winning record as American Legion coach. In those 32 years, his teams have won 924 games while losing only 210. This, combined with his high school coaching record gives him a lifetime record of 1,342 wins and only 331 losses, making Ang one of the most successful coaches in the history of American sports.

After reviewing this man's remarkable coaching career, which is far from over, I am sure we would all agree on the fact that Ang Vaccaro is truly a leader and an inspiration to thousands. On behalf of Ohio's 18th Congressional District, I extend hearty congratulations to Ang Vaccaro on a job truly well done.●

## INTERNATIONAL EMERGENCY WHEAT RESERVE

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. GILMAN. Mr. Speaker, recently both the House Committees on Agriculture and on International Relations reported out legislation establishing an international emergency wheat reserve. This measure authorizes the President to acquire and maintain a reserve stock of wheat to be targeted to nations in need of emergency food assistance during periods of critical food shortages.

In light of the world food crisis of 1972–74, when available supplies sunk dangerously below the needs of famine-stricken nations, the current administration (as did its predecessor), as well as key international food conferences, have advocated establishing such a reserve.

The Senate Agriculture Committee, however, has reported out legislation considerably different than the measure now pending in the House. The Senate bill, establishing an international emergency food fund, would set aside a fund of up to $500 million to be used by the President to acquire, during periods of shortages, grain stocks to be used for international emergency assistance.

Compelled by a dubious logic that would have us purchase grain stocks during periods of shortages of these stocks, when indeed that grain available is considerably more costly than if purchased during periods of abundant harvests, this measure would not enable us to meet our goal of adequately responding to food crises.

Writing in the August 31, 1978 Washington Post, Brennon Jones, an issue analyst with Bread for the World, an organization dealing with U.S. policy and world hunger, offers a cogent analysis of the serious shortcomings of the "Food fund" as compared to the grain reserve concept.

As a sponsor of legislation establishing an emergency grain reserve, and anticipating that the two measures to which I have referred will soon be before Congress, I wish to share this timely article with my colleagues and insert it at this point in the RECORD:

WORLD FOOD FUNDS: YOU CAN'T EAT MONEY

(By Brennon Jones)

Religious groups urge the administration to assist famine-struck nations with additional food aid, but are turned down because of the impact such purchases would have on domestic prices. U.S. consumers boycott in protest of skyrocketing food prices. And U.S. farmers lobby against embargoes and export restrictions that are imposed because of tight grain supplies.

That sounds like fiction, but it all happened during the 1972–74 food crisis. And the chances of a recurrence would be strengthened if Congress adopts a bill now under consideration.

The bill entitled the International Emergency Food Fund, authorizes the President to spend up to $500 million during periods of international food emergencies for purchases of U.S. food aid for humanitarian relief. Introduced by Sen. Robert J. Dole (R-Kan.), the bill was reported out of the Senate Agriculture Committee on Aug. 16 in preference to legislation that would establish grain reserves for such emergencies.

When the World Food Conference met in Rome in 1974, a key part of the global strategy that emerged for avoiding food crises in the future was established in an international grain-reserve system. The Carter administration endorses the concept and has advocated U.S. international emergency reserves. Both the House Agriculture and International Relations Committees passed legislation in mid-August that would establish such reserve stocks. The justification for emergency grain reserves is clear: Such stocks ensure that food aid levels do not shrink at precisely the time when they are most needed—during famines. Without reserves, food aid is bought at the current market price, and in times of scarcity the price soars. So the same aid dollar buys considerably less grain. Thus U.S. food-aid shipments dropped from 9.9 million tons in 1972 to 3.3 million in 1974.

The building of such reserves is clearly in the interest of U.S. producers, because grain for stocking them is purchased on the market—an insight that has not escaped the National Association of Wheat Growers, who have endorsed a wheat reserve of moderate size. The Congressional Budget Office estimates that, should a 6 million metric ton wheat reserve be established (the size the administration supports and the House International Relations Committee bill would provide), U.S. wheat prices could rise immediately by as much as 51 cents per bushel, with a season average increase of up to 34 cents. Such increases would result in a reduction in government outlays for price-support payments to farmers of $235 million in fiscal year 1979 alone.

By votes of 27 to 16 in the House Agriculture Committee, and 12 to 2 in the International Relations Committee amendments were rejected that would have substituted the International Food Fund for the grain-reserve bills. The arguments against the fund are based on these considerations:

Unlike a grain reserve, a fund ensures only that money—not food—is available. Ample grain supplies are on hand for the near future, but a combination of poor weather, rapid population growth and increased consumption due to rising affluence could quickly put us back into a period of scarcity. According to the International Food Policy Research Institute, by 1985 (just 6½ years from now) the annual food deficit of the developing nations alone will increase from this

year's level of 36 million metric tons to at least 95 million metric tons.

A food fund has price impact at exactly the wrong time. Purchases would be made in the market only during times of limited grain supplies and high prices. And the U.S. consumer would bear the brunt of the price impact—a situation that could set the stage for embargoes and export restrictions that ultimately disrupt commercial sales and hurt U.S. producers.

Having a food fund does not ensure its use. The fund is similar to the authority the president already has through the Commodity Credit Corporation (CCC). During the 1974 food crisis, when supplies were tight and prices high, the Ford administration had approximately $10 billion in unused CCC authorizations it could have used to purchase grain for emergency relief purposes. But because of the potential price impact, the choice was made to not respond immediately. For similar political and economic reasons, a president is likely to choose not to enter the market with an emergency food fund when food is critically needed in the future.

Cost is an additional factor that works against the food-fund approach. There are potential cost advantages in that the fund earns interest when not in use, while a grain reserve entails annual charges, including those for storage and quality control. However, the price at which grain is acquired is the key determinant. A grain reserve is acquired when market prices are depressed, or at least not excessively high. But a food fund would be tapped only in critical situations when supplies are tight and prices escalating—as in the 1972–74 period when wheat prices initially doubled, then ultimately tripled. A mere doubling of current wheat prices would be $5.60. Even if the administration were to purchase for the reserve at the current price of $2.80 per bushel (a price they have indicated they are unlikely to purchase much above) and held the stocks for six years, the initial cost, plus annual carrying charges, would still be cheaper than the $5.60 minimum price at which a food fund would conceivably be tapped.

Food fund or grain reserve? Now it's up to House and Senate floor action in September to decide which approach they want to take. Before they do, they might reflect on House Agriculture Committee Chairman Thomas Foley's comment during consideration of the food fund: "People cannot eat dollars. Even less can they eat CCC credits." ●

## LIBYA WANTS BETTER RELATIONS AND MORE TRADE WITH THE UNITED STATES

### HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. SIKES. Mr. Speaker, during my committee trip to Europe, the Middle East, and Africa, I found that Libya wants better relations and more trade with the United States. The problem lies in an American embargo, and the Libyan practice, now discontinued, of offering asylum to hijackers. There also is opposition by Jewish leaders because of Libya's hard line against Israel.

Libyan leaders of ministerial rank with whom I conferred indicated their country wants to buy American commercial aircraft, trucks, and autos, and American farm equipment. They also want the benefit of American expertise in industrial and agricultural development. They are now supplied with Russian weapons, many of them sophisticated, which they claim they first tried to buy from the United States.

The matter is worthy of active consideration, further delays are nonproductive and can be harmful. An important first step would be an exchange of Ambassadors. We maintain full diplomatic relations with many nations that offer less.

Trade is important to the United States. We buy $4 billion in oil each year from Libya and they buy from us $400 million. It is estimated their purchases could increase to $1 billion. An improvement not to be overlooked.

The United States should weigh all these matters rather than hold to the position of no change toward Libya. This is a changing world and we do not distinguish ourselves by being slow to take advantage of new openings for better relations with other countries.●

## VA ANNOUNCES OLIN L. TEAGUE AWARD

### HON. RAY ROBERTS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. ROBERTS. Mr. Speaker, as we draw near adjournment of the 95th Congress, we are reminded that one of the finest Members who ever sat in this body will not be returning. My colleague and friend, "TIGER" TEAGUE has announced his retirement. Honors, deservedly, have begun to pour in on him from some of the millions of Americans whose lives bear the beneficial imprint of his service.

Few honors will please him more than one announced September 7, 1978, by the Veterans' Administration. It is described in an agency news release which is reprinted below:

OLIN E. TEAGUE AWARD

The Veterans' Administration today honored long-time Texas Congressman Olin E. Teague by establishing an annual award in his name to recognize agency employees for outstanding achievements in the rehabilitation of war-wounded veterans.

In announcing the award, VA chief Max Cleland said it was fitting that it should be named for Teague, "one of the most decorated combat-disabled soldiers of World War II and a tireless champion of legislation benefiting veterans."

Teague, an infantry battalion commander who suffered multiple wounds and was decorated eleven times for gallantry, served 18 years as chairman of the House Committee on Veterans Affairs.

Earlier this year, Teague became the one person outside the Veterans' Administration to receive the agency's Exceptional Service Award. The award is VA's highest commendation for an individual by the agency.

Cleland cited Teague for "his extraordinary contributions" to America's veterans.

"No person in the history of America has had such a saluatory effect on the lives of veterans and their families," Cleland said.

Teague's investigations of shortcomings in the World War II VA education assistance legislation led to his authorship of the Korean-era GI Bill and Cleland pointed out that "much of the veterans legislation that has been approved by Congress since World War II bears his imprint."

Rep. Teague has announced his retirement from Congress at the end of the current session.

In advising him of the award's establishment, Cleland told Teague that "of all the programs and activities of the VA, none is more meaningful, more challenging or more representative of the distinctive mission of the VA than the rehabilitation of war-injured veterans.

"During your illustrious 32 years of service in the Congress, there has been no more staunch ally of America's wounded veterans, and none who has worked more enthusiastically or with more effect in their behalf.

"I therefore deem it most appropriate that this high award bear your name as a lasting symbol of what you have done for those whose service to our nation has cost them so dearly."

The Teague Award will be made annually to the VA employee or team of employees whose accomplishments in the area of rehabilitation involve an outstanding improvement in the quality of life for war-injured veterans or contribute in an outstanding manner to their rehabilitation.

Cleland said eligibility for the award "encompasses the whole spectrum of VA personnel who have dealt with wounded veterans. This includes medical personnel, social scientists, vocational counselors, engineers and basic scientists.

"The accomplishment may be a development of a technique or concept that has in a most significant or direct way materially improved the veteran's ability to function as normally as the present state of the art of physical and psychological rehabilitation can offer," he said.●

## SHOULD WE HAVE MAP?

### HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. BEDELL. Mr. Speaker, during House consideration of the fiscal year 1979 Department of Defense appropriations bill last month, I brought to the attention of my colleagues the existence within that bill of nearly $100 million for research and development of a proposed alternate launchpoint system known as MAP (Multiple Aim Point). During the ensuing debate, questions were raised about the efficacy of MAP, and concern was expressed about the lack of knowledge about the potential ramifications of this project. As a result of an informal consensus that grew out of this discussion of the implications of the MAP R. & D. program, I am today introducing a resolution that expresses the sense of the House that the President appoint a high-level commission charged with making a thorough evaluation of the MAP concept and the advisability of its full-scale implementation. I would like to take this opportunity to elaborate briefly on the need for such a study.

Full-scale implementation of MAP would mean the excavation of thousands of vertical silos located primarily in the Western and Midwestern regions of the United States. In a manner akin to a giant "shell game," the 1,000-plus Minutemen (or proposed MX if ever developed) would be covertly shuttled from silo to silo at a ratio of 20 silos to 1 missile so as to prevent the Soviets from knowing the precise locations of our ICBM's. MAP's proponents argue that it

would deter the Soviets from launching a counterforce strike against our land-based ICBM force since they would have to guess as to which silo contained the real missile, therefore making it likely that a sufficient number of missiles would survive to inflict unacceptable damage on the Soviet Union's own populace and industry.

Of course, another possible scenario is that the Soviets would feel constrained to target every missile silo in the United States in order to be relatively assured of depriving us of our counterstrike capability. In that event, Gen. Lew Allen's characterization of MAP as a "great sponge" of targets that would serve to "absorb" the Soviet warheads could very well prove to be prophetic, a prospect which in itself should make any American living west of the Mississippi River dubious about the advisability of deploying such a system. It seems to me that the U.S. strategic objective should logically be to draw Soviet fire away from the U.S. land mass rather than upon it.

This is just the first of many questions that I feel need to be more carefully explored by an objective group of experts prior to congressional action on further implementation of the MAP concept. Other disturbing questions that come to mind include:

First. The cost and strategic utility of the program—is the $20 billion price tag a cost effective means of spending taxpayer dollars? And, might not the money be better spent by upgrading the remaining two-thirds of our nuclear TRIAD?

Second. The impact on arms reduction—how will a commitment to full-scale development of MAP affect the chances for a successful negotiation of the already-endangered SALT II treaty?

Third. The impact on U S. land patterns—how will MAP affect domestic land use patterns given the fact that the total land required for the project would be roughly equivalent to an area the size of the State of Connecticut?

Fourth. The security implications—what sorts of security measures will be required to protect the inviolability of the secret missile locations? And, are there reasonable assurances that the Soviets do not now have, or are not on the verge of having, the surveillance capability that would make MAP a $20 billion "white elephant?"

I am aware that military preparedness is both necessary and expensive. It is not necessarily the intent of this resolution to thwart the development of the MAP system, but only to obtain the necessary information so that Congress will be equipped to intelligently deal with the likely administration request for full-scale funding in the near future. It is my concern that, without the advance access to information that this resolution would provide, history will repeat itself and Congress will find itself inadequately prepared to deal with all the nuances of a major strategic system like MAP.

The resolution itself would have no binding effect on the President, but it would hopefully serve to catalyze an administration initiative to conduct a thorough study of the potential ramifications of MAP. I believe, Mr. Chairman, that my colleagues will agree that this is a reasonable request and one that may save us much in the way of time, money, and resources in the final analysis.

The text of the resolution follows:

H. CON. RES. —

Whereas recent developments with respect to changes in the U.S./Soviet strategic nuclear balance have resulted in a heightened interest in the survivability of U.S. land-based ICBMs; and

Whereas the military and defense establishment community has, as evidenced by strong statements of support from highly-placed officials within the Administration, expressed interest in the full-scale development of the so-called Multiple Aim Point System (MAP); and

Whereas there has been a significant absence of debate as to the advisability of a full-scale implementation of the MAP System and an alarming lack of opportunity for its review and the presentation of opposing viewpoints; and

Whereas funds have already been expended for the testing and development of the MAP program and additional funds have been appropriated for the coming fiscal year for such purposes. and

Whereas the MAP program would require the excavation of vertical silos located primarily west of the Mississippi River on the continental United States land mass and would require the equivalent of an area the size of the state of Connecticut; and

Whereas there are serious questions about the effects that such a proliferation of vertical silos would have on land use patterns, agricultural productivity, and the environment in this vital region; and

Whereas severe reservations have been expressed about the effect a U.S. commitment to the MAP concept might have on the successful negotiation of the current SALT treaty; and

Whereas the minimum cost estimates for MAP of $20 billion raise extension concerns about the opportunity costs it would involve in terms of other alternatives that would have to be foregone; and

Whereas it is the responsibility of Congress to keep itself fully abreast of developments such as the MAP program, the funding of which would carry with it profound implications for each and every American; Now, therefore, be it

*Resolved by the House of Representatives of the United States in Congress Assembled*, That it is the sense of Congress that the President of the United States establish a Presidential commission composed of experts on defensive weapons systems from both the military and civilian strategic communities and representatives of the general public, or, if he should deem it appropriate, any other similarly-composed body that is now already in existence, to compare the Multiple Aim Point System with alternative defensive weapons systems, taking into account the effect of each such defensive weapons system on national defensive, foreign policy, and the national budget, and domestic priorities, to evaluate the desirability of implementing the multiple aim point system, and to report its findings to the President and to the Congress.●

## PERSONAL EXPLANATION

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. LAGOMARSINO. Mr. Speaker, on Wednesday, September 6, 1978, I was not recorded on the first quorum call. I missed that vote due to the fact that TWA flight 88 from Los Angeles to Dulles, scheduled to arrive at Dulles Airport at 6 a.m., September 6, 1978, did not reached the airport until noon on that day.

The flight was delayed for 6 hours in Phoenix, Ariz., due to engine trouble.●

## ANDERSON ASKS FOR SUPPORT FOR AIRCRAFT/AIRPORT NOISE REDUCTION LEGISLATION

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. ANDERSON of California. Mr. Speaker, from time to time I have entered letters of support from among the wide spectrum of supporters of the Airport and Aircraft Noise Reduction bill, H.R. 8729. These have been for the most part letters from national associations or others representing large groups attesting to their strong sense of need and urgency. I have entered only a fraction of the support letters and wires received either by me or others who have called such letters to my attention. In an attempt to be helpful to my colleagues I have had a list prepared of such communications which I request be entered here. Regrettably it does not constitute a complete list of those we know to be in support based on telephone calls and other reports, and many letters probably will be received in the days immediately ahead; however, the list does indicate wide geographic spread from places large and small, and from business, labor, citizens, and local public officials.

Although I have not been able to personally contact each of you, my colleagues, and ask you personally for your support even though I am confident a majority of you already support the bill, I do ask you for your support and commend the list to you in addition to the mail you have individually received. The chances are good that your local airport operators, your local city officials, your local chambers of commerce, your local labor unions, your State officials, and those airlines which serve you, or to whom you are looking for service, have something at stake here. Several thousand small businesses across the country also have a concern. If your district is impacted by aircraft noise your citizens know full well that they have very, very much at stake. But the general public, who will be involved in supporting this with their tax dollars, and especially the traveling public which depends on good and unrestricted air commerce, also have much at stake. Your support is needed. There is no better time.

The list follows:

SOME SUPPORTERS OF AIRCRAFT/AIRPORT NOISE REDUCTION LEGISLATION

International Association of Machinists and Aerospace Workers.

U.S. Conference of Mayors.

West Palm Beach, Florida, Chamber of Commerce.

Buffalo Area Chamber of Commerce.

St. Paul Area Chamber of Commerce.

Coraopolis, Pennsylvania, Chamber of Commerce.
Dayton Area Chamber of Commerce.
Phoenix Metropolitan Chamber of Commerce.
Chicago Association of Commerce and Industry.
Chamber of Commerce of Hawaii.
Matoon, Illinois, Association of Commerce.
New Jersey State Assembly.
New Jersey State Chamber of Commerce.
Mt. Vernon, Illinois, Airport Authority.
San Diego City Council.
Tucson Airport Authority.
Tulsa Airport Authority.
City of Rochester, Minnesota, and Rochester Airport Authority.
Salt Lake City, Mayor's Office.
Columbia Chamber of Commerce.
Clarksville, Tennessee, Chamber of Commerce.
Greater Hartford Chamber of Commerce.
Greater Providence, Rhode Island, Chamber of Commerce.
Newark Chamber of Commerce.
Empire State (New York) Chamber of Commerce.
Illinois Public Airports Association.
Long Island MacArthur Airport.
Los Angeles Area Chamber of Commerce.
Indianapolis Airport Authority.
Air Line Pilots Association.
Dade County Aviation Department (Miami International)
Hillsborough County Aviation Authority (Tampa)
Port of New York and New Jersey Authority.
Airport Operators Council International.
American Association of Airport Executives.
Metropolitan Airports Commission of Minneapolis/St. Paul.
Minneapolis Chamber of Commerce.
Tucson Chamber of Commerce.
Scottsdale, Arizona, Chamber of Commerce.
Governor of South Dakota.
Tennessee Division of Aeronautics.
Tri-City Airport Commission, Bristol, Tennessee.
Nashville Metropolitan Airport Authority.
Greater Lakewood, California, Chamber of Commerce.
California Director of Transportation.
National League of Cities.
Los Angeles County Federation of Labor.
Mayor of San Francisco.
San Francisco Airport Commission.
Pan Am Pilots Master Executive Council.
Mayor of Los Angeles.
Los Angeles Department of Airports.
Douglas Aircraft.
Los Angeles City Council.
City of Long Beach, California.
Rohr Industries.
Southern California Association of Governments.
Greater Boston Chamber of Commerce.
Wayne County Road Commission (Detroit Metropolitan Airport).
Greater Boston C. of C.
McDonnell-Douglas Corp.
Little Rock Municipal Airport Commission.
ALTA (Association of Local Transport Airlines).
Greater Detroit Chamber of Commerce.
Maine State Chamber of Commerce.
San Francisco Chamber of Commerce.
Massachusetts Port Authority (Logan Airport-Boston).
New England Council, Inc.
Mayor of Peoria, Ill.
City manager, Sioux Falls, S.Dak.
City manager, Pierre, S.Dak.
Rapid City, S.Dak. Chamber of Commerce.
Western South Dakota Development Co.
Marathon Battery Company, Waco. Tx.
Lockheed Aircraft Service Company, Ontario, Ca.
Ladish Co., Cudahy, Wis.
Shaw Aero Devices, Inc., East Hampton, N.Y.
Kirklid Rubber Co., Brea, Ca.
Marine Lumber Co., Tigard, Oregon.
Protection Systems Division, Ashland, Mass.
Narmco Materials, Inc., Costa Mesa, Ca.
Fairchild Industrial Products Division, Fairchild Camera and Instrument Corp., Commark, N.Y.
Consolidated Controls Corp., El Segundo, Ca.
American Sign/Indicator Corp., Spokane, Wash.
Litton Fastening Systems, Lakewood, Ca.
Port of Seattle, Seattle, Wash.
Nordskog Industries, Inc., Van Nuys, Ca.
Bendix Energy Controls Division, South Bend, Ind.
SSP Products, Inc., Burbank Ca.
Orcon Corp., Union City, Ca.
LeFiell Manufacturers, Santa Fe Springs, Ca.
American Avitron, Division of Lear Siegler, Inc., Rye, N.Y.
Radar Electric Co., Inc., Seattle, Wash.
Griggs Equipment, Inc., Belton, Tx.
Aerospace and Industrial Products Division, SPS Technologies, Inc., Jenkintown, Pa.
Bendix Corp., Davenport, Iowa.
Davis Industrial Products Co., Portland, Ore.
Sperry Flight Systems, Phoenix, Arizona.
Sperry Rand Corp., Phoenix, Az.
Plessey Dynamics Division, Plessey Industries, Inc., Hillside, N.J.
Smith Industries, Inc., Clearwater, Fla.
Star Machinery Co., Seattle, Portland & Spokane, Wash.
AFL–CIO.
Air Transport Association.●

## FURTHER UNDERLYING CURRENTS OF PROPOSITION 13

### HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. BROWN of California. Mr. Speaker, we in Congress have often discussed the possible meanings of the recent passage of Proposition 13. I believe the the initiative was partially a criticism of the decisionmaking process in our society. I would like to discuss this point here further today.
